**WHEREAS**, this petition was granted by the board at its meeting, May 25, 1926, on certain conditions and petitioner requests a modification of these conditions as to the use of metal-covered frames instead of all metal.

**Resolved**, that the board of standards and appeals does hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted only so far as it affects the openings on the street front of the two (2) lower stories on condition that all openings shall be equipped with frames and sashes complying with the labor law glazed with 1/4 inch polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

## APPLIANCES SUBMITTED FOR APPROVAL.

534-26-SA.  
**PETITIONER**—Socony Burner Corporation.  
**SUBJECT**—Socony Industrial Type "A" Burner, approval of.

## APPEARANCES—

For Petitioner: J. J. Cosgrove.  
**ACTION OF BOARD**—Petition placed on reserve calendar pending inspection of committee of the board.

560-26-SA.  
**PETITIONER**—N. Y. Franklin Oil Burners, Inc.  
**SUBJECT**—Franklin Domestic Oil Burner, approval of.

## APPEARANCES—

For Petitioner: Lindley Vinton.  
**ACTION OF BOARD**—Petition placed on reserve calendar pending inspection by committee of board.

443-26-SA.  
**PETITIONER**—American Schaeffer and Budenberg Corporation.  
**SUBJECT**—Approval of American Anti-Syphon Fuel Oil Valve.

# MINUTES

APPEARANCES—None.

ACTION OF BOARD—Petition withdrawn on written request of petitioner.

THE VOTE TO WITHDRAW—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin .....	5
Negative .....	0
Absent .....	0

1191-24-SA.

PETITIONER—Socony Burner Corp.

SUBJECT—Application for reopening, amendment of resolution, re approval of Socony Arrow Oil Burner Pump and Fan Set with vacuum tank, etc.

APPEARANCES—

For Petitioner: J. J. Cosgrove.

ACTION OF BOARD—Petition withdrawn on request of petitioner's representative, burner being of a type approved by the board.

THE VOTE TO WITHDRAW—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin .....	5
Negative .....	0
Absent .....	0

846-25-SA.

PETITIONER—William F. Regan.

SUBJECT—Application for reopening, amendment of resolution, re approval of KFC Fuel Oil Burner.

APPEARANCES—

For Petitioner: William F. Regan.

ACTION OF BOARD—Petition reopened and resolution amended.

THE VOTE TO REOPEN AND AMEND—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(846-25-SA)

WHEREAS, William F. Regan, filed, August 20, 1925, a petition with the board of standards and appeals for approval of the device known as the K. F. C. Burner; and

WHEREAS, a committee of the board visited the premises, 96 82nd street, Brooklyn, and inspected the K. F. C. Burner in operation; and

WHEREAS, the board approved the burner April 27, 1926, for use with grade B fuel oil in domestic installations and

petitioner requests the approval of the burner for use with grade A oil; and

WHEREAS, the burner is constructed so as to burn either grade A or grade B fuel oil.

Resolved, that the board of standards and appeals do hereby approve the K. F. C. Fuel Oil Burner for use with grade A and grade B oil in domestic installations on condition that the fuel oil burning equipment be installed and maintained in accordance with the fuel oil rules of the board of standards and appeals.

939-24-SA.

PETITIONER—Ballard Interstate Company, owner.

SUBJECT—Application for reopening, modification of resolution, re approval of the Ballard Super Domestic Oil Burner.

APPEARANCES—None.

ACTION OF BOARD—Petition reopened and resolution modified.

THE VOTE TO REOPEN AND MODIFY—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(939-24-SA)

WHEREAS, the Ballard Oil Equipment Company on July 10, 1924, a petition with the board of standards and appeals for approval of their device known as the Ballard Super Domestic Oil Burner; and

WHEREAS, a committee of the board visited the premises, 285 Flatbush avenue extension, Brooklyn, and inspected the oil burner in operation, and

WHEREAS, the board, April 27, 1926, approved the burner for use with grade "B" fuel oil in domestic installations and petitioner now requests that the burner be approved for use with grade "A" fuel oil in domestic and commercial installations for which use and operation the burner is fitted.

Resolved, that the board of standards and appeals do hereby approve the device known as the Ballard Super Domestic Oil Burner for use with grade "A" and grade "B" fuel oil in domestic and commercial installations on condition that the fuel oil burning equipment be installed and maintained in accordance with the fuel oil rules of the board of standards and appeals and that the trip switch controls be made accessible and placed outside the ash pit of furnace.

Adjourned 5:10 P. M.

WILLIAM J. O'GORMAN, Secretary

## CONCRETE RULES

### USE OF HYDRATED LIME IN CONCRETE.

Adopted by the Board of Standards and Appeals, April 19, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated for each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

# RULES

## ELEVATOR RULES

RULES FOR THE CONSTRUCTION, MAINTENANCE AND OPERATION OF ELEVATORS,  
ADOPTED JULY 30, 1918, BY THE BOARD OF STANDARDS AND APPEALS, EFFECTIVE  
AUGUST 26, 1918; REVISED MAY 13, 1919.

**Rule 1. Application of Elevator Rules.** Every elevator, escalator, freight conveyor or amusement device, within the City of New York, in addition to conforming with all provisions of the labor law, building code or other laws or ordinances, as are applicable thereto, shall comply with the requirements of these rules. Existing and future installations shall at all times be maintained by the owner in a safe condition and in conformity with the requirements of these rules.

**Rule 2. Definitions Relating to Elevators.**

(a) The terms "elevator," "passenger elevator," "freight elevator" and "amusement device" shall have the meanings indicated in §560 of the building code.

(b) The term "dumbwaiter" shall apply to such special form of freight elevator, whether power driven or manually operated, the dimensions of which do not exceed nine square feet in horizontal section nor four feet height.

(c) The term "hand power elevator" shall apply to all forms of passenger or freight elevators which are manually operated and the dimensions of which exceed nine square feet in horizontal section.

(d) The term "sidewalk type elevator" shall apply to such special form of freight elevator, either power driven or manually operated, the platform of which does not exceed fifty (50) square feet in area and is suspended and supported at one or more points on the underside.

(e) The term "escalator" shall apply to a moving continuous inclined stairway or runway designed for elevating or lowering passengers.

(f) The term "freight conveyor" shall apply to a device for elevating or lowering freight in a vertical or inclined direction on a continuous moving carrier without the aid of an operator thereon.

(g) The term "future installations" shall apply to elevators, machinery or equipment used in connection therewith, installed after these rules become effective.

(h) The term "existing installations" shall apply to elevators, machinery or equipment used in connection therewith, either already installed, in process of installation, or for which plans are on file with the superintendent of buildings prior to August 26, 1918.

The term "alteration" shall include any essential change to the elevator car, counterweights, rails, machinery, safeties or other equipment or direct motive power; except that any repair work made necessary by the ordinary operation of the elevator shall not be deemed an alteration.

The term "power driven elevator" shall apply to all forms of elevator except those operated by hand power, whether in both directions, or through friction grip on the rope.

**Rule 3. Permits.** The application required by §562, building code, for the installation or alteration of elevators, amusement devices, etc., shall be in triplicate on forms furnished by the superintendent of buildings, and shall state the size, manner of construction, speed, capacity, and essentials, and mode of operation of the same, and be accompanied by necessary drawings; except that applications for the installation of dumbwaiters, and conveyors may consist of a notice to the superintendent of buildings that such installation is to be made.

**Rule 4. Alterations.** In making alterations to existing installations, the parts changed or altered must conform in every respect to the rules governing future installations, and where parts of the elevator are damaged from use, the damaged parts must be completely re-

newed, at the discretion of the superintendent of buildings.

Where hand power elevators are changed to power-driven elevators, they shall conform to every rule governing power-driven elevators, except, that when the rise is not more than thirty-five feet and the capacity is not increased, existing wood guide rails may remain in use. In such conversions the use of a power-driven friction grip device is prohibited when the capacity exceeds 800 pounds.

**Rule 5. Change of Classification.** In future, no freight elevator shall be used for passenger service, unless such elevator conforms to the rules governing future installations of passenger elevators in so far as they relate to safety equipment, hoist ropes, carrying capacity, car enclosure, including gates and emergency exit, shaft openings and doors, and motive power.

In existing installations where such change of classification is made and the hatchway is unenclosed, a substantial enclosure of lawful partitions extending from floor to ceiling and flush with the hatchway shall be constructed, with all openings protected by proper shaft doors.

**Rule 6. Tests of New Elevators.** In future installations all elevators shall be tested as follows:

The cars of all power-driven elevators shall be loaded to their maximum carrying capacity and operated up and down the shaft several times to test the lifting capacity of the machinery and the operation of the upper and lower automatic limit devices. The car shall be stopped at various levels in the shaft to test the operation of the machine brake.

The cars of all power-driven elevators having speeds exceeding one hundred (100) feet per minute, and of hand-power elevators with a rise of more than fifteen (15) feet, shall be loaded to their maximum carrying capacity, run to the top landing and made to travel downward beyond normal speed, so as to automatically operate the speed retarder or speed governor and car safety device and the slack rope device when required, and (except for hand-power elevators) to stop the machine. This rule shall not be construed, however, to require safe lift elevators to be tested with safe lift load.

The cars of power-driven elevators having speeds of one hundred (100) feet per minute or less shall be loaded to their maximum carrying capacity, run to the top landing and started down at normal speed. At this speed the governor shall be manually operated to test the action of the safety equipment.

**Rule 7. Carrying Capacity.** In existing installations the owner, lessee or other person having charge or control of any elevator, except a dumbwaiter, and in future installations the manufacturer of any such elevator, shall cause to be fastened in a conspicuous place in the car of said elevator a metal plate, having suitable letters and figures on same, which shall designate the number of pounds weight which said elevator can safely carry.

Future installations shall be designed to sustain in all their parts a load per square foot of platform area inside the car of not less than the following:

- (a) 75 pounds for power-driven passenger elevators;
- (b) 50 pounds for power-driven freight elevators having platform areas not exceeding 100 square feet;
- (c) 50 pounds for hand-power passenger elevators.

**Rule 8. Rules to be Posted.** In the car of every passenger elevator the superintendent of buildings shall cause to be posted and maintained, in a conspicuous place, for the guidance and information of operators and passengers, such of the rules relating to the oper-

# RULES

ation of elevators as he may deem necessary to insure public safety, including the number of passengers that such car may carry at one time.

**Rule 9. Full Automatic Push Button Elevators.** In future installations full automatic push button elevators must be so designed and equipped that the car, at its rated speed and load, will automatically stop when the car floor is level with or not more than three inches from the designated landing floor.

The car gate and shaft doors shall be equipped with approved devices that will prevent the operation of the car until the car gate is closed and the shaft door is closed and locked. The shaft door shall not be capable of being opened unless the floor of the car is within three inches of the landing. A push button to operate an alarm bell shall be provided in the car, for the purpose of notifying the person in charge of the premises, in case the car becomes stopped in the shaft from any cause. The shaft doors shall be so arranged that they cannot be opened after the car leaves the landing, except in emergency cases, and then only by a special key which must be provided and kept in the possession of the person having charge of the building.

**Rule 10. Belt or Chain Drives.** In future installations no hoisting machine driven by a chain or belt device from a motor or countershaft shall be used in connection with any passenger elevator.

**Rule 11. Shaft Openings.** In shafts hereafter constructed for passenger elevators, no more than one opening shall be allowed in each story, and all openings in the several stories shall be located one above the other, except that doors may be located on opposite or adjacent sides in the several stories when the distance from the car operating device to the door lock does not exceed forty-eight inches and can at all times be fully controlled by the elevator operator without leaving the car operating device. Door openings may be located on opposite or on adjacent sides of the shaft in the first or main entrance story and in the top story, provided that the openings in the remaining stories are all on the same side of the shaft, that a satisfactory device is installed preventing the operation of the car while the car gate distant from the operator is open, that an attendant is always present to control the shaft doors located in the first or top stories, and that there are no offsets or recesses on the inside of the shaft walls.

No alteration not in compliance with the above provision shall be made to any existing passenger elevator shaft.

**Rule 12. Hoistway Enclosure.** In the existing and future installations where no enclosure of solid partitions is required around the hoistway by the provisions of the building code, labor law or these rules, there shall be provided a substantial vertical enclosure extending from the floor for a distance of not less than six (6) feet on the side or sides where there are no openings in the car for loading purposes. On all other sides, gates or doors must be provided. Such enclosure may be constructed of mesh work, grille work or slatted partitions, provided that when mesh work is used it shall be of not less than No. 10 U. S. gauge wire or No. 13 U. S. gauge expanded metal, with mesh not exceeding one and one-half (1½) inches; when grille work is used there shall be not more than one and one-half (1½) inches space between any two members, except that where plain straight bars, not filled in with scroll, are used, there shall be not more than one (1) inch space between members; when wood slats are used they shall be not less than three-eighths (¾) of an inch thick, spaced not more than one (1) inch between slats.

In all cases where existing grille work permitted by law or regulation as a shaft enclosure is altered, such

alteration shall be of substantial material and construction, properly braced and carried the full height of the shaft, with not more than one and one-half inch space between any two members; except that where straight bars, not filled in with scroll work, are used there shall be not more than one inch between members. Where deemed necessary, existing grille work with spaces exceeding those specified in this rule shall be made safe by suitable screen or wire mesh, or glass construction.

**Rule 13. Shaft Doors.** In existing and future installations all gates or doors leading to any shaft in which power-driven passenger elevators are operated (except full automatic push button elevators) shall be locked, bolted or securely fastened on the shaft side. Such shaft doors or gates shall be closed by the operator before the car is put in motion.

In future installations of passenger elevators, keys for opening the shaft doors or gates from the outside of the shaft, in case of emergency, shall be provided and shall be restricted in use to persons in responsible charge of the building.

In existing and future installations in factory buildings only, the openings in every passenger or freight elevator shaft or hoistway enclosure shall be protected in one of the following manners:

- (a) by properly constructed sliding doors;
- (b) by combination slide and swing doors;
- (c) by hinged or swinging doors equipped with approved devices to insure the shaft doors being closed and locked before the car can start from the landing;
- (d) by hinged or swinging doors, either manually operated or self-closing, with auxiliary gates not less than five (5) feet six (6) inches in height, substantially constructed of wood or metal, with not more than two (2) inches space between any two parallel members, and the bottom of the gate not more than ten (10) inches from the floor, except at the top and bottom landings when the distance from the floor to the bottom of the gate may be increased to give required head room, and shall close automatically upon the car leaving the landing in either direction; except that for hand power elevators having the pull rope located in front of the shaft entrance, gates may be two (2) feet six (6) inches in height.

When shaft doors are equipped with electric locking or other locking devices, an approved emergency release shall be provided on the car within easy reach of the operator.

**Rule 14. Car Gates.** In existing and future installations, all entrances to the cars of power-driven passenger elevators shall be provided with substantial folding or sliding gates or doors, and where floor tracks are used the same must be kept level with the finished floor surface of the car. All folding gates over three feet wide at the entrance to shaft or car shall have top and bottom rails spaced not more than eighteen inches on centers when the gates are fully expanded. All car gates shall be closed by the operator before the car is put in motion.

In future installations passenger elevator car gates shall be equipped with an approved device or devices that will prevent the operation of the car while the car gates are open, and an approved emergency release shall be provided on the car within easy reach of the operator.

**Rule 15. Counterweights.** In future installations counterweights shall have their sections securely bolted together with one or more rods, as determined by the engineer in charge of buildings. Such rods must pass through the sub-weights and at least one portion of the frame. No continuous forged straps shall be permitted.

In existing and future installations where counterweights run in the same shaft as the car, they shall, when

# RULES

permost position, be protected on all exposed sides the full length of the counterweight with substantial and properly curved shields of iron or steel not less than No. 16 U. S. gauge; except that for plunger or fixed stroke piston hydraulic or traction type elevators no top shield shall be required. Where no compensating chains or ropes are attached to the counterweight, similar shields shall be provided eighteen inches above the bottom of the counterweight runway and extending upwards at least five feet. In existing installations, where the clearance between car and counterweight is not more than one and one-half inches, neither top nor bottom shields shall be required, but in lieu thereof full-tale metal chains not less than five feet long, spaced not more than six (6) inches on centres from rail to rail, shall be suspended from the bottom of the counterweight.

**Rule 16. Speed Governors.** All power-driven elevators with a rise of more than fifteen feet not already equipped with a speed governor and safety (except sidewalk type elevators and existing freight elevators in buildings not exceeding five stories in height and direct plunger elevators) shall have at the top of the elevator shaft a governor properly connected to a safety device attached to the underside of the car platform, in such manner that the car shall be brought to rest with an easy and gradual stop, or in a distance not greater than nine feet at a speed of seven hundred feet per minute, provided that on elevators having a speed of one hundred feet per minute or less, safeties of the instantaneous type may be used. Every governor operating car safety shall be set to trip the safety at a speed not exceeding forty per cent above the rated speed given in the application, but in no case exceeding eight hundred and fifty feet per minute; but this shall not require any governor to trip the safety at a speed less than one hundred and fifty feet per minute. When a speed governor has been set at the rated speed it shall be sealed. When safeties of the instantaneous type are used, a proper flexible means of application must be interposed between the safety and governor.

**Rule 17. Limit Devices.** In future installations all power-driven elevators shall have approved limit devices as follows:

- a) for Drum Type Electric Elevators, except sidewalk type elevators with speeds not exceeding seventy-five (75) feet per minute, limit switches on the machine in the shaft or on the car;
- b) for Traction Type Electric Elevators, limit switches on the shaft or on the car;
- c) for Electric Drum Sidewalk Type Elevators, with speeds not exceeding seventy-five (75) feet per minute, machine automatics will be required but stopping devices on the operating rope will be accepted in lieu of limit switches in the shaft or on the car;
- d) for Hydraulic Elevators, with speeds not exceeding one hundred and fifty (150) feet per minute, stopping devices on the operating rope;
- e) for Hydraulic Elevators, with speeds exceeding one hundred and fifty (150) feet per minute, limit devices on the machine;
- f) for Lever or Crank-Operated Hydraulic Elevators, limit devices on the machine.

**Rule 18. Elevator Brake.** In future installations every electric elevator shall be equipped with an electric electro-mechanical brake that will bring the car to rest when the car operating device is brought to the stop position or when any of the electric safety devices operate. When the elevator is driven by a belt from an electric motor, the brake must be arranged to operate should the belt break or leave the pulleys.

**Rule 19. Operating Device.** In future installations every elevator driven by electric power and operated by hand rope, lever, wheel or other non-self-centering device, shall be provided with an approved device preventing the

operation of the car, after the interruption of the current, until the operating device has been first returned to the inoperative position, and electric car operating switches shall be self-centering and self-locking in the inoperative position.

**Rule 20. Reverse Phase Relays.** In future installations every elevator motor operated by polyphase alternating electric current shall be equipped with a reverse phase relay.

**Rule 21. Slack Rope Device.** In future installations all power-driven elevators, including power-driven sidewalk elevators, operated by drum hoisting machines, shall have approved automatic slack rope devices that will stop the machine if, from any cause, any car hoisting rope or chain attached to the drum becomes slack.

**Rule 22. Car Locking Device.** No elevator shall be used for the carrying of safes or other material of a greater weight than the normal lifting power of such elevator, unless the machine is provided with special equipment and the car is equipped with an approved locking device which will hold it at any landing, independent of the hoisting ropes while such safe or other material is being loaded or unloaded.

**Rule 23. Hand-Power Elevator Safety Devices.** In future installations every hand-power elevator (except sidewalk type elevators) with a rise of more than fifteen feet, shall be equipped with an approved safety device that will immediately stop and hold the car with a full load if the rope breaks, and with an approved automatic speed retarder and a hand-operated brake operating in both directions.

Grip hoists and elevators operated by gravity in both directions shall comply with the requirements for hand power elevators.

**Rule 24. Escalators.** In future, every escalator installed shall be equipped with an approved safety device to prevent any accidental downward reversal and with an approved stopping device.

**Rule 25. Car Construction.** In future installations the car and car frame of every power-driven elevator and of every hand-power elevator with a rise of more than thirty-five (35) feet shall be of incombustible materials; except that the platform may be of wood covered on the underside with incombustible materials. The car enclosure and flooring may be of hard wood. The car, car frame and enclosure of every hand-power elevator with a rise of thirty-five (35) feet or less may be constructed of wood.

**Rule 26. Passenger Car Enclosures.** In existing and future installations every passenger elevator car shall be fully enclosed on all sides not used for loading or unloading, and on the top, with substantial construction.

In future installations where grille work is used for the car enclosure, including the top, it shall be constructed with not more than one and one-half inch space between any two members; except that where straight bars not filled in with scroll work are used there shall be not more than one inch space between members. When the clearance between car and counterweight is less than two (2) inches, that part of the car enclosure opposite the counterweight runway shall be of solid construction or screened with not more than one-half ( $\frac{1}{2}$ ) inch mesh of not lighter than No. 16 U. S. gauge wire, to a height of not less than six (6) feet six (6) inches.

In existing installations in factory buildings only, where the spaces exceed those specified for future installations, it shall be deemed satisfactory if the grille work is made safe by suitable screen or wire mesh fastened to the car enclosure.

**Rule 27. Emergency Exit.** In future installations every power-driven passenger elevator car shall have a trap

# RULES

door in the top, of such a size as to afford easy egress for passengers, but not less than sixteen inches in least dimension nor less than four hundred square inches in area. When there is more than one elevator in a shaft and the vertical distance between any two consecutive shaft door openings exceeds thirty (30) feet, there shall be provided in addition to the trap door an emergency side exit to the adjacent car.

In existing installations not already provided with an emergency exit, a trap door as specified for future installations shall be provided; except that when the cross head or car top construction renders it impracticable to provide such trap door, this requirement may be waived by the superintendent of buildings, if egress, in case of emergency, is possible through shaft openings, or to an adjacent car.

**Rule 28. Freight Car Enclosure.** In existing and future installations in factory buildings only, every freight elevator car shall be enclosed on all sides not used for loading or unloading, with substantial construction, to a height of five (5) feet six (6) inches, or to the cross head, when this is less than five (5) feet six (6) inches above the car platform.

In future installations, where an enclosure of open construction is used, the space between any two parallel members shall not exceed one inch.

**Rule 29. Freight Elevator Cover.** In existing and future installations in factory buildings only, every freight elevator car shall be provided with a substantial cover or grating constructed of not less than No. 8 U. S. gauge wire or its equivalent in strength, and of a mesh that will reject a one and one-half (1½) inch diameter ball. Sections of the cover or grating may be arranged to swing upward for handling long material, but such cover or grating shall be closed at all other times. In covers hereafter installed (except where car gates are provided) that part of the cover facing the entrances to the hoistway, extending the full width of the car, shall be hinged on a line not less than eight (8) inches nor more than twelve (12) inches back from the edge of the landing, and the hinged section shall be self-closing.

**Rule 30. Space Between Saddles and Car.** In future installations there shall be not more than one and one-quarter inch, nor less than three-quarters of an inch space between the floor of the car and the floor saddles, and where the saddles project into the shaft the same shall be properly bevelled on the underside at an angle of not less than sixty degrees to the horizontal.

**Rule 31. Lights.** In existing and future installations the cars of all elevators shall be properly lighted at all times when in service.

**Rule 32. Guide Rails.** In future installations, guide rails for both car and counterweights of all elevators (except dumbwaiters, and hand-power elevators with a rise of thirty-five feet or less) shall be of iron or steel. They shall be fastened to the sides of the shaft with wrought or cast iron brackets of such strength and design and so spaced that the guide rails and their fastenings shall be able to safely withstand the application of the safety when stopping a fully loaded car under test. For elevators requiring safeties, the guiding surfaces of the car guides shall be finished smooth and joints shall be tongued and grooved or dowelled, and rails shall extend to the level of or above the overhead beams and shall be bottomed on a suitable support.

The weights of steel or iron guide rails shall be not less than given in the following table:

## WEIGHT OF GUIDE RAILS PER LINEAL FOOT.

Total Weight of Car and Live Load, or Weight of Counterweight	Weight of Car Guide Rails		Weight of Counterweight Guide Rails	
	With Guide Rail Safeties.	Without Guide Rail Safeties.	With Guide Rail Safeties.	Without Guide Rail Safeties.
0-4000 lbs. ....	7½	7½	7½	6½
4001-15000 " ....	14	14	14	7½
15001-40000 " ....	30	30	30	7½

**Rule 33. Ropes.** In future installations, all elevators (except dumbwaiters) shall have not less than two ropes independently connected to the car and to each of counterweights. In drum type machines, the lift and counterweight ropes shall have at least one turn of the rope on the drum when they have reached the limit of travel. Every rope hereafter used shall have a factor of safety of not less than six for freight elevators, and not less than eight for passenger elevators. The diameter of any hoist or counterweight rope hereafter installed (except for hand-power elevators and sidewalk type elevators) shall be not less than one-fortieth (1/40) of the diameter of any shaft or drum over which it passes. All ropes used in operation of elevators shall be of steel, iron or malleable covered steel. Ropes of other material than metal may be used as hand ropes and brake ropes in hand power elevators or as centering ropes in power driven elevators with independent rope control. Where overhead machines are used, equalizing arms will be permitted on the car and counterweight. Nothing in this rule shall prohibit the use of chains in sidewalk elevators instead of ropes.

**Rule 34. Auxiliary Freight Compartments.** In future installations no elevator shall be permitted to have attached above, below or on the side of the car a freight compartment or similar device.

In existing installations, entrances to freight compartments shall be protected by folding gates, as required for passenger elevators, and so arranged that the elevator shall not be operated until the gate is closed.

**Rule 35. Overhead Gratings.** In every elevator shaft (except existing elevator shafts, dumbwaiter shafts or shafts of sidewalk elevators outside the building line) immediately under the sheaves at the top of the shaft, or where the machine is located at the top of the shaft, at the level of the top of the machine beams, there shall be provided a substantial grating of iron or steel capable of sustaining not less than seventy-five pounds per square foot. No two members of such grating shall be spaced more than one and one-half inches apart. When such grating does not extend over the entire area of the shaft, the open spaces shall be protected by substantial screened railings not less than three feet high. Every such grating shall extend at least two and one-half feet beyond the general contour of the sheaves or machinery. Deflecting sheaves extending below the machine level, or hoist and counterweight sheaves located at the sides of the shaft, shall be protected by guides or cradles of a construction similar to that required for the gratings. Fireproof floor construction shall be accepted as the equivalent of the grating.

Nothing in this rule shall prevent the placing of a door in such a grating where other suitable access can be had.

Any grating hereafter placed in an existing elevator shaft shall conform to the requirements of this rule.

**Rule 36. Elevator Pit.** In every elevator shaft hereafter constructed (except shafts for dumbwaiters, hand-power elevators and for hand-power elevators with a rise of less than thirty-five feet), the distance from the floor saddle of the lowest landing to the bottom of the pit shall not be less than four feet when the speed does not exceed two hundred and fifty feet per minute, not less than five feet when the speed exceeds two hundred and fifty feet per minute, and not less than six feet when the speed exceeds four hundred feet per minute, and in no case shall there be less than two feet in clear between the bottom of the pit and the lowest point of the underside of the car floor framing when the car is at its lowest possible position. In the case of power-driven

# RULES

side type elevators, the clear space between the bottom of pit and underside of the car floor structure shall be not less than six inches. The pits herein required at the bottom of elevator shafts shall not be used for piping, machinery, or any purpose not required for the elevator equipment; this shall not prevent the encroachment upon such pits, in the case of new elevators installed in existing buildings, the foundations of bearing walls and columns to an extent not exceeding twenty-five per cent of the area of pit.

**Rule 37. Overhead Clearance for Cars.** For all elevator shafts hereafter installed (except shafts for sidewalk elevators) there shall be provided a sufficient clear space, when the car is at the top landing, to allow a run-by of not less than two feet for elevators having a speed not exceeding one hundred feet per minute, not less than three feet for elevators having a speed exceeding one hundred feet per minute and not exceeding three hundred and fifty feet per minute, not less than five feet for elevators having a speed exceeding three hundred and fifty feet per minute.

**Rule 38. Overhead Clearance for Counterweights.** In future installations there shall be provided in all elevator shafts a sufficient clear space when the car has completely compressed the pit buffers to allow of a run-by of counterweight of not less than two (2) feet for traction hydraulic type elevators, and not less than three (3) feet for drum type elevators.

**Rule 39. Machinery Room.** All parts of the elevator machinery for power-driven elevators shall be properly protected, and suitable light provided. In buildings hereafter erected free and safe access must be provided to all parts of elevator machinery, and there shall be not less than thirty (12) inches clearance at limit stop devices on main and outboard bearings of motor. In future installations in existing buildings, such clearance shall be provided as

deemed necessary by the superintendent of buildings, but need not exceed that specified for buildings hereafter erected. When the machine is located at the bottom of the shaft, it shall be protected with a substantial pit pan.

**Rule 40. Speed.** The speed of all power-driven elevators shall not exceed seven hundred feet per minute.

**Rule 41. Buffers.** In future installations for all power-driven elevators (except sidewalk type elevators) there shall be provided substantial spring buffers, pneumatic buffers, or oil buffers for the car and counterweights provided that for the cars and counterweights of all elevators having speeds of more than three hundred and fifty feet per minute, substantial oil buffers shall be installed.

**Rule 42. Supporting Beams.** Supporting beams hereafter installed for elevator sheaves or machinery (except in dumbwaiter shafts) shall be of iron or steel.

**Rule 43. Determination of Questions.** When any existing installation for either passenger or freight service is deemed by the Superintendent of Buildings to be in an unsafe or dangerous condition it shall be made safe in such manner as he shall prescribe, and all defective parts necessary of replacement shall conform, in so far as possible, with the rules governing future installations.

Where there are practical difficulties in the way of carrying out the strict letter of the foregoing rules, the Superintendent of Buildings shall have power to vary their provisions so that the spirit of the law shall be observed and public safety secured and substantial justice done, provided that whenever such variations are granted by a superintendent of buildings it shall be indorsed in writing upon the permit over the signature of such superintendent.

# RULES

## COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS.

*Resolved Resolution Adopted by the Board of Appeals, March 16, 1920, Under Cal. No. 549-17-BZ.*

WHEREAS, the board of appeals, at its regular meeting December 16, 1919, unanimously rescinded an opinion previously expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a permitted use in a business district under the building zone resolution. The board unanimously rescinded this expressed opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed

under the building zone resolution in the absence of any definition therein to the contrary.

*Resolved,* that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First,* That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second,* That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third,* That no plea of ignorance of the date of the

hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth,* That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth,* That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays, 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

### CONTENTS

This issue of the Bulletin contains, in the order given—

Notice of Postponement.

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Special Meeting, October 1, 1926, at 10 a. m.

Minutes of Regular Meeting, October 5, 1926, at 10 a. m.

Minutes of Regular Meeting, October 5, 1926, at 2 p. m.

Rules.

Progress Report.

### PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Wednesday, October 13, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, October 19, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman

at 10 a. m., on request of appellant's represen-  
tative.

400-26-A.

APPELLANT—H. C. F. Koch & Co., inc., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—130-136 West 124th street,  
Manhattan.

APPEARANCES—

For Appellant: George Nissenson.

For Administration: Inspector Maher of fire de-  
partment.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle . . . . . 4

Negative . . . . . 0

Absent: Chief Kenlon . . . . . 1

THE RESOLUTION:

(400-26-A)

WHEREAS, H. C. F. Koch & Co., Inc., owner, filed, May  
7, 1926, an appeal from an order of the fire commissioner,  
affecting premises 130-36 West 124th street, Borough of  
Manhattan: and

# MINUTES

WHEREAS, the order of the fire commissioner, No. 25552-C, reads:

"6. Discontinue the use of 3rd story for dwelling purposes for reason such occupancy is in the violation of Section 154, Ch. 10, Code of Ordinances.";

WHEREAS, the building is non-fireproof, 3 stories in height, 9 ft. 6 in. by 93 ft. in area; divided into two sections of 500 sq. ft. and 2,250 sq. ft. in area by a fire wall, having one opening at first story with a fireproof self-closing door on each side of the fire wall, also one opening at 3rd story with a fireproof self-closing door on one side of the fire wall. OCCUPIED: Westerly section, 1st story, storage of electric trucks; 2nd story, storage and private stable; 3rd story, storage and living apartment at front; easterly section, 1st story, garage; 2nd story and 3rd story, storage; 3 persons in the entire building. EXITS: One enclosed stairway in each section; extending from 1st story to top story in westerly section and from 1st story to roof in westerly section; there is a fire escape on the rear of westerly section;

WHEREAS, the appellant claims that the two sections of building are practically two separate buildings; that the westerly section having the dwelling occupancy on 3rd story the coachman is not used as a garage; that there is a coachman kept on the premises every night from 6 p. m. to 10 p. m.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted as to living quarters for the employee of the owner, charge of the building, on condition that the apartment shall be located at the street front of building on 3rd story, apartment to be separated from the remainder of the building area by four-inch terra cotta wall; that the use and occupancy of the 50 ft. section of structure shall be restricted to the stabling of horses in the private ownership for personal accommodation under permit now in force; that the motor vehicle truck storage shall be limited to electric-driven vehicles; that the 50 ft. section of the building shall be separated from the easterly 25 ft. section by a wall of approved masonry not less than 12 inches thick, with not more than one horizontal opening therein on the 1st floor on the 3rd floor, said openings to be equipped with fireproof doors on the 1st story and with self-closing, fireproof door on 3rd story; and that there shall be no gasoline storage stored or maintained in the 50 ft. westerly section of this building.

420-26-A.  
APPELLANT—William F. Doyle, for Weprin & Glass Bldg. Corp., owner.

SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—330-338 East 44th street, Manhattan.

APPEARANCES—  
For Appellant: William F. Doyle.  
ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

VOTE—  
Affirmative: Chairman Walsh, Commissioners Connell and Holland and Chief Kenlon . . . 4  
Negative: Commissioner Guilfoyle . . . 1  
Absent . . . 0

RESOLUTION:

(408-26-A)

WHEREAS, William F. Doyle, for Weprin & Glass Building Corporation, owner, filed, May 11, 1926, an appeal from order of the fire commissioner, affecting premises Nos. 330-338 East 44th street, Borough of Manhattan; and WHEREAS, the order of the fire commissioner, dated April 17, 1926, reads (Order No. 33500-LC):

"1. Provide an electric high and low closed circuit for gravity tank of standpipe.

"7. Protect all columns and girders with fire retarding material as approved plan No. 106-25.

"8. Properly protect soffit of stairway in cellar and 2nd story, south side, with fireproof material as per approved plan No. 106-25.

"12. Provide a two-inch supply pipe for gravity tank of standpipe in place of one and half inch pipe as per approved plan No. 106-25.";

and  
WHEREAS, the building is non-fireproof, 4 stories (50 ft.) in height, 125 ft. by 100 ft. in area; OCCUPIED as a garage, 10 persons in the building; and

WHEREAS, the appellant claims that the building is equipped with an interior fire alarm, a sprinkler system supplied from a 20,000 gallon gravity tank, and also with a 4-inch standpipe fire line supplied from a 3,500 gallon gravity tank which is provided with a 1½-inch fill pipe; furthermore, the appellant contends that the ceilings on all stories are covered with fire resisting materials except the soffits of the stairs leading to cellar and to 2nd story at south side.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted as to Item 8 on condition that the stairway shall be enclosed with fireproof construction with self-closing, fire doors at any opening therein; that two (2) sprinkler heads shall be installed under the soffit of the stairs on each story; as to Item 12 granted on condition that an approved sprinkler system shall be installed throughout the building; and the appeal as to Items 1 and 7 be and it hereby is denied.

420-26-A.  
APPELLANT—Jacob Goldmintz, owner.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—538 East 178th street, The Bronx.

APPEARANCES—  
For Appellant: Jacob Goldmintz and John D. Krood.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—  
Affirmative . . . 0  
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon . . . 5  
Absent . . . 0

THE RESOLUTION:

(420-26-A)

WHEREAS, Jacob Goldmintz, owner, filed, May 14, 1926, an appeal from an order of the fire commissioner, affecting premises No. 538 East 178th street, Borough of Bronx; and

WHEREAS, the order of the fire commissioner, dated April 26, 1926, reads (Order No. 33742-C):

"1. Discontinue the maintenance of a non-storage garage at premises 538 East 178th Street and remove all motor vehicles, the fuel tanks of which are not empty.

"Reason for above work is inspection made of above premises shows garage is located in basement, 1st story occupied as a store, and dwellings are located on 2nd and 3rd stories which is in violation of Section 154, Chapter 10, Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, 3 stories and cellar (35 ft.) in height, 18 ft. by 60 ft. in area. OCCUPIED: Cellar, garage for the storage of two motor vehicles; 1st story, restaurant and office; 2nd and 3rd stories, living apartment of 6 rooms on each story; and

WHEREAS, the appellant claims that the ceiling of the garage, also the walls and ceilings of public hall, is covered with wire lath and two coats of cement plaster; that the garage is separated from the rest of the building by an

# MINUTES

unpierced 6-inch terra cotta partition; that the building is provided with a fire escape.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

510-26-A.

APPELLANT—William F. Regan, for Benjamin Harris, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—229 Bowery, Manhattan.

APPEARANCES—

For Appellant: William F. Regan.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle and Chief

Kenlon ..... 5

Absent ..... 0

THE RESOLUTION:

(510-26-A)

WHEREAS, William F. Regan, for Benjamin Harris, owner, filed, June 4, 1926, an appeal from an order of the fire commissioner, affecting premises No. 229 Bowery, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 24, 1926, reads (Order No. 34182-C):

"1. Discontinue the storage of nitro-cellulose products on premises.

"REASON: Premises used as a dwelling. Section 232-2-B, Chapter 10, Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, 3 stories (35 ft. 6 in.), in height, 25 ft. by 112 ft. and 108 ft. in area at 1st story and 25 ft. by 92 ft. and 88 ft. (irregular) above. OCCUPIED: 1st story, store; 2nd story, one living apartment, also the manufacture of metal frames, 3 persons; 3rd story, manufacture of metal frames, 6 persons; and

WHEREAS, the appellant claims that the building is equipped with a fire escape at front opening to the living apartment on the 2nd story; that the owner is the only one who uses the living apartment; furthermore, that only a small amount of celluloid in sheets less than 1/4 inch in thickness are carried on the premises.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

536-26-A.

APPELLANT—Cornell Utilities Co., Inc., for John A. Steinmetz, owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—1022 East 178th street, The Bronx.

APPEARANCES—

For Appellant: William Porter.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle and Chief

Kenlon ..... 5

Absent ..... 0

THE RESOLUTION:

(536-26-A)

WHEREAS, William Porter, for Cornell Utilities Company, Inc., for John A. Steinmetz, owner, filed, June 11, 1926, an appeal with the board of standards and appeals from a decision of the fire commissioner, affecting premises 1022 East 178th street, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, dated May 20, 1926, reads:

"Re Alt. App. 368-1926:

"The use of Grade 'B' Fuel Oil is not permitted in commercial plants and residences of more than two families unless the room in which equipment is used is cut off from rest of building by fireproof partition ceilings and floors. Such rooms must also have direct entrance from street only and be adequately vented direct to the outer air.";

and

WHEREAS, the building is of frame construction, 3 stories (38 ft.) in height, 24 ft. by 75 ft. in area. OCCUPIED: 1st story, marble works, 10 persons; 2nd story, manufacture of vests, 10 persons; 3rd story, radio shop, 4 persons. EQUIPPED with a fuel oil burning system, consisting of a 1065 gallon storage tank, buried 7 ft. 6 in. below ground level, a 55-gallon auxiliary tank, connected by piping to two approved No-Kol Burners, installed in the cellar; and

WHEREAS, the appellant claims that there is an exit from the cellar by means of the engineer's ladder in front area; that the ceiling of the boiler room is covered with metal lath and 3/4 in. P. C. plaster; furthermore, the appellant contends that the fuel oil installation conforms with the rules of the board for grade "B" oil, except as to fireproof construction and an opening from the boiler room cellar to the rest of the building.

*Resolved*, that the decision of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

547-26-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for LaClede Hotel Realty Corporation, lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—102-106 East 15th street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle and Chief

Kenlon ..... 5

Absent ..... 0

THE RESOLUTION:

(547-26-A)

WHEREAS, Croker National Fire Prevention Engineering Company, for LaClede Hotel Realty Corporation, lessee, filed, June 15, 1926, an appeal from an order of the fire commissioner, affecting premises 102-6 East 15th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 5, 1926, reads:

"Order No. 85706-F:

"1. Install a standpipe system with risers 4 in. in diameter, tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2 1/2 in. regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure \* \* \*";

and

WHEREAS, the building is non-fireproof, 8 stories (92 ft. 2 in.) in height, 75 ft. by 71 ft. 7 5/8 in. (about 5,000 sq. ft. in area); OCCUPIED as a hotel; 1st story, dining room and offices, 10 persons; 2nd to 8th stories, inclusive, 17 living rooms on each story; and

WHEREAS, the appellant claims that the building is EQUIPPED with a 2-in. standpipe system, connected with the city main, consisting of an automatic electric fire pump

# MINUTES

the cellar and a 1,500 gallon gravity tank in the pent-  
use; 75 ft. of hose and a 2½ gallon chemical extinguisher  
each story; an interior fire alarm system, connected with  
central office at 1st story is also installed; furthermore,  
the appellant contends that the present occupancy has been  
continuous since 1882; that there is about 25 persons on each  
story; that the exit facilities, also the fire fighting equip-  
ment are adequate.

*Resolved*, that the order of the fire commissioner be and  
hereby is *affirmed*, and the appeal be and it hereby is  
*denied*.

551-26-A.  
APPELLANT—E. G. Riley, for Amsco Realty Corp.,  
owner.

SUBJECT—Appeal from decision of fire commissioner.  
PREMISES AFFECTED—47 Ann street, Manhattan.

APPEARANCES—  
For Appellant: None.  
For Administration: Inspector Carroll of fire de-  
partment.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—  
Affirmative ..... 0  
Negative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and Chief  
Kenlon ..... 5  
Absent ..... 0

THE RESOLUTION:

(548-26-A)

WHEREAS, E. G. Riley, for Amsco Realty Corporation,  
owner, filed, June 16, 1926, an appeal from a decision of the  
fire commissioner, affecting premises 47 Ann street, Borough  
of Manhattan; and

WHEREAS, the decision of the fire commissioner, rendered  
July 27, 1923, Alt. Applic. 2760-24, reads:

"1. Not more than 400 sprinkler heads shall be con-  
trolled by one dry pipe (Type A) valve as per Rule  
7a."

WHEREAS, the building is non-fireproof, 7 stories, cellar  
sub-cellar (80 ft.) in height, 28 ft. by 136 ft., about  
15,350 sq. ft. in area. OCCUPIED: Sub-cellar, stock  
cellar, packing, 8 persons; 1st story, offices, 19 per-  
sons; 2nd story, engraving, 20 persons; 3rd story, stock  
cellar, 15 persons; 4th story, engraving, 15 persons; 5th story, electro-  
plating, 15 persons; 6th story, manufacture of jewelry, 25  
persons; 7th story, manufacture of jewelry, 38 persons;  
EQUIPPED with a sprinkler system; and

WHEREAS, the appellant proposes to install 498 one-half  
standard sprinkler heads controlled by one dry pipe  
(Type A) valve, instead of 400 heads as restricted in Rule  
7a for sprinkler equipment; the appellant contends that  
the New York Fire Insurance Exchange has approved the  
proposed equipment as herein proposed; furthermore, the  
appellant has reduced the occupancy of the building on the  
7th story to storage only.

*Resolved*, that the decision of the fire commissioner be  
and hereby is *affirmed*, and the appeal be and it hereby is  
*denied*.

564-26-A.  
APPELLANT—Croker National Fire Prevention Engi-  
neering Co., for J. D. Wilson & Sons, lessee.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—1295-1307 Broadway, Brook-  
lyn.

APPEARANCES—  
For Appellant: Herman E. Horwood.  
For Administration: Inspector Maher of fire de-  
partment.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and Chief  
Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

THE RESOLUTION:

(551-26-A)

WHEREAS, Croker National Fire Prevention Engineering  
Company, for J. D. Wilson & Sons, lessee, filed, June 17,  
1926, an appeal from an order of the fire commissioner,  
affecting premises 1295-1307 Broadway, Borough of Brook-  
lyn; and

WHEREAS, the order of the fire commissioner, dated  
July 27, 1923, reads:

"Order No. 48703-F:

"1. Install a standpipe system with risers 4 in. in  
diameter, tested to withstand a pressure of 300 lbs. per  
square inch, extending from cellar to roof, with neces-  
sary check valves and 2½ in. regulation Fire Depart-  
ment outlets on each story (including basement, cellar  
and roof) placed within main stairway enclosure."

and  
WHEREAS, the building is non-fireproof, 3 stories (41 ft.  
1 in.) in height, 175 ft. by 174 ft. 8 in., about 23,500 sq. ft.  
in area at 1st and 2nd stories; and 175 ft. by 100 ft. about  
15,350 sq. ft. in area at 3rd story; OCCUPIED as a department  
store; basement, 20 persons; 1st story, 90 persons; 2nd  
story, 25 persons; 3rd story, 15 persons; and

WHEREAS, the appellant claims that the building is  
EQUIPPED with a sprinkler system, connected to the city  
main on Broadway and also on Grove street, with two  
siamese connections, one on each street front; the average  
pressure in the mains is 40 lbs.; that the building is also  
equipped with a central office fire alarm system, three sta-  
tions on each story, also an interior fire alarm system; that  
fire drills are conducted regularly and that a watchman is  
constantly on duty at all times; that there are 34 bucket  
tanks, ten 2½ gallon chemical fire extinguishers, two 40 gal-  
lon chemical engines; fire pails, hooks and axes distributed  
throughout the premises; furthermore, that the building  
faces on two streets and there is a driveway across the en-  
tire width of the premises at rear.

*Resolved*, that the order of the fire commissioner be and  
it hereby is *modified*, and the appeal be and it hereby is  
*granted* with respect to the installation of gravity tank on  
roof only, on condition, that not less than a 4 in. connection  
to street main shall be installed; that the standpipe system  
otherwise shall conform with the rules of the board of  
standards and appeals; and that the building shall be not in-  
creased in height or area.

564-26-A.  
APPELLANT—John J. Gilmartin, for Unit Ventilating  
Company, Inc., owner.

THE RESOLUTION:

(564-26-A)

WHEREAS, John J. Gilmartin, for Unit Ventilating Com-  
pany, Inc., filed, June 21, 1926, an appeal from an order of  
the fire commissioner, affecting premises 211-221 128th  
street, College Point, Borough of Queens; and

# MINUTES

WHEREAS, the order of the fire commissioner, dated January 18, 1926, reads:

"Order No. 89345-F:

"1. Install a standpipe system with risers 4 in. in diameter, tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ in. regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway \* \* \*";

and

WHEREAS, the building is non-fireproof, one story in height, 150 ft. by 51 ft. and 100 ft. irregular, about 11,500 sq. ft. in area; OCCUPIED for the manufacture of metal ventilators, 50 persons; and

WHEREAS, the appellant contends that no goods are carried on the premises except sheet metal; that there is no fire hazard.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be not increased in height, area or dimension; and *granted* so long as present occupancy and operation remain unchanged.

567-26-A.

APPELLANT—Socony Burner Corporation, for Valentine & Co., owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—364 Manhattan avenue, Brooklyn.

APPEARANCES—

For Appellant: J. J. Cosgrove.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Kenlon ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(567-26-A)

WHEREAS, Socony Burner Corporation, for Valentine & Company, owner, filed, June 22, 1926, an appeal from a decision of the fire commissioner, affecting premises 36 Manhattan avenue, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, rendered June 19, 1926, Alt. Applic. No. 1618-1926, reads:

"1. Burner must be of a type approved by the Board of Standards and Appeals.";

and

WHEREAS, the building is of brick and metal construction, one story (35 ft.) in height, 43 ft. by 58 ft. in area; OCCUPIED for the manufacture of varnish, 10 persons; and

WHEREAS, the appellant proposes to install a fuel oil burning system, consisting of an industrial type "A" Socony fuel oil burner, using grade "B" oil; the installation is for the purpose of permitting an inspection by a committee of the board of standards and appeals.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* for a temporary period of ninety (90) days, at owner's risk and subject to inspection and test by a committee of the board.

570-26-A.

APPELLANT—Jacob Lubroth, Inc., for Polk Construction Co., owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—88 Jackson avenue, Jackson Heights, Borough of Queens.

APPEARANCES—

For Appellant: Jacob Lubroth.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners

Connell and Holland and Chief Kenlon .

Negative: Commissioner Guilfoyle .....

Absent .....

THE RESOLUTION:

(570-26-A)

WHEREAS, Jacob Lubroth, Inc., for Polk Construction Co., owner, filed, June 23, 1926, an appeal from a decision of the fire commissioner affecting premises 88 Jackson avenue, Jackson Heights, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, rendered March 12, 1926 (N. B. Applic. No. 762-25), reads:

"1. Area of building exceeds 20,000 square feet therefore a gravity tank of not less than 3,500 gallon capacity must be provided for standpipe system and so elevated that the bottom thereof is not less than 2 above the roof level, as required by Rule No. 8, subdivision A of the rules adopted by the Board of Standards and Appeals, governing the installation of standpipe (fire lines).";

and

WHEREAS, the building is non-fireproof, one story (14 ft. 8 in.) in height, 200 ft. by 140 ft., about 27,300 sq. ft. in area; OCCUPIED as a garage for the storage of more than five motor vehicles; and

WHEREAS, the appellant claims that the building is equipped with an automatic sprinkler system and also a 4-inch standpipe system, connected to a 12-inch street main, having pressure of 40 pounds; furthermore, the appellant contends that the building faces three streets with ample exits; that there is a city fire hydrant 75 ft. from the premises and also approved water tanks, buckets and pails of sand are distributed throughout the premises.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* only so far as the installation of the gravity tank on roof is involved *on condition* that 4-inch street connection shall be installed in accordance with Standpipe Rules and that the equipment otherwise shall comply with the regulations in all other respects; and that the building shall be not increased in height or area.

572-26-A.

APPELLANT—Michael A. Cardo, for Luigi Fusco, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—706 East 227 street, The Bronx.

APPEARANCES—

For Appellant: Michael A. Cardo.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Negative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle and Chief

Kenlon .....

Absent .....

THE RESOLUTION:

(572-26-A)

WHEREAS, Michael A. Cardo, for Luigi Fusco, owner, filed, June 24, 1926, an appeal from an order of the fire commissioner affecting premises 706 East 227th street, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated March 28, 1926 (Order No. 33818-C), reads:

# MINUTES

"1. Discontinue the maintenance of a non-storage garage and remove all motor vehicles, the fuel tanks of which are not empty, from the above mentioned premises, Section 154, Chapter 10, Code of Ordinances.";

WHEREAS, the building is non-fireproof, 3 stories in height, 30.32 ft. by 39 ft. in area at 1st story and 65 ft. by 39 ft. in area above; OCCUPIED: 1st story, 3 stores and garage for the storage of 3 motor vehicles; 2nd story, 2 living apartments; 3rd story, 3 living apartments; and

WHEREAS, the appellant contends that the original plans of the building including the garage were approved, both by the Tenement House Department and the Bureau of Buildings; that the Bureau of Buildings issued a Certificate of Occupancy, No. 1752 of 1924 (a copy of which is filed in the case); furthermore, that the garage portion is entirely separated from the rest of the building by fireproof walls and reinforced concrete roof.

Resolved, that the order of the fire commissioner be and hereby is affirmed, and the appeal be and it hereby is denied.

582-26-A.  
APPELLANT—Necarsulmer & Lehlbach, for Ninety Lexington Avenue Corp., owner.

SUBJECT—Appeal from decision of superintendent of buildings.

PREMISES AFFECTED—80-88 Lexington avenue, Manhattan.

APPEARANCES—

For Appellant: Edward Lehlbach.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(582-26-A)

WHEREAS, Necarsulmer and Lehlbach, for Ninety Lexington Avenue Corp., owner, filed, June 28, 1926, an appeal from a decision of the superintendent of buildings affecting premises 80-88 Lexington avenue, Borough of Manhattan;

WHEREAS, the decision of the superintendent of buildings, rendered June 25, 1926 (N. B. 216-1926), reads:

"Number of elevators in one shaft should comply with Sections 373-13 of Building Code.";

WHEREAS, the proposed building is fireproof, 17 stories (ft. 11 in.) in height, 98 ft. 9 in. by 114 ft. 3 in. in area; OCCUPIED: offices, 80 persons on each story; and

WHEREAS, the appellant proposes to install a group of five elevators along the northerly wall, separated so as to have two elevators in one shaft and two elevators in the other; the appellant contends that if not more than two elevators are permitted in one shaft, then one elevator would necessarily be isolated in one shaft, and in case of accident passengers could be taken from one car to another between

Resolved, that the decision of the superintendent of buildings be and it hereby is modified and the appeal be and it hereby is granted on condition and only so long as the total number of elevators does not exceed five cars, with accommodations in one shaft only for not more than three cars and that the building code and elevator rules be modified in all other respects.

590-26-A.

APPELLANT—David H. Smith & Sons, Inc., owner.

SUBJECT—Appeal from decision of superintendent of buildings.

PREMISES AFFECTED—South side of 50th street, 223 ft. east of 1st avenue, Brooklyn.

APPEARANCES—

For Appellant: David H. Smith.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Negative .....	0
Absent .....	0

THE RESOLUTION:

(585-26-A)

WHEREAS, David H. Smith & Sons, Inc., owner, filed, June 20, 1926, an appeal from a decision of the superintendent of buildings affecting premises on the south side of 50th street, 223 ft. east of First avenue, Borough of Brooklyn; and

WHEREAS, the decision of the superintendent of buildings, rendered June 14, 1926 (Applic. No. 10437-1926), reads:

"1. A standpipe system is required as per Sec. 581—Area in excess of 10,000 ft.";

and

WHEREAS, the building is non-fireproof, one story (24 ft.) in height, 260 ft. and 306 ft. by 188 ft., about 53,000 sq. ft. in area; OCCUPIED for the storage of iron and steel; and

WHEREAS, the appellant claims that the property affected by the decision of the superintendent of buildings is 150 ft. by 100 ft., 15,000 sq. ft. in area; that the block is surrounded by six fire hydrants on 51st street side, four fire hydrants on Second avenue, and two fire hydrants on First avenue; furthermore, the appellant contends that due to materials handled such as iron, steel and masons' materials, there is no fire hazard.

Resolved, that the decision of the superintendent of buildings be and it hereby is modified and that the appeal be and it hereby is granted on condition that the building be not increased in height, area or dimension, and only so long as the use, occupancy and operation of the business of masons' and builders' supplies, sale and storage in said building remain substantially unchanged.

590-26-A.

APPELLANT—R. A. Johnson, for American Hard Rubber Company, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—113 3rd avenue, College Point, Borough of Queens.

APPEARANCES—

For Appellant: R. A. Johnson.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(590-26-A)

WHEREAS, R. A. Johnson, for American Hard Rubber Co., owner, filed, July 2, 1926, an appeal from an order of the fire commissioner, affecting premises No. 113 Third avenue, College Point, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated June 15, 1926 (Order No. 4265-LC), reads:

"You are hereby notified that an inspection of the above premises, used as a storage garage shows that the following must be done before the permit requested by you can be issued:

# MINUTES

"2. Install an approved oil separator, trap or other similar apparatus. A preliminary plan showing location, size and connections must be filed with this Bureau. Plans and specifications in duplicate must be filed with and approved by this Department before the above work may be commenced.";

and

WHEREAS, the premises consist of two frame buildings, one story in height, building No. 1: 30 ft. by 40 ft., and building No. 2: 26 ft. by 36 ft. in area; OCCUPIED as a storage garage and a parking garage respectively, a four-inch drain leads from the floor of each garage and connects with a six-inch tile sewer which in turn leads to Flushing Bay; and

WHEREAS, the appellant claims that storage garage No. 1 is used only for the storage of three trucks; that garage No. 2 is used only to permit executives to park their cars during working hours; furthermore, the appellant contends that the garage drains do not connect with the city sewer, but instead have a private sewer direct to Flushing Bay, and under the above conditions that his garage is not affected by the regulation of the fire department which applies to garages for more than four motor vehicles.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified* and that the appeal be and it hereby is *granted on condition* that the existing floor drain discharge from the garage is maintained through private sewer with no other inlets thereto, and so long as conditions of use, occupancy and operation remain substantially unchanged.

THE RESOLUTION:

(399-26-BZ)

WHEREAS, Abraham Farber, for Bessie Sollar, owner, filed, May 7, 1926, an application, under the building zone resolution, to permit in a residence district the alteration and extension of a building used for store purposes on the first story; premises 519 Saratoga avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 5, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Saratoga avenue is in a residence district, Pitkin avenue is in a business district and Douglas street is in a business district; and

WHEREAS, the decision of the tenement house commissioner rendered March 17, 1926, reads:

"1. Proposed alterations of extending store use contrary to Building Zone Resolution. (Note business district to be extended in a residence district.);"

and

WHEREAS, the existing building is of non-fireproof construction, 3 stories in height, with a frontage of 25 ft. and a depth of 50 ft. to be occupied as stores and apartment and

WHEREAS, it is proposed to extend the area of the existing store on 1st story so as to occupy the entire area of the lot. Proposed extension 25 ft. by 50 ft.; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 7a of the building zone resolution, and that denial of permission to extend the existing business does not entail practical difficulty or unnecessary hardship.

*Resolved*, that the decision of the tenement house commissioner be and it hereby is *affirmed* and that the application be and it hereby is *denied*.

41-26-BZ.

APPLICANT—H. I. Feldman, for John Kasser, owner.

# MINUTES

## THE RESOLUTION:

(41-26-BZ)

WHEREAS, Deiches, Goldwater and Flynn, for John Kaser, owner, filed, January 18, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 3600 Jerome avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 20, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Jerome avenue, Bainbridge avenue and East 213th street are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered December 29, 1925, reads:

"1. Erection of proposed garage for storage of more than five motor vehicles in business district is contrary to provisions of Building Zone Resolution."

WHEREAS, the proposed building is of non-fireproof construction, one story in height, with a frontage of 125 ft. and depth of 200 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship, and section 7e, due to existing use and surrounding conditions; and

WHEREAS, the applicant has filed duly acknowledged contracts of several adjoining and abutting proper owners; and

WHEREAS, this application was granted by the board at its meeting, April 20, 1926, on certain conditions and applicant requested a modification of these conditions.

*Resolved*, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall not exceed a height of two stories above grade; that a rear yard of not less than five feet in depth shall be provided and maintained throughout the entire lot of the property to a height not exceeding 23 ft. above grade; that a required 10-foot yard, above the 23-foot height limitation, shall be provided and maintained; that the gable walls shall be unpierced throughout their entire height and length; that the entire Jerome avenue front of the structure shall be developed and maintained for a depth of approximately 60 ft. as retail mercantile stores, or other conforming business district use, separated from the garage area by rear by unpierced walls of approved masonry; that the rear entrances for the accommodation of the garage and operation shall be maintained on the Jerome avenue front at each end of the structure, each vehicular entrance shall exceed a width of 10 ft.; that the gable walls of the structure shall be unpierced throughout their entire height and length; that the structure shall be constructed of fireproof material throughout; that the garage area of the structure shall be equipped with a sprinkler system, supplied by direct connection to the city main, that there shall be no roof erected or maintained on the premises; the street front other than show window store fronts shall be finished with face brick, etc.; all permits necessary for the prosecution of the work shall be obtained within nine (9) months from the date the building completed within eighteen (18) months from the date of this action.

3-BZ.

LICANT—John J. Dunnigan, for John C. Gaffney, owner.

ECT—Application for reopening, modification of resolution, re decision of superintendent of buildings, under sections 7-e and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a

garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—3617 Bainbridge avenue, The Bronx.

APPEARANCES—

For Applicant: John J. Dunnigan.

For Opposition: None.

ACTION OF BOARD—Application reopened and resolution modified.

CONDITIONS—As specified in resolution.

THE VOTE TO REOPEN AND MODIFY—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle

Negative

Absent: Chief Kenlon

THE RESOLUTION:

(332-26-BZ)

WHEREAS, John J. Dunnigan, for John C. Gaffney, owner, filed, April 16, 1926, an application, under the building zone resolution, to permit in a business district, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 3617 Bainbridge avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that both Jerome avenue and Bainbridge avenue are in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 9, 1926 (N. B. 780-26), reads:

"1. Erection of proposed garage for storage of more than five motor vehicles in business district is contrary to provisions of Building Zone Resolution."

and

WHEREAS, the proposed building is of non-fireproof construction, two stories in height, with a frontage of 74.08 ft., and a depth of 99 ft. (irregular), to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant substantiated his basis of appeal under section 7e, in that there existed and still exists a public stable, with permit, still in force, in same block, as verified by letter submitted from health department; and under section 21 in that the surrounding non-conforming uses supports the contention as to the property under appeal being improvable for development for dwelling purposes; and

WHEREAS, this application was granted by the board at its meeting, July 13, 1926, on certain conditions and applicant requested a modification of these conditions as to location of ramp.

*Resolved*, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall not exceed a two-story structure in height above grade; that there shall be no cellar other than that required for the accommodation of the heating apparatus, approximately 20 ft. square at front of Bainbridge avenue; that the building shall be erected fireproof throughout; a rear yard of not less than 10 ft. deep provided at the level of the 2nd story for the full width on the 78 ft. gable line; that this offset shall be glazed with wire glass in metal frame; that an automatic louvre ventilator shall be provided fixed to the rear wall of the 2nd story at this offset; that there shall be no signs other than one fixed, projecting electric sign, indicating the name and title of garage; that the rear and gable walls otherwise shall be unpierced throughout the entire height and length; that any skylights installed in the roof of 2nd story shall be glazed with plain glass protected with wire guards above and below; that the gasoline storage equipment shall be located approximately at the street front, northerly of the center door; that the front wall shall be finished with face brick

# MINUTES

with architectural terra cotta or stone trimmings; that the start of any ramp runway shall set back from street front not less than 10 ft.; and that all permits necessary for the prosecution of the work shall be obtained within nine months and the work completed within eighteen months.

883-24-BZ.

APPLICANT—John A. McCarthy & Co., Inc., owner.

SUBJECT—Application for reopening, extension of time, (re decision of superintendent of buildings) to permit in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—East side of Gerard avenue, 105.30 ft. north of East 146th street and west side of Walton avenue, 104.71 ft. north of East 146th street, The Bronx.

APPEARANCES—None.

ACTION OF BOARD—Chairman read written request for extension of time to complete. Application reopened and extension of time granted to complete work.

THE VOTE TO REOPEN AND EXTEND TIME—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle ..... 4

Negative ..... 0

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(883-24-BZ)

WHEREAS, Philip J. Sinnott, for John A. McCarthy, owner, filed, July 2, 1924, an application, under the building zone resolution, to permit the extension from an unrestricted district into a business district, of a proposed garage for the storage of more than five motor vehicles; premises east side of Gerard avenue, 105.30 ft. north of 146th street and west side of Walton avenue 104.71 feet north of East 146th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, July 29, 1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Gerard avenue is an unrestricted district and Walton avenue is a business district and

WHEREAS, the decision of the superintendent of buildings rendered, dated June 10, 1924, in acting on N. B. Application No. 1575-24, reads:

"1. Erection of proposed garage for storage of more than five motor vehicles in an unrestricted district extending into a business district is contrary to provision of building zone resolution.";

and

WHEREAS, the proposed building is to be of fireproof construction, one story above grade on Walton avenue and two stories above grade on Gerard avenue in height, with a frontage of 56.18 ft. and a depth of 120 ft.; to be occupied as a garage for more than five motor vehicles; and

WHEREAS, under the provisions of section 7 subdivision C the board is empowered to act; and

WHEREAS, this application was granted by the board at its meeting, July 29, 1924, on certain conditions and applicant requested a modification of the time limit imposed.

Resolved, that the board of appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the structure be built fireproof and shall not exceed one story above the grade level of Walton avenue; that there shall not be more than one vehicular entrance on the Walton avenue front of the building; that the gable walls shall be unpierced throughout their entire height and length; that the front elevations on Gerard avenue and on Walton avenue shall be finished in cement stucco or face brick with architectural terra cotta or stone trimmings; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from October 5, 1926.

THE RESOLUTION:

(434-26-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for D. Schneiderman and H. Karasik, owners, filed, May 8, 1926, a petition for a variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 1013 East Tremont avenue, Borough of the Bronx; and

WHEREAS, the order of the fire commissioner, dated October 20, 1925 (No. 86117-LD), reads:

"1. Enclose the interior stairway on the east side of building in partitions of fireproof material extending from 1st story to 3 ft. above the roof.

"2. Provide an additional means of exit remote from interior stairway constructed."

WHEREAS, the building is non-fireproof, 3 stories in height, 6 ft. by 75 ft. in area at 1st story and 25 ft. by 72 ft. in area above; OCCUPIED: 1st story, stores; 2nd story, billiard parlor, 3 persons; 3rd story, manufacture of dresses, 4 persons; EXITS: an interior fireproof stairway, extending from the 1st story to top story, enclosed in fire-resisting partitions with wooden doors at openings; a 60-degree fire escape on the rear of the building, having non-fireproof openings along the course thereof, extending from top story to the yard level, with EGRESS from the termination of fire escape by means of open yard at west leading direct to Bryant avenue; ROOFS of adjoining buildings 2 stories over at west; one story lower at east; and

WHEREAS, the petitioner proposes as to item 2, to fireproof openings on the rear fire escapes; the petitioner contends as to item 1, that the stair enclosure is constructed of 2-in. x 4-in. studs, with wire lath and 3/4 in. Portland cement mortar on both sides; that the exit facilities are adequate under the proposed improvement.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted as to item 1, on condition that the existing fireproof stairs shall be enclosed with partitions of fire resisting construction, in accordance with the rules of the board of standards and

appeals; and granted as to item 2, only so far as it affects egress from the termination of the fire escape on the rear of the building, on condition that the fire escape conform with the labor law in all other respects, with egress through the adjoining yard and passageway of the abutting tenement house direct to Bryant avenue; that the building shall not be increased in height or area, and so long as conditions as to occupancy and use remain unchanged.

THE RESOLUTION:

(456-26-S)

WHEREAS, William F. Doyle, for Bethlehem Engineering Co., owner, filed, May 21, 1926, a petition for a variation from the requirements of the labor law as cited in order of the fire commissioner, affecting premises 206 West 51st street, 1648-1650 Broadway and 778-780 Seventh avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 7, 1926, reads:

"Order No. 48289-LF:

"Discontinue the use of the premises for factory purposes in accordance with Certificate of Occupancy No. 5990 issued by the Supt. of Buildings on March 7, 1923, until a certificate permitting such manufacturing has been obtained. Unless within 20 days such use shall cease, legal steps will be taken by this Department to prevent its continuance."

and

WHEREAS, the building is fireproof, 13 stories in height, 158 ft. 11 1/2 in. by 41 ft. 7 in. and 56 ft. 2 in., irregular in depth; OCCUPIED: 1st story, stores; 2nd story, beauty parlor, 25 persons; 3rd story, manufacture of jewelry, 41 persons; 4th story, offices, 25 persons; 5th story, offices, 30 persons; 6th story, publishers, 50 persons; 7th story, tailor, 35 persons; 8th, 9th and 10th stories, offices, 25 persons on each story; 11th story, manufacture of instruments, 35 persons; 12th story, diamond cutting, 12 persons; 13th story, diamond cutting, 20 persons; EXITS: Two interior, fireproof stairways, one extending from the 1st story to roof, the other from 1st story to top story, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner contends that this is a fireproof building, occupied by lofts and offices, equipped with a stand-pipe system.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects the width of the doors to both stairways on condition that a screened outside iron stairway shall be extended from the top platform of the existing fire tower to the roof, and shall be not less than 44 in. wide, and that the labor law requirements shall be complied with in all other respects.

472-26-S.

PETITIONER—Arthur Harft, for Kate Arnold, owner.  
SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—36 East 8th street, Manhattan.

APPEARANCES—

For Petitioner: None.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition dismissed for lack of prosecution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(472-26-S)

WHEREAS, Arthur Harft, for Kate Arnold, owner, filed, May 25, 1926, a petition for a variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 36 East 8th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 5, 1926 (No. 90647-LD), reads:

"1. Extend the interior stairway at the west side of building to the roof, as per Sec. 271, Labor Law.

"2. Provide a secondary exit from 2nd story, per Sec. 271, Labor Law.

"3. Arrange the fire escapes on the front north side of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sec. 273 and 274 of Labor Law, etc., or carry out a proper alternative method of complying with the requirements of Sec. 271 of the Labor Law.

"Among the defects noted are the following:

"Windows on course not fireproof and self-closing.

"Windows on 3rd and 4th stories are broken and defective.

"Openings on 5th story (18" x 18") not large enough to afford access to balconies.

"Floor opening in balcony at 3rd story level not closed up."

and

WHEREAS, the building is non-fireproof, 4 stories and attic in height, 25 ft. by 75 ft. in area at 1st and 2nd stories, 25 ft. by 65 ft. at 3rd story, and 25 ft. by 50 ft. in area above; OCCUPIED: 1st story, machine shop, 4 persons; 2nd story, manufacture of novelties, 4 persons; 3rd story, manufacture of novelties, 6 persons; 4th story, dressmaking, 10 persons; attic, vacant; EQUIPPED with a fire alarm signal system; EXITS: An interior wooden stairway at the west side, extending from the 1st story to the attic, enclosed in non-fireproof partitions, with hardwood doors at openings, an iron ladder from east side of attic to roof scuttle; a fire escape on the front of the building, having non-fireproof openings along the course thereof extending from the attic to the third story and counter-balanced stairs to sidewalk; ROOFS of adjoining building: 10 ft. 9 in. higher at east; 20 ft. 0 in. higher at west; and

WHEREAS, the petitioner proposes, as to item No. 1, to provide a metal scuttle with fixed wire glass and to remove the obstructing partition from attic; as to item No. 2, petitioner proposes to provide a fire escape balcony at rear of second story, a fireproof window opening on the same and an iron ladder to yard level, and to obtain consent of adjoining owner at west to use his premises as a means of egress to street in case of fire; as to item No. 3, petitioner proposes to fireproof the openings on the front fire escapes at third and fourth stories; the petitioner contends that the exits will then be adequate; and

WHEREAS, no one appeared when this case was called.

Resolved, that the petition be and it hereby is *dismissed* for lack of prosecution.

PETITIONER—Charles B. Walker, for Estate of L. P. Hawes, owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—207 Centre street, Manhattan.

APPEARANCES—

For Petitioner: Rudolph P. Miller, Charles B. Walker.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Holland and Guilfoyle and Deputy Chief Martin .....	4
Negative: Commissioner Connell .....	1
Absent .....	0

THE RESOLUTION:

(469-26-S)

WHEREAS, Charles B. Walker, for Estate of L. P. Hawes, owner, filed, May 24, 1926, a petition for a variation from the requirements of the labor law as cited in order of fire commissioner, dated May 6, 1926, affecting premises 207 Centre street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner (No. 95835-LD), reads:

"1. Enclose the interior stairway at the centre of the building serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire-resisting material extending continuously from the lowest point of the stairway to the underside of the roof boarding, that portion of the roof beams within the stair enclosure shall be covered with fire-resisting material, constructed as per section 271 of the Labor Law and rule 1 of the Board of Standards and Appeals, adopted July 29, 1924, or carry out a proper alternative method of complying with section 271 of the labor law."

and

WHEREAS, the building is non-fireproof, 5 stories and basement in height, 44 ft. by 47 ft. in area; OCCUPIED as a tenant factory: 2nd story, machine shops, 6 persons; 3rd story, machine shop, 10 persons; 4th story, printer, 10 persons; 5th story, nickel plating, 6 persons; EXITS: An interior wooden stairway extending from the 1st story to top story, enclosed in wooden partitions (metal covered at 1st story only) with wooden doors at openings; two standard fire escapes on the front of the building, one party wall fire escape balcony on the rear of the building at each story, having fireproof openings along the course thereof; a horizontal exit to building adjoining at north on each story; ROOFS of adjoining buildings: same level at south, ten feet higher at north; and

WHEREAS, the petitioner contends that there are five means of egress from each story; that the occupancy is small and the exit facilities are adequate.

Resolved, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that two party wall standard labor law fire escapes on the front of the Centre street building shall be maintained; that the interior horizontal exits as indicated on the plans filed with this appeal shall be maintained unfastened at all times during the occupancy of the premises; and that the occupancy shall not exceed 10 persons on any floor above the first story.

THE RESOLUTION:

(475-26-S)

WHEREAS, National Carbon Co., Inc., owner, filed, May 1926, a petition for variation from the requirements of labor law, as cited in an order of the fire commissioner, affecting premises 302 Thompson avenue, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner reads:

"Not more than 320 persons shall occupy this floor or space at any time for the purpose of working thereon, under the limitations imposed by Section 278 of the Labor Law.

"To permit a larger amount of persons than is hereby specified to work on this floor or space at any time is a misdemeanor under Section 1275 of the Penal Law."

WHEREAS, the building is fireproof, 7 stories in height, ft. by 300 ft., about 49,800 sq. ft. floor area at 2nd floor; OCCUPIED for the manufacture of batteries: 1st story, 65 persons; 2nd story, 320 persons; 3rd story, 273 persons; 4th story, 91 persons; 5th story, 125 persons; 6th story, 142 persons; 7th story, 212 persons; EQUIPPED with a sprinkler system and a fire alarm system; EXITS: fire towers and four interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to increase the occupancy of the 2nd story from 320 persons to 400 persons;

WHEREAS, the petitioner claims that the building was built after October 1, 1913; that fire drills are held regularly; that there are 6 exit stairways having a clearance of 6 ft. in width, also unobstructed space on each stair hall

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that an approved sprinkler and standpipe system be installed and maintained; that a fire drill shall be held and maintained; that the occupancy shall not exceed 400 persons on any one floor; and that the building be not increased in height or area, and the present remains unchanged.

THE RESOLUTION:

(488-26-S)

WHEREAS, Robert V. Banks, for Israel Berkenfeld, owner, filed, May 28, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 53 West 19th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated April 5, 1926 (Alt. Applic. No. 572-26), reads:

"5. A lawful passageway to street from termination of rear fire escape should be provided as per Section 273 of Labor Law."

and

WHEREAS, the building is non-fireproof, 5 stories in height, 22 ft. by 92 ft. in area at 1st story and 22 ft. by 80 ft. in area above; OCCUPIED as a tenant factory, 20 persons on each story; EXITS: an interior wooden stairway, extending from the 1st story to roof enclosed in fire-retarding partitions with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from main roof to the roof of 1st story extension; with no legal means of egress from the termination of the fire escape; ROOFS of adjoining buildings: same level; and

WHEREAS, the petitioner proposes to connect the rear 2nd story fire escape balcony with the 2nd story balcony on the rear of adjoining premises at east (No. 51 West 19th street), thence by an iron fireproof runway across the adjoining extension roof to a stair ladder leading to the yard of building facing West 20th street, thence to the street; the petitioner has filed a letter of consent from the owner of No. 51 West 19th street to use his premises as a means of exit.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects egress from the termination of the fire escape, on condition that a standard labor law fire escape shall be erected and maintained on the rear of the building, with egress from the termination to the yard of the adjoining premises to the east; that an affidavit of consent for egress through adjoining premises shall be filed with the superintendent of buildings; and that the ceiling of the rear extension shall be fire retarded in accordance with the rules of the board of standards and appeals.

THE RESOLUTION:

(518-26-S)

WHEREAS, Walter M. Mason, for The No. 15 West 47th Street Corp., owner, filed, June 7, 1926, a petition for variation from the requirements of the labor law, as cited in a

# MINUTES

decision of the superintendent of buildings, affecting premises Nos. 13-15-17-19 West 47th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated May 24, 1926 (N. B. Applic. 546-25), reads:

"33. All windows must comply with Section 264-7 of Labor Law."

and

WHEREAS, the proposed building is fireproof, 18 stories in height, 97 ft. 6 in. by 100 ft. 5 in. in area; OCCUPIED as a tenant factory, about 75 persons on each story; EQUIPPED with a sprinkler system and a fire alarm system; EXITS: one fire tower and one fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to use large lights of glass in front windows; the maximum area of light at 1st story, 118 sq. ft.; at 2nd story, 80 sq. ft.; the petitioner contends that to have smaller lights would seriously affect the renting figure.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as the openings on the street front of the building on the two lowest stories are concerned, on condition that the openings shall be equipped with approved metal frames, glazed with 1/4 in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION:

(537-26-S)

WHEREAS, David M. Jones, for Travin Realty Co., owner, filed, June 11, 1926, a petition for variation from the requirements of the labor law as cited in an order of the fire commissioner affecting premises 191 Mercer street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 22, 1926 (Order No. 97054-LD), reads:

"1. Enclose the interior stairway serving as a required means of exit on all sides with partitions of fire-resisting material extending continuously from the cellar to the underside of the floor of the 2nd story including any exposed stair soffits, landings and passageways, openings shall be provided with approved self-closing fire doors constructed as per Sec. 271 of the Labor Law and Rule 2 of the Board of Standards and Appeals, adopted July 29, 1924.

"2. Provide an additional required means of exit from the 1st story, remote from the existing exit, preferably located at the rear of the building, in accordance with the requirements of Sec. 271 of the Labor Law.

"3. Provide an additional required means of exit from the cellar, said exit to be located at the rear of the building, in accordance with the requirements of Sec. 271 of the Labor Law and Rule 2 of the Board of Standards and Appeals, adopted July 29, 1924."

and

WHEREAS, the building is non-fireproof, 4 stories in height, 24 ft. by 93 ft. in area; OCCUPIED: cellar, storage and cutting cardboard, 1 person; 1st story, paper box manufacture, 10 persons; 2nd story, vacant (proposed, 6 persons); 3rd story, metal novelties, 2 persons; 4th story, vacant (proposed, 6 persons); EQUIPPED with a sprinkler system in cellar and 1st story; EXITS: an interior wooden stairway, extending from the 1st story to top story, enclosed in wood partitions with wooden doors at openings; an iron ladder from top story to roof scuttle; a fire escape on the front of the building, having fireproof openings along the course thereof, extending from top story to the second story and counter-balanced stairs to sidewalk; ROOFS of adjoining buildings: 2 stories higher; and

WHEREAS, the petitioner claims that the wood partitions enclosing stairhall at 1st story, including the wooden stairhall door are metal covered on the factory side; the soffit of 1st story stairs and the ceiling of factory on 1st story are metal covered; also the soffit of cellar stairs, both sides of cellar stair enclosure and the cellar ceiling are metal

# MINUTES

covered; the petitioner, furthermore, proposes to cover the ceiling of entrance hall, also the hall side of doors and stairway enclosure with metal.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Items 2 and 3, *on condition* that doors shall be provided from the rear of the premises at cellar and 1st story, at window-sill level, with proper steps from the floor to the sill, with egress from the fire escape to the open yard of the adjoining premises to the south, and that the rear fire escape at 1st story shall be connected to the balcony fire escape of the premises to the west, and that an iron bridge shall be provided from the fire escape balcony of the first story to the balcony fire escape of the premises directly to the rear; and that the petition be *denied* as to item 1.

WHEREAS, R. C. Hurwitz, for Esther Hurwitz and Dora Pack, owners, filed, June 11, 1926, a petition for variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 202-220 Meserole avenue, 59-61 Moultrie street, 96-100 Jewell street, Borough of Brooklyn; and

WHEREAS, the orders of the fire commissioner, dated May 1926 (Order No. 95245-LD), read:

"1. Provide an additional required means of exit from the 2nd story of the 202-206 Meserole avenue section of the building remote from the existing interior stairway in accordance with the requirements of rule 3, of the Board of Standards and Appeals, adopted July 29, 1924."

(Order No. 95246-LD):

"1. Arrange iron bars and wire mesh on windows on north side of all sections of the building on 1st story, so as to be readily movable or removable from both sides in such a manner as to afford the free and unobstructed use of such windows for purposes of egress, as per Sec. 272 of the Labor Law."

WHEREAS, the building is non-fireproof, 2 stories in height, by 50 ft. and 200 ft., irregular in depth, divided into units, "A," "B," "C," "D" and "E," separated by brick one foot in thickness, with approved fire doors at all exits; OCCUPIED collectively as a dyeing establishment

1st story, 35 persons; 2nd story, 17 persons; EQUIPPED with a fire alarm system; EXITS: in unit an interior wooden stairway, extending from the 1st to 2nd story enclosed in wood partitions with wooden doors at openings; a wooden ladder at south end of 2nd story to roof scuttle; an outside open iron stairway from 2nd story to Meserole avenue; ROOFS of adjoining buildings: dry lower at east; and

and

WHEREAS the building is non-fireproof, 3 stories and attic

WHEREAS, the petitioner claims there are 13 screened windows on 1st story and 2 screened windows in the cellar along Meserole avenue affected by Order No. 95246-LD; that the windows are barred for protection against burglary; furthermore, the petitioner contends that the occupancy of 2nd story is small, fire pails are provided and the exits are adequate.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item 1, Order No. 95245-LD, *on condition* that a 60 degree balcony fire escape shall be erected on the rear southerly end of the building with stairs to the yard; and *denied* as to Item 1, Order No. 95246-LD.

THE RESOLUTION:

(550-26-S)

WHEREAS, Claysmith Co., Inc., owner, filed, June 16, 1926, a petition for variation from the requirements of the labor law as cited in an order of the fire commissioner affecting premises 84 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 26, 1926 (Order No. 97261-LD), reads:

"1. Provide an outside iron balcony fire escape on the south side of building with balconies 4' in width connected by stairways not less than 22" wide, placed at an incline of not more than 45 degrees, extending from ground to roof, constructed as per Sec. 273 of the Labor Law and rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with Sec. 271 of the Labor Law.

"2. Remove the substandard fire escape on the east side of building or reconstruct same to conform with Sec. 274 of the Labor Law and rule 3 of the Board of Standards and Appeals, amended May 9, 1924. Among the defects noted on this fire escape are the following: No stairs from top balcony to roof. No 60-degree stairs connecting balconies. No stairs or drop ladder in guides from lowest balcony to ground. Must be maintained structurally safe and properly painted. No sign of any character shall be placed at openings to same.

"3. Remove the substandard fire escape on the southeast and northwest corners of building, or reconstruct same to conform with Sec. 274 of the Labor Law and rule 3 of the Board of Standards and Appeals, amended May 9, 1924. Among the defects noted on these fire escapes are the following: Doors and windows on course not fireproof nor self-closing. Do not extend to roof. Stairs at northwest corner of building unsafe. Stairs at southeast corner passes over non-fireproof roof to reach ground. Must be maintained structurally safe and properly painted. No sign of any character shall be placed at openings to same."

# MINUTES

(37 ft.) in height, 122 ft. by 40 ft. in area; OCCUPIED as a factory for cotton goods; 1st story, 39 persons; 2nd story, 2 persons; 3rd story, 15 persons; attic story, vacant; EQUIPPED with a fire alarm system; a sprinkler system now being installed; EXITS: an interior wooden stairway, extending from the 1st story to top story, enclosed in wood partitions with wooden doors at openings; a fire escape on the east side of the building, having non-fireproof openings along the course thereof, extending from 2nd story to the 3rd story, and stationary iron ladder to ground level, open to street; there is an outside open wooden stairway from 2nd to 3rd story at southeast corner of building leading to ground level and open to street; ROOFS of adjoining building: 21 ft. and 25 ft. lower; and

WHEREAS, the petitioner proposes to comply with Item 2, by rearranging the substandard fire escapes on east side, to a standard fire escape; furthermore, the petitioner contends that the occupancy is small and the exits are adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to item 2, on condition that the substandard fire escape on the east side of the building shall be reconstructed and maintained structurally safe; and denied as to Items 1 and 3.

562-26-S.

PETITIONER—Samuel Rosenblum, for Mason & Moore Realty Corp., owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—28-30 East 4th street, Manhattan.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE RESOLUTION:

(562-26-S)

WHEREAS, Samuel Rosenblum, for Mason and Moore Realty Corp., owner, filed, June 21, 1926, a petition for variation from the requirements of the labor law as cited in an order of the fire commissioner, affecting premises 28-30 East 4th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 28, 1926 (Order No. 95288-LD), reads:

"1. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof, so that same are in compliance with the provisions of Section 273 and Sec. 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.

"Among the defects noted on this fire escape are the following: No safe passageway to the street from the termination.";

and

WHEREAS, the building is fireproof, 8 stories in height, 50 ft. 8 in. by 84 ft. 8 in. in area at 1st story and 50 ft. 8 in. by 77 ft. 8 in. in area above; OCCUPIED: 1st story, machine shop; 2nd story, manufacture of clothing, 10 persons; 3rd story, printers, 14 persons; 4th story, manufacture of caps, 18 persons; 5th story, manufacture of linings, 14 persons; 6th story, manufacture of trousers, 25 persons; 7th story, manufacture of hats, 10 persons; 8th story, wire covering, 10 persons; EQUIPPED with a fire alarm system; EXITS: an interior fireproof stairway, extending from the

1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof extending from roof to the second story balcony and a 45 degree stairs leading to yard adjoining premises at south, No. 32-38 Great Jones street; ROOFS of adjoining buildings: stories lower at east and west. and

WHEREAS, the petitioner contends that the rear fire escape terminate in the adjoining yard at south which is of a large area; that the exits are adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on so far as it affects the egress from the termination of the fire escape on condition that the fire escape otherwise complies with the requirements of the labor law, and the egress shall be provided to the adjoining yards of Nos. 32-34 36-38 Great Jones street with egress therefrom through plain glass openings to street.

563-26-S.

PETITIONER—Shampan & Shampan, for Realty Construction Corp., owner.

SUBJECT—Variation of the labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—156-160 West 28th street and 307-309 Seventh avenue, Manhattan.

APPEARANCES—

For Petitioner: Frederick J. Fauldhaber.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell and Guilfoyle and Deputy Chief Martin .....

Negative .....

Absent: Commissioner Holland .....

THE RESOLUTION:

(563-26-S)

WHEREAS, Shampan and Shampan, for Realty Construction Corp., owner, filed, June 21, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises Nos. 156-160 West 28th street and Nos. 307-309 Seventh avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings dated June 11, 1926 (N. B. Applic. No. 233-26), reads:

"This amendment is disapproved with the following objection:

"1 All windows must comply with Sections 262 and 264 of the Labor Law. Windows with panels over 720 square inches and windows which are not self-closing are unlawful.";

and

WHEREAS, the proposed building is fireproof, 23 stories in height, is L shape in plan, fronting on West 28th street, 68 ft. 6 3/4 in. by 108 ft. 9 in. in area, and fronting on Seventh avenue, 41 ft. 6 in. by 103 ft. 1 3/4 in. in area; OCCUPIED as a factory building, 140 persons on each story; EQUIPPED with a sprinkler system; EXITS: a fire tower and one interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to omit the self-closing devices on all front windows below the 13th story, and to use 1/4 in. plate glass of large area in front windows: the maximum size at 1st story, 9 ft. 11 7/16 in. by 9 ft. 10 in.; at 2nd story, 6 ft. 10 1/8 in. by 6 ft. 8 in.; and at 3rd story, 6 ft. 8 1/8 in. by 6 ft. 8 in.; the petitioner contends that to use smaller panes would destroy the architectural appearance of the building; furthermore, that all other windows will conform to the labor law.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor

# MINUTES

law, and that the petition be and it hereby is *granted*, only so far as it affects the glass of the windows in the lower three stories on the street front, *on condition* that the openings shall be equipped with approved metal frames, glazed with  $\frac{1}{4}$  in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

11-26-S.

THE RESOLUTION:

(571-26-S)

WHEREAS, George Fred Pelham, for Fifth Avenue and 28th Street Realty Co., Inc., owner, filed, June 23, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises No. 243 Fifth avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered May 14, 1926 (N. B. Applic. No. 1-26), reads:

"21. All windows should comply with Rule 503 of Industrial Code. Panes should not exceed 720 square inches in area nor 48" in any dimension."

WHEREAS, the proposed building is fireproof, 24 stories in height, 86 ft. 10 in. by 125 ft. in area; OCCUPIED as a factory building, 60 persons on each story; EQUIPPED with a sprinkler system; EXITS: a fire tower and one interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to use large lights of 16 in. in front windows: the maximum size at 1st story, 16 in. by 13 ft. 0 in.; at 2nd and 3rd stories, 6 ft. 0 in. by 13 ft. 0 in.; the petitioner contends that to use smaller lights of glass would destroy the architectural appearance of the building.

Resolved, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the windows on the street front of the lowest stories, *on condition* that the openings shall be equipped with approved metal frames, glazed with  $\frac{1}{4}$  in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

11-26-S.  
PETITIONER—Jas. P. Whiskeman, for Seach Realty Co., owner.

SUBJECT—Variation of the labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—38-42 East 32nd street, Manhattan.

THE RESOLUTION:

(589-26-S)

WHEREAS, James P. Whiskeman, for Krebs-Stengel & Co., lessee, filed, July 2, 1926, a petition for variation from the requirements of the labor law as cited in a decision of the superintendent of buildings, affecting premises 38-42 East 32nd street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered June 30, 1926, reads:

"1. Proposed partitions are unlawful. All partitions in a fireproof factory building should be built of incombustible material in accordance with the Labor Law. Reconsideration requested is denied."

and

WHEREAS, the building is fireproof, 12 stories (130 ft.) in height, 70 ft. by 98 ft. 9 in. in area; OCCUPIED as a factory building; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: a fire tower and one interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner has erected wooden partitions, 7 ft. in height, constructed partly of glass, on the first story, forming offices and desk rooms; the petitioner contends that the partitions do not interfere with the exit of the building; furthermore, that they do not create a fire hazard being on the first story of the building.

Resolved, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the first story store at street grade, *on condition* that the use and occupancy shall be restricted to display of merchandise exclusively, and that the partitions shall not exceed a height of 7 ft. 6 in.

235-26-S.

PETITIONER—Patrick J. Murray, for Edward W. Elgin, owner.

SUBJECT—Variation of the labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—228 East 51st street, Manhattan.

APPEARANCES—

For Petitioner: Patrick J. Murray.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

THE RESOLUTION:

(235-26-S)

WHEREAS, Patrick J. Murray, for Edward W. Elgin, owner, filed, May 19, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 228 East 51st street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered January 18, 1926, reads:

"1. Second means of exit to be provided."

and

WHEREAS, the building is non-fireproof, 4 stories in height, 16 ft. by 78 ft. in depth at 1st story, 69 ft. at 2nd story, and 45 ft. in depth above; OCCUPIED: 1st story, dyeing and cleaning, 12 persons; 2nd story, dyeing and cleaning, 20 persons; 3rd and 4th stories, one family dwelling; EXITS: an interior wooden stairway, extending from the 1st story to top story; enclosed in wood lath and plaster partitions with wooden doors at openings; a ladder from top story to roof scuttle; ROOFS of adjoining buildings: same level at east and west; and

# MINUTES

WHEREAS, the petitioner contends that the building is less than 40 ft. in height; furthermore, the petitioner proposes to erect a fire escape on rear at 2nd floor and to provide a sliding drop ladder in guides to the yard, and also a gate in the fence leading to adjoining yard at east; and

WHEREAS, this petition was denied by the board, July 20, 1926, and petitioner proposed to comply with all items except item No. 1 and requested a reopening of the case.

*Resolved*, that the board of standards and appeals does hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted on condition that a balcony fire escape, embracing at least one window on the top story, shall be installed and provided with connecting steps to the roof of the second story extension, and that a balcony with connecting stairs shall be provided from the 2nd story to the first story extension and also from the 1st story extension to the yard, with egress from the yard to the premises at the rear and east; that a certificate of consent from either of the adjoining owners shall be filed for permission for egress through either premises; and that there shall be no cleaning business conducted on the premises nor any inflammable mixtures used or stored thereon.

THE RESOLUTION:

(493-24-SA)

WHEREAS, Alfred R. Haase filed, April 7, 1924, a petition for approval of his device known as the Faultless Burner; and

WHEREAS, a committee of the board inspected this device in operation at premises 137 Corona avenue, Corona, L. I., and recommended the approval of the device; and

WHEREAS, this petition was granted by the board at meeting, December 22, 1925, approving the burner for use with Grade B fuel oil and petitioner requests its approval for use with Grade A oil also.

*Resolved*, that the board of standards and appeals do hereby approve the device known as the Faultless Oil Burner for use with Grade B fuel oil and for use with Grade A oil when equipped with pump feed in domestic installations in conjunction with fuel oil burning equipment, when installed and operated in accordance with the fuel oil rules of the board of standards and appeals.

The board records with deep regret the demise, on October 3, 1926, of its former member the Hon. John W. Moore.

On the announcement of his death the board adjourned, out of respect to his memory, extending to his bereaved family its profound sympathy.

Adjourned 5.45 p. m.

# RULES

## ENCLOSURE OF FACTORY STAIRWAYS

(410-24-SR)

Supplementary to Labor Law, § 271; originally adopted by the Industrial Commission August 28, 1913, and effective October 1, 1913, amended November 18, 1915; revised and readopted February 10, 1916, effective March 1, 1916; revised and adopted by the Board of Standards and Appeals July 29, 1924.

Rule 1.—Except as herein provided, in all factory buildings five stories or less in height, erected prior to October 1, 1913, in which there are more than twenty persons employed above the second story, all interior stairways, serving as required means of exit, and the landings, platforms and passageways connected therewith, shall be enclosed on all sides by partitions of fire-resisting material extending continuously from the lowest part of the stairway in accordance with the following schedule:

Number of stories	Contents combustible, no sprinkler	Contents non-combustible, no sprinkler	Contents combustible, and sprinkler	Contents non-combustible, and sprinkler
One	Stairways Enclosed			
Two	Stairways Enclosed	Stairways Enclosed		
Three	Stairways Enclosed	Stairways Enclosed	Stairways Enclosed	

The term "contents" as used above means articles, goods, wares and merchandise, packed, stored, manufactured or in the process of manufacture.

The term "combustible" as used above means articles, wares or merchandise which will burn or support combustion.

The term "sprinkler" as used above means an adequate automatic sprinkler equipment installed and maintained in good working order on each floor.

The term "story" as used above means that part of a building between any floor and the floor or roof next above;—the first story is that part of a building which is more than 50 per cent above the floor below and the next above the curb or average grade level.

Where the stairway extends to the top floor of the building, such partitions shall extend to the under side of the roof boarding. That portion of the under side of the roof beams within the stair enclosure shall be covered with fire resisting material, except in buildings with roofs of non-combustible material, in which case the partitions shall stop at the under side of the roof.

Where the stairway is required to extend to the roof, the enclosure shall be so built as to form a bulkhead. The enclosure shall be ventilated by a skylight in the roof with louvres or ventilators, or exterior windows with opening sections at the top floor.

Openings in such partitions shall be provided with approved self-closing fire doors, except where such openings are in the exterior wall of the building.

The bottom of the enclosure shall be of fireproof material at least four inches thick unless the partition extends to the cellar bottom.

A horizontal exit, as defined in section 267 of the Labor Law, will be accepted as a compliance with this rule where both sides of the fire wall or walls are occupied by the same factory floor by the same occupant.

Rule 2.—Where there are occupancies on any story or part of a story involving the storage or use below the top of the following materials and exceeding the amount specified, and there are more than 5 persons employed at manufacturing above such occupancy.

The interior stairway serving as required means of egress shall be enclosed on that story with fire resisting material from floor to under side of floor above, including any exposed stair soffits, landings and passageways; openings shall be provided with approved self-closing fire doors.

Nitrocellulose in any shape or form, 10 lbs.

Volatile inflammable oils, 1 gal.

Volatile inflammable mixtures, 5 gals.

Combustible mixtures, 10 gals.

Paints, varnishes and lacquers, 10 gals.

Upholstering or mattresses, manufacturing or repairing.

Cotton, rag and paper sorting, 1 ton.

Paper box manufacturing.

Restaurants and lunch rooms with cooking (not including tea, coffee or similar beverages).

The Board shall rule upon new occupancies as they arise and pass upon points under dispute.

When more than two stories are to be segregated, as above, the entire stairway shall be enclosed in fire-resisting material where there are more than 5 persons employed at manufacturing above the first story.

### Rule 3.—Required Exits and Enclosures of Stairways in Two-story Factory Buildings.

1. Required Exits.—In every two-story factory building erected prior to October 1, 1913, in which more than five persons are employed at manufacturing, there shall be provided from each story at least two means of exit or escape from fire remote from each other, one of which shall open on an interior stairway which shall be enclosed, as hereinafter provided, or on an exterior enclosed stairway. The other may lead to such a stairway, or to a horizontal or grade exit, or to an exterior screened stairway, or to a fire escape conforming to section 273, Labor Law. Except that exit door shall be a fire door, with substantial steps to the sills properly secured when sill is more than 8 inches above the floor level; and where there is no safe egress from the roof, a gooseneck ladder shall be provided from top balcony to the roof.

Unobstructed egress from the foot of the fire escape or exterior screened stairway shall be as required by section 273, Labor Law, or to open adjoining yard with egress to the street. No point on any floor of such building shall be more than one hundred and fifty (150) feet distant from such an exit.

Rule 4.—Enclosure of Stairways.—In two-story buildings where there are occupancies on any story or part of a story involving the storage or use below the top story of any of the materials exceeding the amounts specified in Rule 2 and there are more than 5 persons employed at manufacturing above such occupancy, all interior stairways serving as required means of exit shall be enclosed from the lowest point of such stairway to the ceiling of the first floor by partitions of fire-resisting material, unless the building is provided with a wet sprinkler system, in which case such enclosure of stairways shall not be required. Such enclosures shall lead directly to a door opening outwardly to a street or road, or an open area affording unobstructed passage to a street or road. All openings in such enclosure shall be provided with fire doors equipped with self-closing devices.

All reference herein to "Enclosure of Stairways" shall be considered as applying only to required stairways.

### Rule 5.—Storage of Combustible Material About Factory Stairways.

In all factory buildings no articles or wares of any nature shall be kept or stored inside the limits of any stairway enclosure or unenclosed stairway, or on the landings, platforms or passageways connected therewith.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the

hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth*, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, October 19, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, October 26, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman

WHEREAS, the order of the fire commissioner, dated September 10, 1925 (Order No. 84775-F), reads:  
"1. Provide a separate and distinct system of Automatic Sprinklers throughout building having at least one source of water supply, arranged and equipped as

provided in the rules for fire extinguishing appliance adopted by the Board of Standards and Appeals, May 24, 1917, as amended May 2, 1918, and January 21, 1919, effective February 17, 1919.";

and  
WHEREAS, the building is non-fireproof, 2 stories in height, 25 ft. by 95 ft. in area at 1st story, and 25 ft. by 50 ft. area above; OCCUPIED: cellar, stock rooms; 1st story, manufacture of paper boxes, 8 persons; 2nd story, packing and storage of paper boxes, 3 persons; and

WHEREAS, the appellant contends that the occupancy is small and that the exits are adequate; and

WHEREAS, no one appeared when this case was called.  
Resolved, that the appeal be and it hereby is dismissed for lack of prosecution.

595-26-A.  
APPELLANT—Cornell Utilities Co. for Henry Stubbman, owner.  
SUBJECT—Appeal from decision of fire commissioner.  
PREMISES AFFECTED—1 West 6th street, Coney Island, Brooklyn.  
APPEARANCES—  
For Appellant: William Porter.  
For Administration: Inspector Carroll of fire department.  
ACTION OF BOARD—Appeal denied.  
THE VOTE TO GRANT—  
Affirmative .....  
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....  
Absent: Chief Kenlon .....

THE RESOLUTION:

(595-26-A)

WHEREAS, William Porter, for Cornell Utilities Co., for Henry G. Stubbman, owner, filed, July 7, 1926, an appeal from a decision of the fire commissioner, affecting premises 1 West 6th street, Coney Island, Borough of Brooklyn; and  
WHEREAS, the decision of the fire commissioner, rendered June 11, 1926, reads:

"3. The use of Grade B fuel oil is not permitted in commercial plants and residences of more than two families unless the room in which equipment is used is cut off from rest of building by fireproof partition, ceilings and floors. Such rooms must also have direct entrance from street only and be adequately vented to the outer air.";

and  
WHEREAS, the building is fireproof, 4 stories in height, 59 ft. by 100 ft. in area; OCCUPIED as a hotel accommodating 200 persons; and

WHEREAS, a fuel oil burning system has been installed consisting of a 1,080-gallon fuel oil tank (buried outside the premises), a 55-gallon auxiliary tank (located in open part of basement), a NoKol Automatic Burner (located in boiler room which does not directly open to the outer air) and the necessary valves and piping to make a complete installation; and

WHEREAS, appellant contends that hardship would result if compelled to strictly comply with the rules and contends that the existing installation is a substantial compliance with the rules.

Resolved, that the decision of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

598-26-A.  
APPELLANT—James Duffy, for DeForest Phonofilm Inc., lessee.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—318 East 48th street, Manhattan.  
APPEARANCES—  
For Appellant: James Duffy, L. A. Baker.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle ..... 4  
Negative ..... 0  
Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(598-26-A)

WHEREAS, James Duffy, for DeForest Phonofilms, Inc., lessee, filed, June 30, 1926, an appeal from an order of the fire commissioner, affecting premises 318 East 48th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 3, 1926 (Order No. 34356-LC), reads:

"13. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 pounds per square inch, extending from cellar to roof with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.";

and

WHEREAS, the premises consist of a plot of ground having a frontage of 73 ft. 3 in. on East 48th street and a frontage of 73 ft. 3 in. on East 47th street, upon which is located a one and two-story non-fireproof building having a total area of approximately 13,000 square feet; the building being divided into 3 sections by masonry walls, with the openings herein protected by automatic fireproof doors; OCCUPIED as a motion picture studio, approximately 30 persons permanently employed, increased by motion picture casts; and

WHEREAS, the appellant contends that the premises faces on two street fronts and that in compliance with a modification granted under Cal. No. 1202-25-A, a sprinkler system has been installed and that sufficient fire protection is afforded thereby; and

WHEREAS, these premises were covered by similar orders affecting separate portions of the structure under Cal. No. 729-23-A and Cal. No. 1202-25-A, which orders were modified by action of this board in those cases.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the stipulation of the two foregoing appeals namely Cal. No. 729-23-A and Cal. No. 1202-25-A on the same premises shall be complied with, and so long as the structure remains substantially unchanged and is not increased in height or area, and that the existing exit facilities and the sub-dividing brick walls as indicated on the plans filed in this case shall be maintained unchanged.

APPELLANT—Samuel Gumeiner, for Weingarten & Geberer, lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—90-94 Grand street, Manhattan.

APPEARANCES—

For Appellant: Samuel Gumeiner.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle ..... 4  
Negative ..... 0  
Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(599-26-A)

WHEREAS, Samuel Gumeiner, for Weingarten and Geberer, lessee, filed, July 8, 1926, an appeal from an order of the

fire commissioner, affecting premises 90-94 Grand street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 11, 1926 (Order No. 34505-LC), reads:

"You are hereby notified that an inspection of premises 90-94 Grand Street, Manhattan, used for the storage of celluloid, show that the following must be done before permit requested by you can be issued:

"1. Provide fireproof, self-closing doors at openings to freight elevator shaft.

"2. Provide an enclosure of fire retarding material around passenger elevator shaft.

"3. Discontinue use of gas in hallway.

"4. Discontinue the use of any open flame in any room wherein nitro-cellulose is used.

"5. Provide suitable guards around radiators and steam pipes to prevent combustible material from coming in contact therewith.

"Note: Top shall be sloping so as to prevent same from being used as shelves.

"6. Arrange work benches so as to prevent stock from falling from same to floor. Sec. 235-10-3, Chap. 10, Art. 19, Code of Ordinances.

"7. Arrange tables at least 4 inches from any wall, steam or hot water pipes. Sec. 235-10-3-B, Chap. 10, Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, 5 stories in height, 75 ft. by 101 ft. in area; OCCUPIED: 1st story, stores; 2nd story, manufacture of brassieres, 50 persons; 3rd story, occupied by appellant for the manufacture of leather novelties (some having celluloid insets), 20 persons; 4th story, shipping department, 3 persons; 5th story, manufacture of leather bags, 30 persons; and

WHEREAS, appellant contends that the building is equipped with a sprinkler system; that the celluloid is cut by hand into the required sizes; that no filing or drilling is done; that appellant has a certificate of fitness for handling celluloid, and requests permission to store a maximum of 25 pounds of celluloid on the premises.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* only so far as it affects the occupancy of the 3rd story *on condition* that not more than 25 pounds of sheet celluloid shall be maintained on the premises, stored and maintained in approved metal can located at the front of the building adjacent to an open window; that the work or manufacturing on these sheets shall be limited to cutting, sewing and pasting in envelope pocketbooks and that the cutting shall be restricted to hand operation; and as to item 2, the elevator enclosure on the floor of this occupancy, namely 3rd story, shall be enclosed in approved fire resisting construction, and any openings therein shall be equipped with self-closing fireproof doors, and that the stairways on this 3rd story shall also be enclosed in either fireproof or approved fire resisting construction and any openings thereto shall be protected with self-closing fireproof doors.

## THE RESOLUTION:

(609-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for L. C. Tiffany Furnaces, Inc., owner, filed, July 13, 1926, an appeal from an order of the fire commissioner, affecting premises on the northwest corner of Kingsland avenue and Luydig place, Corona, Borough of Queens; and

WHEREAS, the order of the fire commissioner (Order No. 89846-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.";

and

WHEREAS, the premises, facing on three street fronts, consists of a group of buildings: a one-story and basement brick metal shop leading into the shop building; a one-story and basement fireproof packing building; a two-story non-fireproof office building and a one-story corrugated iron shop; the group having a total area of approximately 20,000 sq. ft.; OCCUPIED for the manufacture of art glass, 30 persons in entire premises; and

WHEREAS, appellant contends that the premises are open on all four sides; that the materials used in the manufacture of the glass are non-inflammable; that there are city fire hydrants in the vicinity and that the premises are provided with a hose house containing a hose reel, on wheels, with 200 feet of hose.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be not increased in height or area and remain substantially unchanged as to the subdivision of the existing floor area; that the packing shall be restricted to a room of fireproof enclosure with any openings thereto equipped with fireproof self-closing doors; that a 40-gallon portable fire extinguisher shall be installed and properly housed in the open driveway at the southerly end of the premises; that a 40-gallon portable fire extinguisher shall be located in the "shop" immediately adjoining the "supply room" abutting the partitions thereof; so long as conditions as to use and present operation of premises remain substantially unchanged.

## THE RESOLUTION:

(611-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for 591 Broadway Corp., owner, filed, July 13, 1926, an appeal from an order of the fire commissioner, affecting premises 591 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 2, 1925 (Order No. 87039-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements,

cellars and roofs), placed within main stairway enclosure.";

and

WHEREAS, the building is non-fireproof, 6 stories, 85 2 in. in height on the Broadway front, 92 ft. high on Mercer street, 30 ft. 1 in. by 200 ft. in area; OCCUPIED: 1 story, stores; 2nd story, manufacture of men's shirts, 10 persons; 3rd story, manufacture of men's shirts, 10 persons; 4th story, manufacture of pants, 5 persons; 5th story vacant at present; 6th story, manufacture of hats, 50 persons; and

WHEREAS, appellant contends that the building is provided with a sprinkler system supplied from a 10,000-gallon gravity tank, and that the building is but slightly in excess of the height limit requiring the installation of a standpipe system.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be not increased in height or area and shall be equipped throughout with an approved wet sprinkler system, and only so long as conditions as to occupancy and use remain substantially unchanged.

## THE RESOLUTION:

(618-26-A)

WHEREAS, John J. Gilmartin, for B. Peter Cerussi, owner, filed, July 14, 1926, an appeal from an order of the fire commissioner, affecting premises 4570-4582 Third avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated June 14, 1926 (Order No. 34477-C), reads:

"1. Discontinue the maintenance of a garage on these premises; remove all the gasoline from storage tank and remove all motor vehicles, the fuel tanks of which are not empty, from premises.

"THE ABOVE ORDER IS ISSUED FOR THE FOLLOWING REASONS:

"(B) Garage is over 10,000 square feet in area and not provided with a 4 inch standpipe, Section 581, Chapter 5, Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, one story in height, 75 ft. by 197 ft. (approximately 11,600 sq. ft.) in area; OCCUPIED as a public garage, 5 persons; and

WHEREAS, appellant contends that the building is low in height and but slightly in excess of the area limit requiring standpipes; that there are 4 city fire hydrants in the immediate vicinity and that fire buckets have been installed throughout the premises.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be equipped with a standpipe system in accordance with the resolution of this board under Cal. No. 179-20-S.

THE RESOLUTION:

(625-26-A)

WHEREAS, Samuel Rosenblum, for Hermann and Grace Co., owner, filed, July 15, 1926, an appeal from an order of the fire commissioner, affecting premises 671-689 Bergen street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated June 1, 1926 (Order No. 97750-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure."

WHEREAS, the building is non-fireproof, two and three stories in height, 20 ft. and 30 ft., and 82 ft. 9 in. by 150 ft., regular, (approximately 14,700 sq. ft.) in area; (there being also a one-story shed at the northwest corner of the premises); OCCUPIED: 1st story, manufacture of sheet metal work, 50 persons; 2nd story, manufacture of kalamein, 35 persons; 3rd story, storage, no persons; and

WHEREAS, appellant contends that the premises (excepting shed) are protected by an automatic sprinkler system; that the buildings are supervised by day and night watchmen; and that the occupancy of the premises is not arduous.

Resolved, that the order of the fire commissioner be and hereby is modified, and the appeal be and it hereby is granted on condition that the premises shall be equipped throughout with an approved sprinkler system and that the premises shall be not increased in height, area or dimensions, only so long as the present occupancy and use remains substantially unchanged.

THE RESOLUTION:

(754-26-A)

WHEREAS, Socony Burner Corp., for Herbert L. Pratt, owner, filed, September 10, 1926, an appeal from a decision

of the fire commissioner and also from a decision of the superintendent of buildings, affecting premises 1027 Fifth avenue, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, rendered August 25, 1926, reads:

"1. Systems fed by gravity between the storage tank and the pump are prohibited (Grade B system).

"2. Capacity of a storage tank for Grade B fuel oil may not exceed 1,100 gallons.

"3. Capacity of a tank for the storage of Grade B fuel oil which tank is not buried outside of a building or below the lowest floor level may not exceed 200 gallons.

"4. Pumps may be located below the top of the oil storage tank where heavy oil is used having a gravity of not more than 18 degrees Beaume and where the top of the tank is not more than 10 feet above the pumps."

the decision of the superintendent of buildings, rendered August 16, 1926, reads:

"This amendment is disapproved with the following objections:

"3. The capacity of grade B oil tank should not exceed 1,100 gallons as per rule 19 subdivision 2 of the Fuel Oil Rules.

"4. Show clearly the enclosure of tank and the thickness of the fill. Enclosure and fill should comply with rule 19 of the Fuel Oil Rules. Obtain and show permit from Highway Department."

and

WHEREAS, the building is non-fireproof, 6 stories in height, 40 ft. by 100 ft. in area; OCCUPIED as a residence for one family; and

WHEREAS, the appellant proposes to install a fuel oil burning system consisting of a 2,500-gallon storage tank buried 4 feet below the sidewalk level in an abandoned coal vault, enclosed by 20 inch stone walls, with a surrounding sand fill; and an approved Socony Arrow burner installed in the boiler room, 11 ft. 6 in. below the storage tank, using Grade "B" oil, with all necessary piping, valves and pump for a complete installation; and

WHEREAS, the appellant contends that to install a 1,100-gallon tank would necessitate a daily supply of oil; also that the oil is pumped from the top of tank to burner and that the suction line is protected by a vacuum tank device.

Resolved, that the decision of the fire commissioner and the decision of the superintendent of buildings be and they hereby are affirmed, and the appeal be and it hereby is denied.

THE RESOLUTION:

(772-26-A)

WHEREAS, Conrad Hewitt, for the Metropolitan Museum of Art, for the City of New York, owner, filed, September 17, 1926, an appeal from a decision of the fire commissioner, affecting premises west side Fifth avenue, 115 ft. west of southeast corner of 80th street, Borough of Manhattan; and

# MINUTES

WHEREAS, the decision of the fire commissioner (re Alt. App. 297-1926), dated August 25, 1926, reads:

"1. Storage of inflammable motion picture film may not be permitted within 50 ft. of lecture hall.

"2. Building in which inflammable motion picture film is to be contained must be equipped with a two source automatic pressure and gravity sprinkler system, plans for which must be filed. Sprinklers in vault must be connected with this system."

and

WHEREAS, the building is fireproof, 3 stories in height, of large dimensions, used and known as the lecture hall and exhibition building of the Metropolitan Museum of Art; EQUIPPED with a sprinkler system, supplied by three separate 6 inch connections—one connection from the high pressure (65 lbs.) main on east side of Fifth avenue; the other two from the low pressure main of 48 inches in diameter, which are connected to one 800-gallon, automatic steam pump and one 1,000-gallon, motor-driven, automatic turbine pump; the high pressure main is directly connected with the sprinkler system and on the discharge side of pumps, which automatically start when the pressure drops to 60 lbs. and cuts out when pressure reaches 65 lbs.; and

WHEREAS, the appellant proposes to construct a motion picture film storage vault in the court between the boiler house and the lecture hall and at an elevation of 21 ft. above the court floor level, vault to be fireproof, one story in height, 28 ft. by 10 ft. 1 in. in area, and to equip the same with adequate sprinkler heads connected by piping to the existing sprinkler system in the museum building; and

WHEREAS, the appellant contends that the proposed film vault will be entirely on the outside and separated from the lecture hall by an unpierced brick wall, 20 inches in thickness; furthermore, that the existing sprinkler system is better than the ordinary installations.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to item 1, *on condition* that this proposed structure shall not exceed an area of 12 ft. by 15 ft. and shall be not more than one story in height with not more than one opening therein equipped with a fireproof self-closing door and accessible from the exterior courtway only, and *granted* as to item 2 *on condition* that the vault shall be equipped with a sprinkler supply from the existing sprinkler system of the main structure and that the vault shall be otherwise constructed in accordance with the requirements of the code of ordinances.

THE RESOLUTION:

(288-26-A)

WHEREAS, Edward P. Doyle, for Watkins Garage Realty Co., owner, filed, April 5, 1926, an appeal from an order of the fire commissioner, affecting premises 740-748 Whitlock avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated February 4, 1926 (No. 32952-LC), reads:

"1. Construct 6 in. terra cotta wall with automatic fireproof doors across garage 120 ft. from front wall of garage as shown on approved plan 1117-24.";

and

WHEREAS, the building is non-fireproof, one story in height, 100 ft. by 170 ft. and 180 ft., irregular in depth about 17,000 sq. ft. in area; OCCUPIED as a storage garage, 3 persons; EQUIPPED with a 4 in. standpipe 3 outlets and sufficient length of 2½ in. hose to reach all portions of the floor area; and

WHEREAS, the appellant contends that the building is only one story in height, has less than 24,000 sq. ft. floor area, faces two streets and is easily accessible to firemen and

WHEREAS, this appeal was denied by the board at its meeting, June 15, 1926, and appellant requested a reopening of the case, which request was granted by vote of the board

*Resolved*, that the order of the fire commissioner be and it hereby is *modified* and the appeal be and it hereby is *granted on condition* that a wet sprinkler system with not less than two 4 in. connections to city main at both street fronts shall be installed.

**THE RESOLUTION**:

(453-26-BZ)

WHEREAS, John J. Dunnigan, for Pasquale Fiore, owner, 1, May 20, 1926, an application, under the building zone resolution, to permit in a business district, extending from unrestricted district, the erection and maintenance of a factory building; premises 460-468 Southern Boulevard, Bronx; and

WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting, October 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Southern Boulevard, East 147th street and Timpson Place are partly business and partly restricted districts; and

WHEREAS, the decision of the superintendent of buildings, N. B. 876-1926, rendered May 21, 1926, reads:

"1. Erection of proposed factory building in a business district extending into unrestricted district is contrary to provisions of Building Zone Resolution."

WHEREAS, the proposed building is to be of non-fireproof construction, three stories in height, with a frontage of 125 ft., and a depth of 125 ft. and 65 ft. (irregular), to be occupied as factory building; and

WHEREAS, the board deemed that the applicant substantiated his basis of appeal under sections 7-c and 21 in that the facts are same and similar uses opposite and abutting his property, and that on part of his plot there existed prior to and still exists a non-conforming use and occupancy. *solved*, that the board of standards and appeals does *not* make a variation in the application of the use district provisions of the building zone resolution, and that the

application be and it hereby is *granted on condition* that the building shall not exceed a height of 50 ft. (3 stories in height) above grade; that any factory occupancy and operation conducted in the proposed structure shall be limited and restricted to the manufacture and assembly of custom-made furniture; that the gable walls shall be unpierced throughout their entire height and length; that the 1st story street front shall be constructed and arranged for a depth of not less than 40 ft. for use and occupancy as mercantile stores or show rooms, separated from the factory portion by walls of approved masonry; that a rear yard not less than 10 ft. deep for the entire width of premises shall be maintained; and that the requirements of the building zone resolution shall be complied with in all other respects; and that all permits required shall be obtained within nine months and the building completed within eighteen months.

517-26-BZ.

**APPLICANT**—Victor C. Farrar, for 40th St. & Park Ave., Inc., owner.

**SUBJECT**—Application (re decision of superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence district the erection and maintenance of a building to be used for offices.

**PREMISES AFFECTED**—90-98 Park avenue and 38-40 East 40th street, Manhattan.

**APPEARANCES**—

For Applicant: Charles Craig.

For Opposition: Edwin DeT. Bechtel, John Fox, O. F. Sensch, George H. Kuhner, L. Terrell, Milton Damnamn, Mark Jacobs, R. H. Blum, M. L. Baker, P. B. Edson, Joseph Beyhill, James A. McCarthy, Catharine Potter.

Connell, Holland and Guilfoyle ..... 4

Negative ..... 0

Absent: Chief Kenlon ..... 1

**THE RESOLUTION**:

(517-26-BZ)

WHEREAS, Victor C. Farrar, for 40th Street and Park Avenue, Inc., owner, filed, June 7, 1926, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a building to be used for offices; premises 90-98 Park avenue and 38-40 East 40th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting, October 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Park avenue, south of East 40th street, is in a residence district; that Park avenue, north of East 40th street is in a business district; that East 40th street, south side, is in a residence district; and that East 40th street, north side, is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 4, 1926, reads:

"1. A business building may not be erected in a residence district—Zone Resolution, Section 3.";

and

WHEREAS, the proposed building is of fireproof construction, 21 stories and pent house in height, with a frontage of 116 ft. 6 in. on Park avenue and 130 ft. on East 40th street, to be occupied for offices; and

WHEREAS, the board deemed that the applicant substantiated his basis of appeal under Section 21, on the ground that the continued limitation and use of this property to strict compliance of the building zone resolution requirements entail unnecessary hardship and practical difficulties; that the same and similar uses exist almost throughout the entire street

# MINUTES

front, and that this street front on the northerly side throughout and on the same side for 100 ft. from Madison avenue is designated on the city maps for business use.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that no part of the building shall be used for manufacturing use purposes or occupancy; that any store use on the 1st story shall be restricted on the Park avenue front to banking business or retail mercantile or executive business uses, not operating on Sundays or holidays, and that no portion of the Park avenue front for a depth of not less than 100 ft. shall be occupied or used at any time as a restaurant or for the sale of edibles or beverages; that the main corridor, business entrance shall be restricted to the 40th street front of the structure and not within 50 ft. of the corner; that there shall be no advertising signs of any nature or description erected on Park avenue section of this property nor within 25 ft. of corner; that a return shall be made to this board of the architectural design of the front elevations on Park avenue and 40th street and the layout of the ground or store floor and one typical floor plan for approval by this board before filing application with the bureau of buildings; that the building otherwise shall be constructed and maintained in accordance with the building zone resolution requirements in all respects; and that all permits required shall be obtained within nine months and the building completed within eighteen months.

## 544-26-BZ.

APPLICANT—New York Telephone Company, owner.  
SUBJECT—Application (re decision of superintendent of buildings) under section 7(c) and 7(d) of the building zone resolution, to permit the extension from a business into a residence district, of an existing telephone exchange.

PREMISES AFFECTED—676-686 Fairview avenue and 1928-1944 Gates avenue, Ridgewood, Borough of Queens.

## APPEARANCES—

For Applicant: N. B. Egleston.

For Opposition: Anthony B. Stegman, Catharine Kerr.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle ..... 4

Negative ..... 0

Absent: Chief Kenlon ..... 1

## THE RESOLUTION:

(544-26-BZ)

WHEREAS, New York Telephone Company, owner, filed, July 12, 1926, an application, under the building zone resolution, to permit the extension from a business to a residence district of an existing telephone exchange building; premises 676-686 Fairview avenue, and 1928-1944 Gates avenue, Ridgewood, Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Fairview avenue is business, Gates avenue is residence, and Palmetto street is residence; and

WHEREAS, the decision of the superintendent of buildings, re: Alt. 996-1926, rendered April 12, 1926, reads:

"Your application for a permit on the above location has been rejected, as an examination of your drawings and application shows they do not conform with the laws for the following reason:

"Extending telephone exchange into a residence district.";

and

WHEREAS, the proposed building is to be of fireproof construction, 3 stories in height, with a frontage of 90 ft. 10 in., and a depth of 145 ft. 1 in., to be occupied as telephone exchange; and

WHEREAS, the board deemed that applicant was entitled to relief under sections 7-c and 7-d of the zoning resolution;

*Resolved*, that the board of standards and appeals do hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall not exceed a height of 3 stories; that there shall be no entrance or exit on the street front of the building within the residence use district of Gates avenue; that an open court of not less than 15 ft. deep for the entire width of the property shall be maintained at the rear of building on Gates avenue; that there shall be no vehicular entrance to yard from the courtway; that the front elevation of the Gates avenue side and the return wall on Gates avenue shall be finished with face brick and architectural terra cotta and stone trimmings; that any permits required shall be obtained within nine months and the building completed within eighteen months from the date of the action.

THE RESOLUTION:

(579-26-BZ)

WHEREAS, Alfred J. Boulton, for Felice Mancaruso, owner, filed, June 28, 1926, an application, under the building zone resolution, to permit the extension from an unrestricted district into a business district of a proposed garage for the storage of more than five motor vehicles; premises 608-616 Union street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Union street is in an unrestricted district; that Fourth avenue is in a business district; and that President street is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 22, 1926, reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 4-A 15.

"The erection of a public garage for more than five motor vehicles extending 20 feet into a business district."

WHEREAS, the proposed building is of non-fireproof construction, one story in height, with a frontage of 100 ft., and a depth of 95 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to relief under sections 7-c, 7-e and 21.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall not exceed one story in height above grade and shall be constructed fireproof; that the rear and gable walls shall be unpierced throughout their entire height and length; that any skylights installed shall be glazed with plain glass, protected with wire guards above and below; that there shall be no vehicular opening on the street front within

25 ft. of the easterly gable wall; that the front elevation shall be finished in face brick with architectural terra cotta or stone trimmings; that there shall be no roof signs erected; that any gasoline storage equipment installed shall be located at the westerly end of the building near the street front; and that all permits required shall be obtained within nine months and the work completed within eighteen months.

586-26-BZ.

APPLICANT—Edward P. Doyle, for Richbroson Hotel Co., Inc., owner.

SUBJECT—Application (re decision of superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence district, the maintenance of the use of a portion of the basement of an existing building for business purposes.

PREMISES AFFECTED—2-4 West 72nd street, Manhattan.

THE RESOLUTION:

(586-26-BZ)

WHEREAS, Edward P. Doyle, for Richbroson Hotel Co., Inc., lessee, filed, July 1, 1926, an application, under the building zone resolution, to permit in a residence district the maintenance or the use of a portion of the basement of an existing building for business purposes; premises 2-4 West 72nd street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 72nd street, West 71st street and Central Park West are all in a residence district; and

WHEREAS, the order of the superintendent of buildings, rendered April 2, 1926, reads (Order 69/25):

"You are hereby notified that the building occupied as a hotel and known as number 2 and 4 West 72nd st., HOTEL MAJESTIC and located in a residence district in the Borough of Manhattan, in the City of New York, does not conform to Section 3 of the Building Zone Resolution of the Board of Estimate and Apportionment, adopted July 25, 1916, in the respects noted below: In that of occupying the center portion of basement floor as a business office."

and

WHEREAS, the existing building is of fireproof construction, 12 stories in height, with a frontage of 200 ft. and a depth of 150 ft.; to be occupied for business purposes; and

WHEREAS, the board deemed that applicant substantiated his basis of appeal under Section 21.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted* only so far as it affects the room located in basement, approximately 60 ft. frontage by 65 ft. depth, located about 65 ft. southerly from 72nd street on the Central Park West front of structure, restricted to the use of executive office for the accommodation and incidental use of the Automobile Association of America, *on condition*, that there shall be no sale, barter or exchange of merchandise on the premises; that there shall

# MINUTES

be no signs of any nature or description other than the monogram of the association, not exceeding three letters of the alphabet; and that any permits required shall be obtained within thirty days and any work involved thereby shall be completed within ninety days.

Negative: Commissioner Guilfoyle	1
Absent	0

THE RESOLUTION:

(334-26-BZ)

WHEREAS, John J. Dunnigan, for East Fordham Road Syndicate, Inc., owner, filed, April 16, 1926, an application, under the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of an automobile sales room and service station; premises 690-698 East Fordham road, 2491-2509 Crotona avenue and 2500-2502 Cambrelling avenue, Borough of Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 6, 1926, A. M., after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Crotona avenue is residence; East Fordham road is business and East 189th street is business; and

WHEREAS, the decision of the superintendent of buildings, re: N. B. 781-1926, rendered April 9, 1926, reads:

"1. Erection of proposed building to be occupied for business purposes in business district extending into residence district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of fireproof construction, 3 stories in height, with a frontage of 103.45 ft. and a depth of 330.68 ft., irregular, to be occupied as an automobile sales room and service station; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship; and

WHEREAS, this application was granted by this board at its meeting, July 6, 1926, on certain conditions and applicant requests a modification of these conditions to permit a roof sign.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that the structure be limited to three stories in height above grade; that no gasoline storage equipment shall be maintained or installed on the premises other than portable tanks not exceeding 50-gallon capacity; that the use, conduct and operation of the property shall be restricted to automobile manufacturer's sales and distributing agency; that no part of the structure shall be rented or hired for live storage garage use; that there shall be no advertising signs or display on the front of the building other than the name and title of the business; not more than one roof sign shall be erected restricted to the business area of the plot not exceeding a height of 30 ft. above the cornice of the building; the advertising display to be limited to that of the owner or occupant of the premises; that the design of the front elevation shall be substantially in accordance with the photograph filed at the hearing and the facades on the street fronts shall be finished in architectural terra cotta, natural stone, enamel or face brick; that there shall be no door opening on Cambrelling avenue other than an emergency exit not exceeding 3 ft. 8 in. in width; that the requirements of the building zone resolution shall be complied with in all other respects; that all required permits shall be obtained within nine months and the building completed within eighteen months from the date of this action.

Adjourned, 4:20 P. M.

WILLIAM J. O'GORMAN, *Secretary*.

THE RESOLUTION:

(592-26-S)

WHEREAS, William Cohn, owner, filed, July 7, 1926, a petition for a variation from the requirements of the labor law as cited in order of the fire commissioner, affecting premises 386-388 West Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 28, 1926, reads:

"Order No. 90166-LD:

"1. Provide a second means of egress from the 1st floor, same to be located at rear of building, as per Section 271 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, 5 stories in height, 50 ft. by 75 ft. in area at 1st story and 50 ft. by 65 ft. in area above; OCCUPIED: 1st story, carpenter shop, 7 persons; 2nd story, storage of trunks, 4 persons; 3rd story, manufacture of trunks, 4 persons; 4th story, manufacture of trunks, 6 persons; 5th story, manufacture of trunks, 6 persons; EXITS: an interior wooden stairway, extending from the 1st story to roof; enclosed in wood partitions with wood doors at openings; a fire escape on the front of the building, having fireproof openings along the course thereof, extending from the top story to the 2nd story balcony with counter-balanced stair to street; ROOFS of adjoining buildings approximately the same level; and

# MINUTES

WHEREAS, petitioner contends that the whole of the lot is covered by the building, excepting the area at the westerly rear and that an exit leading to this would have egress through adjoining properties and would not be practical and proposes to construct three doorways (opening outwardly) at the front of the building on the 1st story and requests the acceptance of this egress in view of the small occupancy.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that an iron balcony shall be provided at the rear first story, from any one of the existing three windows, with iron steps and an iron landing platform at the grade level of the yard of the premises to the rear, and that there shall be four doorways provided at the street front of the building from the store direct to the street, and *granted* only so long as conditions as to occupancy and use remain substantially unchanged.

622-26-S.

PETITIONER—Henry I. Oser, for Fur Manufacturers' Building Company, Inc., lessee.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—249-251 West 29th street, Manhattan.

APPEARANCES—

For Petitioner: J. Lewis.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative .....	0
Absent: Chief Kenlon.....	1

THE RESOLUTION:

(622-26-S)

WHEREAS, Henry I. Oser, for Fur Manufacturers' Building Co., Inc., lessee, filed, July 15, 1925, a petition for a variation from the requirements of the labor law, as cited in decision of the superintendent of buildings, affecting premises 249-251 West 29th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, re N. B. 781-1925, dated May 12, 1926, reads:

"1. All windows must comply with Section 264 of the Labor Law and Rule 503 of the Industrial Code."; and

WHEREAS, the building is fireproof, 15 stories in height, 50 ft. 2 in. by 98 ft. 9 in. in area at 1st story and 50 ft. 2 in. by 88 ft. 10 in. in area above; OCCUPIED: 1st story, stores and factory, 45 persons; upper stories, offices, show-rooms and factories, 270 persons above the 1st story; EQUIPPED with a sprinkler system; EXITS: Two interior, fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings in the front wall of the building on the 1st, 2nd and 3rd stories, glazed with plate glass; the maximum area of the glass on the 1st story being 92 in. by 96 in.; on the 2nd story being 63 in. by 86 in. and on the 3rd story being 63 in. by 86 in. in area; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the lower three stories.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* only so far as it affects the windows on the street front of the building on the three lowest stories, *on condition* that the openings be equipped with approved metal frames, glazed with  $\frac{1}{4}$  in. polished plate glass, and that the labor law requirements shall be complied with in all other respects.

623-26-S.

THE RESOLUTION:

(623-26-S)

WHEREAS, Henry I. Oser, for Fur Zone Realty Co. owner, filed, July 15, 1926, a petition for a variation from the requirements of the labor law, as cited in decision of the superintendent of buildings, affecting premises 252-254 West 30th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, re N. B. App. 773-1926, dated May 12, 1926, reads:

"This amendment is disapproved with the following objection:

"4. All windows must comply with Sec. 264 of the Labor Law and Rule 503 of the Industrial Code."; and

WHEREAS, the building is fireproof, 15 stories in height, 49 ft. 9 in. by 98 ft. 9 in. in area at 1st story and 49 ft. 9 in. by 88 ft. 9 in. in area above; OCCUPIED: 1st story, stores upper stories, tenant factories, approximately 55 persons per story; EQUIPPED with a sprinkler system; EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings in the street wall of the building on the 1st and 2nd stories, glazed with plate glass; the maximum area of the glass on the 1st story being 222 in. by 100 in., and on the 2nd story being 48 in. by 78 in. in area; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the lower two stories.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* only so far as it affects the windows on the two lowest stories of the street front of the building, *on condition* that the openings shall be equipped with approved metal frames glazed with  $\frac{1}{4}$  in. plate glass, and that the requirements of the labor law shall be complied with in all other respects.

464-26-S.

PETITIONER—Walter M. Mason, for The 37 West 4th Street Corporation, owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—35-37-39 West 47th street, Manhattan.

APPEARANCES—

For Petitioner: Fred Adinolfi.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative .....	0
Absent: Chief Kenlon.....	1

# MINUTES

## THE RESOLUTION:

(464-26-S)

WHEREAS, Walter M. Mason, for The No. 37 West 47th Street Corp., owner, filed, May 24, 1926, a petition for a variation of the labor law, as cited in decision of the superintendent of buildings, affecting premises 35-37-39 West 47th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, N. B. App. No. 17-1925, reads:

"This amendment is disapproved with the following objections:

"10. Glazing of windows must conform to Section 264 of Labor Law.";

WHEREAS, the building is fireproof, 17 stories in height, 8 ft. 6 in. by 100 ft. 5 in. in area; OCCUPIED as a factory building, 25 per cent manufacturing, about 90 persons on each story; EQUIPPED with a sprinkler system and a fire alarm system; EXITS: A fire tower and one interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to install large lights of glass in front windows, the maximum size at 1st story, 2 ft. 2 in. by 10 ft. 9 in.; on 2nd story, 5 ft. 0 in. by 7 ft. 6 in.; all other windows will comply with the labor law; the petitioner contends that windows will be used as show windows; that to have smaller lights would seriously affect the renting figure.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only in far as it affects the windows on the two lowest stories on the street front of the building, on condition that the windows shall be equipped with approved metal frames, glazed with 1/4 in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

1-26-S.  
PETITIONER—Eidlitz and Hulse, for King Charlton Company, Inc., owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—East side of Hudson street, covering whole block front between King and Charlton streets, Borough of Manhattan.

APPEARANCES—  
For Petitioner—Cornelius J. Sullivan.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition denied.

THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Absent: Chief Kenlon.....	1

## THE RESOLUTION:

(731-26-S)

WHEREAS, Eidlitz and Hulse, for King Charlton Co., Inc., owner, filed, August 26, 1926, a petition for variation from

the requirements of the labor law as cited in a decision of the superintendent of buildings, affecting premises east side of Hudson street, covering whole block front between King and Charlton streets, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered July 27, 1926 (N. B. Applic. No. 334-1926), reads:

"2. Provide one exterior enclosed stair accessible from any point in the building. Section 270-273, Labor Law.";

and

WHEREAS, the proposed building is fireproof, 8 stories (111 ft. 0 in.) in height, 201 ft. 8 in. by 150 ft. in area; OCCUPIED as a factory building, 168 persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; ROOFS of adjoining buildings: 38 ft. lower; and

WHEREAS, the petitioner proposes to install two interior fireproof enclosed stairways at the centre of the new building now in course of construction, for the two required means of exit, instead of providing one interior and one exterior fireproof enclosed stairways as per the labor law for buildings exceeding 100 ft. in height; the petitioner contends that the 11 ft. in excess of height is due to the unusual height of each story, which was designed for the purpose of greater light and ventilation; furthermore, that the proposed arrangement complies with the section of the building code for fire towers in business buildings.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and that the petition be and it hereby is denied.

## APPLIANCES SUBMITTED FOR APPROVAL.

397-26-SA.

PETITIONER—Worthington Pump and Machinery Corporation.

SUBJECT—Approval of Worthington Triplex Vertical Power Pump.

APPEARANCES—

For Petitioner: W. S. Montgomery.

ACTION OF BOARD—Petition placed on Reserve Calendar, pending test and report by fire commissioner.

632-26-SA.

PETITIONER—Arcoil Heat Machine Company.

SUBJECT—Approval of Arcoil Heat Machine.

APPEARANCES—

For Petitioner: Edward Ward McMahon.

ACTION OF BOARD—Petition placed on Reserve Calendar, pending report of committee of the board.

Adjourned 5.35 p. m.

WILLIAM J. O'GORMAN, Secretary.

## PROPOSED AMENDMENTS TO FUEL OIL RULES

### FUEL OIL RULES

#### CONSTRUCTION AND INSTALLATION OF OIL BURNING EQUIPMENT AND STORAGE AND USE OF FUEL OILS

Adopted by the Board of Standards and Appeals November 6, 1919, Amended January 6, 1922, January 18, 1924.

##### Rule 1. Definition.

The term "fuel oil" under these rules shall include any liquid or mobile mixture, substance or compound derived from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

##### (a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

##### (b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

(c) Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

##### (d) Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, shall be used for domestic heating in buildings occupied by not more than two (2) families and in tenement houses and commercial plants. If used in tenement houses or commercial plants, a Certificate of Qualification for the operator of the plant will be required as per Rule 15.

(e) Where Grade A oil is used in place of Grade B oil in domestic installations it may be used under the requirements for Grade B installations.

(f) No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

##### Rule 2. Manner of Storage for Fuel Oil.

Fuel oil, to be used for heating and power purposes, shall be at all times stored in metal tanks with all openings or connections through the tops of the tanks.

##### Rule 3. General Location of Tanks for Fuel Oil.

(a) In all buildings fuel oil storage tanks shall be buried below the floor of the lowest story or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of any wall separating a building from the subway and, if practical, tanks shall be placed in a lower position than the roadbed of the subway.

##### Rule 4A. Location, Protection and Capacity Tanks for the Storage of Grade A Fuel Oil

###### Section 1. Inside of Buildings Above Ground.

(a) Where tanks cannot be buried and are located the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space between the tank and the walls and roof of the enclosure shall be completely filled with clean upland sand or earth well tamped.

(f) Not more than one tank shall be placed in an enclosure.

(g) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "h."

(h) In any building, if tanks properly enclosed and covered as above required are located in a fireproof detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

###### Section 2. Inside Buildings Below Ground.

(a) When a tank is buried beneath a building its capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4A, Section 1 (g) and (h).

(b) Tanks shall be buried underground below the level of any piping to which they may be connected with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, covered by at least six (6) inches of concrete which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(c) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with earth or sand. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

###### Section 3. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located

# RULES

outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth ( $1\frac{1}{4}$ ) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above ground, the tanks shall be not less than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

## Section 4. Outside of Buildings Below Ground.

(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

## Rule 4B. Location, Protection and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When not buried and located inside of a building they shall be placed on the lowest floor level and shall be enclosed in four inches of terra cotta or eight inches of approved masonry, and the aggregate capacity of such storage tanks shall not exceed 275 gallons.

(b) Tanks, when buried, shall be placed with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm soil foundation.

(c) Tanks shall be set on firm soil and surrounded with soft earth or sand and shall be complete encased with (6) inches of concrete, where soil conditions require.

(d) Where in the opinion of the Fire Commissioner extreme difference of grade or soil conditions would work a hardship an anti-syphon valve or other mechanical device to prevent syphoning approved by the U. S. Bureau of Standards, Fire Underwriters Laboratories or other laboratory recognized by the Board of Standards and Appeals, may be used.

### 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.

## Rule 5. Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half ( $1\frac{1}{2}$ ) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth ( $\frac{1}{4}$ ) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; of masonry or of impervious reinforced concrete. Earth-work embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half ( $1\frac{1}{2}$ ) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

## Rule 5A. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanket-gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half ( $\frac{1}{2}$ ) inch in size. The boilers shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit there shall be kept ready for use two portable fire extinguishers of not less than 1 quart capacity or other equivalent fire extinguishers for extinguishing oil fires.

## Rule 6. Material and Construction of Tanks for the Storage of Fuel Oil.

### Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Such plates shall be free from physical imperfections, such as laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked, or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$  in. shell,  $\frac{1}{4}$  in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$  in. shell,  $\frac{5}{16}$  in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$  in. shell,  $\frac{3}{8}$  in. heads.

Tanks over 120 inches in diameter to be of  $\frac{3}{8}$  in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should flat heads be used, they must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

# RULES

## (e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell  $\frac{1}{4}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{1}{4}$  in. pitch.

In shell  $\frac{5}{16}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{3}{8}$  in. pitch.

In shell  $\frac{3}{8}$  in. thick,  $\frac{3}{4}$  in. diameter rivets  $2\frac{1}{2}$  in. pitch.

## Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality required for cylindrical tanks, and of a thickness of not less than  $\frac{5}{16}$  of an inch.

(b) Corners may be made up by bending the plates or by the use of angles.

(c) Rivets in seams shall be  $\frac{5}{8}$  of an inch in diameter and spaced not more than  $2\frac{1}{4}$  inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must not be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of six (6) inches center to center on these members.

(f) When structural reinforcing members are tied together with braces, in order to reduce the effective length, the braces shall not be stressed higher than nine thousand (9,000) pounds per square inch taken on the minimum net section.

(g) If structural members are omitted and the sides of the tank are braced by means of rods or bars, these members should not be spaced farther apart than twenty-four (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch on the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars so that the bar will break before the connection will let go.

## Section 3. Vertical Storage Tanks Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality required for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be  $\frac{1}{4}$  inch and the minimum thickness of roof plates  $\frac{1}{8}$  inch.

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

(c) Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate seams shall be designed, with proper efficiency to meet requirements of above formula for shell plates.

(d) In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind will be permitted.

(e) Tanks for storage of grade B oil shall be constructed in accordance with the requirements of this rule, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than  $\frac{3}{16}$  inches in thickness.

(f) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

## Section 4. Welding.

(a) Where welding is to be used for a part or for the entire tank, the tank shall be fabricated as required under Rule 6, Section 1.

(b) All welded seams of plates shall be lapped or butted.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight, metal to metal, before welding and kept tight together during welding. Both inside and outside welds shall be of full 45 degree fillet.

Where a butt joint is used, it shall be of the 90 deg. double V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

(c) All heads shall be flanged, the straight part of the flange being not less than as follows:

For  $\frac{3}{16}$  inch heads,  $1\frac{3}{4}$  inch flange.

For  $\frac{1}{4}$  inch heads, 2 inch flange.

For  $\frac{5}{16}$  inch heads, 2 inch flange.

For  $\frac{3}{8}$  inch heads,  $2\frac{1}{4}$  inch flange.

For heads over 120 inches diameter the flange shall be increased in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a driving fit and the shell shall fit the head closely all around. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head welds for tanks of 1,100 gallon capacity or less and not over 48 inches in diameter, shall be of the 90 deg. single V type welded entirely through and reinforced not more than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the 90 deg. double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

(d) Where tanks are made up of two or more rings the welded longitudinal joints of adjacent sections shall break joints. At no point of a butt girth joint shall the sheet on one side be offset with the sheet on the other side in excess of one-half of the thickness of the plate. All butt girth joints shall be welded inside and out and reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

## Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar, asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

# RULES

## Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

## Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

## Rule 7. Tests of Tanks for the Storage of Fuel Oil.

### Section 1. Inside of Buildings Above or Below Ground or Outside of Buildings Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks, shall withstand after being set in place, a hydrostatic or air test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

(c) Tanks when subjected to an air pressure test shall be equipped with a safety relief valve set at not more than 32 lbs. per sq. in., and the air compressor device employed in the air testing of the tank shall be of low pressure type, equipped with an automatic pressure regulator set at not less than 35 lbs.

### Section 2. Horizontal Tanks Outside of Building, Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic or air test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

### Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

### Section 4. Test for Tanks. How Conducted.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic or air test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 or 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.

## Rule 8. Piping for Fuel Oil.

### Section 1. Installation of Piping.

(a) Piping shall be run as directly as practicable without sags, and, except as provided in Rule 11A, e, shall be laid so that where practicable pipes shall pitch toward the

supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.

### Section 2. Type and Material.

(a) All piping shall be of standard full weight brass, copper, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ( $\frac{1}{2}$ ) inch inside diameter shall be permitted; except that for Grade B oil  $\frac{1}{4}$ -inch diameter pipes may be used.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Tubing and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. No soldered connection shall be used. The length of tubing shall not exceed that required for direct connections to coupling.

### Section 3a. Tests for Piping. Grade A.

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ( $1\frac{1}{2}$ ) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

### Section 3b. Tests for Piping. Grade B.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.

### Section 3c. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes, when required, shall be not less than one size larger than supply pipe.

### Section 4. Relief Valves.

(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of the pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than  $\frac{1}{2}$  in. by  $\frac{1}{2}$  in. of the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) An automatic by-pass valve of size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with

# RULES

the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.

## Section 5. Fill Pipes.

(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) The fill pipe shall be provided with a trap or seal or carried within four (4) inches of the lowest point in the tank.

(d) The fill pipe shall be made up with screwed or flanged fittings and shall be oil tight and securely held in place.

## Section 6. Vent Pipes.

(a) An open, galvanized iron vent pipe without trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the same class of liquids is installed, vent pipes may be run into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.

(c) Vent openings in tanks shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation. Vents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter ( $1\frac{1}{4}$ ) inches in diameter.

(d) Vent pipes shall be provided with weather proof hoods and terminate outside the building above the street surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direction of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions, to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to tank trucks by tight connections and filled by pressure, a one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow to the fill box and shall be so set as to prevent the passage of vapor to the street.

## Section 7. Return Pipes from Burners.

Return lines from burners, where necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, and shall be connected into the suction line near the pump or into the storage tank. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.

## Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of hot water coils thermostatically controlled and the oil shall not be heated above one hundred and forty (140) degrees Fahrenheit.

## Rule 9A. Valves and Control of Flow for Grade A Fuel Oil.

(a) Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size

containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the hand-wheel. The use of packing which may be affected by oil or heat is prohibited.

(b) A shut-off valve shall be provided in discharge and suction lines near each pump; in discharge line from each tank as near the tank as practicable, and in branch lines near each burner.

## Rule 9B. Valves and Control of Flow for Grade B Fuel Oil.

(a) Readily accessible valves shall be provided near each burner and in the discharge line from each storage tank.

(b) A remote control for shutting off the supply of oil to the burners shall be provided.

(c) An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve. Automatic by-pass valves shall be set at not more than fifty (50) per cent above the maximum working pressure. This rule shall not apply to burners and pumps approved as a unit when provided with a pressure relief device.

## Rule 10. Oil Level Indicating Device for Grade A Fuel Oil.

A test well or gauging device shall be installed and so designed as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept locked when not in use.

## Rule 11A. Pumps for Grade A Fuel Oil.

(a) Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

(b) Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel oil for heating or steam.

(c) Pumps located in the same room where burners are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above ground storage tanks shall be located outside embankment walls, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

(e) Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a gravity of not more than eighteen (18) degrees Baume and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps.

## Rule 11B. Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11A (a).

## Rule 12. Burners for Fuel Oil.

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals. In domestic installations the burner shall be equipped with an overflow attachment or an automatic control to prevent flooding.

# RULES

## Rule 13. General Devices for Grade A Fuel Oil.

- (a) Devices which are subject to breakage and escape of oil shall be prohibited.
- (b) Thermometers with large clear reading scales, placed in thermometer wells with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

## Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

## Rule 15. Operation of Plant Other Than Domestic Installations Using Grade A Fuel Oil.

No fuel oil burning plant shall be operated unless in charge of a person holding a certificate of qualification from the Police Commissioner. A certificate of qualification will be required of each person who is directly in charge of the operation of the plant during each shift.

## Rule 16. Installation.

No fuel oil installation shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil installation shall be submitted to the Fire Commissioner for approval, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

## Rule 17. Auxiliary Tanks for Grade B Fuel Oil.

- (a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.
- (b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.
- (c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frames or cradles and secured by 2x $\frac{1}{8}$ -inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.
- (d) Where only an auxiliary tank as prescribed in these rules is used it shall in addition to complying with the requirements for auxiliary tanks comply with all requirements for the protection of a storage tank other than the enclosure.

## Rule 18. Pilot Light.

Automatic systems unless electrically ignited shall be so designed that the flame cannot be extinguished by operation of the automatic control valve and a pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not to be easily extinguished.

## Rule 19. Furnaces and Ranges.

- (a) Stoves, ranges, hot air furnaces or other devices, originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces in which vapors might collect are adequately vented, and if used shall be of such construction as to withstand the maximum temperature which the oil burning device to be installed may generate.
- (b) No damper for closing of more than eighty (80) per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

## Rule 20. Fire Protection for Grade A and Grade B oil in Domestic Installations in dwellings occupied by not more than two families and in old law tenements occupied by three or more families in new law tenements and in commercial plants.

- (a) No combustible material shall be stored within ten (10) feet of a furnace door.
- (b) In dwellings occupied by not more than two (2) families, any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back, or eight (8) feet from the front of the furnace shall be covered with approved fire retarding material; the ceiling except it be of fireproof construction shall be protected with approved fire retarding material extending four (4) feet beyond the sides and back and eight (8) feet from the front of the furnace. In old law tenement houses occupied by three or more families the heating apparatus shall be located in an enclosure the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors and the ceiling of the enclosure, if not of fireproof construction, shall be protected with approved fire retarding material; said enclosure shall be ventilated to the outer air; all vertical openings leading to cellar shall be protected with fireproof material not less than four (4) inches in thickness with all openings therein protected with self closing fireproof doors.
- (c) In new law tenement houses or in commercial plants the room or rooms in which the oil conveying piping and equipment is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra-cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have entrance from the street, court or yard only, and shall be ventilated to the outer air.
- Approved fire retarding material shall be any material complying with the rules of the Board of Standards and Appeals for fire retarding of garages.
- (d) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

## Rule 21. Systems Prohibited Where Grade B Fuel Oil Is Used.

The use of auxiliary tanks between pump and burner of the pressure type are prohibited. Systems, fed by gravity between the storage tank and the pump, or force systems, are prohibited.

## Rule 22. Use of Grade A or Grade B Fuel Oil.

- (a) These Rules shall not apply to gas companies storing or using fuel oil in the manufacture of illuminating gas for public use.
- (b) The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.
- (c) Modification: When for any reason it may be impracticable to comply strictly with the foregoing rules the fire commissioner shall have power to modify their provisions so that the spirit and substance thereof shall be complied with. Such modification shall be endorsed upon the permit over the signature of the fire commissioner.
- (d) These Rules shall take effect immediately.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the

hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth*, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

BOARD OF STANDARDS AND APPEALS,

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL,

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays, 9 a. m. to 12 noon.

communications should be addressed to the chairman of the board.

### CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, October 19, 1926, at 10 a. m.

Minutes of Regular Meeting, October 19, 1926, at 2 p. m.

Corrections.

Reserve Calendar.

Third Quarterly Report.

Proposed Amendments to the Fuel Oil Rules.

Progress Report.

### PUBLIC HEARINGS

NOV 3 1926

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, October 26, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Wednesday, November 3, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman

## CALL OF CLERK'S CALENDAR

**TUESDAY, OCTOBER 26, 1926, AT 2 P. M.**

*Building Zone Cases.*

1266-25-BZ  
APPLICANT—Philip J. Sinnott, for Louis J. Block, owner  
PREMISES—668-672 New Lots avenue, Brooklyn.  
APPLICATION, under section 21 of the building zone resolution,  
TO PERMIT in a business district the erection and maintenance of a gasoline selling station.

574-26-BZ  
APPLICANT—John J. Dunnigan, for Menlo Building Co. owner.  
PREMISES—3510 Webster avenue, The Bronx.  
APPLICATION, under sections 7c and 21 of the building zone resolution,  
TO PERMIT the extension from an unrestricted district into a business district of a proposed garage for the storage of more than five (5) motor vehicles.

643-26-BZ  
APPLICANT—John J. Dunnigan, for Breskap Realty Corp., owner.  
PREMISES—2850 Grand Concourse, The Bronx.  
APPLICATION, under section 21 of the building zone resolution,  
TO PERMIT in a residence district the alteration and conversion of occupancy in part of the first story from residence use to business use.

725-26-BZ  
APPLICANT—Brown Rolston, for Pie Bakeries of America, Inc., owner.  
PREMISES—North side of 2nd street, 170 ft. 9 in. east of Fourth avenue, Brooklyn.  
APPLICATION, under section 21 of the building zone resolution,  
TO PERMIT in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

605-26-BZ  
APPLICANT—Kramer and Kleinfeld, for Daniel Buonocore, owner.  
PREMISES—1767-1779 84th street, Brooklyn.  
APPLICATION, under section 21 of the building zone resolution,  
TO PERMIT in a business district the erection and maintenance of a poultry slaughter house.

**OCTOBER 26, 1926, 10 A. M.**

*Appeals from Administrative Orders.*

236-26-A—114-116 Fulton street, Manhattan.  
487-26-A—202-220 Meserole avenue, 90-106 Jewell street and 59-61 Moultrie street, Brooklyn.  
756-26-A—696-716 Pacific street, Brooklyn.  
474-26-A—231-239 Borden avenue, Long Island City, Borough of Queens.

# CALENDAR

- 502-26-A—141-145 Wooster street, Manhattan.  
 15-26-A—80-82 Greene street, Manhattan.  
 492-26-A—171 Thompson avenue, Long Island City, Borough of Queens.  
 757-26-A—4270 Martha avenue, The Bronx.

## Building Zone Applications

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, *Tuesday morning, October 5, 1926*, at 10 o'clock, in Room 1013, Municipal Building, on the following matters:

CAL. NO. 17-26-BZ—Application, January 6, 1926, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of John Welz, owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 168-190 East 98th street, Brooklyn.

CAL. NO. 108-26-BZ—Application, February 5, 1926, under sections 7b and 21 of the building zone resolution, of Eugene De Rosa, architect, on behalf of Emerdyke Realty Corp., owner, to permit the extension from a business district into a residence district of a proposed theatre building; premises 4915-4923 Broadway, Manhattan.

CAL. NO. 496-26-BZ—Application, June 2, 1926, under section 21 of the building zone resolution, of Willion F. Doyle, applicant, on behalf of The Debb Corp., owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises southeast corner of Jerome avenue and East Van Cortlandt avenue, The Bronx.

CAL. NO. 392-26-BZ—Application, May 6, 1926, under section 21 of the building zone resolution, of John J. Gilmartin, applicant, on behalf of N. Green, owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 301-303 Freeman avenue, Long Island City, Borough of Queens.

CAL. NO. 691-26-BZ—Application, August 10, 1926, under section 7c of the building zone resolution, of William F. Doyle, applicant, on behalf of S. S. Kresge Co., owner, to permit in a residence district extending from a business district the erection and maintenance of a business building; premises 462-464 Fifth avenue, Brooklyn.

CAL. NO. 624-26-BZ—Application, July 15, 1926, under section 21 of the building zone resolution, of John DeHart, applicant, on behalf of H. L. Corp., owner, to permit in a business district the erection and maintenance of a gasoline service station; premises southwest corner of Nassau boulevard and Kissena boulevard, Flushing, Borough of Queens.

CAL. NO. 607-26-BZ—Application, July 12, 1926, under section 21 of the building zone resolution, of Joseph B. Lynch, applicant, on behalf of Leo F. Gieberick, owner, to permit in a residence district the erection

tion of a garage for the storage of more than five (5) motor vehicles; premises 502-518 Avenue W and 2341-2351 East 5th street, Brooklyn.

THE RESOLUTION:

(584-26-A)

WHEREAS, Alfred Douglas Olena, for Metropolitan Resources, Inc., owner, filed, June 30, 1926, an appeal from a decision of the fire commissioner affecting premises 6600 Metropolitan avenue, Middle Village, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, rendered June 23, 1926, N. B. Application No. 693-26, reads:

"3. Standpipe equipment must be installed in each building over 10,000 square feet in area. Such equipment as well as its source supply must conform to rules of Board of Standards of Appeals."

and

WHEREAS, the proposed plant consists of three steel and concrete non-fireproof buildings, one story in height, 300 feet by 220 feet, 100 feet by 220 feet and 52 feet by 77 feet in area, on the premises of about 696,960 square feet in area; OCCUPIED for woodworking, dry kiln and storage, and boiler room, respectively; and

WHEREAS, the appellant proposes to equip the plant with a sprinkler system, a standpipe system, five (5) fire hydrants and one monitor nozzle, all connected up to an underground private main, extending around the three buildings, with connection to the 8-inch city water main now in Metropolitan avenue; to provide a 40,000 gallon underground reserve tank buried outside the building at front; a 1,000 gallon per minute pump suctioning from the reserve tank and connected up with the standpipe, sprinkler and fire hydrant system, the private main being checked against the street pressure when the pump is in action; and

WHEREAS, the appellant claims that: the 8-inch city water main in Metropolitan avenue is fed both ways; that the minimum pressure is 25 pounds (letter filed from bureau of water supply verifying claim); furthermore, the appellant contends that the pump will maintain a greater pressure in

# MINUTES

the standpipe and sprinkler systems than a gravity tank on the roof; that the proposed combined water systems will comply in all respects to the requirements of law and the rules of the board, except as to being separate and independent, also the omission of gravity tanks on the roof; that the proposed system provides adequate protection in case of fire; and

WHEREAS, at the public hearing this date the appeal was amended to show only item 3 as being before the board for consideration.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* only so far as it affects the standpipe in the dry kiln building, marked "B" on plans submitted in this appeal, is concerned, *on condition* that building "B" shall be equipped with an approved sprinkler system throughout; that the building shall be not increased in height, area or dimension; and that the open, surrounding driveway and space shall be maintained as indicated on these plans; and that the decision shall be complied with in all other respects.

626-26-A.

APPELLANT—Leonard W. Kautz, for J. D. Williams, Inc., owner.

SUBJECT—Appeal from order of the fire commissioner.

PREMISES AFFECTED—2941-47 Atlantic avenue, Brooklyn.

APPEARANCES—

For Appellant: Leonard W. Kautz.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin

THE RESOLUTION:

(626-26-A)

WHEREAS, Leonard W. Kautz, for J. D. Williams, Inc., owner, filed, July 16, 1926, an appeal from an order of the fire commissioner affecting premises 2941-2947 Atlantic avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated June 15, 1926, Order No. 4269-LC, reads:

"You are hereby notified that an inspection of the above premises, used for the storage of peroxide, etc. shows that the following must be done before the permit requested by you can be issued:

FORTHWITH

1. Install standpipe 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets, etc."; and

WHEREAS, the building is non-fireproof, 4 stories (54 feet 8 inches) in height, 90 feet by 140 feet (approximately 11,600 square feet) in area; OCCUPIED: basement, dressing furs, 35 persons; 1st story, dressing furs, 45 persons; 2nd story, fur dyeing and also dress manufacture, 75 persons; 3rd story, dress manufacture, 75 persons; 4th story, shoe manufacture, 50 persons; and

WHEREAS, appellant contends that the building faces on two street fronts, with a 10 foot alleyway on side and back; that it is equipped with an automatic sprinkler system; that the building is amply provided with exits; that night watchmen patrol the premises and that there are 5 city fire hydrants within 100 feet of the building;

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be equipped throughout with an approved sprinkler system; that the

building shall be not increased in height or area; that a rear and side court of not less than 10 feet in width, open clear to the sky, shall be maintained free and unobstructed; and *granted* only so long as the present occupancy and use shall remain unchanged.

THE RESOLUTION:

(552-26-BZ)

WHEREAS, Matthew Del Gaudio, for John Nista, owner, filed, June 17, 1926, an application, under the building zone resolution, to permit in a residence district the extension of the 1st story of an existing business building; premises 2496 Belmont avenue, The Bronx; and

WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting, October 19, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Belmont avenue is in a residence district, East Fordham Road is in a business district and East 189th street is in a business district; and

WHEREAS, the decision of the superintendent of buildings rendered May 26, 1926, re Alt. App. 195-1926, reads:

"Proposed extension of business use in building located in residence district contrary to Sec. 3, Zone Resolution."

and

WHEREAS, the existing building is of non-fireproof construction, three stories in height, with a frontage of 24 feet and a depth of 41 feet to be occupied as store and families; it is proposed to erect a non-fireproof, one story addition at the rear of the premises, and using it for a bake oven as an accessory to the existing store on front portion of building. The upper two stories of premises are occupied as dwellings; and

WHEREAS, the board deemed that applicant was not entitled to the relief requested under section 7-a of the building zone resolution nor on the ground of practical difficulties and unnecessary hardship.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed and that the application be and it hereby is denied.

530-26-BZ.

APPLICANT—Matthew W. Del Gaudio, for Edwin F. Branning, owner.

SUBJECT—Application (re: decision of the superintendent of buildings) under sections 7-e and 21 of the building zone resolution, to permit in a business district, the extension in height of an existing garage for the storage of more than five motor vehicles.

THE RESOLUTION:

(530-26-BZ)

WHEREAS, Matthew Del Gaudio, for Edwin Branning, owner, filed, June 9, 1926, an application, under the building zone resolution, to permit in a business district the extension in height of an existing garage for the storage of more than 5 motor vehicles; premises 1827 Sedgwick avenue, The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 19, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Sedgwick avenue, south of Tremont avenue is in a business district, Sedgwick avenue, north of Tremont avenue is in a residence district, W. Tremont avenue is in a business district and Cedar avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings rendered June 2, 1926, reads (Alt. App. 185-1926):

"1. Proposed extension in height of garage for more than five motor vehicles in business district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the existing fireproof building is one story on Sedgwick avenue front and has a frontage of 77 feet, 11 inches on Sedgwick avenue and 141 feet on West Tremont avenue (177th street). It is proposed to add an additional fireproof story to the building and occupy the entire premises as a garage for the storage of more than five motor vehicles; and

# MINUTES

WHEREAS, the board deemed that applicant was not entitled to the relief requested under section 7-e of the building zone resolution nor on the ground of practical difficulties and unnecessary hardship.

*Resolved* that the decision of the superintendent of buildings be and it hereby is *affirmed* and that the application be and it hereby is *denied*.

587-26-BZ.

APPLICANT—Keepland Development Corporation, owner.  
SUBJECT—Application (re: decision of the superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence use district the erection of a building to be occupied for business (stores).

Absent .....	0

THE RESOLUTION:

(587-26-BZ)

WHEREAS, Keepland Development Corp., owner, filed, July 1, 1926, an application, under the building zone resolution, to permit in a residence district the erection of a building to be occupied for business (stores); premises 941-949 Washington avenue, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 19, 1926, after due notice by publication in the Bulletin of the Board of Standard and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Montgomery street is in an unrestricted district, Washington avenue is in a residence district and Franklin avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 8, 1926 (Applic. 7618-1926), reads:

"Proposition contrary to the Zone Resolution.

"Art. II, Sec. 3.

"The erection of stores in a residential district.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, with a frontage of 91 ft. 6 in. and a depth of 50 ft. 0 in. to be occupied as stores in the first story; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution, on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted*, only so far as the ground story, street floor, of this plot is concerned, for use and occupancy as retail mercantile stores, *on condition* that a conforming dwelling use and occupancy, namely a six-story tenement house as agreed by attorney applicant, shall be erected; that the show window return on the Washington avenue front shall not exceed a depth of 12 ft. southerly from the corner of Montgomery street; that return drawings shall be made to this board for approval, before submission to the administrative departments having jurisdiction for consideration; and that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months.

60-25-BZ.

APPLICANT—Benenson Realty Company, owner.

SUBJECT: Application for reopening—extension of time in which to obtain permits—re: application (de-

cision of superintendent of buildings) to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—2115-37 Webster avenue, The Bronx.

APPEARANCES—

For Applicant: Harry A. Reffelt.

Negative .....	0
Absent .....	0

THE RESOLUTION:

(60-25-BZ)

WHEREAS, Edward Hoffman, for Benenson Realty Co., owner, filed, January 15, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 2115-2137 Webster avenue, The Bronx; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, June 9, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Webster avenue and Folin street are business districts and Tiebout avenue is a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 5, 1925, in acting on N. B. Application No. 3148-24, reads:

"1. Erection of proposed garage for storage of more than 5 motor vehicles in business district is contrary to provisions of the Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of fireproof construction, two stories in height, with a frontage of 200 ft. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, there was no opposition to the granting of this application on the part of adjoining property owners and there is a letter on file from the bureau of buildings supporting the basis of appeal under section 7 E of the building zone resolution; and

WHEREAS, this application was granted by the board at its meeting, June 9, 1925, on certain conditions and applicant requested a modification of the time limit and an extension of time.

*Resolved*, that the board of appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall be erected fireproof, not to exceed two (2) stories in height above grade; that the roof shall be of flat design and construction; the first story of the building to be not more than 50 ft. deep and the second story 100 ft. in depth; the rear and gable walls shall be unpierced throughout their entire height and length, other than two exits on open court within the property of the premises; that the skylights installed shall not be within 20 ft. of the gable wall, to be glazed with plain glass, equipped with wire guards above and below; the front elevation shall be finished in face brick with architectural terra cotta and stone trimmings of panel design, no roof signs to be erected or maintained, and that there shall be no advertising display on the front of the building other than one electric sign indicating the title of the garage;

*Resolved, further*, all permits necessary for the prosecution of the work shall be obtained within nine (9) months and the building completed within eighteen (18) months from October 19, 1926.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle..... 4

Negative ..... 0

Absent: Deputy Chief Martin ..... 1

## THE RESOLUTION:

(594-26-S)

WHEREAS, Buchman and Kahn, for 249 West 35th Street Corp., owner, filed, July 7, 1926, a petition for variation from the requirements of the labor law as cited in a decision of the superintendent of buildings, affecting premises 247-251 West 35th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered August 30, 1926, reads:

"14. Glazing of windows must conform to Section 264 of the Labor Law.";

and

WHEREAS, the building is fireproof, 16 stories in height, 69 ft. by 98 ft. 9 in. in area at 1st story, and 69 ft. by 83 ft. 4 in. in area above; OCCUPIED: 1st story, stores; upper stories, offices, show rooms and 25% manufacturing, approximately 60 persons per story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS:

two interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings in the front wall of the building, on the 1st and 2nd stories, glazed with plate glass, the maximum area of the glass on the 1st story being 7 ft. 0 in. by 8 ft. 0 in. and on the 2nd story being 2 ft. 0 in. by 4 ft. 0 in.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would detract from the architectural appearance of the building and would destroy the intended use of the lower two stories.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it is granted only so far as the windows on the street front of the first and second stories are affected by the order, on condition that the openings shall be equipped with approved metal frames, glazed with 3/4 in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

1409-18-S.

PETITIONER—E. M. Grella, for United American Publishing Company, Inc., present owner.

SUBJECT—Application for reopening—modification of resolution—re: variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—241 Lafayette street, Manhattan.

## APPEARANCES—

For Petitioner:—None.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition reopened and resolution modified.

## THE VOTE TO REOPEN AND MODIFY—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle..... 4

Negative ..... 0

Absent: Deputy Chief Martin ..... 1

## THE RESOLUTION:

(1409-18-S)

WHEREAS, Paul C. Schnitzler, attorney for Minnie E. Williams, owner, filed, August 6, 1918, a petition for variation of Sec. 79-b, labor law, as cited in order of the fire commissioner, affecting premises 241 Lafayette street, Borough of Manhattan; and

WHEREAS, this petition was denied by the board of standards and appeals, at its regular meeting, September 24, 1918, and restored to the calendar on application of Frank J. Schefcik, architect, by vote of the board, under date of November 12, 1918; and

WHEREAS, the order of the fire commissioner reads:

"Enclose stairway in fire-resisting material.";

and

WHEREAS, the building is non-fireproof, six stories high, 25 ft. 5 in. by 99 ft. 1 in. in area; OCCUPIED by a porcelain distributor in the basement, first and second stories; vacant in third story; occupied for storage in fourth story; by an instrument maker in the fifth story, and for the manufacture of leather goods in the sixth story, with a total of not more than 25 persons employed above first story at any time; the means of egress consisting of: (a) an interior stairway extending from first story to roof, enclosed in wood stud, lath and plaster partitions with wood doors at the openings; (b) a rear 60-degree fire escape with extension to roof, and ladder from lowest balcony to the rear of a fire house adjoining to the north; that the fire house to the north is of the same height as the building to the south and higher than the building in question; and

WHEREAS, petitioner proposes to cover left side of partition with fire-retarding material and provide kalamein doors at openings; and

# MINUTES

WHEREAS, this petition was granted by the board at its meeting, on November 26, 1918, on certain conditions, and applicant requests a modification of these conditions as to occupancy, and proposes to have an occupancy of 6 persons on the second story; 6 persons on the third story; 5 persons on the fourth story; storage on the fifth story, no persons, and 7 persons on the sixth story.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law and that the petition be and it hereby is granted *on condition* that the occupancy shall not exceed 25 persons above the first story.

## \*CORRECTION.

The minutes of the meeting of the board of standards and appeals held September 21, 1926, as they appeared in Bulletin No. 39, Vol. XI, are hereby corrected to read as follows:

## THE RESOLUTION:

(283-26-S)

WHEREAS, John J. Gilmartin, for David Herstein, owner, filed, April 5, 1926, a petition for a variation of the requirements of the labor law as cited in order of the fire commissioner, affecting premises 10 Washington place, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 1, 1925 (Order No. 81868-LD), reads:

"1. Provide an additional means of exit from the cellar and sub-cellar, said exit to be located at the rear of building, remote from the existing stairway in accordance with Section 271 of the Labor Law."

WHEREAS, the building is non-fireproof, 6 stories in height, 3 ft. by 90 ft. in area at first story and 43 ft. by 85 ft.

\*Correction—Words "first story" omitted and "cellar level" substituted in line 34.

in area above; OCCUPIED as a tenant factory; sub-cellar, storage, 2 persons; cellar, manufacture of hats, 8 persons; 1st story, offices, 15 persons; 2nd to 6th story, inclusive, manufacture of clothing, 20 persons on each story; EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from the sub-cellar to roof, enclosed in fire resisting partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to provide a second means of exit from cellar and sub-cellar by means of a double-rung iron ladder at front, extending up to the sidewalk and enclosed with fire-resisting partitions, with fireproof, self-closing doors at the openings.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that a 60-degree iron stairway shall be provided from the level of the sub-cellar at the rear with a balcony at the cellar and first story level, with a bridge from the cellar level balcony connecting to the premises at rear, Nos. 19-21 West 4th street; that an affidavit of consent from owner of premises to rear for the connecting bridge at the first story shall be filed with the fire commissioner.

# MINUTES

## \*CORRECTION.

The minutes of the meeting of the board of standards and appeals held July 13, 1926, as they appeared in Bulletin No. 29, Vol. XI, are hereby corrected to read as follows:

## THE RESOLUTION:

(644-25-BZ)

WHEREAS, H. I. Feldman, for Max Ackerman, owner,

\*Correction—Words "that a skylight be provided with wire wall ventilator over 1st story at rear, glazed with wire glass, protected with wire guards above" omitted in line 45.

filed, June 22, 1925, an application, under the building zone resolution, to permit in a business district, extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 301-305 East 97th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 24, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 97th street is in a busi-

# MINUTES

ness and unrestricted district; that Second avenue is in a business district, and that East 98th street is in a business and unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 18, 1925, reads:

"The location of a garage for the use of more than five cars in a business district is contrary to section 4 of the Building Zone Resolution.";

and  
WHEREAS, the proposed building is non-fireproof construction, two stories in height, with a frontage of 75 ft. 8½ in. and a depth of 100 ft. 11 in.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, applicant supported his basis of appeal under section 7-c of the building zone resolution, and the board deemed it would be an unnecessary hardship in this circumstance to deprive applicant of the use of his entire premises; and

WHEREAS, this application was granted by the board at its meeting, November 24, 1925, on certain conditions and

applicant requested a modification of these conditions as to rear yard line and proposes to omit the basement.

*Resolved*, that the board of standards and appeals do hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building be limited in height to two stories above grade that the rear and gable walls shall be unpierced throughout their entire height and length; that a rear yard of no less than 10 ft. in depth for full width of premises be provided at the level of 23 ft. above curb; that any skylight installed in the main roof shall be glazed with plain glass, protected with wire guards above and below; that there shall be no vehicular entrance within the business area of the premises; that the front elevation shall be finished with face brick and architectural terra cotta or stone trimmings that no roof sign shall be erected or maintained; that any signs erected shall be confined to within the unrestricted use area of the building; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

## RULES

### COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS.

*Recommended Resolution Adopted by the Board of Appeals,  
March 16, 1920, Under Cal. No. 549-17-BZ.*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed

under the building zone resolution in the absence of any definition therein to the contrary.

*Resolved*, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

## CONCRETE RULES

### USE OF HYDRATED LIME IN CONCRETE.

Adopted by the Board of Standards and Appeals, April 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights being the amount of lime which may be incorporated in each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

# RULES

## PROPOSED AMENDMENTS TO FUEL OIL RULES

### FUEL OIL RULES

#### CONSTRUCTION AND INSTALLATION OF OIL BURNING EQUIPMENT AND STORAGE AND USE OF FUEL OILS

Adopted by the Board of Standards and Appeals November 6, 1919, Amended January 6, 1922, January 18, 1924.

##### Rule 1. Definition.

The term "fuel oil" under these rules shall include any liquid or mobile mixture, substance or compound derived from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

##### (a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

##### (b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

(c) Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

##### (d) Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, may be used for domestic heating in buildings occupied by not more than two (2) families and in tenement houses and commercial plants. If used in tenement houses or commercial plants, a certificate of fitness for the operation of the plant will be required as per Rule 15.

(e) Where Grade A oil is used in place of Grade B oil in domestic installations it may be used under the requirements for Grade B installations.

(f) No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

##### Rule 2. Manner of Storage for Fuel Oil.

Fuel oil, to be used for heating and power purposes, shall be at all times stored in metal tanks with all openings or connections through the tops of the tanks.

##### Rule 3. General Location of Tanks for Fuel Oil.

(a) In all buildings fuel oil storage tanks shall be buried below the floor of the lowest story or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of any wall separating a building from the subway and, if practical, tanks shall be placed in a lower position than the roadbed of the subway.

##### Rule 4A. Location, Protection and Capacity Tanks for the Storage of Grade A Fuel Oil

###### Section 1. Inside of Buildings Above Ground.

(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and be roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space between the tank and the walls and roof of the enclosure shall be completely filled with upland sand or earth well tamped.

(f) Not more than one tank shall be placed in an enclosure.

(g) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "h."

(h) In any building, if tanks properly enclosed and covered as above required are located in a fireproof detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

###### Section 2. Inside Buildings Below Ground.

(a) When a tank is buried beneath a building its capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4A, Section 1 (g) and (h).

(b) Tanks shall be buried underground below the level of any piping to which they may be connected with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, covered by at least six (6) inches of concrete which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(c) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with earth or sand. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

###### Section 3. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located

# RULES

outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth ( $1\frac{1}{4}$ ) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above ground, the tanks shall be not less than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

## Section 4. Outside of Buildings Below Ground.

(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

## Rule 4B. Location, Protection and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When not buried and located inside of a building they shall be placed on the lowest floor level and shall be enclosed in four inches of terra cotta or eight inches of approved masonry, and the aggregate capacity of such storage tanks shall not exceed 275 gallons.

(b) Tanks, when buried, shall be placed with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and covered with reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm soil foundation.

(c) Tanks shall be set on firm soil and surrounded with soft earth or sand and shall be completely encased with (6) inches of concrete, where soil conditions require.

(d) Where in the opinion of the Fire Commissioner extreme difference of grade or soil conditions would work a hardship an anti-syphon valve or other mechanical device to prevent syphoning approved by the U. S. Bureau of Standards, Fire Underwriters Laboratories or other laboratory recognized by the Board of Standards and Appeals, may be used.

### 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.

## Rule 5. Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half ( $1\frac{1}{2}$ ) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth ( $\frac{1}{4}$ ) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; of masonry or of impervious reinforced concrete. Earth-work embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half ( $1\frac{1}{2}$ ) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

## Rule 5A. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanketing gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half ( $\frac{1}{2}$ ) inch in size. The boilers shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit there shall be kept ready for use two portable fire extinguishers of not less than 1 quart capacity or other equivalent fire extinguishers for extinguishing oil fires.

## Rule 6. Material and Construction of Tanks for the Storage of Fuel Oil.

### Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Such plates shall be free from physical imperfections, such as laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked, or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.  
Tanks 36 in. in diameter and less— $\frac{1}{4}$  in. shell,  $\frac{3}{8}$  in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$  in. shell,  $5/16$  in. heads.

Tanks 73 to 120 in. in diameter— $5/16$  in. shell,  $3/8$  in. heads.

Tanks over 120 inches in diameter to be of  $3/8$  in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should flat heads be used, they must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

# RULES

## (e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell  $\frac{1}{4}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{1}{4}$  in. pitch.

In shell  $\frac{5}{16}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{3}{8}$  in. pitch.

In shell  $\frac{3}{8}$  in. thick,  $\frac{3}{4}$  in. diameter rivets  $2\frac{1}{2}$  in. pitch.

## Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality required for cylindrical tanks, and of a thickness of not less than  $\frac{5}{16}$  of an inch.

(b) Corners may be made up by bending the plates or by the use of angles.

(c) Rivets in seams shall be  $\frac{5}{8}$  of an inch in diameter and spaced not more than  $2\frac{1}{4}$  inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must not be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of six (6) inches center to center on these members.

(f) When structural reinforcing members are tied together with braces, in order to reduce the effective length, the braces shall not be stressed higher than nine thousand (9,000) pounds per square inch taken on the minimum net section.

(g) If structural members are omitted and the sides of the tank are braced by means of rods or bars, these members should not be spaced farther apart than twenty-four (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch on the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars so that the bar will break before the connection will let go.

## Section 3. Vertical Storage Tanks Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality required for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be  $\frac{1}{4}$  inch and the minimum thickness of roof plates  $\frac{1}{8}$  inch.

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

(c) Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate seams shall be designed, with proper efficiency to meet requirements of above formula for shell plates.

(d) In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind will be permitted.

(e) Tanks for storage of grade B oil shall be constructed in accordance with the requirements of this rule, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than  $\frac{3}{16}$  inches in thickness.

(f) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

## Section 4. Welding.

(a) Where welding is to be used for a part or for the entire tank, the tank shall be fabricated as required under Rule 6, Section 1.

(b) All welded seams of plates shall be lapped or butted.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight, metal to metal, before welding and kept tight together during welding. Both inside and outside welds shall be of full 45 degree fillet.

Where a butt joint is used, it shall be of the 90 degree double V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

(c) All heads shall be flanged, the straight part of the flange being not less than as follows:

For  $\frac{3}{16}$  inch heads,  $1\frac{1}{4}$  inch flange.

For  $\frac{1}{4}$  inch heads, 2 inch flange.

For  $\frac{5}{16}$  inch heads, 2 inch flange.

For  $\frac{3}{8}$  inch heads,  $2\frac{1}{4}$  inch flange.

For heads over 120 inches diameter the flange shall be increased in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a driving fit and the shell shall fit the head closely all around. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head welds for tanks of 1,100 gallon capacity or less and not over 48 inches in diameter, shall be of the 90 degree single V type welded entirely through and reinforced not more than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the 90 degree double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

(d) Where tanks are made up of two or more rings the welded longitudinal joints of adjacent sections shall be break joints. At no point of a butt girth joint shall the sheet on one side be offset with the sheet on the other side in excess of one-half of the thickness of the plate. All butt girth joints shall be welded inside and out and reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

## Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar, asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

# RULES

## Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

## Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

## Rule 7. Tests of Tanks for the Storage of Fuel Oil.

### Section 1. Inside of Buildings Above or Below Ground or Outside of Buildings Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks, shall withstand after being set in place, a hydrostatic or air test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

(c) Tanks when subjected to an air pressure test shall be equipped with a safety relief valve set at not more than 32 lbs. per sq. in., and the air compressor device employed in the air testing of the tank shall be of low pressure type, equipped with an automatic pressure regulator set at not less than 35 lbs.

### Section 2. Horizontal Tanks Outside of Building, Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic or air test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

### Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

### Section 4. Test for Tanks. How Conducted.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic or air test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 or 3 inches of the seam, and on each side of the seam, the blows to be as hard as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.

## Rule 8. Piping for Fuel Oil.

### Section 1. Installation of Piping.

(a) Piping shall be run as directly as practicable without sags, and, except as provided in Rule 11A, e, shall be laid so that where practicable pipes shall pitch toward the

supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.

### Section 2. Type and Material.

(a) All piping shall be of standard full weight brass, copper, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ( $\frac{1}{2}$ ) inch inside diameter shall be permitted; except that for Grade B oil  $\frac{1}{4}$ -inch diameter pipes may be used.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Tubing and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. No soldered connection shall be used. The length of tubing shall not exceed that required for direct connections to coupling.

### Section 3a. Tests for Piping. Grade A.

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ( $1\frac{1}{2}$ ) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

### Section 3b. Tests for Piping. Grade B.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.

### Section 3c. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes, when required, shall be not less than one size larger than supply pipe.

### Section 4. Relief Valves.

(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of the pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than  $\frac{1}{2}$  in. by  $\frac{1}{2}$  in., of the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) An automatic by-pass valve of size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with

# RULES

the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.

## Section 5. Fill Pipes.

(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) The fill pipe shall be provided with a trap or seal or carried within four (4) inches of the lowest point in the tank.

(d) The fill pipe shall be made up with screwed or flanged fittings and shall be oil tight and securely held in place.

## Section 6. Vent Pipes.

(a) An open, galvanized iron vent pipe without trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the same class of liquids is installed, vent pipes may be run into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.

(c) Vent openings in tanks shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation. Vents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter (1¼) inches in diameter.

(d) Vent pipes shall be provided with weather proof hoods and terminate outside the building above the street surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direction of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions, to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to tank trucks by tight connections and filled by pressure, a one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow to the fill box and shall be so set as to prevent the passage of vapor to the street.

## Section 7. Return Pipes from Burners.

Return lines from burners, where necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, and shall be connected into the suction line near the pump or into the storage tank. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.

## Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of hot water coils thermostatically controlled and the oil shall not be heated above one hundred and forty (140) degrees Fahrenheit.

## Rule 9A. Valves and Control of Flow for Grade A Fuel Oil.

(a) Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size

containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the hand-wheel. The use of packing which may be affected by oil or heat is prohibited.

(b) A shut-off valve shall be provided in discharge and suction lines near each pump; in discharge line from each tank as near the tank as practicable, and in branch lines near each burner.

## Rule 9B. Valves and Control of Flow for Grade B Fuel Oil.

(a) Readily accessible valves shall be provided near each burner and in the discharge line from each storage tank.

(b) A remote control for shutting off the supply of oil to the burners shall be provided.

(c) An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve. Automatic by-pass valves shall be set at not more than fifty (50) per cent above the maximum working pressure. This rule shall not apply to burners and pumps approved as a unit when provided with a pressure relief device.

## Rule 10. Oil Level Indicating Device for Grade A Fuel Oil.

A test well or gauging device shall be installed and so designed as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept locked when not in use.

## Rule 11A. Pumps for Grade A Fuel Oil.

(a) Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

(b) Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel oil for heating or steam.

(c) Pumps located in the same room where burners are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above ground storage tanks shall be located outside embankment walls, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

(e) Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a gravity of not more than eighteen (18) degrees Baume and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps.

## Rule 11B. Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11A (a).

## Rule 12. Burners for Fuel Oil.

The burner mechanism shall be of a recognized type, approved by the Board of Standards and Appeals. In domestic installations the burner shall be equipped with an overflow attachment or an automatic control to prevent flooding.

# RULES

## Rule 13. General Devices for Grade A Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer wells with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

## Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

## Rule 15. Operation of Plant Other Than Domestic Installations Using Grade A Fuel Oil.

No fuel oil burning plant shall be operated unless in charge of a person holding a certificate of fitness as issued by the fire department. A certificate of fitness will be required for each person who is directly in charge of the operation of the plant at any and all times.

This certificate of fitness will be required for all Grade A installations, and Grade B installations in dwellings or more than two families and in commercial plants. This requirement as to Grade A installations shall not apply to dwellings of less than three families equipped with Grade B installations using Grade A oil.

## Rule 16. Installation.

No fuel oil installation shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil installation shall be submitted to the Fire Commissioner for approval, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

## Rule 17. Auxiliary Tanks for Grade B Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frames or cradles and secured by 2x1/4-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

(d) Where only an auxiliary tank as prescribed in these rules is used it shall in addition to complying with the requirements for auxiliary tanks comply with all requirements for the protection of a storage tank other than the enclosure.

## Rule 18. Pilot Light.

Automatic systems unless electrically ignited shall be so designed that the flame cannot be extinguished by operation of the automatic control valve and a pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not to be easily extinguished.

## Rule 19. Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices, originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces in which vapors might collect are adequately vented, and if used shall be of such construction as to withstand the maximum temperature which the oil burning device being installed may generate.

(b) No damper for closing of more than eighty (80) per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

## Rule 20. Fire Protection for Grade A and Grade B oil in Domestic Installations in dwellings occupied by not more than two families and in old law tenements occupied by three or more families in new law tenements and in commercial plants.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) In dwellings occupied by not more than two (2) families, any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back, or eight (8) feet from the front of the furnace shall be covered with approved fire retarding material; the ceiling except it be of fireproof construction shall be protected with approved fire retarding material extending four (4) feet beyond the sides and back and eight (8) feet from the front of the furnace. In old law tenement houses occupied by three or more families the heating apparatus and oil burning device shall be located in an enclosure the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors and the ceiling of the enclosure, if not of fireproof construction, shall be protected with approved fire retarding material; said enclosure shall be ventilated to the outer air; all vertical openings leading to cellar shall be protected with fireproof material not less than four (4) inches in thickness with all openings therein protected with self-closing fireproof doors.

(c) In new law tenement houses or in commercial plants the room or rooms in which the heating apparatus and oil burning device is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra-cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have entrance from the street, court or yard only, and shall be ventilated to the outer air.

Approved fire retarding material shall be any material complying with the rules of the Board of Standards and Appeals for fire retarding of garages.

(d) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

## Rule 21. Systems Prohibited Where Grade B Fuel Oil Is Used.

The use of auxiliary tanks between pump and burner of the pressure type are prohibited. Systems, fed by gravity between the storage tank and the pump, or force systems, are prohibited.

## Rule 22. Use of Grade A or Grade B Fuel Oil.

(a) These Rules shall not apply to gas companies storing or using fuel oil in the manufacture of illuminating gas for public use.

(b) The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(c) Modification: When for any reason it may be impracticable to comply strictly with the foregoing rules the fire commissioner shall have power to modify their provisions so that the spirit and substance thereof shall be complied with. Such modification shall be endorsed upon the permit over the signature of the fire commissioner.

(d) These Rules shall take effect immediately.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the

hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth*, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of a cases promptly, for the reason that the pendency of a appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

THE LIBRARY OF THE

### CALL OF CLERK'S CALENDAR

NOV 20 1926  
UNIVERSITY OF ILLINOIS  
The Clerk's Calendar consists of applications under the Building-Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Wednesday, November 3, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, November 9, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, *Chairman*

THE VOTE TO WITHDRAW—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5

Negative ..... 0

Absent ..... 0

3-25-A.

APPELLANT—New Way Hydrogen Gas Generator Co., Inc., lessee.

SUBJECT—Appeal from order of fire commissioner.

REMISES AFFECTED—336 Coney Island avenue, Brooklyn.

APPEARANCES—

For Appellant: None.

ACTION OF BOARD—Appeal dismissed for lack of prosecution.

THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle and

Deputy Chief Martin ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(888-25-A)

WHEREAS, the New Way Hydrogen Gas Generator Co., filed, September 1, 1925, an appeal with the board of standards and appeals from an order of the fire commissioner, affecting premises 336 Coney Island avenue, Borough of Brooklyn; and

WHEREAS, the appellant failed to complete his papers although duly notified to do so.

*Resolved*, that the appeal be and it hereby is *dismissed* for lack of prosecution.

548-26-A.

APPELLANT—Amsco Realty Corp., owner.

SUBJECT—Application for reopening, reconsideration, re appeal from decision of fire commissioner.

PREMISES AFFECTED—47 Ann street, Manhattan.

APPEARANCES—

For Appellant: Edward G. Reilly.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal reopened and granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE TO REOPEN AND GRANT ON CONDITION—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle and

Deputy Chief Martin ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(548-26-A)

WHEREAS, E. G. Riley, for Amsco Realty Corp., owner, filed, June 16, 1926, an appeal from a decision of the fire commissioner, affecting premises 47 Ann street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, rendered May 26, 1926 (Alt. Applic. 2760-24), reads:

"1. Not more than 400 sprinkler heads shall be controlled by one dry pipe (Type A) valve as per Rule 27a.";

and

WHEREAS, the building is non-fireproof, 7 stories, cellar and sub-cellar (80 ft.) in height, 28 ft. by 136 ft., about 3,600 sq. ft. in area; OCCUPIED: sub-cellar, stock room; cellar, packing, 8 persons; 1st story, offices, 19 persons; 2nd story, engraving, 20 persons; 3rd story, stock room; 4th story, engraving, 15 persons; 5th story, electro-plating, 15 persons; 6th story, manufacture of jewelry, 25 persons; 7th story, manufacture of jewelry, 38 persons; EQUIPPED with a sprinkler system; and

WHEREAS, the appellant proposes to install 498 one-half inch standard sprinkler heads controlled by one dry pipe (Type A) valve, instead of 400 heads as restricted in Rule 27(a) for sprinkler equipment; the appellant contends that the New York Fire Insurance Exchange has approved the sprinkler equipment as herein proposed; furthermore, the appellant has reduced the occupancy of the building on the 3rd story to storage only; and

WHEREAS, this appeal was denied by the board, October 5, 1926, and reopened by vote of the board.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified* and the appeal be and it hereby is *granted on condition* that an approved sprinkler system be

# MINUTES

installed and maintained and that the number of heads shall not exceed by more than twenty-five per cent the requirement of the sprinkler rules of the board of standards and appeals now in force; that the dry pipe valve be equipped with an accelerator or an exhauster acceptable to the fire department.

236-26-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Fulton Street Leasing Corp., lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—114-116 Fulton street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	4
Negative .....	0
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(236-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Fulton Street Leasing Corp., lessee, filed, March 20, 1926, an appeal from an order of the fire commissioner, affecting premises 114-116 Fulton street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 3, 1925 (Order No. 74633-F), reads:

"1. Provide a non-automatic sprinkler system in cellar, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals on May 24, 1917, as amended May 2, 1918, and January 21, 1919, effective February 17, 1919, and in the rules and regulations of the Fire Department and in connection therewith provide an automatic fire alarm complete with Central Office connection."

and

WHEREAS, the building is non-fireproof, six (6) stories (76 ft. 3 in.) in height, 50 ft. 4 in. by 83 ft. 9 in. in area at 1st story and 50 ft. 4 in. by 69 ft. 9 in. in area above; the building is divided at cellar and 1st story by a brick party wall; OCCUPIED: (No. 114), cellar, woodworking, 6 persons; 1st story, store, 6 persons; (No. 116), cellar, stock room; 1st story, stationery shop, 9 persons; (Nos. 114-116), 2nd story, restaurant, 10 persons; 3rd story, printing and manufacture of jewelry, 19 persons; 4th, 5th and 6th stories, manufacture of jewelry, 14 persons on each story; and

WHEREAS, the appellant claims that he has installed an approved sprinkler system in the cellar of No. 114 Fulton street, and proposes to install a thermostatic fire alarm also in the same cellar; the appellant contends that there is no connection between the cellars and first stories of No. 114 and No. 116 Fulton street; furthermore, that the occupancy, except in the cellar of No. 114, does not warrant the installation of a sprinkler.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is granted affecting No. 116 and *denied* as to No. 114 on condition that the cellar of these buildings shall be separated by walls of approved masonry, unpierced throughout the entire height and length, and that the cellar ceiling and stairways of No. 116 shall be fire-retarded in accordance with the rules of the board of standards and appeals, and that any openings in the cellar stairway shall be protected with self-closing, fireproof doors, and *granted* only so long as the existing occupancy of cellar remain unchanged.

487-26-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Esther Hurwitz and Dora Kaback, owners.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—202-220 Meserole avenue, 90-106 Jewell street and 59-61 Moultrie street, Brooklyn.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	4
Negative .....	0
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(487-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Esther Hurwitz and Dora Kaback, owners, filed, May 28, 1926, an appeal from an order of the fire commissioner, affecting premises 202-220 Meserole avenue, 90-106 Jewell street and 59-61 Moultrie street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated May 7, 1926 (No. 95247), reads:

"1. Install a standpipe system with risers 4 in. in diameter, tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½" regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure. \* \* \*";

and

WHEREAS, the premises consist of a group of five buildings, four of which are 1 story in height and one two stories in height with open yards, all the buildings being less than 5,000 sq. ft. in area with the exception of one building which is 6,500 sq. ft. in area, the premises being occupied for a dyeing establishment, 38 persons in the first story and 17 persons in the second story; and

WHEREAS, the appellant claims that the building is equipped with a fire alarm system; that fire pails are provided on the 2nd story; that due to the method of dyeing, the greater portion of floors are flooded with water; that there are three fire hydrants facing the premises (one on each street front); that the building is supervised by a watchman at night; furthermore, the appellant proposes to provide fire extinguishers on the 2nd story.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the buildings as now subdivided remain substantially unchanged; that the buildings be not increased in height or area; that the requirements of the fire department as to the provision and distribution of fire pails shall be complied with, and, further, only so long as conditions as to the existing occupancy and use remain unchanged.

756-26-A.

APPELLANT—Pittsburgh-Des Moines Steel Company, for News Syndicate, Inc., owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—696-716 Pacific street, Borough of Brooklyn.

APPEARANCES—

For Appellant: S. Selman, G. B. Tanis, H. A. Caussirat, Luke McVeigh, W. C. Graham.

For Administration: Inspectors Carroll and Maher of fire department.

ACTION OF BOARD—Appeal denied.

# MINUTES

## THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Absent .....	0

## THE RESOLUTION:

(756-26-A)

WHEREAS, Pittsburgh-Des Moines Steel Co., for the News  
Indicate, Inc., owner, filed, September 11, 1926, an appeal  
from a decision of the fire commissioner, affecting prem-  
ises 696-716 Pacific street, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, re N. B.  
No. 2086-1926, dated August 25, 1926, reads:

"1. Sprinkler tank may not exceed 25,000 gallons  
unless approved by the Board of Standards and Appeals.

"2. Sprinkler and standpipe tanks must be separate  
and distinct.";

WHEREAS, the building now under construction is fireproof,  
86 ft. in height, 223 ft. 0 in. by 110 ft. 0 in. in  
area; OCCUPANCY: publishing house; and

WHEREAS, the appellant proposes to install a sprinkler  
system, also a standpipe system, fed from two combined  
tanks: a cylindrical standpipe tank of 3,500 gallon capacity,  
located in the centre of a larger cylindrical tank, which permits  
a capacity of 41,700 gallons for the sprinkler system; and

WHEREAS, the appellant claims that a similar structure of  
combined tanks was constructed at East 134th street  
and Walnut avenue under approval of the fire commissioner,  
where the capacity was 25,000 gallons; furthermore, the ap-  
pellant contends that the water in the tanks is entirely  
separate and distinct—they will have a separate system of  
pipes to each tank, separate overflow and quick emptying  
valves; otherwise, the systems will conform to the rules  
of the board.

Resolved, that the decision of the fire commissioner be  
and it hereby is *affirmed*, and the appeal be and it hereby is  
granted.

3-A.

APPELLANT—G. A. & H. Boehm, for Nathan Dorsky  
& Bro., lessee.

SUBJECT—Appeal from decision of fire commissioner.  
PREMISES AFFECTED—80-82 Greene street, Man-  
hattan.

## APPEARANCES—

For Appellant: George A. Boehm.

For Administration: Inspectors Meyer and  
Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(15-26-A)

WHEREAS, G. A. & H. Boehm, for Constance J. Lieval,  
owner, filed, January 6, 1926, an appeal from an order of  
the fire commissioner, affecting premises Nos. 80-82 Greene  
street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated De-  
cember 16, 1925 (Order No. 31627-LC), reads:

"You are hereby notified that an inspection of prem-  
ises 80-82 Greene street, Borough of Manhattan, used  
for the storage and use of combustible fibre, shows that  
the following must be done before permit requested by  
you can be issued:

"1. Protect the ceiling, 1st story and all vertical  
openings by a covering of approved fire retarding mate-  
rial.";

WHEREAS, the building is non-fireproof, 5 stories (75 ft.  
8 in.) in height, 50 ft. by 94 ft. in area at 1st story and 50  
ft. by 84 ft. in area above; OCCUPIED for factory pur-  
poses, 50 persons on each story; and

WHEREAS, the appellant claims that the building is equipped  
with a two-source sprinkler system; that the ceiling of the  
premises affected by the fire department order is covered  
with plaster of three coat work; that the stair enclosure is  
of fire-resisting materials; furthermore, the appellant con-  
tends that there is not more than 15 tons of tightly baled  
nor more than 5 tons of loose wool cloth clippings kept  
on the premises at any time.

Resolved, that the order of the fire commissioner be and  
it hereby is *modified*, and the appeal be and it hereby is  
granted on condition that the stock of loose woolen clip-  
pings shall be restricted to the first story and shall not, at  
any time, exceed three ton loose; that the existing approved  
two-source wet sprinkler system shall be maintained, and  
that all regal requirements as to the existing interior stair-  
way enclosure shall be approved and maintained; that the  
stairway below the first story shall be enclosed in accordance  
with the requirements of the labor law and that any openings  
in floor therein shall be equipped with automatic trap doors.

492-26-A.

APPELLANT—Ira I. Slomon, owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—171 Thompson avenue, L. I.  
City, Borough of Queens.

## APPEARANCES—

For Appellant: Ira I. Slomon, John P. Priol.

For Administration: Inspector Carroll of fire de-  
partment.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(492-26-A)

WHEREAS, Ira I. Slomon, owner, filed, June 1, 1926, an  
appeal from a decision of the fire commissioner, affecting  
premises 171 Thompson avenue, Long Island City, Borough  
of Queens; and

WHEREAS, the decision of the fire commissioner, rendered  
May 6, 1926 (Alt. Applic. No. 2664-24), reads:

"2. Floors and roof must be portland cement con-  
crete at least 6" thick or brick masonry 8" thick.";

and  
WHEREAS, the building is of concrete construction, steel  
roof framing unprotected, one story in height, 20 ft. by 22  
ft. in area; OCCUPIED for the manufacture of rubber  
cement, one person; and

WHEREAS, the appellant proposes to construct a No. 26  
gauge metal roof on open steel trusses, in lieu of a 6 in.  
concrete roof as required by law; to use the structure as a  
mixing room for the manufacture of inflammable mixtures;  
the appellant contends that the roof he proposes is light in  
weight and less dangerous in case of explosion than a 6 in.  
concrete roof; and

WHEREAS, this appeal was previously denied and was re-  
opened by vote of the board.

Resolved, that the decision of the fire commissioner be  
and it hereby is *modified*, and the appeal be and it hereby is  
granted only so far as the construction of the roof is in-  
volved on condition that the construction otherwise comply  
with the regulations in all respects and that the roof cover-  
ing shall be of corrugated metal, supported by steel truss  
frame, in accordance with the drawings submitted in this  
appeal.

757-26-A.

APPELLANT—Wilma Denes, owner.

SUBJECT—Appeal from order of fire commissioner.

# MINUTES

PREMISES AFFECTED—4270 Martha avenue, The Bronx.

## APPEARANCES—

For Appellant: Jacob Ansbacher, Wilma Denes.  
For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and  
Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(757-26-A)

WHEREAS, Jacob Ansbacher, for Wilma Denes, owner, filed, September 13, 1926, an appeal from an order of the fire commissioner, affecting premises 4270 Martha avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated January 26, 1926 (Order No. 32834-LC), reads:

"Have plan No. 1979-25 approved.

"Have fuel oil burning device or apparatus for Grade B Fuel Oil approved by Board of Standards and Appeals, as per Rule 35-a of the Fuel Oil Rules.";

and

WHEREAS, the building is non-fireproof, 2½ stories in height, 51 ft. 6 in. by 28 ft. 0 in. in area; OCCUPIED as a private residence; a fuel oil burning system has been installed in the cellar, consisting of an outside storage tank of 550 gallon capacity buried 3 ft. 0 in. below ground level, with all necessary piping connected with a Universe Automatic Oil Burner located in the cellar; and

WHEREAS, the appellant proposes to comply with all requirements of the fire commissioner as to the installation of the fuel oil burning system except as to the burner; the appellant contends that there are other similar appeals before the board as to the same burner and requests permission to operate the system pending decision of the board.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, for a temporary period of ninety days, pending the determination of the board on a petition for the approval of the burner for general use, *on condition* that the mechanical equipment of this installation otherwise complies with the fuel oil rules of the board of standards and appeals

## THE RESOLUTION:

(17-26-BZ)

WHEREAS, William F. Doyle, for John Welz, owner, filed, January 6, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 168-190 East 98th street, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 26, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 98th street is in a business district and Rockaway Parkway is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 5, 1926, reads:

"Proposition contrary to the Zone Resolution, Art. 2, Sec. 4A, 15.

"The erection of a public garage for more than five vehicles in a business district."

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 200 ft. and a depth of 120 ft., to be occupied as a garage; and

WHEREAS, the application has been supported by the filing of substantial consents of property owners immediately affected and the board deemed applicant entitled to relief on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone regulations and that the application be and it hereby is *granted on condition* that the building shall not exceed one story in height above grade; that the rear and gable walls shall be unpierced throughout their entire height and length; that the front elevation shall be finished in face brick with architectural terra cotta or stone trimmings; that there shall be no roof signs erected; that the exterior of the rear wall shall be finished with light colored face brick; that any gasoline storage equipment installed shall be located at the extreme front of the building; that all permits required for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

392-26-BZ.

THE RESOLUTION:

(392-26-BZ)

WHEREAS, John J. Gilmartin, for N. Green, owner, filed, May 6, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 301-303 Freeman avenue, northeast corner Radde street, Long Island City, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 26, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Freeman street, Radde street and Academy street are in business districts; and

WHEREAS, the decision of the fire commissioner, rendered February 10, 1926 (re Alt. 250-26), reads:

"A gasoline service station may not be permitted in a Business District, Appeal may be taken to the Board of Appeals."

and

WHEREAS, it is proposed to bury two 550-gallon gasoline tanks and erect two pumps on the lot; there are existing garages facing Radde street and a frame residence building facing Freeman street on the premises; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the decision of the fire commissioner be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

691-26-BZ.

APPLICANT—William F. Doyle, for S. S. Kresge Co., owner.

SUBJECT—Application (re decision of superintendent of buildings) under section 7 (c) of the building zone resolution, to permit in a residence district the erection and maintenance of a business building.

PREMISES AFFECTED—462-464 5th avenue, Brooklyn.

THE RESOLUTION:

(624-26-BZ)

WHEREAS, John DeHart, for H. L. Corp., owner, filed, July 15, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises southwest corner Nassau boulevard and Kissena boulevard, Flushing, Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 26, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Nassau boulevard, Kissena boulevard and Reeves avenue are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered June 25, 1926 (Applic. 10529-26), reads:

"Your application for a permit on the above location has been rejected as an examination of your drawings and applications show that corrections must be made in the form of Amendment or subsequent statements in triplicate, typewritten and filed with original papers, as they do not conform with the Laws, Rules and regulations for the following reasons:

"Contrary to Art. 2, Section 4, Zone Law.";

and

WHEREAS, the proposed building is of non-fireproof construction, one story in height, with a frontage of 22 ft. 0 in. and a depth of 25 ft. 0 in. to be occupied as a gasoline service station; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship in carrying out the strict letter of the zoning regulations.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that all permits required for the prosecution of the work shall be obtained within six months and the work completed within one year from the date of this action; that there shall be erected on the westerly boundary line of the property, from Nassau boulevard to Reeves street, a brick wall, not less than fifteen (15) feet in height, finished with face brick; that the proposed structure shall be erected substantially in accordance with the design and drawings filed in this case; any arc lights or lamps erected on the exterior or in the open on this property shall be protected with reflectors at the rear of same to provide against glare or reflection on property to the west.

Absent: Chief Kenlon .....	1

THE RESOLUTION:

(616-26-BZ)

WHEREAS, Pythian Temple Association, owner, filed, July 13, 1926, an application, under the building zone resolution, to permit in a residence and "B" area district the erection and maintenance of a building with a rear yard less in depth than that required by the zone resolution; premises 135-145 West 70th street, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 26, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 70th street, West 71st street and Broadway are in residence use and "B" area districts; and

WHEREAS, the decision of the superintendent of buildings, rendered July 13, 1926 (N. B. 204-26), reads:

"Rear yard should comply with Building Zone Resolution Section 12 and Section 17.";

and

WHEREAS, the proposed building is to be of fireproof construction, 7 stories and pent house in height, with a frontage of 112 ft.  $\frac{3}{8}$  in. and a depth of 100 ft. 5 in. at 1st story, 90 ft. 5 in. and various depths above; to be occupied for all uses accessory to a lodge meeting house; the proposed yard is 3 ft. 0 in. less in depth at a point 78 ft. 0 in. above curb level and also at each story above said point; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the area district regulations of the building zone resolution and that the application be and it hereby is *granted*, only so far as it affects the rear yard setback requirement above the 60 ft. level, *on condition* that a required rear yard not less than 10 ft. for the entire width of premises be established and

# MINUTES

maintained for a height not exceeding 60 ft. above the allowable rear first story extension; that the rear yard setback starting at this level shall be not less than 10 ft. 10 in., setting back therefrom two in. for every 1 ft. in height, in accordance with the requirements of the building zone resolution; that the structure shall be erected in accordance with the requirements of the building zone resolution in all other respects. All permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

549-26-BZ.

APPLICANT—John DeHart, for Joseph Perl binder, owner.

SUBJECT—Application (re decision of superintendent of buildings) under sections 7-c and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—1149-1151 Southern Boulevard, The Bronx.

THE RESOLUTION:

(549-26-BZ)

WHEREAS, John DeHart, for Joseph Perl binder, owner, filed, June 16, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 1149-1151 Southern boulevard, The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 26, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Southern boulevard, Home street and East 167th street are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered June 7, 1926 (Applic. N. B. 1434-26), reads:

"1. Erection of proposed garage for storage of more than 5 motor vehicles in business district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 50 ft. and a depth of 100 ft. to be occupied as a garage; and

WHEREAS, the board deemed that applicant was not entitled to relief on the ground of practical difficulties and unnecessary hardship, nor was the further invasion of prohibitive use justified under section 7-c of the building zone resolution on the existence of a non-conforming use and the general opposition of abutting and adjacent owners.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

THE RESOLUTION:

(162-24-BZ)

WHEREAS, Babetta Schulze, owner, filed, January 31, 1924, an application, under the building zone resolution, to permit in a residence district the maintenance of a garage for the storage of two pleasure motor vehicles, one space rented to persons not residing on the premises; premises southwest corner of 16th avenue and 27th street, Beechhurst, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, November 25, 1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 27th street and 16th avenue are residence districts; and

WHEREAS, the order of the fire commissioner, dated January 11, 1924, reads:

"Order No. 85299-LC:

"1. Discontinue the maintenance of garage in which is kept motor vehicles that are subject to charges for storage.

"2. Discontinue the maintenance of garage in which is kept motor vehicles that are not the property of persons residing in a dwelling on the same lot."

and

WHEREAS, the building is of frame and stucco construction, one story in height, with a frontage of 19 ft. and a depth of 19 ft.; occupied as a garage for two motor vehicles, space for one of which is rented to persons not residing on premises; and

WHEREAS, the applicant has filed the duly acknowledged consents of the owners of 86 per cent of the property frontage deemed by the board to be affected; and

WHEREAS, this application was granted by the board at its meeting, November 25, 1924, for a temporary period of 2 years and applicant requests an extension of the period.

*Resolved*, that the board of appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the capacity of the garage be limited to two automobiles of the pleasure car type, space for one of which may be rented to persons not residing on the premises; that there shall be no gasoline storage equipment maintained on the premises, and no signs or advertising display of any nature or description be exposed on premises; and this permit is *granted* for the temporary period of two years from November 25, 1926.

Negative .....	0
Absent .....	0

THE RESOLUTION:

(423-25-BZ)

WHEREAS, Samuel Schlau, for Isabel Burger, owner, filed, April 20, 1925, an application, under the building zone resolution, to permit in an "F" area district the erection of an apartment house, the area of which is in excess of that permitted in such a district; premises 123-02 to 123-08 Rockaway Beach boulevard, Rockaway Park, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 19, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the district maps accompanying the building zone resolution show that both Rockaway Beach boulevard and Beach 123rd street are in residence use and "F" area districts; and

WHEREAS, the decision of the tenement house commissioner, rendered March 30, 1925, reads:

"The plans and specifications submitted by you for the erection of one tenement house located at Rockaway Beach boulevard, N. W. corner 123rd St., have been disapproved this day for the following reasons:

"Objection No. 19 not removed. As district has been changed to an F area district, building must be made to conform to requirements of this district. Zone Resolutions.";

WHEREAS, the proposed building is to be of non-fireproof construction, six stories in height, with a frontage of 74 ft. and a depth of 74 ft.; to be occupied as apartments; and

WHEREAS, the board concluded that applicant is entitled to relief and the zoning resolution precludes retroaction under section 24, having filed plans prior to the change of zone from an "E" to an "F" district, and that there would

be unnecessary hardship in the way of carrying out the strict letter of the zoning resolution; and

WHEREAS, applicant stated over his signature, dated October 16, 1926, that he is estopped from complying with the resolution granted by this board under date of January 19, 1926, to the extent only wherein the resolution requires the securing of all permits, which included permits from the bureau of buildings, and the superintendent of buildings, in view of said stipulation, holds that the time specified in the original resolution as to permits has expired.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the area district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building be limited in height to four stories above grade, restricted in use and occupancy specifically to that permitted in a residence use district; that the building shall set back from the building line of the Rockaway Beach boulevard and from Beach 123rd street not less than fifteen (15) ft.; that an open court, running the full depth of the plot, of not less than eleven (11) ft. in width shall be maintained on the westerly side of the premises; and that an open court of not less than eleven (11) ft. in width for the full extent of the plot shall be maintained on the northerly end of the property; that the exterior surface of the rear and gable walls shall be finished in light-colored face brick; that the facade of the building on the two street fronts shall be finished with face brick or natural cut stone and natural stone or architectural terra cotta trimmings; that a return drawing of the proposed elevations shall be made to this board for approval, before submitting same to the tenement house commissioner for approval; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action, October 26, 1926.

## AREA FIXED.

(910-25-BZ)

The chairman presented and read a communication from James A. Higgins, requesting the board to fix the area deemed affected and within which to obtain consents for the maintenance of a garage for the storage of more than five motor vehicles; premises 1421-1425 65th street, Brooklyn.

The following area was approved by the board:

Both sides of 65th street from New Utrecht avenue to a point 400 ft. west of proposed garage; also the properties at the rear and for a distance of 50 ft. on either side of the side lines of the premises in question.

Adjourned 4.20 p. m.

WILLIAM J. O'GORMAN, Secretary.

## THE RESOLUTION:

(538-26-S)

WHEREAS, Charles N. Whinston & Brother, for James C. Colgate, et al., owner, filed, June 11, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises Nos. 41-43 John street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 27, 1926 (Order No. 89259-LD), reads:

"1. Provide an additional means of exit from the 2nd and 3rd story of the 3 story portion of the building remote from the existing stairway, properly located at the south side of the building in accordance with the requirements of Section 271 of the Labor Law."

and

WHEREAS, the building is non-fireproof, 4 stories in height, 51 ft. by 90 ft. in area at 1st story and divided into a front and rear wing above the 1st story by a yard 10 ft. in depth; the rear wing is 3 stories in height; OCCUPIED: front wing, manufacture of jewelry, 30 persons on each story; rear wing, bakery, 2 persons in the entire wing; EQUIPPED with a fire alarm system; EXITS: an interior wooden stairway in each wing, (front wing): extending from the 1st story to roof, enclosed in metal lath and plaster partitions with fireproof doors at openings, stairway in the rear wing extends from 1st story to top story, enclosed in wood partitions; and

WHEREAS, the petitioner proposes to maintain a horizontal balcony across the yard connecting the two wings of the building at 2nd and the 3rd story; also to connect the rear window of the rear wing at the 2nd and 3rd stories to the fire escape on the rear of adjoining building which faces Dutch street.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted* only so far as it affects the egress from the second and third stories of the three-story portion of the premises *on condition* that an iron bridge not less than 3 ft. in width, with 3-foot rails, shall be provided as shown on the drawings filed with this petition; that the skylights in the existing first story extension shall be glazed with wire glass; that steps to the sills, to overcome the difference in levels from the floor to windowsills, shall be provided on both the second and third story; and that the present double-hung windows on the course of the proposed fire escape shall be removed and fireproof casement doors substituted; and *granted* only so long as conditions as to operation and use otherwise remain substantially unchanged.

56-26-S.

PETITIONER—Thomas I. Sheridan, for Stephen Realty Co., owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—16-24 West 47th street, Manhattan.

APPEARANCES—

For Petitioner: Thomas I. Sheridan.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Holland, Connell and Guilfoyle and Deputy Chief Martin ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(56-26-S)

WHEREAS, Thomas I. Sheridan, petitioner, for Stephen Realty Co., owner, filed, January 22, 1926, a petition for

variation from the requirements of the labor law as cited in orders of the fire commissioner, affecting premises 16-24 West 47th street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated June 10, 1925, read:

Order No. 79826-LF:

"1. Install an adequate interior electric fire alarm system in accordance with the Rules of Board of Standards and Appeals and the enclosed approved layout."

Order No. 79827-LF:

"That a fire drill should be established and maintained."

and

WHEREAS, the building is fireproof, 14 stories in height, 100 ft. by 100 ft. in area; OCCUPIED: offices and show rooms for jewelers, watch and clock jobbers, about 40 persons on each story, and one living apartment on the roof for the superintendent of the building; EXITS: a fire tower and also an interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner contends that the building is fireproof; that the merchandise carried is non-combustible; that the only work done and termed as a factory use is the insertion of watch-works into watch-cases, and the cleaning and buffing of watch-cases by the use of a  $\frac{1}{4}$  horse power motor; furthermore, the petitioner contends that there is an all night elevator service and watchmen are patrolling the premises at all times; and

WHEREAS, the basis of the order is the presence and operation of jewelers' buffing machines, operated by electric motors not exceeding  $\frac{1}{4}$  horse power; and

WHEREAS, practically the entire occupancy of the building is substantially devoted to the jeweler's trade; and

WHEREAS, the petitioner seeks no relief from the equipment of the premises with an approved interior electric fire alarm system, seeking relief from the requirements as to the fire drill only, on the stipulation that not more than ten persons in the entire building shall be employed in the operation of jewelers' buffers.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition as to Order No. 79827-LF be and it is hereby *granted* only so far as it affects the fire drill requirements *on condition* that the entire premises shall be equipped with an approved interior electric fire alarm system, and that the occupancy throughout shall remain unchanged; and that the petition be and it hereby is *denied* as to Order No. 79826-LF, Item 1.

40-26-S.

PETITIONER—Louis R. Glantz, for Samley Leomor Realty Co., Inc., owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—52 West 46th street, Manhattan.

APPEARANCES—

For Petitioner: Herman E. Horwood.

## THE RESOLUTION:

(40-26-S)

WHEREAS, Louis R. Glantz, for Samley Leomor Realty Co., Inc., owner, filed, January 18, 1926, a petition for variation from the requirements of the labor law, as cited

# MINUTES

in an order of the fire commissioner, affecting premises No. 52 West 46th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 2, 1925 (Order No. 65405-LD), reads:

"1. Provide an outside iron balcony fire escape on the south side of building with balconies 4' in width connected by stairways not less than 22" wide, placed at an incline of not more than 45 degrees extending from ground to roof, constructed as per Section 273 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with Section 271 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, 6 stories in height, 22 ft. by 100 ft. in area at 1st story and 22 ft. by 92 ft. in area above; OCCUPIED: 1st story, stores; 2nd story, manufacturer of furs, 4 persons; 3rd story, manufacturer of furs, 4 persons; 4th story, manufacturer of dresses, 20 persons; 5th story, manufacture of furs, 8 persons; 6th story, manufacture of furs, 6 persons; EQUIPPED with a fire alarm signal system; EXITS: an interior slate stairway, extending from the 1st story to roof; enclosed in fire-resisting partitions with fireproof doors at openings; and

WHEREAS, petitioner proposes to erect a fire escape on the rear of the building.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that approved labor law party wall balconies shall be constructed on the rear of the building connecting with a regulation labor law fire escape on No. 50 West 46th street, and that there shall be constructed, together with the fire escape balcony on the 6th story of No. 52, a 45-degree connecting stairs to the 5th story balcony of No. 50; and a 45-degree stair and landing to roof of No. 52, both premises being in the same ownership and operation; with the exception of egress which shall be maintained through an open yard to premises No. 48 West 46th street, with egress from the rear yard of No. 48 direct to the street, through plain glass openings; and on *condition* that the work is commenced within 10 days and prosecuted to completion without delay, and that this petition is granted only so long as conditions as to use and occupancy remain substantially unchanged.

454-26-S.

PETITIONER—Emor Realty Corporation, lessee.

SUBJECT—Variation of the labor law as cited in order of fire commissioner and decision of superintendent of buildings.

PREMISES AFFECTED—9-11-13 East 59th street, Manhattan.

APPEARANCES—

For Petitioner: Otis E. Kurth, Edward P. O'Reilly.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE RESOLUTION:

(454-26-S)

WHEREAS, Emor Realty Corp., lessee, filed, May 21, 1926, a petition for variation from the requirements of the labor law as cited in an order of the fire commissioner and decision of the superintendent of buildings, affecting premises 9-11-13 East 59th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 5, 1925 (Order No. 86242-LD), reads:

"1. Remove the substandard fire-escape on the north-east end of the building or reconstruct same as per 274 of the Labor Law and Rule 3, Board of Standards and Appeals, adopted May 9, 1924. Among the defects noted are the following: 1. Windows on course not fireproof, self-closing. 2. Connecting stairs are not 60 degrees. 3. No stairway top balcony to roof. 4. No drop ladder in guides from lowest balcony to ground. 5. No safe egress from termination.

"2. Arrange the fire escape on the northwest end of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of the Sec. 271 of the Labor Law."

and

WHEREAS, the decision of the superintendent of buildings, rendered in acting on request for certificate of occupancy, reads:

"Arrange fire escape on northwest end of building \* \* \* so that same comply with provisions of Sec. 273-274 of labor law. \* \* \* Remove substandard fire escape on east and rear. \* \* \*";

and

WHEREAS, the building is non-fireproof, 5 stories in height, 75 ft. by 100 ft. in area at 1st story, and 75 ft. by 75 ft. in area above; OCCUPIED: 1st story, stores, 8 persons; 2nd story, manufacture of ladies dresses, 7 persons; 3rd story, studio and offices, 7 persons; 4th story, four studios, 4 persons; 5th story, 6 studios, 4 persons; EQUIPPED with a fire alarm signal system; EXITS: an interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at opening, a substandard fire escape on the rear at east end of the building, a fire escape on the rear at center of the building, having fireproof openings along the course thereof, extending from top story to the 2nd story balcony on the same level and connected with the roof of 1st story rear extension; a gooseneck ladder from top story balcony to roof, no legal means of egress from termination of rear fire escapes; ROOFS of adjoining buildings: 11 ft. lower at east, 22 ft. higher at west; and

WHEREAS, the petitioner proposes to maintain the balconies and stairways of the sub-standard party wall fire escape at rear east, in a safe unobstructed condition in lieu of complying with Item No. 1 of fire department Order No. 86242-LD; the petitioner contends as to Item No. 2 of the order, that there is no safe means of egress from main roof; that the rear fire escape at centre of building is provided with a gooseneck ladder from top balcony to roof; that egress from the termination may be had over roof of 1st story rear extension to roof of adjoining extension at east, a fixed iron ladder from the latter roof to a brick passageway leading direct to the street.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that the existing fire escapes on the 2nd, 4th and 5th stories of Nos. 9-11-13 East 59th street shall be connected continuously as on the 3rd floor; that a balcony with not more than 60-degree stairs shall be provided from the top balcony to the roof; that all windows on the course of the fire escape shall be made fireproof; and that an iron bridge from the present 2nd story balcony of No. 9 shall be provided to the adjoining one-story extension to the east; and *granted* only so long as conditions as to occupancy and use remain otherwise unchanged.

508-26-S.

PETITIONER—Crocker National Fire Prevention Engineering Co., for Ledom Realty Co., lessee.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

# MINUTES

PREMISES AFFECTED—68-72 Church street, Manhattan.

## APPEARANCES—

For Petitioner: Herman E. Horwood.

Connell and Guilfoyle and Deputy Chief  
Martin ..... 4  
Negative ..... 0  
Absent: Commissioner Holland ..... 1

## THE RESOLUTION:

(508-26-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Ledom Realty Co., lessee, filed, June 3, 1926, a petition for a variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 68-72 Church street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 3, 1926 (No. 94156-LD), reads:

"1. Enclose the interior stairway at south side of building serving as a required means of exit and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the 1st story to and including the bulkhead on roof, constructed as per Section 271 of the Labor Law. \* \* \*";

and  
WHEREAS, the building is non-fireproof, 5 stories in height, 4 ft. 2 in. by 50 ft. 2 in. in area; OCCUPIED: 1st story, store; 2nd story, office, 30 persons; 3rd story, shipping room, 6 persons; 4th story, manufacture of insulators, 13 persons; 5th story, storage only; EQUIPPED with a fire alarm signal system; EXITS: an interior wooden stairway, extending from the 1st story to roof, enclosed partly in plastered partitions and partly in wooden partitions up to the 4th story, open at 5th story, with fireproof doors at 1st and 4th stories and wooden doors at 3rd and 4th stories at openings; two fire escapes, (one on each street front of the building), having fireproof openings along the course thereof, extending from top story to the 2nd story and drop ladder to sidewalk; ROOFS of adjoining buildings: 7 ft. in. higher at south; 5 ft. 6 in. higher at west; and

WHEREAS, the petitioner claims that a similar order to enclose the interior stairs was issued by the State Labor department in 1916; at that time the building was provided with only one standard fire escape; by agreement, the owner constructed another standard fire escape and the Labor Department dismissed the order; furthermore, the petitioner contends that the occupancy is small and the exits are adequate.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that a standard labor law fire escape shall be provided at the extreme easterly end of the building on the Essex street front, and that a standard labor law fire escape shall be constructed and maintained approximately in the center of the building on the Church street front; and only so long as conditions as to use and occupancy remain substantially unchanged.

## THE RESOLUTION:

(513-26-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Barney Klinghoffer & Son, owners, filed, June 5, 1926, a petition for a variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 1584-1586 Fulton street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated November 4, 1925 (No. 86183-LD), reads:

"1. Arrange the exterior screened stairway on the west side of building and the openings leading thereto, so that same are in compliance with the provisions of Section 268 of the Labor Law.

"Among the defects noted are the following:

"No stairway from 3rd story balcony to roof.";

and

WHEREAS, the building is non-fireproof, 3 stories in height, 40 ft. by 100 ft. in area; OCCUPIED: 1st story, stores; 2nd story, manufacture of clothing, 23 persons; 3rd story, ballroom; EXITS: an interior wooden stairway, extending from the 1st story to top story, enclosed in non-fireproof partitions with wooden doors at openings; an exterior screened stairway on the west side of the building, having fireproof openings along the course thereof, extending from top story to the court level, with direct egress to the street; ROOFS of adjoining buildings: one story lower at east, two stories lower at west; and

WHEREAS, the petitioner proposes to comply with all the fire department orders with the exception of providing a stairway from 3rd story balcony to the roof; the petitioner contends that the only factory occupancy is on the 2nd story and, furthermore, there is no safe egress from the roof of the building in question.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that a stairway, not greater than 60 degrees, shall be provided from the top story balcony to a balcony at the roof level.

## THE RESOLUTION:

(577-26-S)

WHEREAS, William I. Hohauser, Inc., for 214 West 28th Street Corp., lessee, filed, June 26, 1926, a petition for a variation from the requirements of the labor law as cited in

# MINUTES

decision of the superintendent of buildings, affecting premises 214-218 West 28th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated May 15, 1926 (re N. B. App. 160-1926), reads:

"7. Front windows on 1st, 2nd and 3rd floors should comply with Section 264 of Labor Law and Rule 503 of Industrial Code.";

and

WHEREAS, the building is fireproof, 14 stories in height, 49 ft. 5 in. by 88 ft. 9 in. in area; OCCUPIED as a factory building, 33 persons on each story; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to use large plate glass in front windows; the maximum size at 1st story, 7 ft. 0 in. by 10 ft. 0 in.; at 2nd and 3rd stories, 5 ft. 0 in. by 6 ft. 0 in.; the petitioner contends that to use smaller panes of glass would greatly reduce the rental value.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted* only so far as it affects the windows on the 1st, 2nd and 3rd stories in the street front of the building, *on condition* that the openings shall be equipped with approved metal frames, glazed with  $\frac{1}{4}$  in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

(621-26-S)

WHEREAS, Henry I. Oser, for 307 West 38th Street, Inc., owner, filed, July 15, 1926, a petition for a variation from the requirements of the labor law, as cited in decision of the superintendent of buildings, affecting premises 307-317 West 38th street and 308 West 39th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated May 12, 1926 (re N. B. 751-1925), reads:

"4. Windows at 1st and 2nd stories front should comply with the provisions of Section 264 of Labor Law and Rule 503 of Industrial Code.";

and

WHEREAS, the proposed building is fireproof, 18 stories in height, 150 ft. by 88 ft. 9 in. in area, fronting on 38th street, and 25 ft. by 98 ft. 9 in. in area, fronting on 39th street; OCCUPIED as a factory building, 150 persons on each story; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to use large plate glass in windows on both street fronts; the maximum size at 1st story, 11 ft. 6 in. by 6 ft. 6 in.; at 2nd story, 9 ft. 2 in. by 7 ft. 0 in.; the petitioner contends that the windows are for the display of merchandise and to install smaller lights would defeat their purpose and greatly reduce the rental value.

*Resolved*, that the board of standards and appeals hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects the windows on the 1st and 2nd stories on the 38th street front, and windows of the 1st story on the 39th street extension, *on condition* that the openings shall be equipped with approved metal frames, glazed with  $\frac{1}{4}$  in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

629-26-S.

PETITIONER—David I. Seiffer, for Ricka Seiffer, lessee.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—261 Greene street, Manhattan.

APPEARANCES—

For Petitioner: Edward D. Newman.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition denied.

THE VOTE TO GRANT—

Affirmative .....

Negative: Chairman Walsh, Commissioners Connell and Guilfoyle and Deputy Chief

Martin .....

Absent: Commissioner Holland .....

THE RESOLUTION:

(629-26-S)

WHEREAS, David I. Seiffer, for Ricka Seiffer, lessee, filed, July 20, 1926, a petition for a variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 261 Greene street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 6, 1926 (No. 95868-LD), reads:

"2. Extend the interior stairway at the north side of building to the roof, as per Sec. 271 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, 4 stories in height, 25 ft. by 100 ft. in area at 1st story and 25 ft. by 50 ft. in area above; OCCUPIED: 1st story, store; 2nd story, manufacture of caps, 10 persons; 3rd story, manufacture of dresses, 12 persons; 4th story, manufacture of clothing, 10 persons; EQUIPPED with a fire alarm signal system; EXITS: an interior wooden stairway, extending from 1st story to top story, enclosed in non-fireproof partitions with fireproof doors at openings, a sub-standard fire escape on the rear of the building; a fire escape on the front of the building, having fireproof openings along the corner thereof, extending from top story to 2nd story and counterbalanced stairs to sidewalk; ROOFS of adjoining buildings: 9 ft. 0 in. higher at north, same level at south; and

WHEREAS, the petitioner proposes to provide a counterbalanced scuttle on roof, with a double-rung iron ladder from top story, leading to such scuttle; the petitioner contends that the extension of interior stair to roof would be expensive and cause extensive alterations due to the location of toilets and plumbing pipe lines.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and that the petition be and it hereby is *denied*.

APPLIANCES SUBMITTED FOR APPROVAL

860-24-SA.

PETITIONER—Monarch Equipment Company, owner.  
SUBJECT—Approval of Monarch Domestic Fuel Oil Burner.

APPEARANCES—None.

ACTION OF BOARD—Petition dismissed for lack of prosecution.

# MINUTES

## THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners  
Connell and Guilfoyle and Deputy Chief  
Martin ..... 4  
Negative ..... 0  
Absent: Commissioner Holland ..... 1

## THE RESOLUTION:

(860-24-SA)

WHEREAS, the Monarch Equipment Co. filed, June 27, 1924, a petition to the board of standards and appeals for approval of their device known as the Monarch Domestic Fuel Oil Burner, and

WHEREAS, the petitioner failed to complete his papers, though duly notified to do so.

*Resolved*, that the petition be and hereby is *dismissed* for lack of prosecution.

84-23-SA.

PETITIONER—Universal Gas Producer Distributing Corp., owner.

SUBJECT—Approval of Universal G. P. O. Burner.

APPEARANCES—None.

ACTION OF BOARD—Petition dismissed for lack of prosecution.

## THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners  
Connell and Guilfoyle and Deputy Chief  
Martin ..... 4  
Negative ..... 0  
Absent: Commissioner Holland ..... 1

## THE RESOLUTION:

(1484-23-SA)

WHEREAS, Philip J. Sinnott filed, December 17, 1923, a petition to the board of standards and appeals for approval of their device known as the Universal G. P. O. Burner;

WHEREAS, the petitioner failed to complete his papers, though duly notified to do so.

*Resolved*, that the petition be and hereby is *dismissed* for lack of prosecution.

54-23-SA.

PETITIONER—American Oil Burner Corporation, owner.

SUBJECT—Approval of Domestic Fuel Oil Burner.

APPEARANCES—None.

ACTION OF BOARD—Petition dismissed for lack of prosecution.

## THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners  
Connell and Guilfoyle and Deputy Chief  
Martin ..... 4  
Negative ..... 0  
Absent: Commissioner Holland ..... 1

## THE RESOLUTION:

(544-23-SA)

WHEREAS, the American Oil Burner Corp. filed, May 3, 1923, a petition to the board of standards and appeals for approval of their device known as the American Oil Burner;

WHEREAS, the petitioner failed to complete his papers, though duly notified to do so.

*Resolved*, that the petition be and hereby is *dismissed* for lack of prosecution.

95-25-SA.

PETITIONER—Westinghouse Electric and Manufacturing Company.

SUBJECT—Approval of Westinghouse Electric Manufacturing Voltmeters and Milliammeters, Type BA, CA.

APPEARANCES—

For Petitioner: M. A. Zeek.

For Administration: Inspector Mulligan of fire department.

ACTION OF BOARD—Petition approved in accordance with report of chief of bureau of fire prevention.

## THE VOTE TO APPROVE—

Affirmative: Chairman Walsh, Commissioners  
Connell and Guilfoyle and Deputy Chief  
Martin ..... 4  
Negative ..... 0  
Absent: Commissioner Holland ..... 1

## THE RESOLUTION:

(1310-25-SA)

WHEREAS, the Westinghouse Electric and Manufacturing Co. filed, November 19, 1925, a petition to the board of standards and appeals for the approval of their device known as the Westinghouse Type B A and C A Volt and Milliammeters; and

WHEREAS, the matter was referred to the fire commissioner for test and report; and the report of the bureau of fire prevention, dated October 5, 1926, recommends the approval of the device.

*Resolved*, that the board of standards and appeals does hereby *approve* the device known as the Westinghouse Type B A and C A Volt and Milliammeters for use on fire alarm control panels when installed in accordance with the recommendation of the report of the inspector of the fire prevention bureau submitted with the recommendation of the chief of the bureau.

581-26-SA.

PETITIONER—E. B. Latham & Company.

SUBJECT—Summerheat Oil Burner, approval of.

APPEARANCES—None.

ACTION OF BOARD—Petition approved.

THE VOTE TO ADOPT REPORT OF COMMITTEE AND APPROVE APPLIANCE—

Affirmative: Chairman Walsh, Commissioners  
Connell and Guilfoyle and Deputy Chief  
Martin ..... 4  
Negative ..... 0  
Absent: Commissioner Holland ..... 1

## THE RESOLUTION:

(581-26-SA)

WHEREAS, the E. B. Latham & Co. filed, June 28, 1926, a petition to the board of standards and appeals for the approval of their device known as the Summerheat Oil Burner; and

WHEREAS, the committee of the board tested this device in operation at 550-552 Pearl street, Manhattan, and recommended the device.

*Resolved*, that the board of standards and appeals hereby *approves* the device for use with Grade A and Grade B fuel oil for domestic and commercial installations when installed and maintained in accordance with the fuel oil rules of the board of standards and appeals.

*Cases listed in the Reserve Calendar are cases upon which action by the board has been deferred pending committee reports, of this board, court or department actions, and will remain thereon until the aforesaid reports, court or departmental actions are consummated. Whereupon the case or cases will be restored to the regular calendar and due notice of the date set for hearing will be mailed to the appellant, applicant or petitioner of record.*

## RULES

### COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS.

*Amended Resolution Adopted by the Board of Appeals, March 16, 1920, Under Cal. No. 549-17-BZ.*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed

under the building zone resolution in the absence of any definition therein to the contrary.

*Resolved*, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

## CONCRETE RULES

### USE OF HYDRATED LIME IN CONCRETE.

Adopted by the Board of Standards and Appeals, April 1, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated in each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

# RULES

## PROPOSED AMENDMENTS TO FUEL OIL RULES

### FUEL OIL RULES

#### CONSTRUCTION AND INSTALLATION OF OIL BURNING EQUIPMENT AND STORAGE AND USE OF FUEL OILS

Adopted by the Board of Standards and Appeals November 6, 1919, Amended January 6, 1922, January 18, 1924.

##### Rule 1. Definition.

The term "fuel oil" under these rules shall include any liquid or mobile mixture, substance or compound derived from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

##### (a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

##### (b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

(c) Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

##### (d) Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, may be used for domestic heating in buildings occupied by not more than two (2) families and in tenement houses and commercial plants. If used in tenement houses or commercial plants, a certificate of fitness for the operator of the plant will be required as per Rule 15.

(e) Where Grade A oil is used in place of Grade B oil in domestic installations it may be used under the requirements for Grade B installations.

(f) No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

##### Rule 2. Manner of Storage for Fuel Oil.

Fuel oil, to be used for heating and power purposes, shall be at all times stored in metal tanks with all openings or connections through the tops of the tanks.

##### Rule 3. General Location of Tanks for Fuel Oil.

(a) In all buildings fuel oil storage tanks shall be buried below the floor of the lowest story or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth:

(b) Along the line of subways no tank shall be placed within twenty (20) feet of any wall separating a building from the subway and, if practical, tanks shall be placed in a lower position than the roadbed of the subway.

##### Rule 4A. Location, Protection and Capacity of Tanks for the Storage of Grade A Fuel Oil.

###### Section 1. Inside of Buildings Above Ground.

(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space between the tank and the walls and roof of the enclosure shall be completely filled with dry upland sand or earth well tamped.

(f) Not more than one tank shall be placed in an enclosure.

(g) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "h."

(h) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

###### Section 2. Inside Buildings Below Ground.

(a) When a tank is buried beneath a building its capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4A, Section 1 (g) and (h).

(b) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, covered by at least six (6) inches of concrete which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(c) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with soft earth or sand. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

###### Section 3. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located

# RULES

outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth ( $1\frac{1}{4}$ ) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above ground, the tanks shall be not less than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

## Section 4. Outside of Buildings Below Ground.

(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

## Rule 4B. Location, Protection and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When not buried and located inside of a building they shall be placed on the lowest floor level and shall be enclosed in four inches of terra cotta or eight inches of approved masonry, and the aggregate capacity of such storage tanks shall not exceed 275 gallons.

(b) Tanks, when buried, shall be placed with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm soil foundation.

(c) Tanks shall be set on firm soil and surrounded with soft earth or sand and shall be complete encased with (6) inches of concrete, where soil conditions require.

(d) Where in the opinion of the Fire Commissioner extreme difference of grade or soil conditions would work a hardship an anti-syphon valve or other mechanical device to prevent syphoning approved by the U. S. Bureau of Standards, Fire Underwriters Laboratories or other laboratory recognized by the Board of Standards and Appeals, may be used.

### 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.

## Rule 5. Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half ( $1\frac{1}{2}$ ) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth ( $\frac{1}{4}$ ) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; of masonry or of impervious reinforced concrete. Earth-work embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half ( $1\frac{1}{2}$ ) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

## Rule 5A. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand (10,000) gallons outside of buildings shall be equipped with a system of steam pipes, blanket-gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half ( $\frac{1}{2}$ ) inch in size. The boilers shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit there shall be kept ready for use two portable fire extinguishers of not less than 1 quart capacity or other equivalent fire extinguishers for extinguishing oil fires.

## Rule 6. Material and Construction of Tanks for the Storage of Fuel Oil.

### Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Such plates shall be free from physical imperfections, such as laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked, or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$  in. shell,  $\frac{1}{4}$  in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$  in. shell,  $\frac{5}{16}$  in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$  in. shell,  $\frac{3}{8}$  in. heads.

Tanks over 120 inches in diameter to be of  $\frac{3}{8}$  in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should flat heads be used, they must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

# RULES

(e) Diameter and Spacing of Rivets.  
Riveting in single lap seams shall not exceed a pitch as follows:

In shell  $\frac{1}{4}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{1}{4}$  in. pitch.

In shell  $\frac{5}{16}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{3}{8}$  in. pitch.

In shell  $\frac{3}{8}$  in. thick,  $\frac{3}{4}$  in. diameter rivets  $2\frac{1}{2}$  in. pitch.

## Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality required for cylindrical tanks, and of a thickness of not less than  $\frac{5}{16}$  of an inch.

(b) Corners may be made up by bending the plates or by the use of angles.

(c) Rivets in seams shall be  $\frac{5}{8}$  of an inch in diameter and spaced not more than  $2\frac{1}{4}$  inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must not be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of six (6) inches center to center on these members.

(f) When structural reinforcing members are tied together with braces, in order to reduce the effective length, the braces shall not be stressed higher than nine thousand (9,000) pounds per square inch taken on the minimum net section.

(g) If structural members are omitted and the sides of the tank are braced by means of rods or bars, these members should not be spaced farther apart than twenty-four (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch on the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars so that the bar will break before the connection will let go.

## Section 3. Vertical Storage Tanks Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality required for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be  $\frac{1}{4}$  inch and the minimum thickness of roof plates  $\frac{1}{8}$  inch.

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

(c) Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate seams shall be designed, with proper efficiency to meet requirements of above formula for shell plates.

(d) In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind will be permitted.

(e) Tanks for storage of grade B oil shall be constructed in accordance with the requirements of this rule, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than  $\frac{3}{16}$  inches in thickness.

(f) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

## Section 4. Welding.

(a) Where welding is to be used for a part or for the entire tank, the tank shall be fabricated as required under Rule 6, Section 1.

(b) All welded seams of plates shall be lapped or butted.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight, metal to metal, before welding and kept tight together during welding. Both inside and outside welds shall be of full 45 degree fillet.

Where a butt joint is used, it shall be of the 90 deg. double V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

(c) All heads shall be flanged, the straight part of the flange being not less than as follows:

For  $\frac{3}{16}$  inch heads,  $1\frac{3}{4}$  inch flange.

For  $\frac{1}{4}$  inch heads, 2 inch flange.

For  $\frac{5}{16}$  inch heads, 2 inch flange.

For  $\frac{3}{8}$  inch heads,  $2\frac{1}{4}$  inch flange.

For heads over 120 inches diameter the flange shall be increased in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a driving fit and the shell shall fit the head closely all around. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head welds for tanks of 1,100 gallon capacity or less and not over 48 inches in diameter, shall be of the 90 deg. single V type welded entirely through and reinforced not more than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the 90 deg. double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

(d) Where tanks are made up of two or more rings the welded longitudinal joints of adjacent sections shall break joints. At no point of a butt girth joint shall the sheet on one side be offset with the sheet on the other side in excess of one-half of the thickness of the plate. All butt girth joints shall be welded inside and out and reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces: in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

## Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar, asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

# RULES

## Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

## Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

## Rule 7. Tests of Tanks for the Storage of Fuel Oil.

### Section 1. Inside of Buildings Above or Below Ground or Outside of Buildings Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks, shall withstand after being set in place, a hydrostatic or air test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

(c) Tanks when subjected to an air pressure test shall be equipped with a safety relief valve set at not more than 32 lbs. per sq. in., and the air compressor device employed in the air testing of the tank shall be of low pressure type, equipped with an automatic pressure regulator set at not less than 35 lbs.

### Section 2. Horizontal Tanks Outside of Building, Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic or air test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

### Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

### Section 4. Test for Tanks. How Conducted.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic or air test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 or 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.

## Rule 8. Piping for Fuel Oil.

### Section 1. Installation of Piping.

(a) Piping shall be run as directly as practicable without sags, and, except as provided in Rule 11A, e, shall be laid so that where practicable pipes shall pitch toward the

supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.

### Section 2. Type and Material.

(a) All piping shall be of standard full weight brass, copper, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ( $\frac{1}{2}$ ) inch inside diameter shall be permitted; except that for Grade B oil  $\frac{1}{4}$ -inch diameter pipes may be used.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Tubing and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. No soldered connection shall be used. The length of tubing shall not exceed that required for direct connections to coupling.

### Section 3a. Tests for Piping. Grade A.

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ( $1\frac{1}{2}$ ) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

### Section 3b. Tests for Piping. Grade B.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.

### Section 3c. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes, when required, shall be not less than one size larger than supply pipe.

### Section 4. Relief Valves.

(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of the pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than  $\frac{1}{2}$  in. by  $\frac{1}{2}$  in. of the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) An automatic by-pass valve of size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with

# RULES

the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.

## Section 5. Fill Pipes.

(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) The fill pipe shall be provided with a trap or seal or carried within four (4) inches of the lowest point in the tank.

(d) The fill pipe shall be made up with screwed or flanged fittings and shall be oil tight and securely held in place.

## Section 6. Vent Pipes.

(a) An open, galvanized iron vent pipe without trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the same class of liquids is installed, vent pipes may be run into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.

(c) Vent openings in tanks shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation. Vents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter ( $1\frac{1}{4}$ ) inches in diameter.

(d) Vent pipes shall be provided with weather proof hoods and terminate outside the building above the street surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direction of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions, to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to tank trucks by tight connections and filled by pressure, a one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow to the fill box and shall be so set as to prevent the passage of vapor to the street.

## Section 7. Return Pipes from Burners.

Return lines from burners, where necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, and shall be connected into the suction line near the pump or into the storage tank. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.

## Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of hot water coils thermostatically controlled and the oil shall not be heated above one hundred and forty (140) degrees Fahrenheit.

## Rule 9A. Valves and Control of Flow for Grade A Fuel Oil.

(a) Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size

containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the hand-wheel. The use of packing which may be affected by oil or heat is prohibited.

(b) A shut-off valve shall be provided in discharge and suction lines near each pump; in discharge line from each tank as near the tank as practicable, and in branch lines near each burner.

## Rule 9B. Valves and Control of Flow for Grade B Fuel Oil.

(a) Readily accessible valves shall be provided near each burner and in the discharge line from each storage tank.

(b) A remote control for shutting off the supply of oil to the burners shall be provided.

(c) An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve. Automatic by-pass valves shall be set at not more than fifty (50) per cent above the maximum working pressure. This rule shall not apply to burners and pumps approved as a unit when provided with a pressure relief device.

## Rule 10. Oil Level Indicating Device for Grade A Fuel Oil.

A test well or gauging device shall be installed and so designed as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept locked when not in use.

## Rule 11A. Pumps for Grade A Fuel Oil.

(a) Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

(b) Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel oil for heating or steam.

(c) Pumps located in the same room where burners are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above ground storage tanks shall be located outside embankment walls, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

(e) Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a gravity of not more than eighteen (18) degrees Baume and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps.

## Rule 11B. Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11A (a).

## Rule 12. Burners for Fuel Oil.

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals. In domestic installations the burner shall be equipped with an overflow attachment or an automatic control to prevent flooding.

# RULES

## Rule 13. General Devices for Grade A Fuel Oil.

- (a) Devices which are subject to breakage and escape of oil shall be prohibited.
- (b) Thermometers with large clear reading scales, placed in thermometer wells with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

## Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

## Rule 15. Operation of Plant Other Than Domestic Installations Using Grade A Fuel Oil.

No fuel oil burning plant shall be operated unless in charge of a person holding a certificate of fitness as issued by the fire department. A certificate of fitness will be required for each person who is directly in charge of the operation of the plant at any and all times.

This certificate of fitness will be required for all Grade A installations, and Grade B installations in dwellings or more than two families and in commercial plants. This requirement as to Grade A installations shall not apply to dwellings of less than three families equipped with Grade B installations using Grade A oil.

## Rule 16. Installation.

No fuel oil installation shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil installation shall be submitted to the Fire Commissioner for approval, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

## Rule 17. Auxiliary Tanks for Grade B Fuel Oil.

- (a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.
- (b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.
- (c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frames or cradles and secured by 2x1/8-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.
- (d) Where only an auxiliary tank as prescribed in these rules is used it shall in addition to complying with the requirements for auxiliary tanks comply with all requirements for the protection of a storage tank other than the enclosure.

## Rule 18. Pilot Light.

Automatic systems unless electrically ignited shall be so designed that the flame cannot be extinguished by operation of the automatic control valve and a pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not to be easily extinguished.

## Rule 19. Furnaces and Ranges.

- (a) Stoves, ranges, hot air furnaces or other devices, originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces in which vapors might collect are adequately vented, and if used shall be of such construction as to withstand the maximum temperature which the oil burning device when installed may generate.
- (b) No damper for closing of more than eighty (80) per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

## Rule 20. Fire Protection for Grade A and Grade B oil in Domestic Installations in dwellings occupied by not more than two families and in old law tenements occupied by three or more families in new law tenements and in commercial plants.

- (a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) In dwellings occupied by not more than two (2) families, any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back, or eight (8) feet from the front of the furnace shall be covered with approved fire retarding material; the ceiling except it be of fireproof construction shall be protected with approved fire retarding material extending four (4) feet beyond the sides and back and eight (8) feet from the front of the furnace. In old law tenement houses occupied by three or more families the heating apparatus and oil burning device shall be located in an enclosure the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors and the ceiling of the enclosure, if not of fireproof construction, shall be protected with approved fire retarding material; said enclosure shall be ventilated to the outer air; all vertical openings leading to cellar shall be protected with fireproof material not less than four (4) inches in thickness with all openings therein protected with self-closing fireproof doors.

(c) In new law tenement houses or in commercial plants the room or rooms in which the heating apparatus and oil burning device is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra-cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have entrance from the street, court or yard only, and shall be ventilated to the outer air.

Approved fire retarding material shall be any material complying with the rules of the Board of Standards and Appeals for fire retarding of garages.

(d) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

## Rule 21. Systems Prohibited Where Grade B Fuel Oil Is Used.

The use of auxiliary tanks between pump and burner of the pressure type are prohibited. Systems, fed by gravity between the storage tank and the pump, or force systems, are prohibited.

## Rule 22. Use of Grade A or Grade B Fuel Oil.

(a) These Rules shall not apply to gas companies storing or using fuel oil in the manufacture of illuminating gas for public use.

(b) The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(c) Modification: When for any reason it may be impracticable to comply strictly with the foregoing rules the fire commissioner shall have power to modify their provisions so that the spirit and substance thereof shall be complied with. Such modification shall be endorsed upon the permit over the signature of the fire commissioner.

(d) These Rules shall take effect immediately.

WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First,* That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second,* That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third,* That no plea of ignorance of the date of the

hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth,* That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth,* That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays, 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

## CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, November 3, 1926, at 10 a. m.

Minutes of Regular Meeting, November 3, 1926, at 2 p. m.

Fire Escape Rules.

Fuel Oil Rules.

Progress Report.

### PUBLIC HEARINGS

Tuesdays at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, November 9, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, November 16, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman

## CALL OF CLERK'S CALENDAR TUESDAY, NOVEMBER 9, 1926, AT 2 P. M.

### Building Zone Cases.

528-26-BZ.	APPLICANT—David L. Malbin, for Oscar E. Hayman, owner. PREMISES—2150-2176 Gravesend avenue, Brooklyn. APPLICATION, under section 21 of the building zone resolution, TO PERMIT in a business district the erection and main- tenance of a garage for the storage of more than five (5) motor vehicles.
565-26-BZ.	APPLICANT—Henry J. Nurick, for Eyess Realty Corp., owner. PREMISES—281-289 Brooklyn avenue, Brooklyn. APPLICATION, under section 21 of the building zone resolution, TO PERMIT in a residence district the alteration and change of occupancy in part from residence to a business use.
520-26-BZ.	APPLICANT—Jacob Lubroth, Inc., for Charles Fineman, owner. PREMISES—Northeast corner of Vineland avenue and Journeyay avenue, Staten Island, Richmond. APPLICATION, under section 7g of the building zone resolution, TO PERMIT in a business district the erection and main- tenance of a gasoline selling station.
603-26-BZ.	APPLICANT—Emil Guterman, for John Ballschuss and Osmar Ballschuss, owners. PREMISES—22016 Merrick road, Springfield, Borough of Queens. APPLICATION, under section 21 of the building zone resolution, TO PERMIT in a business district the erection and main- tenance of a gasoline selling station.
621-25-BZ.	APPLICANT—McCooey and Conroy, for D. Tedesco, owner. PREMISES—63-67 New York avenue, Brooklyn. APPLICATION, under sections 7a-b-c of the building zone resolution, TO PERMIT the extension from an unrestricted district into a residence district of a proposed addition to an existing garage for the storage of more than five (5) motor vehicles (previously denied).
712-26-BZ.	APPLICANT—Thomas J. McCabe, for Philip H. Reid, owner. PREMISES—2211 Emmons avenue, Brooklyn.

# CALENDAR

APPLICATION, under section 21 of the building zone resolution,  
TO PERMIT in a residence district the erection and maintenance of a gasoline selling station.

726-26-BZ.

APPLICANT—John J. Mackey, for Hyman Grobelsky and Harry Slater, owners.

PREMISES—4806-4810 New Utrecht avenue, Brooklyn.

APPLICATION, under section 7b of the building zone resolution,

TO PERMIT in a residence district extending from a business district the erection and maintenance of an extension used for business purposes.

762-26-BZ.

APPLICANT—John DeHart, for Ernest J. Coates, owner.

PREMISES—140 Remsen street, Brooklyn.

APPLICATION, under sections 7b and 21 of the building zone resolution,

TO PERMIT in a residence district extending from a business district the erection and maintenance of a business building.

705-26-BZ.

APPLICANT—Hannah E. Plant and Geo. Robinson, owners.

PREMISES—430-436 East 21st street, Brooklyn.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a residence district the erection and maintenance of a building with stores on the first story.

## NOVEMBER 9, 1926, 10 A. M.

### *Appeals from Administrative Orders.*

373-26-A—229-239 Knickerbocker avenue, Brooklyn.

169-26-A—607-611 West 47th street, Manhattan.

575-26-A—West side of Canal street, 173 ft. north of Chester avenue, Woodhaven, Borough of Queens.

339-26-A—212-216 West 48th street, Manhattan.

462-26-A—237 East Fordham road, The Bronx.

596-26-A—52-54 West 13th street, Manhattan.

613-26-A—136-146 West 52nd street, Manhattan.

630-26-A—150 Third avenue, College Point, Borough of Queens.

631-26-A—438 Grand avenue, Brooklyn.

638-26-A—32-44 Hamilton avenue, Brooklyn.

763-26-A—4095-4139 Ninth avenue, Manhattan.

789-26-A—229-231 West 42nd street, Manhattan.

### *Building Zone Applications.*

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, *Tuesday morning, November 9, 1926*, at 10 o'clock, in Room 1013, Municipal Building, on the following matters:

CAL. NO. 1425-24-BZ—Application, May 11, 1926, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Charles Milgrim, owner, to permit in a residence district the maintenance of a factory use of an existing building (previously denied by the board); premises 231 West 74th street, Manhattan.

CAL. NO. 593-26-BZ—Application, July 7, 1926, under section 21 of the building zone resolution, of Daniel Campbell, Jr., architect, on behalf of Dualboro Corp., owner, to permit the extension from an unrestricted district into a business district of a proposed garage for the storage of more than five (5) motor vehicles; premises 62-64-66 Northern boulevard, Flushing, Borough of Queens.

CAL. NO. 604-26-BZ—Application, July 10, 1926, under section 21 of the building zone resolution, of Emil Guterman, applicant, on behalf of H. W. Olson and C. W. Otto, lessees, to permit in a business use district the installation and maintenance of a gasoline selling station; premises 641-645 Gun Hill road, northeast corner of Olinville avenue, The Bronx.

CAL. NO. 535-26-BZ—Application, June 9, 1926, under section 21 of the building zone resolution, of Carl Sherman, applicant, on behalf of Bogild Builders, Inc., owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises east side Jerome avenue, 165.02 ft. north of East 174th street, The Bronx.

CAL. NO. 633-26-BZ—Application, July 21, 1926, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Miriam Young, owner, to permit in a residence district the erection and maintenance of a building for store purposes; premises 1883 Marmion avenue, The Bronx.

CAL. NO. 606-26-BZ—Application, July 12, 1926, under section 7e of the building zone resolution, of John J. Dunnigan, applicant, on behalf of Mary A. Klug, owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 445-449 East 189th street, The Bronx.

CAL. NO. 607-26-BZ—Application, July 12, 1926, under section 21 of the building zone resolution, of Joseph B. Lynch, applicant, on behalf of Leo F. Gieberick, owner, to permit in a residence district the erection of a garage for the storage of more than five (5) motor vehicles; premises 502-518 Avenue W and 2341-2351 East 5th street, Brooklyn.

CAL. NO. 1266-25-BZ—Application, December 9, 1925, under section 21 of the building zone resolution, of Philip J. Sinnott, applicant, on behalf of Louis J. Block, owner, to permit in a business district the erection and maintenance of a gasoline selling station; premises 668-672 New Lots avenue, southwest corner of Jerome street, Brooklyn.

CAL. NO. 574-26-BZ—Application, June 24, 1926, under sections 7c and 21 of the building zone resolution, of John J. Dunnigan, applicant, on behalf of Menlo Building Co., owner, to permit the extension from an

# CALENDAR

unrestricted district into a business district of a proposed garage for the storage of more than five (5) motor vehicles; premises 3510 Webster avenue, The Bronx.

CAL. NO. 605-26-BZ—Application, July 12, 1926, under section 21 of the building zone resolution, of Kramer and Kleinfeld, applicants, on behalf of Daniel Buonocore, owner, to permit in a business district the erection and maintenance of a poultry slaughter house; premises 1767-1779 84th street, Brooklyn.

CAL. NO. 643-26-BZ—Application, July 23, 1926, under section 21 of the building zone resolution, of John J. Dunnigan, applicant, on behalf of Breskap Realty Corp., owner, to permit in a residence district the alteration and conversion of occupancy in part, of the first story from residence use to a business use; premises 2850 Grand Concourse, northeast corner of East 198th street, The Bronx.

CAL. NO. 725-26-BZ—Application, August 23, 1926, under section 21 of the building zone resolution, of Brown Rolston, architect, on behalf of Pie Bakeries of America, Inc., owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises north side of 2nd street, 170 ft. 9 in. east of Fourth avenue, Brooklyn.

WILLIAM E. WALSH, *Chairman.*

## NOVEMBER 9, 1926, 2 P. M.

### *Petitions for Variations.*

- 497-26-S—34 East 30th street, Manhattan.
- 637-26-S—157-159 West 22nd street, Manhattan.

Resolved, that the appeal be and it hereby is *dismissed* for lack of prosecution.

130-26-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Charles Cooper & Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—194 Worth street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Meyers of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	4
Negative .....	0
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(130-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Chas. Cooper & Co., owner, filed, February 15, 1926, an appeal from an order of the fire commissioner, affecting premises 194 Worth street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 10, 1925, reads:

"Order No. 31935-LC:

"Provide a separate and distinct system of *Automatic Sprinklers* throughout building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals May 24, 1917, as amended May 2, 1918, and January 21, 19, effective February 17, 1919.";

and

WHEREAS, the building is non-fireproof, 5 stories (59 ft. 6 in.) in height, 28 ft.  $\frac{3}{4}$  in. frontage on Worth street and 26 ft. 7 in. frontage on Mulberry street by 27 ft. 4 in. in (average) depth; OCCUPIED as a chemical and drug house; 1st story, store; 2nd story, 10 persons; 3rd story, 3 persons; 4th story, stock, 1 person; 5th story, stock room, 2 persons; and

WHEREAS, the appellant contends that the quantities of chemicals and drugs carried are 10 per cent or less than that permitted in wholesale drug houses; that there is no manu-

facturing nor compounding done on the premises; furthermore, that the present business has been in operation since 1860 and now carries a smaller amount of chemicals and drugs than at any time; and that under existing conditions a sprinkler system is not necessary; and

WHEREAS, a permit has been in force on these premises since 1915 under the same use and occupancy, and the premises occupied substantially for the same use and operation for thirty years.

*Resolved*, that the board recommends the restoration of the permit by the fire department for these premises under the same conditions as existed during the issuance of same since 1915.

553-26-A.

APPELLANT—Stap Co., Inc., lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—7-11 West 45th street, Manhattan.

APPEARANCES—

For Appellant: Robert S. Tipping.

For Administration: Inspector Meyers of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	4
Negative .....	0
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(553-26-A)

WHEREAS, Stap Co., Inc., lessee, filed, June 17, 1926, an appeal from an order of the fire commissioner, affecting premises 7-11 West 45th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 29, 1926, reads:

"Order No. 34267-LC:

"You are hereby notified that an inspection of premises \* \* \* used for the storage and use of oxygen, nitric acid, etc., shows that the following must be done before permit requested by you can be issued:

"1. Have each operator of blow-pipe or other similar device or apparatus for heating, melting or welding apply for and secure a Certificate of Fitness.";

and

WHEREAS, the building is fireproof, 17 stories (170 ft.) in height, 45 ft. by 90 ft. in area; OCCUPIED: 1st story, stores; upper stories, offices and 25 per cent manufacturing, about 40 persons on each story; and

WHEREAS, the appellant claims that he occupies part of the 14th story for his factory, there being other independent factories on the same floor; that he carries 3 cylinders of oxygen of 220 cubic feet capacity each; that the gases used are safe and non-inflammable; the cylinders are located 20 ft. away from work benches; furthermore, the appellant contends that the necessity for individual certificates of fitness no longer exists, as the person operating the blow-pipe does not operate the oxygen regulator.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the person operating the tank and the large platinum torch shall obtain a certificate of fitness; that the tanks shall be located at the front of the building adjacent to or near an open window; that the use and occupancy of these premises shall be limited to the manufacturing jewelers' trade; and that the requirements of the labor law shall be complied with.

600-26-A.

APPELLANT—Scottish Rites Bodies of N. Y. City, owner.

SUBJECT—Appeal from order of superintendent of buildings.

PREMISES AFFECTED—315 West 34th street and 316 West 35th street, Manhattan.

## THE RESOLUTION:

(600-26-A)

WHEREAS, Scottish Rites Bodies of New York City, owner, filed, June 30, 1926, an appeal from an order of the superintendent of buildings, affecting premises 315 West 34th street and 316 West 35th street, Borough of Manhattan; and

WHEREAS, the order of the superintendent of buildings, dated October 16, 1924, reads:

“Order No. 4498-1924:

“In that of erecting marquise connecting two existing marquise thereby making the marquise more than 50' long.

“You are hereby directed to remove 4' section of marquise as required by law.”;

and

WHEREAS, the building is fireproof, 8 stories in height 125 ft. by 197 ft. 6 in. in area; OCCUPIED as a fraternal organization, club and meeting place; a marquise projecting 22 ft. 9 in. outward, 12 ft. 4 in. above sidewalk has been erected on the front of the building and running 75 ft. 0 in. in length without an opening; and

WHEREAS, the appellant claims that the marquise was constructed for the protection of pedestrians; also for additional beauty and to put a 4-foot gap in the same would defeat the purpose for which it was constructed.

Resolved, that the order of the superintendent of buildings be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the marquise shall be equipped and provided with a hinged hatchway not less than 4 ft. in width for the entire depth from the face of the marquise to the face of the building, subdivided into three sections of two leaves each and arranged to fold back on the existing marquise; that a sign shall be painted on the underside of marquise in red letters on white background, marked “trap doors” for fire department use; that the present marquise shall not be extended or enlarged nor embrace any window on the course of any stairs, passageway or shaft; and so long as the existing use and occupancy of the premises shall remain unchanged.

615-26-A.

APPELLANT—William C. McTarnahan, for Petroleum Heat & Power Co., Inc., of New York, lessee.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—416-432 East 47th street, Manhattan.

## APPEARANCES—

For Appellant: George P. Knight.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and  
Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(615-26-A)

WHEREAS, William C. McTarnahan, for Petroleum Heat and Power Co., Inc., of New York, lessee, filed, July 13, and

1926, an appeal from a decision of the fire commissioner, affecting premises 416-432 East 47th street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, re Alt. Application No. 666-1923, dated July 13, 1926, reads:

“Proposed additional storage of fuel oil is contrary to the resolution of the Board of Standards and Appeals under Calendar No. 549-24-A.”;

and

WHEREAS, the premises consist of a plot of ground having a frontage of 225 ft. on East 47th street and a depth of 100 ft., upon which is located a sub-station of the Petroleum Heat and Power Co. consisting of six (6) buried storage tanks, each having a capacity of 30,000 gallons of fuel oil and also a one-story fireproof pump house, approximately 18 ft. by 57 ft. in area; and

WHEREAS, under Cal. No. 549-24-A, an appeal (by the Ballard Oil Equipment Co.) permitting an installation of 6 tanks was granted by the board. The premises as now laid out indicate a tank storage arrangement of three batteries with 6 tanks to each battery. Each individual tank of 30 gallon storage capacity; and

WHEREAS, the present needs do not indicate a greater requirement than one additional battery of 6 tanks.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, permitting the installation of six additional tanks, in accordance with the conditions imposed in the resolution under Cal. No. 549-24-A, on same premises *on condition* that the storage shall be arranged in twelve (12) tanks of not more than 30,000 gallons capacity each; that the tanks shall be encased in not less than 12 in. of concrete and not less than 12 in. concrete between tanks with 2 ft. of earth-fill on top of same; that the installation shall be completed in accordance with the fuel oil rules of the board of standards and appeals; that the storage shall be restricted to oil of not less than 150 degrees flashpoint; and that the construction and installation of this plant shall be in accordance with the plans and details filed in the appeal under Cal. No. 549-24-A.

642-26-A.

APPELLANT—American Book Match Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—108-116 Lorraine street, Brooklyn.

## APPEARANCES—

For Appellant: L. T. Ralston.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and  
Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(642-26-A)

WHEREAS, American Book Match Co., owner, filed, July 23, 1926, an appeal from an order of the fire commissioner, affecting premises 108-116 Lorraine street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated July 23, 1926 (Order No. 98347-F), reads:

“Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.”;

# MINUTES

WHEREAS, the building is non-fireproof, one story in height, 100 ft. by 200 ft. in area, divided into two areas by a firewall; OCCUPIED for the manufacture of paper matches, 20 persons; and

WHEREAS, the appellant claims that the building is equipped with an automatic sprinkler system (connected with central service-station alarm), having siamese connections on each street.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building be not increased in height or area and shall be subdivided by a wall of approved masonry with not more than one opening therein, equipped with approved automatic fire doors and that the gable walls, other than the single opening in each lavatory, shall be unpierced throughout and that all cutting machines shall be provided with an approved 2½ gallon fire extinguisher; that the premises throughout shall be equipped with a wet sprinkler system with central office connection; and so long as conditions as to occupancy and use remain substantially unchanged.

644-26-A.

APPELLANT—Joseph H. Cornell, for Ladies Malbish Arumin Society, owner.

SUBJECT—Appeal from decision of the superintendent of buildings.

PREMISES AFFECTED—1 Beach 34th street, Edgemere, Borough of Queens.

APPEARANCES—

For Appellant: Joseph H. Cornell, Leo J. Uris, Mrs. Joseph Cohen, Mrs. Rosenkranz.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT ON CONDITION—

Affirmative: Chairman Walsh, Commissioner Holland and Chief Kenlon.....	3
Negative: Commissioners Connell and Guilfoyle .....	2
Absent .....	0

THE RESOLUTION:

(644-26-A)

WHEREAS, Joseph H. Cornell, for Ladies Malbish Arumin Society, owner, filed, July 26, 1926, an appeal from a decision of the superintendent of buildings, affecting premises 1 Beach 34th street, Edgemere, Borough of Queens; and

WHEREAS, the decision of the superintendent of buildings rendered July 22, 1926, reads: (Alt. No. 2605-1926)

"SEC. 72, Par. A, requires that this building being over 20 feet in height must be a fireproof building;" and

WHEREAS, the existing building is of frame construction, two and one half stories (39 ft.) in height; OCCUPIED as a summer home for 50 boys, 12 to 15 years of age; and

WHEREAS, the appellant proposes to erect a two-story and basement L shaped extension (of brick wall, wood beams and composition flooring), 60 ft. by 25 ft. and 60 ft., irregular, in depth, with one fireproof brick enclosed stairway, extending from basement to roof and also an interior stairway enclosed with fire-retarding partitions extending from first story to second story; proposes to use the building as a summer home for 100 boys; and

WHEREAS, the appellant contends that all connections between the existing building and the proposed extension will be provided with fireproof, self closing doors; that the existing building has been occupied as a summer home for 8 years;

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

654-26-A.

APPELLANT—Ballard Oil Equipment Co., for Fordham Gardens, Inc., owner.

SUBJECT—Appeal from decision of the fire commissioner.

PREMISES AFFECTED—2788 Grand Concourse, Borough of The Bronx.

APPEARANCES—

For Appellant: David Kaufman.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Absent .....	0

THE RESOLUTION:

(654-26-A)

WHEREAS, David Kaufman, for Fordham Gardens, Inc., owner, filed, July 27, 1926, an appeal from a decision of the fire commissioner, affecting premises 2788 Grand Concourse, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, dated July 27, 1926, reads:

"N. B. App. No. 205-1926

"9. Top of storage tank should be located at lower level than fill level."

and

WHEREAS, the building is fireproof, 6 stories in height, 96 feet by 130 feet (irregular) in area. OCCUPIED: as an apartment house. and

WHEREAS, a fuel oil burning equipment has been installed, consisting of 3,500 gallon fuel oil storage tank (buried under the front court of the building) and a complete Ballard Automatic Oil Burning System; and

WHEREAS, appellant contends that the storage tank, having its top four (4) feet above the fill box level, rests on solid rock; that a check valve (located near the receiving end of the oil line) prevents the oil syphoning out through the fill box and that hardship would result if compelled to remove the rock and locate the tank below the level of the fill box.

*Resolved*, that the decision of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

## BUILDING ZONE CASES.

606-26-BZ.

APPLICANT—John J. Dunnigan, for Mary A. Klug, owner.

SUBJECT—Application (re decision of superintendent of buildings) under sections 7c and 21 of the building zone resolution.

PREMISES AFFECTED—135-147 East 22nd street, Brooklyn.

## APPEARANCES—None.

ACTION OF BOARD—Application dismissed for lack of prosecution.

## THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	4
Negative .....	0
Absent: Chief Kenlon .....	1

## THE RESOLUTION:

(131-26-BZ)

WHEREAS, M. A. Cantor, for the Borough Hall Construction Company, owner, filed, February 16, 1926, an application under the building zone resolution affecting premises 135-147 East 22nd Street, Borough of Brooklyn; and

WHEREAS, applicant has failed to complete his papers although duly notified to do so;

Resolved, that the application be and it hereby is *dismissed* for lack of prosecution.

78-26-BZ.

APPLICANT—Schreiber, Collins, Myers & Buchter, for Masro Realty Corp., owner.

SUBJECT—Application (re decision of superintendent of buildings) under section 21 of the building zone resolution, to permit partly in a 1½ times district and partly in a 2 times district and also in a "B" area district, the erection and maintenance of the street wall higher than that permitted by the zone resolution, and also to construct a yard less in depth than that required by the zone resolution.

PREMISES AFFECTED—264-268 West 40th street, Manhattan.

## APPEARANCES—

For Applicant: John F. Keating, John Caldwell Myers.

For Opposition: Isador Lublin.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(578-26-BZ)

WHEREAS, Schreiber, Collins, Myers and Buchter, for Masro Realty Corporation, owner, filed, June 26, 1926, an application under the building zone resolution, to permit in a 1½ times height district and partly in a 2 times height district, and also in a B area district the erection of the street wall of a building to a height in excess of the limit set by the zone resolution and, also, to permit a rear yard of a depth less than that required by the zone resolution; premises 264-268 West 40th street, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 3, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 8th Avenue is in a 1½ times height B area and business use district and West 40th street is in a 2 times height B area and business use district; and

WHEREAS, the decision of the superintendent of buildings rendered June 8, 1926, N. B. Applic. No. 230-1926, reads:

"1. Provide lawful yard as per Section 12 and 17 of Zoning Resolution.

"2. Building is partly in a 1½ times and partly in a 2 times district. Portion of front wall exceeds the height limits imposed by Sections 8 and 9 of the Zoning Resolution."

and

WHEREAS, the proposed building is to be of fireproof construction, 20 stories in height, with a frontage of 65 feet and a depth of 98 ft. 9 in. 1st story, 88 ft. 9 in. above, to be occupied as stores and lofts; it is proposed to erect the street wall on entire front to a height of 150 ft.; and

WHEREAS, the plot on which the proposed building is to be erected is divided by the boundary line of two heights districts permitting the street wall for a portion of the plot to be erected to a height of 150 ft. and the remainder to a height of 120 ft.; and

WHEREAS, the board deemed that applicant was entitled to adjustment relief under section 21, as regards the height restriction, on the ground of practical difficulty and unnecessary hardship.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the height district regulations of the building zone resolution and that the application be and it hereby is *granted*, only so far as it affects the street front of the building as to the setback requirements for a height not to exceed one hundred and fifty feet above curb level, *on condition* that the structure otherwise shall be erected in conformity with the zoning resolution requirements, setback, rear yard and area regulations; and that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months.

634-26-BZ.

APPLICANT—William F. Doyle, for Hansom Building Corp., owner.

SUBJECT—Application (re decision of superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—East side Sherman avenue, 51 feet south of East 163rd street, The Bronx.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: Wm. Koener, Mr. Raunheim, Herman Ritschen.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Holland and Guilfoyle and Chief Kenlon	4
Negative: Commissioner Connell	1
Absent	0

THE RESOLUTION:

(634-26-BZ)

WHEREAS, William F. Doyle, for Hansom Building Corporation, owner, filed, July 21, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises east side of Sherman avenue 51 ft. south of East 163rd street, The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 3, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Sherman avenue is in a unrestricted business and residence district; East 163rd street is in a business district and Grant avenue is in an unrestricted business and residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered, July 17, 1926, N. B. 1833-26, reads:

"Erection of public garage for storage of more than five motor vehicles in business district is contrary to provisions of the Building Zone resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, 2 stories in height, with a frontage of 64 feet 0 inches and a depth of 151 feet 0 inches, to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship, in view of abutting and surrounding conditions.

*Resolved* that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that the building shall not be erected higher than the existing adjoining building on the south and shall be of fireproof construction; that the gable walls shall be unpierced throughout their entire height and length; that a yard of not less than ten feet in depth for the full width of premises shall be provided and maintained at the rear; that the rear wall shall be unpierced with the exception of one doorway not less than three (3) feet six (6) inches in width, equipped with a self-closing fireproof door; that there shall be no vehicular opening on street front within thirty (30) feet of the northerly gable wall; that there shall be no roof signs erected or maintained, and no signs erected other than one pro-

jecting electric sign located on the front of the building; that any gasoline storage equipment installed shall be located at the street front at the southerly side of the structure; that the front of the building shall be finished with face brick and architectural terra cotta or stone trimmings; and that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

1302-25-BZ.

APPLICANT—William F. Doyle, for Kay-Wei Building Corp., owner.

SUBJECT—Application for reopening, reconsideration, (re decision of the superintendent of buildings) under sections 7e and 21 of the building zone resolution, to permit in a business district extending slightly into a residence district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles, (previously denied).

THE RESOLUTION:

(1302-25-BZ)

WHEREAS, William F. Doyle, for Kay Wei Building Corp., owner, filed, December 16, 1925, an application, under the building zone resolution, to permit in a business district extending slightly into a residence district, the erection and maintenance of a garage for the storage of more than five motor vehicles (previously denied); premises 1751-1765 67th street, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 3, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 67th street is in a business district, 18th avenue is in a business district and 66th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 1, 1926 (Applic. No. 23164), reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3 and Sec. 4, and 15.

"The erection of a Public Garage for more than five motor vehicles in a business district and projecting slightly into a residential district.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, 1 story in height, with a frontage of 140 ft.  $\frac{3}{4}$  in. and a depth of 141 ft. 5 in. to be occupied as a garage for more than 5 motor vehicles; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

# MINUTES

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed* and that the application be and it hereby is *denied*.

AREA FIXED.

(302-26-BZ)

The chairman presented and read a communication from Croker National Fire Prevention Engineering Co. requesting the board to fix the area deemed affected and in which to obtain consents for the alteration and extension of a garage

for more than five motor vehicles; premises 13-15 Sumpter street, Brooklyn.

The following area was approved by the board:

Both sides of Sumpter Street and also both sides of Fulton street from Patchen Avenue to Reid Avenue; also the premises adjoining at rear and for a distance of 50 feet on either side of the side lot lines of the premises in question.

Adjourned 2.00 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

THE RESOLUTION:

(355-26-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for H. Meltzer & Sons, Corp., owner, filed, April 23, 1926, a petition for variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 380-390 Snediker avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated January 28, 1926, reads:

"Order No. 90192-LD:

"Provide an interior stairway from 1st to 2nd story constructed as per rules 3 and 4, of the Board of Standards and Appeals, adopted July 29, 1924.

"Order No. 90194-LD:

"Arrange bars on windows on all sides of 1st story, so as to be readily movable or removable from both sides in such a manner as to afford the free and unobstructed use of such windows, for purposes of egress, as per Sec. 272, of the Labor Law.

"Order No. 90195-LD:

"Remove the obstructions (machines) in front of doors in 1st and 2nd story, as per Sec. 272, of the Labor Law.";

and

WHEREAS, the building is fireproof, 2 stories in height, 74 ft. by 100 ft. in area; OCCUPIED for the manufacture of metal bag frames; 1st story, 15 persons; 2nd story, 50 persons; EXITS: six open exterior iron stairways, extending from the ground level to 2nd story; six areaway exits from

1st story up to ground level; ROOFS of adjoining buildings: same level at west; and

WHEREAS, the petitioner claims that the building is open on three sides; that there are four (4) unobstructed exits from the 1st story and five unobstructed exits from the 2nd story; that there is no point of any floor more than 40 ft. from an exit leading direct to the street.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Order No. 90192, *on condition* that the building shall not be increased in height or area, and that the existing six (6) exterior iron stairways from the 2nd story shall be maintained; and *granted*, as to Order No. 90194, *on condition* that the six (6) existing exterior exits from 1st story shall not be reduced in number or dimension and that two (2) exits on each of the three sides of the building shall be maintained free and unobstructed; and only so long as conditions as to operation and use remain substantially unchanged; and *denied* as to Order No. 90195.

639-26-S.

PETITIONER—Samuel Rosenblum, for Latham Litho and Printing Co., lessee.

SUBJECT—Variation of the labor law as cited in the order of the fire commissioner.

PREMISES AFFECTED—Southwest corner of Woodside avenue and Barnett avenue, Long Island City, Borough of Queens.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

THE RESOLUTION:

(639-26-S)

WHEREAS, Samuel Rosenblum, for Latham Litho and Printing Co., lessee, filed, July 22, 1926, a petition for variation from the requirements of the labor law as cited in an order of the fire commissioner, affecting premises on the southwest corner of Woodside avenue and Barnett avenue, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated August 20, 1925 (Order No. 83884-LD), reads:

"1. Provide an enclosure of fireproof material around 2 interior stairways one on north side and one on south side, as per Section 270 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, 3 stories in height, 162 ft. by 264 ft. in area; OCCUPIED for printing and lithographing purposes; 1st story, garage, boiler room and storage, 12 persons; 2nd story, office, press room and shipping room, 125 persons; 3rd story, photograph department, 6 persons; EQUIPPED with a sprinkler system and telegraphic communication; an accommodating open iron stairway from first story (boiler room) to 2nd story; EXITS: two interior fireproof stairways, extending from the 1st story to top story, enclosed in fireproof partitions with fireproof doors at openings; ROOFS of adjoining buildings: none; and

WHEREAS, the petitioner contends that the interior stairway at the south side is not a required means of exit, but is an accommodating stairs between the boiler room and shipping room; furthermore, that, in addition to the accommodating stairway, the building is provided with two fireproof enclosed stairways in accordance with the labor law.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and that the petition be and it hereby is *denied*.

PETITIONER—Samuel Rosenblum, for Estate of Jonas Weil, L. V. Weil, executor, owners.

SUBJECT—Variation of the labor law as cited in the order of the fire commissioner.

PREMISES AFFECTED—50 Bond street, Borough of Manhattan.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative .....	0
Absent: Chief Kenlon.....	1

THE RESOLUTION:

(640-26-S)

WHEREAS, Samuel Rosenblum, for Estate of Jonas Weil, Benjamin J. Weil, et al, executors, owner, filed, July 22, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 50 Bond street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 25, 1925 (Order No. 87411-LD), reads:

"2. Arrange the fire escape at the northwest corner of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.

"NOTE: Among the defects noted on this fire escape are the following:

"No stairway from the lowest balcony to ground.

"No safe passageway to the street from termination.";

and

WHEREAS, the building is non-fireproof, 7 stories in height, 31 ft. 6 in. by 121 ft. in area at 1st story and 31 ft. 6 in. by 115 ft. in area above; OCCUPIED: 1st story, manufacture of paper boxes; 2nd story, meeting room; 3rd story, manufacture of caps, 18 persons; 4th story, vacant; 5th story, manufacture of glass boxes and caps, 17 persons; 6th story, manufacture of clothing, 35 persons; 7th story, manufacture of hat frames, 10 persons; EQUIPPED with a fire alarm signal system; EXITS: an interior wooden stairway, extending from the 1st story to roof, enclosed in non-fireproof partitions, metal-covered on both sides with No. 26 gauge; with fireproof doors at openings; a sub-standard fire escape on the front of the building; a party fire escape on the west side of the building at rear, having fireproof openings along the course thereof, extending from top story to 2nd story and drop ladder reaching yard level of No. 48, Bond street, with no legal means of egress to the street; ROOFS of adjoining buildings: 2 stories lower at east and west; and

WHEREAS, the petitioner claims that the interior stairs are enclosed with fire-resisting partitions and have been previously accepted by departments having jurisdiction: that connections to the party fire escapes on the rear of No. 55 Great Jones street were made pursuant to previous orders and the fire escape accepted by the departments on completion of the work; furthermore, the board of standards and appeals accepted the party fire escapes as a required means of exit from No. 55 Great Jones street under Cal. No. 1981-17-S; the petitioner contends that the existing exits are adequate.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that self-closing, fireproof doors shall be provided on each story above the first story to the existing fire escape

on the rear of No. 55 Great Jones street; that the doors on the fire escape shall be maintained accessible at all hours, equipped in accordance with the labor law, and that a drop ladder in guides shall be provided from the lowest balcony of the party wall fire escape to the yard of No. 48 Bond street with egress therefrom through plain glass openings; and that a balcony shall be provided on the lowest story of No. 50 Bond street with egress to the adjoining yard to the east, No. 340 Bowery, with egress from the yard of No. 340 Bowery through plain glass openings to the street; and granted only so long as conditions as to occupancy and use shall remain substantially unchanged.

641-26-S.

PETITIONER—Henry I. Oser, for Bas Realty Corporation, owner.

SUBJECT—Variation of the labor law as cited in the decision of the superintendent of buildings.

PREMISES AFFECTED—2-4 West 29th street, Manhattan, and 258-260 Fifth avenue, Manhattan.

APPEARANCES—

For Petitioner—J. Lewis.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Negative .....	0
Absent: Chief Kenlon.....	1

THE RESOLUTION:

(641-26-S)

WHEREAS, Henry I. Oser, for Bas Realty Corporation, owner, filed, July 22, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings affecting premises 2-4 West 29th street and 258-260 Fifth avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered July 21, 1926, reads:

"1. Exterior openings at 1st, 2nd and 3rd floors should comply with Section 264 of Labor Law and Rule 503 of Industrial Code.";

and

WHEREAS, the proposed building is fireproof, 16 stories in height, 50 ft. by 90 ft., 6 in. in area. OCCUPIED: Offices, showrooms and 25% manufacturing, 85 persons on each story; EQUIPPED with a sprinkler system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to use large plate glass in front windows; the maximum size at 1st story, 4 ft. 11 in. by 8 ft.; at 2nd and 3rd story, 2 ft. by 3 ft. 3 in.; the petitioner contends that the windows are for the display of merchandise and to divide the glass into smaller sections would defeat their purpose and greatly reduce rental value.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted only so far as the windows on the street front of the three lowest stories are affected, on condition that all openings shall be equipped with approved metal frames, glazed with 1/4 in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

651-26-S.

PETITIONER—Schwartz & Gross, for Jatison Construction Company, Inc., owner.

SUBJECT—Variation of the labor law as cited in the decision of the superintendent of buildings.

PREMISES AFFECTED—39-43 West 37th street, Borough of Manhattan.

Connell, Holland and Guilfoyle..... 4  
Negative ..... 0  
Absent: Chief Kenlon..... 1

## THE RESOLUTION:

(651-26-S)

WHEREAS, Schwartz & Gross, for Jatison Construction Company, Inc., owner, filed, July 27, 1926, a petition for variation from the requirements of the labor law as cited in a decision of the superintendent of buildings, affecting premises 39-43 West 37th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered July 20, 1926, N. B. Applic. No. 131-1926, reads:

"17. Windows on street front at 1st, 2nd and 3rd floors should comply with Section 264 of Labor Law and Rule 503 of Industrial Code.";

and

WHEREAS, the building is fireproof, 18 stories in height, 60 ft. by 98 ft. in area; OCCUPIED: 1st story, stores; upper stories, offices, show rooms and 25% manufacturing, approximately 115 persons per story; EQUIPPED with a sprinkler system. EXITS: Two interior fireproof stairways extending from the 1st story to roof, enclosed in fireproof partitions, with fire doors at openings; and

WHEREAS, there are openings on the 1st, 2nd and 3rd stories in the street wall of the building, glazed with  $\frac{1}{4}$  in. thick plate glass; the maximum area of the glass on the first story being 9 ft. by 15 ft.; and on the 2nd and 3rd stories 6 ft. by 11 ft. in area; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would detract from the architectural appearance of the building and would, also, destroy the intended use of the lower three stories.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects the windows on the street front of the three lowest stories on condition that all openings shall be equipped with approved metal frames, glazed with  $\frac{1}{4}$  in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

## THE RESOLUTION:

(657-26-S)

WHEREAS, Arthur Eckstein, Inc., for 208-210 West 30th Street Corporation, owner, filed, July 28, 1926, a petition for variation from the requirements of the labor law, as

cited in an order of the fire commissioner, affecting premises 208-210-212 West 30th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 6, 1925, reads:

"Order No. 76498 L. D.

"Remove combustible articles (cigar stand) from stair enclosure, 1st story as per Rule 5 of the Board of Standards and Appeals adopted July 29, 1924.";

and

WHEREAS, the building is fireproof, 12 stories in height, 69 ft. by 100 ft. in area at 1st story and 69 ft. by 90 ft. in area above. OCCUPIED: 1st story, stores; upper stories, tenant factory (mostly manufacturing furriers), approximately 30 persons per story; EQUIPPED with a sprinkler system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there is a cigar stand located on the 1st story, within the easterly stairway enclosure; and

WHEREAS, petitioner contends that the cigar stand is so located, that it does not interfere with the exit; that the occupant carries a small stock of tobacco and proposes to install, within the stand, an approved liquid fire extinguisher.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and that the petition be and it hereby is denied.

## APPLIANCE SUBMITTED FOR APPROVAL.

## THE RESOLUTION:

(259-25-SA)

WHEREAS, the Automatic Oil Burner Corporation filed March 6, 1925, a petition for approval of their device, known as the "Electrol" Automatic Oil Burner; and

WHEREAS, a committee of the board inspected this device in operation at 32 Lincoln street, Flushing, Borough of Queens; and

WHEREAS, the petition was granted by the board at its meeting, June 29, 1925, approving the burner for use with Grade "B" fuel oil and petitioner requested a modification of the resolution and permission to use the burner with Grade "A" oil.

Resolved, that the board of standards and appeals does hereby approve the "Electrol" Automatic Oil Burner, in accordance with report of engineer of the board, for domestic installation, using grade "A" and grade "B" fuel oil, on condition and in conjunction with installations and equipment complying with the rules of the board of standards and appeals in all respects, except as to pilot light and control.

# RULES

## FIRE ESCAPE RULES

ADOPTED JULY 2, 1918; CAL. NO. 1218-18-S; AMENDED DEC. 12, 1918; CAL. NO. 1708-18-S; AMENDED  
MAY 9, 1924; CAL. NO. 414-24-SR.

**Rule 1.** In any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, more than five stories in height and not exceeding nine stories in height, nor in any case more than 90 ft. from curb level to top floor level, one of the required means of exit or escape under Section 271-1 of the Labor Law may consist of an outside fire escape, provided that:

(a) Any such fire escape hereafter erected shall comply with all the provisions of Section 273, labor law, and in addition thereto:

(1) The balconies and stairs shall be protected on the outside by substantial railings to a height of at least 4 ft. 6 in., measured from floor of balcony or center of stair tread, constructed of bars at least one-half ( $\frac{1}{2}$ ) inch in diameter, spaced not more than six (6) inches on centers, or of substantial grill work, or of screening not less than No. 10 U. S. gauge wire with not more than one and one-half ( $1\frac{1}{2}$ ) mesh, all rigidly braced;

(2) When there is safe egress from the roof of the building to any adjoining structure, the fire escape stairway shall continue to the roof, and if there be no safe means of egress, a gooseneck ladder shall be provided from the top story balcony to the roof.

(b) Any such fire escape erected prior to October 1, 1913, shall conform in every respect with the requirements of paragraph (a) of this rule, except that balconies may be not less than 3 feet in width; the connecting stairs not less than 20 inches in width, and placed at an angle not exceeding 60 degrees if the building is not over six stories in height, otherwise at an angle of 45 degrees; fire windows leading to balconies may be at window sill level if the steps not less than sixteen (16) inches wide are provided on the inside from floor level, leading thereto.

(c) Any such fire escape erected subsequent to October 1, 1913, and prior to these rules taking effect, unless previously accepted as one of the required means of exit or escape by the administrative official having jurisdiction, shall conform in every respect to paragraph (a) of this rule.

**Rule 2.** A fire escape shall not hereafter be accepted as constituting one of the required means of exit or escape under Section 271-1 of the Labor Law, in any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, exceeding nine stories in height, or more than 90 feet from curb level to top floor level.

cupied as a factory, exceeding nine stories in height, or more than 90 feet from curb level to top floor level.

**Rule 3.** When in addition to the required exits from any factory or factory building, there exist other means of egress which are not entirely in accordance with the requirements of the Labor Law and the Rules of the Board of Standards and Appeals, such means of egress may be retained under the following conditions:

(a) Fire Escapes.—All substandard fire escapes on factory buildings shall be removed or reconstructed in accordance with Section 274 of the Labor Law, except that in lieu of a counterbalanced stair a drop ladder in guides from the lowest balcony to ground may be provided. Substandard fire escapes shall not be considered as a basis for increased occupancy of the building. When such substandard fire escapes are located in any court or on the side or rear of a building, proper egress to a point of safety shall be provided, either to open adjoining yards, or the lowest balcony may be connected to an adjoining fire escape, exterior stairway, or to roof of adjoining extension, or other egress satisfactory to the Fire Commissioner. All such fire escapes shall be maintained structurally safe and properly painted.

(b) Interior Stairways.—All interior stairways not conforming to the requirements of the Labor Law or rules of the Board of Standards and Appeals may be retained, provided that egress to same is maintained unobstructed, halls are properly lighted, and all landings, passageways, etc., are maintained free and unobstructed. An easily operated panic bolt or other similar device may be installed at street exit door.

(c) Exterior Screened Stairways.—Exterior screened stairways not serving as a required means of egress shall be either removed or maintained structurally safe and properly painted, exits thereto and all platforms and passageways thereof shall be maintained unobstructed, and egress from termination shall be provided for sub-standard fire escapes in subdivision a.

(d) Horizontal Bridges.—Horizontal bridges and part wall balconies between buildings shall be removed or maintained structurally safe and properly painted, and access thereto and all passageways thereof shall be maintained unobstructed.

(e) No sign of any character shall be placed at openings leading to these sub-standard exits.

# RULES

## FUEL OIL RULES

### CONSTRUCTION AND INSTALLATION OF OIL BURNING EQUIPMENT AND STORAGE AND USE OF FUEL OILS

Adopted by the Board of Standards and Appeals November 6, 1919, Amended January 6, 1922, January 18, 1924, and November 3, 1926.

#### Rule 1. Definition.

The term "fuel oil" under these rules shall include any liquid or mobile mixture, substance or compound derived from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

##### (a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

##### (b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

(c) Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

##### (d) Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, may be used for domestic heating in buildings occupied by not more than two (2) families and in tenement houses and commercial plants. If used in tenement houses or commercial plants, a certificate of fitness for the operator of the plant will be required as per Rule 15.

(e) Where Grade A oil is used in place of Grade B oil in domestic installations it may be used under the requirements for Grade B installations.

(f) No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

#### Rule 2. Manner of Storage for Fuel Oil.

Fuel oil, to be used for heating and power purposes, shall be at all times stored in metal tanks with all openings or connections through the tops of the tanks.

#### Rule 3. General Location of Tanks for Fuel Oil.

(a) In all buildings fuel oil storage tanks shall be buried below the floor of the lowest story or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of any wall separating a building from the subway and, if practical, tanks shall be placed in a lower position than the roadbed of the subway.

#### Rule 4A. Location, Protection and Capacity of Tanks for the Storage of Grade A Fuel Oil.

##### Section 1. Inside of Buildings Above Ground.

(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space between the tank and the walls and roof of the enclosure shall be completely filled with dry upland sand or earth well tamped.

(f) Not more than one tank shall be placed in an enclosure.

(g) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "h."

(h) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

##### Section 2. Inside Buildings Below Ground.

(a) When a tank is buried beneath a building its capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4A, Section 1 (g) and (h).

(b) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, covered by at least six (6) inches of concrete which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(c) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with soft earth or sand. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

##### Section 3. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located

# RULES

outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth ( $1\frac{1}{4}$ ) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above ground, the tanks shall be not less than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

## Section 4. Outside of Buildings Below Ground.

(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

## Rule 4B. Location, Protection and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When not buried and located inside of a building they shall be placed on the lowest floor level and shall be enclosed in four inches of terra cotta or eight inches of approved masonry, and the aggregate capacity of such storage tanks shall not exceed 275 gallons.

(b) Tanks, when buried, shall be placed with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm soil foundation.

(c) Tanks shall be set on firm soil and surrounded with soft earth or sand and shall be complete encased with (6) inches of concrete, where soil conditions require.

(d) Where in the opinion of the Fire Commissioner extreme difference of grade or soil conditions would work a hardship an anti-syphon valve or other mechanical device to prevent syphoning approved by the U. S. Bureau of Standards, Fire Underwriters Laboratories or other laboratory recognized by the Board of Standards and Appeals, may be used.

### 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.

## Rule 5. Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half ( $1\frac{1}{2}$ ) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth ( $\frac{1}{4}$ ) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; of masonry or of impervious reinforced concrete. Earth-work embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half ( $1\frac{1}{2}$ ) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

## Rule 5A. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanket-gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half ( $\frac{1}{2}$ ) inch in size. The boilers shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit there shall be kept ready for use two portable fire extinguishers of not less than 1 quart capacity or other equivalent fire extinguishers for extinguishing oil fires.

## Rule 6. Material and Construction of Tanks for the Storage of Fuel Oil.

### Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Such plates shall be free from physical imperfections, such as laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked, or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$  in. shell,  $\frac{1}{4}$  in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$  in. shell,  $\frac{5}{16}$  in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$  in. shell,  $\frac{3}{8}$  in. heads.

Tanks over 120 inches in diameter to be of  $\frac{3}{8}$  in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should flat heads be used, they must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

# RULES

(e) Diameter and Spacing of Rivets.  
Riveting in single lap seams shall not exceed a pitch as follows:

In shell  $\frac{1}{4}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{1}{4}$  in. pitch.  
In shell  $\frac{5}{16}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{3}{8}$  in. pitch.

In shell  $\frac{3}{8}$  in. thick,  $\frac{3}{4}$  in. diameter rivets  $2\frac{1}{2}$  in. pitch.

## Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality required for cylindrical tanks, and of a thickness of not less than  $\frac{5}{16}$  of an inch.

(b) Corners may be made up by bending the plates or by the use of angles.

(c) Rivets in seams shall be  $\frac{5}{8}$  of an inch in diameter and spaced not more than  $2\frac{1}{4}$  inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must not be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of six (6) inches center to center on these members.

(f) When structural reinforcing members are tied together with braces, in order to reduce the effective length, the braces shall not be stressed higher than nine thousand (9,000) pounds per square inch taken on the minimum net section.

(g) If structural members are omitted and the sides of the tank are braced by means of rods or bars, these members should not be spaced farther apart than twenty-four (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch on the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars so that the bar will break before the connection will let go.

## Section 3. Vertical Storage Tanks Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality required for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be  $\frac{1}{4}$  inch and the minimum thickness of roof plates  $\frac{1}{8}$  inch.

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

(c) Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate seams shall be designed, with proper efficiency to meet requirements of above formula for shell plates.

(d) In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind will be permitted.

(e) Tanks for storage of grade B oil shall be constructed in accordance with the requirements of this rule, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than  $\frac{3}{16}$  inches in thickness.

(f) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

## Section 4. Welding.

(a) Where welding is to be used for a part or for the entire tank, the tank shall be fabricated as required under Rule 6, Section 1.

(b) All welded seams of plates shall be lapped or butted.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight, metal to metal, before welding and kept tight together during welding. Both inside and outside welds shall be of full 45 degree fillet.

Where a butt joint is used, it shall be of the 90 deg. double V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

(c) All heads shall be flanged, the straight part of the flange being not less than as follows:

For  $\frac{3}{16}$  inch heads,  $1\frac{1}{4}$  inch flange.

For  $\frac{1}{4}$  inch heads, 2 inch flange.

For  $\frac{5}{16}$  inch heads, 2 inch flange.

For  $\frac{3}{8}$  inch heads,  $2\frac{1}{4}$  inch flange.

For heads over 120 inches diameter the flange shall be increased in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a driving fit and the shell shall fit the head closely all around. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head welds for tanks of 1,100 gallon capacity or less and not over 48 inches in diameter, shall be of the 90 deg. single V type welded entirely through and reinforced not more than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the 90 deg. double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

(d) Where tanks are made up of two or more rings the welded longitudinal joints of adjacent sections shall break joints. At no point of a butt girth joint shall the sheet on one side be offset with the sheet on the other side in excess of one-half of the thickness of the plate. All butt girth joints shall be welded inside and out and reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

## Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar, asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

# RULES

## Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

## Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

## Rule 7. Tests of Tanks for the Storage of Fuel Oil.

### Section 1. Inside of Buildings Above or Below Ground or Outside of Buildings Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks, shall withstand after being set in place, a hydrostatic or air test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

(c) Tanks when subjected to an air pressure test shall be equipped with a safety relief valve set at not more than 32 lbs. per sq. in., and the air compressor device employed in the air testing of the tank shall be of low pressure type, equipped with an automatic pressure regulator set at not less than 35 lbs.

### Section 2. Horizontal Tanks Outside of Building, Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic or air test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

### Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

### Section 4. Test for Tanks. How Conducted.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic or air test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 or 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.

## Rule 8. Piping for Fuel Oil.

### Section 1. Installation of Piping.

(a) Piping shall be run as directly as practicable without sags, and, except as provided in Rule 11A, e, shall be laid so that where practicable pipes shall pitch toward the

supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.

### Section 2. Type and Material.

(a) All piping shall be of standard full weight brass, copper, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ( $\frac{1}{2}$ ) inch inside diameter shall be permitted; except that for Grade B oil  $\frac{1}{4}$ -inch diameter pipes may be used.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Tubing and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. No soldered connection shall be used. The length of tubing shall not exceed that required for direct connections to coupling.

### Section 3a. Tests for Piping. Grade A.

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ( $1\frac{1}{2}$ ) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

### Section 3b. Tests for Piping. Grade B.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.

### Section 3c. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes, when required, shall be not less than one size larger than supply pipe.

### Section 4. Relief Valves.

(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of the pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than  $\frac{1}{2}$  in. by  $\frac{1}{2}$  in. of the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) An automatic by-pass valve of size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with

# RULES

the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.

## Section 5. Fill Pipes.

(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) The fill pipe shall be provided with a trap or seal or carried within four (4) inches of the lowest point in the tank.

(d) The fill pipe shall be made up with screwed or flanged fittings and shall be oil tight and securely held in place.

## Section 6. Vent Pipes.

(a) An open, galvanized iron vent pipe without trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the same class of liquids is installed, vent pipes may be run into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.

(c) Vent openings in tanks shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation. Vents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter ( $1\frac{1}{4}$ ) inches in diameter.

(d) Vent pipes shall be provided with weather proof hoods and terminate outside the building above the street surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direction of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions, to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to tank trucks by tight connections and filled by pressure, a one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow to the fill box and shall be so set as to prevent the passage of vapor to the street.

## Section 7. Return Pipes from Burners.

Return lines from burners, where necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, and shall be connected into the suction line near the pump or into the storage tank. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.

## Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of hot water coils thermostatically controlled and the oil shall not be heated above one hundred and forty (140) degrees Fahrenheit.

## Rule 9A. Valves and Control of Flow for Grade A Fuel Oil.

(a) Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size

containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the hand-wheel. The use of packing which may be affected by oil or heat is prohibited.

(b) A shut-off valve shall be provided in discharge and suction lines near each pump; in discharge line from each tank as near the tank as practicable, and in branch lines near each burner.

## Rule 9B. Valves and Control of Flow for Grade B Fuel Oil.

(a) Readily accessible valves shall be provided near each burner and in the discharge line from each storage tank.

(b) A remote control for shutting off the supply of oil to the burners shall be provided.

(c) An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve. Automatic by-pass valves shall be set at not more than fifty (50) per cent above the maximum working pressure. This rule shall not apply to burners and pumps approved as a unit when provided with a pressure relief device.

## Rule 10. Oil Level Indicating Device for Grade A Fuel Oil.

A test well or gauging device shall be installed and so designed as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept locked when not in use.

## Rule 11A. Pumps for Grade A Fuel Oil.

(a) Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

(b) Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel oil for heating or steam.

(c) Pumps located in the same room where burners are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above ground storage tanks shall be located outside embankment walls, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

(e) Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a gravity of not more than eighteen (18) degrees Baume and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps.

## Rule 11B. Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11A (a).

## Rule 12. Burners for Fuel Oil.

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals. In domestic installations the burner shall be equipped with an overflow attachment or an automatic control to prevent flooding.

# RULES

## Rule 13. General Devices for Grade A Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer wells with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

## Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

## Rule 15. Operation of Plant Other Than Domestic Installations Using Grade A Fuel Oil.

No fuel oil burning plant shall be operated unless in charge of a person holding a certificate of fitness as issued by the fire department. A certificate of fitness will be required for each person who is directly in charge of the operation of the plant at any and all times.

This certificate of fitness will be required for all Grade A installations, and Grade B installations in dwellings for more than two families and in commercial plants. This requirement as to Grade A installations shall not apply to dwellings of less than three families equipped with Grade B installations using Grade A oil.

## Rule 16. Installation.

No fuel oil installation shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil installation shall be submitted to the Fire Commissioner for approval, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

## Rule 17. Auxiliary Tanks for Grade B Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frames or cradles and secured by 2x1/8-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

(d) Where only an auxiliary tank as prescribed in these rules is used it shall in addition to complying with the requirements for auxiliary tanks comply with all requirements for the protection of a storage tank other than the enclosure.

## Rule 18. Pilot Light.

Automatic systems unless electrically ignited shall be so designed that the flame cannot be extinguished by operation of the automatic control valve and a pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not to be easily extinguished.

## Rule 19. Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices, originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces in which vapors might collect are adequately vented, and if used shall be of such construction as to withstand the maximum temperature which the oil burning device to be installed may generate.

(b) No damper for closing of more than eighty (80) per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

## Rule 20. Fire Protection for Grade A and Grade B oil in Domestic Installations in dwellings occupied by not more than two families and in old law tenements occupied by three or more families in new law tenements and in commercial plants.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) In dwellings occupied by not more than two (2) families, any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back, or eight (8) feet from the front of the furnace shall be covered with approved fire retarding material; the ceiling except it be of fireproof construction shall be protected with approved fire retarding material extending four (4) feet beyond the sides and back and eight (8) feet from the front of the furnace. In old law tenement houses occupied by three or more families the heating apparatus and oil burning device shall be located in an enclosure the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors and the ceiling of the enclosure, if not of fireproof construction, shall be protected with approved fire retarding material; said enclosure shall be ventilated to the outer air; all vertical openings leading to cellar shall be protected with fireproof material not less than four (4) inches in thickness with all openings therein protected with self-closing fireproof doors.

(c) In new law tenement houses or in commercial plants the room or rooms in which the heating apparatus and oil burning device is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra-cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have entrance from the street, court or yard only, and shall be ventilated to the outer air.

Approved fire retarding material shall be any material complying with the rules of the Board of Standards and Appeals for fire retarding of garages.

(d) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

## Rule 21. Systems Prohibited Where Grade B Fuel Oil Is Used.

The use of auxiliary tanks between pump and burner of the pressure type are prohibited. Systems, fed by gravity between the storage tank and the pump, or force systems, are prohibited.

## Rule 22. Use of Grade A or Grade B Fuel Oil.

(a) These Rules shall not apply to gas companies storing or using fuel oil in the manufacture of illuminating gas for public use.

(b) The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(c) Modification: When for any reason it may be impracticable to comply strictly with the foregoing rules the fire commissioner shall have power to modify their provisions so that the spirit and substance thereof shall be complied with. Such modification shall be endorsed upon the permit over the signature of the fire commissioner.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First,* That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second,* That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third,* That no plea of ignorance of the date of the

hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth,* That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth,* That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

- CHIEF JOHN KENLON
- WILLIAM J. O'GORMAN, Secretary
- EDWARD V. BARTON, Chief Clerk

### PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.  
Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, November 16, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, November 23, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman

## THE RESOLUTION:

(339-26-A)

WHEREAS, Croker National Fire Prevention Engineering Company, for Mitchell Mark Realty Co., owner, filed, April 19, 1926, an appeal from an order of the fire commissioner, affecting premises numbers 212-216 West 48th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 15, 1925, reads: (Order No. 29104-LD)

"1. If the maximum quantity of inflammable photographic film ever on hand in your premises is:

(a) Over 25 pounds but not over 50 pounds, provide a double walled metal cabinet of approved construction;

(b) Over 50 pounds but not over 250 pounds, provide such cabinet with one sprinkler head in it, properly connected to house water pipes;

(c) If over 250 pounds but not over 500 pounds provide a dividend cabinet with sprinkler head in each compartment and a two source automatic sprinkler system throughout the entire building;

(d) If over 500 pounds provide an approved fireproof vault and two source automatic sprinkler system throughout the entire building."

and

WHEREAS, the building is non-fireproof, 5 stories (71 feet) in height, 77 feet by 50 feet in area; OCCUPIED for the purpose of making photographs; 1st story, stores, 25 persons; 2nd story, finishing department, 18 persons; 3rd story, machine shop, 20 persons; 4th story, printing, 40 persons; 5th story, studio; and

WHEREAS, the appellant contends that there is no motion picture film department on the premises, the regulation safety film only is used; furthermore, the appellant proposes to store all film in a fireproof room;

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and that the appeal be and it hereby is *denied*.

596-26-A.

APPELLANT—George Provot, Archt., for Vincenzo Radillo, owner.

SUBJECT—Appeal from decision of superintendent of buildings.

PREMISES AFFECTED—52-54 West 13th street, Manhattan.

APPEARANCES—

For Appellant: George Provot.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and  
Chief Kenlon ..... 5

Absent ..... 0

THE RESOLUTION:

(596-26-A)

WHEREAS, George Provot, for Vincenzo Radillo, owner, filed, July 17, 1926, an appeal from a decision of the superintendent of buildings, affecting premises numbers 52-54 West 13th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated, June 19, 1926, reads: (Alt. 1216-26)

"1. Provide lawful ventilation for rooms indicated on plans."

and

WHEREAS, the building is non-fireproof, 4 stories (47 feet 0 inches) in height, 27 feet 0 inches street frontage, 42 feet 0 inches in width at rear and 103 feet 3 inches in depth; OCCUPIED: 1st story, restaurant; upper stories, storage warehouse; and

WHEREAS, the appellant proposes to rearrange the upper stories and change the occupancy from warehouse use to residence use: one housekeeping apartment to be installed on each of the 2nd and 3rd stories and one non-housekeeping apartment on the 4th story, each rear living room

is lighted and ventilated by a window opening to yard of adjoining premises at south; and

WHEREAS, the appellant contends that the rear windows are an existing condition; that they provide permanent and adequate light and ventilation to the rear living rooms, due to the fact that the yard adjoining at south is 10 feet deep at the rear of a tenement house.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the appeal be and it hereby is *denied*.

613-26-A.

APPELLANT—Croker National Fire Prevention Eng. Co., for Wyanoak Publishing Co., lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—136-146 West 52nd street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and  
Chief Kenlon ..... 5

Absent ..... 0

THE RESOLUTION:

(613-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Wyanoak Publishing Company, lessee, filed, July 13, 1926, an appeal from an order of the fire commissioner, dated June 6, 1926, affecting premises 136-146 West 52nd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 6, 1926, reads:

"1. Provide a fireproof vault in which to keep all of your inflammable photographic film. Vault to be constructed, located, ventilated and protected in accordance with plans to be filed with and approved by Fire Department.

"2. Either reduce stock of inflammable film to less than 500 pounds or provide approved gravity tank (in addition to present pressure tanks) for the sprinkler system of the building."

and

WHEREAS, the building is fireproof, 12 stories in height, 150 feet by 100 feet 5 inches in area. OCCUPIED:: 1st story, stores; 2nd story, printer, 15 persons; 3rd story, printing, 40 persons; 4th story, printing, 45 persons; 5th story, dental supplies and spectacle mfr., 65 persons; 6th story, printer, 40 persons; 7th story, interior decorator, 40 persons; 8th story, jewelers, 150 persons; 9th story, jewelers, 100 persons; 10th story, printers, 60 persons; 11th story, jewelers, 50 persons; 12th story, furniture mfg. and dental school, 10 and 45 persons respectively; appellant occupying the 4th story for making photographic lobby displays for theatres; and

WHEREAS, appellant contends that the amount of film in stock is approximately 1500 lbs. of exposed negatives (mostly safety film); that it is stored in a fireproof room (15 feet by 18 feet in area and constructed of 4 inch terra cotta blocks) having four sprinklerheads therein; that there are 22,500 gallons of water in the three-pressure tanks on the roof, and contends further that the appellant is only a lessee and consequently is not in a position to provide the required gravity tank.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

630-26-A.

APPELLANT—R. A. Johnson, for American Hard Rubber Co., owner.

SUBJECT—Appeal from order of fire commissioner.

# MINUTES

PREMISES AFFECTED—150 Third avenue, College Point, Borough of Queens.

## APPEARANCES—

For Appellant: R. A. Johnson.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(630-36-A)

WHEREAS, R. A. Johnson, for American Hard Rubber Co., owner, filed, July 21, 1926, an appeal from an order of the fire commissioner, affecting premises No. 150 Third avenue, College Point, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated July 9, 1926 (Order No. 4741-LC), reads:

"1. Provide an approved storage system for the storage of volatile inflammable oil or liquid (benzole). Plans and specifications in duplicate must be filed with and approved by this department before the above work may be commenced.

"2. Have superintendent or manager in charge of the operations of a technical establishment apply for and secure a Certificate of Fitness. Sec. 261, Code of Ord. Examinations every day between 9 A. M. to 3 P. M. Saturdays 9 A. M. to 11 A. M. at 365 Jay Street, Brooklyn. Applicant must file two unmounted photographs of himself 2 x 3 inches."

and  
WHEREAS, the oil house is fireproof, one story in height, 25 ft. by 21 ft. in area, located on a large plot with other buildings used collectively for the manufacture of rubber products; and

WHEREAS, the appellant contends that not more than one 50-gallon barrel of benzole is stored at any time on the premises; that the benzole is stored out in the open, 90 ft. away from any building; the appellant claims he has complied with item 2 of the order.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to item 1, on condition that not more than one drum of benzole shall be maintained on the premises, stored in the open area of yard on a concrete platform with a metal roof shed over same supported on four iron posts; and *denied* as to item 2.

638-26-A.

APPELLANT—Samuel Rosenblum, for India Wharf Brewing Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—32-34 Hamilton avenue, Brooklyn.

## APPEARANCES—

For Appellant: Samuel Rosenblum, Mr. Ben-nison.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(638-26-A)

WHEREAS, Samuel Rosenblum, for India Wharf Brewing

Co., owner, filed, July 22, 1926, an appeal from an order of the fire commissioner, affecting premises 32-34 Hamilton avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated July 3, 1926 (Order No. 4516-LC), reads:

"1. Reduce the quantity of alcohol stored in the building of *wooden construction* to a quantity aggregating 10 barrels of 50 gallons each for the reason that subdivision B of Section 251, Chapter 10, City of New York, provides that no permit shall be issued for the manufacture, distillation, rectification or storage of distilled liquors, spirits or alcohol in a building which is of *wooden construction*.

"A permit for the storage of alcohol in the building of brick construction will be issued when the above item and the following are complied with:

"2. Install a dry sprinkler system throughout the brick building where alcohol is stored. Plans and specifications to be filed with and approved by the Fire Department before the work of installing sprinkler is commenced. Sec. 10, Ch. 10, Code of Ordinances."

and

WHEREAS, the building is of frame construction, 2 stories in height, 103 ft. by 100 ft. in area; OCCUPIED for the storage of general supplies, groceries, etc., including denatured alcohol; and

WHEREAS, the appellant contends that the alcohol is stored only in the clearstory section of the building, in sealed containers; that there is a high pressure fire hydrant directly in front of the building; furthermore, the appellant claims that most of the building is of brick construction, that due to the front walls being of frame construction, the entire building has been classified under frame construction.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the buildings shall be not increased in height, area or dimension; that the storage shall be restricted to the one story buildings, marked "C" and "D" and limited to alcohol, under bonded warehouse storage and government supervision, maintained in approved sealed metal drums; that the underside of the roofs of these buildings, "C" and "D," shall be fire-retarded, and any existing side walls of frame construction shall be brick filled and fire-retarded; and that an approved 40-gallon portable fire extinguisher containing a fire extinguishing medium acceptable to fire department for the purpose of this storage shall be maintained in either building "C" or "D."

763-26-A.

APPELLANT—Joseph B. Lynch, for Lotos Oil and Distributing Corp., owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—4095-4139 Ninth avenue, Manhattan.

## APPEARANCES—

For Appellant: William Michels, Joseph B. Lynch.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(763-26-A)

WHEREAS, Joseph B. Lynch, for Lotos Oil and Distributing Corp., owner, filed, September 15, 1926, an appeal from a decision of the fire commissioner, affecting premises 4095-4139 Ninth avenue, Borough of Manhattan; and

# MINUTES

WHEREAS, the decision of the fire commissioner, dated September 15, 1926 (App. No. 2970-26-N. B.), reads:

"All storage tanks comprising or forming a part of an oil storage plant shall be buried so that the tops thereof shall be at least two feet below grade level and be separated from each other by not less than one foot of solid concrete as per Section 111, subdivision No. 5 of Article 8, of Chapter 10, of the Code of Ordinances. Appeal may be taken to the Board of Appeals."

and

WHEREAS, the premises consist of a plot of ground 222 ft. 6 in. by 325 ft., bounded on the west by the Harlem River; and

WHEREAS, the appellant proposes to install a bulk-oil storage and distributing plant consisting of an office, fire pump house, gas pump house, warehouse and twelve (12) 42,000-gallon gasoline storage tanks, to be separated into batteries of three tanks each, each battery to be surrounded by reinforced concrete dykes enclosing a space sufficient to accommodate the contents of the tank; the top of tanks located 6 ft. above ground level; and

WHEREAS, the appellant contends that due to the nature of the soil and the high water level makes it a great hardship to comply with the order of the fire commissioner; and

WHEREAS, a committee of the board visited premises 218th to 220th street and Harlem River, Manhattan, a plot adjoining the premises under appeal and in the same ownership occupied for the same purpose and reported under Cal. No. 431-25-A as follows:

Cal. No. 431-25-A. June 8th, 1925.

PREMISES, 218th to 220th Street & Harlem River, Manhattan.

## REPORT OF COMMITTEE:

A committee of the Board consisting of Chairman Walsh, Fire Chief Kenlon, Messrs. Holland and Connell visited the above premises on June 8th, 1925.

The appeal is before the Board on an order of the Fire Commissioner requiring the burial of oil storage tanks. The appellant seeks relief from the entire burial of the tanks for the reasons that the ground is on the banks of the Harlem River and if compelled to bury same they would be below tide level. The property is now occupied with temporary wooden shacks and one story frame structures set on discarded sews.

The entire west side of 9th Avenue (north of the 3rd Avenue car barns on 217th Street) is vacant, so there is no improvement that would be in any way impaired or adversely affected by any means of hazard.

The plans before us on this appeal, propose the installation of twelve steel tanks, installed horizontally; the natural grade is approximately six feet above tide water.

The committee recommends that the proposed installation be separated into batteries of not more than three tanks to each battery and that the tanks be set approximately half-way (diameter) below grade and that the enclosure walls shall be built of reinforced concrete, carried to the top of the tanks, and all enclosures and tanks to be filled and covered over with earth; the fill to extend not less than three feet above the top of the tanks, and that a reinforced concrete wall shall be erected outside the tank installation enclosure; these outside enclosure walls to be not less than 10 ft. high, the earth fill to be sloped from the top to the inside of the exterior enclosure walls at bottom; the tanks so installed to be equipped in accordance with the rules of the Fire Department and the ordinances in all other respects; a yard hydrant with anti-freezing valves and siamese connection to be provided at the end of the dock, connected to and supplied from approved pumps hooked up to the city water mains, and that a revolving water line nozzle shall be provided, one to each battery enclosure of three (3) tanks, and that an approved liquid fire-fighting medium shall be provided and maintained operative from an independent pump

house, the pump house to be isolated from the tank enclosure and to be constructed fireproof. It is further recommended that the sub-dividing wall between each battery of tanks shall be carried up at least 6 ft. above the top of the earth fill of the tanks, the ends of these walls to be returned on a rack of 45 degrees at opposite ends, and that a return of the drawings shall be made to this Board for approval, in compliance with the foregoing report.

(Signed) WILLIAM E. WALSH,  
JOHN KENLON,  
HENRY L. CONNELL,  
JAMES P. HOLLAND.

and

WHEREAS, the board deemed that in as much as conditions have not changed in the vicinity of these premises, the stipulations set forth by the committee under Cal. No. 431-25-A as modified by the board at its meeting, June 6, 1926, would apply to the premises under appeal.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the equipment shall be installed substantially in accordance with the report of the committee of inspection; the oil storage and mechanical equipment and structural design, all as finally approved by the board under Cal. No. 431-25-A on the abutting premises in same ownership and operation, shall be complied with for this extension of premises and use. The necessary permits required by law to be obtained and work executed to completion without suspension or unnecessary delay.

## BUILDING ZONE CASES.

535-26-BZ.

APPLICANT—Carl Sherman, for Bogild Builders, Inc., owner.

SUBJECT—Application (re decision of superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

(1425-24-BZ)

WHEREAS, William F. Doyle, for Theresa Browning, owner, filed, December 3, 1926, an application, under the building zone resolution, to permit in a residence district the maintenance of a factory use of an existing building; premises 231 West 74th street, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 9, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 74th street and West 75th street are in residence districts and Broadway is in a business district; and

WHEREAS, the order of the superintendent of buildings, rendered July 18, 1924, reads:

"Violation Order No. 3296:

"\* \* \* In that of conducting a business (factory) in a residence district, contrary to the provisions of the Building Zone Resolution adopted by the Board of Estimate and Apportionment, July 25th, 1916.

"You are hereby directed to discontinue the occupancy of the above building as a business (factory) in a residence district to comply with the Building Zone Resolution."

nd

WHEREAS, the existing building is of non-fireproof construction, 3 stories and basement in height, with a frontage of 20 ft. 0 in. and a depth of 53 ft. 0 in. to be occupied as a factory building; and

WHEREAS, the board deemed that strict compliance with the regulations of the zoning law would work an unnecessary hardship, if enforced at this time, in view of the short time the lease on premises has to run.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted* for a temporary period not to extend beyond May 1st, 1927, for use and occupancy of gown demonstration and light needlework, *on condition* that there shall be no sign of any nature or description exposed on these premises; that there shall be no wares or merchandise displayed in or from any windows at the street front; that the present residential aspect at the street front shall be maintained; that all exits and entrances of the present occupants shall be through the business building adjoining in the business use area, in the same lesseeship and operation, on the corner of 74th street and Broadway.

593-26-BZ.

APPLICANT—Daniel Campbell, Jr., for Dualboro Corp., owner.

THE RESOLUTION:

(606-26-BZ)

WHEREAS, John J. Dunnigan, for Mary A. Klug, owner, filed, July 12, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 445-449 East 189th street, The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 9, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the build-

# MINUTES

ing zone resolution show that East 189th street, Park avenue and East Fordham road are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered July 7, 1926 (Re: App. N. B. 1740-26), reads:

"Erection of proposed garage for storage of more than five motor vehicles in business district is contrary to provisions of Building Zone Resolution.";

and  
WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 63.4 ft. and a depth of 140 ft.; to be occupied as a garage for the storage of more than 5 motor vehicles; and

WHEREAS, the basis of appeal has been accepted and established and the board heretofore granted similar variation for similar use on the same street.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that the building be not more than two stories in height above grade; that a rear yard not less than ten ft. in depth for the entire width of the property be incorporated at the grade of the second story level; that the rear and gable walls shall be unpierced throughout their entire height and length, with the exception of the second story windows, rear; opening to roof of extension these windows shall be equipped with metal frames and sash, glazed with wire glass; that the garage shall be constructed fireproof, with the exception of the roof, which, if not fireproofed, shall be fire-retarded in accordance with the rules of the board of standards and appeals; that any gasoline storage equipment installed shall be located at the extreme front, easterly end of the structure; that there shall be no signs erected other than one projecting electric sign, indicating the title of the garage; that the front of the building shall be finished with face brick and architectural terra cotta or stone trimmings; that all necessary permits required shall be obtained within nine months and the building completed within eighteen months from the date of this action.

607-26-BZ.

APPLICANT—John W. Clancy, substituting for Joseph B. Lynch, for Leo F. Gieberich, owner.

SUBJECT—Application (re decision of superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence district the erection of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—502-518 Avenue W and 2341-2351 East 5th street, Brooklyn.

APPEARANCES—

For Applicant: John W. Clancy.

For Opposition: A. Jaccario, George A. Bodee, Samuel Wolkof.

ACTION OF BOARD—Application granted on condition.

THE RESOLUTION:

(607-26-BZ)

WHEREAS, John W. Clancy substituted for Joseph B. Lynch, for Leo F. Gieberich, owner, filed, July 12, 1926, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 502-518 Avenue W, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 9, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Avenue W is in a residence

district, Ocean Parkway is in a residence district and East 5th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 12, 1926, reads:

"Proposed public garage for more than five motor vehicles to be located in a residence district is contrary to Art II, Sec. 3 of the Zone Resolution.";

and

WHEREAS, the proposed building is to be of fireproof construction except roof, two stories in height, with a frontage of 100 ft. on East 5th street and 150 ft. on Avenue W; to be occupied as a garage for the storage of more than 5 motor vehicles; and

WHEREAS, the board deemed that applicant substantiated his basis of appeal under section 21, in that the applicant claims to have held the property over 15 years and at the present time receives but a very small, if any, rental for the stable use existing on the premises.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that the building shall be erected fireproof and not in excess of two stories above grade of the East 5th street curb level; that the southerly gable wall and the easterly rear wall shall be constructed and maintained unpierced throughout their entire height and length; that no part of the easterly rear wall shall be erected within 81 ft. of Ocean Parkway building line; that the exterior easterly rear wall shall be finished with light-color, front brick; that the street walls on East 5th street and Avenue W shall be finished with face brick or natural stone with architectural terra cotta or stone trimmings; that any gasoline storage equipment installed shall be located at the 5th street front of building; that there shall be no roof signs erected or maintained on the premises; that there shall be no advertising display of any nature or description other than the one projecting electric sign, indicating the title of the business conducted on the premises; that all necessary permits required shall be obtained within nine months and the building completed within eighteen months; and that a return by the architect of the proposed finished drawing shall be made to this board for its approval in accordance with the stipulations of the foregoing resolution before filing plans in the building department.

1266-25-BZ.

THE RESOLUTION:

(463-26-BZ)

WHEREAS, C. A. Sandblom, for Van Vyck Realty Corp., owner, filed, May 24, 1926, an application, under the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a store and theatre building; premises 13408-13420 Liberty avenue, Woodhaven, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 20, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Liberty avenue is in a business district, 135th street is in a residence district and that 134th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 5, 1926 (N. B. 5035-26), reads:

"1. Erection of building for theatres and stores extending into residential district is prohibited by Zone Law. Not examined further.";

and

WHEREAS, the proposed building is of fireproof construction, two stories in height, with a frontage of 150 ft. 5¾ in. and a depth of 109 ft. 10¾ in. and 121 ft. 9 in., irregular; to be occupied as a store and theatre; extending into the residence district a maximum distance of 21 ft. 9 in.; and

WHEREAS, applicant established his basis of appeal under section 7-b of the building zone resolution and the board deemed that there would be practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution; and

WHEREAS, this application was granted by the board, at its meeting, July 20, 1926, on certain conditions, and applicant requested a modification of these conditions as to use of the premises in the business district.

# MINUTES

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that the building be restricted to a one-story theatre structure, with a stadium balcony with a two-story business use on the Liberty avenue front; that the building shall be erected in accordance with the requirements of article 25 of the building code; that the exterior finish of the wall on the 135th street front shall be of face brick with architectural

terra cotta or stone trimmings, with no door openings in the residence use district portion of street wall; that any permits required shall be obtained within nine months and the building completed within eighteen months from the date of this action, and that a return of the proposed elevation on the 135th street front shall be submitted to this board for approval.

Adjourned 2.10 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

## THE RESOLUTION:

(637-26-S)

WHEREAS, Morris Popper, for Frederick W. Marks, owner, filed, July 22, 1926, a petition for a variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 157-159 West 22nd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 6, 1926 (No. 95869-LD), reads:

"1. Provide safe and unobstructed egress from the lower termination of the fire-escape on rear of building by constructing a fireproof passageway with an unobstructed width of at least 3 ft. throughout, leading to the street, adequately lighted at all times during working hours, or by means of providing access to an open area having communication with the street, as per Section 273 of the Labor Law."

and  
WHEREAS, the building is non-fireproof, 4 stories in height, 41 ft. 9 in. by 94 ft. 9 in. in area at 1st story and 41 ft. 9 in. by 58 ft. 2 in. in area above; OCCUPIED: 1st story, stores; 2nd story, vacant; 3rd story, embroidery shop, 6 persons; 4th story, embroidery shop, 16 persons; EXITS: an interior wooden stairway, extending from the 1st story to roof, enclosed in non-fireproof partitions with sheet iron doors at openings; a fire escape on the rear of the building having fireproof openings along the course thereof, extending from roof to the yard, with no legal means of egress to street; ROOFS of adjoining buildings: same level at west; 20 ft. higher at east; and

WHEREAS, the petitioner claims the existing means of egress from rear fire escapes is to the open yards adjoining at west, thence over an iron bridge which connects with a fireproof passageway, 10 ft. in width, and leading direct to Seventh avenue; furthermore, the petitioner has filed a copy of consent from the adjoining owner at west permitting his yard to be left open for use as an exit in case of fire.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted only so far as it affects egress from the termination of the rear fire escape on condition that open and unobstructed egress shall be maintained at the yard level over iron bridge to the adjoining open courtway of the theatre immediately to the north, with egress from said courtway, open and unobstructed, direct to Seventh avenue; and that the ceiling of the first story extension shall be fire-retarded in accordance with the rules of the board of standards and appeals; and granted only so long as conditions as to occupancy and use remain unchanged.

129-26-S.

PETITIONER—Croker National Fire Prevention Engineering Co., for A. & H. Realty Co., owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—365 First avenue, Manhattan.

APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

## THE RESOLUTION:

(129-26-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for A. & H. Realty Co., owner, filed, February 15, 1926,

a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 365 First avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 9, 1925 (Order No. 82091-LD), reads:

"1. Provide safe and unobstructed egress from the lower termination of the fire escape at rear of building by constructing a fireproof passageway with an unobstructed width of at least 3 feet throughout leading to the street, adequately lighted at all times during working hours, or by means of providing access to an open area having a communication with the street, as per Section 273 of the Labor Law."

and

WHEREAS, the building is fireproof, 5 stories in height, 25 ft. by 100 ft. in area; OCCUPIED: 1st story, garage, 3 persons; 2nd story, furniture show room, 2 persons; 3rd story, manufacturing Christmas tree ornaments, 15 persons; 4th story, lamps, 7 persons; 5th story, tailor, 20 persons; EQUIPPED with a fire alarm signal system; EXITS: an interior fireproof stairway extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; a standard fire escape on the northerly rear of the building, having fireproof openings along the course thereof, extending from the top story to the open rear yard; with EGRESS from the termination of the fire escape by means of open hallway (leading to East 21st street) from yard of tenement to south; ROOFS of adjoining buildings: two and three stories lower; and

WHEREAS, petitioner requests the acceptance of the existing means of egress.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted only so far as it affects egress from the lowest termination of the fire escape emptying into the open yard of the premises to the rear with egress therefrom through the tenement house passageway direct to 21st street, and granted only so long as conditions as to occupancy and use remain substantially unchanged.

## THE RESOLUTION:

(652-26-S)

WHEREAS, Schwartz & Gross, for Jatison Construction Co., Inc., owner, filed, July 27, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 48-56 West 37th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated July 9, 1926, reads:

"N. B. App. No. 158-26:

"17. Windows on street front at 1st, 2nd and 3rd floors should comply with Section 264 of Labor Law and Rule 503 of Industrial Code."

and

WHEREAS, the building is fireproof, 18 stories in height, 104 ft. 6 in. by 98 ft. 9 in. in area at 1st story and 104 ft. 6 in. by 88 ft. in area above; OCCUPIED: 1st story, store; upper stories, offices, show rooms and 25 per cent manu-

# MINUTES

facturing, 100 persons per story; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings on the 1st, 2nd and 3rd stories in the street walls of the building glazed with  $\frac{1}{4}$  in. thick plate glass; the maximum area of the glass on the 1st story being 9 ft. by 9 ft. and on the 2nd and 3rd stories, 7 ft. by 8 ft. in area; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would detract from the architectural appearance of the building; and, also, would destroy the intended use of the three lower stories.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law and that the petition be and it hereby is *granted* only so far as it affects windows on the street fronts of the three lower stories *on condition* that all openings shall be equipped with approved metal frames, glazed with  $\frac{1}{4}$  in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION:

(495-26-S)

WHEREAS, Buchman & Kahn, for 635 Sixth Avenue Corp., owner, filed, June 1, 1926, a petition for variation from the requirements of the labor law as cited in a decision of the superintendent of buildings, affecting premises 103 West 37th street and 635-643 Sixth avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered May 22, 1926 (N. B. Applic. No. 646-1925), reads:

"14. All windows must comply with Section 264 of the Labor Law and Rule 503 of Industrial Code.";

and

WHEREAS, the building is fireproof, 23 stories in height, 99 ft. by 100 ft. in area; OCCUPIED: 1st story, stores; upper stories, offices, show rooms and 25 per cent manufacturing, 105 persons per story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings on the first story in the Sixth avenue and, also, in the West 37th street front walls of the building, glazed with plate glass; the maximum area of the glass being 8 ft. 0 in. by 9 ft. 0 in.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would make it impracticable to use the 1st story for store purposes.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law and that the petition be and it hereby is *granted* only so far as it affects the windows on the first story, grade level, on the 27th street front and also on the Sixth avenue front, *on condition* that all openings shall be equipped with approved metal frames, glazed with  $\frac{1}{4}$  in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

## THE RESOLUTION:

(674-26-S)

WHEREAS, Shampan & Shampan, for Realty Construction Corp., owner, filed, July 31, 1926, a petition for variation from the requirements of the labor law as cited in a decision of the superintendent of buildings, affecting premises 150-154 West 28th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered July 23, 1926 (N. B. Applic. No. 227-1926), reads:

"10. All windows should comply with Section 264 of Labor Law and Rule 503 of Industrial Code.";

and  
WHEREAS, the building is fireproof, 18 stories in height, 76 ft. by 98 ft. in area at 1st story and 76 ft. by 88 ft. in area above; OCCUPIED: 1st story, stores; upper stories, tenant factories, 56 persons per story; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings on the 1st, 2nd and 3rd stories in the street walls of the building, glazed with 1/4 in. thick plate glass; the maximum area of the glass on the 1st story being 5 ft. 4 in. by 6 ft. 0 in., and on the 2nd and 3rd stories being 7 ft. 0 in. by 6 ft. 8 in.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the three lower stories and contends, further that all windows above the 3rd story will comply with the labor law excepting as to the omission of self-closing devices on the street front windows below the 13th story of the building; and

WHEREAS, this petition was dismissed for lack of prosecution and reopened by vote of the board.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted only so far as it affects the windows on the first story street front, on condition that all openings shall be equipped with approved metal frames, glazed with 1/4 in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION:

(690-26-S)

WHEREAS, Edward M. Adelsohn, for Benjamin Braverman, owner, filed, August 9, 1926, a petition for variation from the requirements of the labor law as cited in an order of the fire commissioner, affecting premises 237-241 Sheffield avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated July 20, 1926 (No. 99483-LD), reads:

"1. Extend interior stairway and enclosure from 2nd story level to 3' above the roof as per Section 270 of the Labor Law.

"2. Provide a fireproof enclosure about the exterior iron stairway on east side of building as per Section 270 of the Labor Law."

and

WHEREAS, the building is non-fireproof, 2 stories in height, 40 ft. by 62 ft. in area; OCCUPIED: wet wash laundry as accessory to dry cleaning establishment at rear; 1st story, 15 persons; 2nd story, 15 persons; EXITS: an interior fireproof stairway, extending from the 1st story to top story; enclosed in fireproof partitions with fireproof doors at openings; an exterior iron stairway on the east side of the building, having fireproof openings along the course thereof, extending from the 2nd story to the rear yard; with EGRESS from the termination of the fire escape by means of side yard to street; ROOFS of adjoining buildings: to south, one story lower; and

WHEREAS, petitioner contends that there are no adjoining buildings of the same height as the premises in question and that there would be no improvement in exits by extending the interior stairway to the roof and contends, further, in view of the light occupancy, that the existing means of egress are adequate.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed* and that the petition be and it hereby is *denied*.

THE RESOLUTION:

(723-26-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Estate of William Lane, owner, filed, August 20, 1926, a petition for variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises Nos. 1-13 Sterling place, Borough of Brooklyn; and

WHEREAS, the orders of the fire commissioner, dated February 8, 1926, read:

(Order No. 90800-LD):

"1. Remove the substandard fire escapes, 2 on the front of building, 2 in courtyard and 2 on the rear of the building, or reconstruct same as per Section 274 of the Labor Law and Rule 3 of the Board of Standards and Appeals, adopted May 9, 1924.

"Among the defects noted are the following:

"(a) Windows on course not fireproof self-closing.

"(b) No drop ladder in guides from lowest balcony on 2 front fire escapes to the street.

"(c) No stairway to roof from the balcony rear 2 fire escapes.

"2. Enclose both the interior stairs serving as required means of exit from cellar to the underside of the roof beams as per Section 271 of the Labor Law and Rule 1 of the Board of Standards and Appeals, adopted July 29, 1924."

(Order No. 90802-LD):

"1. Arrange metal bars on windows in cellar on north, east and west sides of building also 1 metal bar on window on east side of 4th story on east wing of building so as to be readily movable or removable from both sides in such a manner as to afford the free and unobstructed use of such windows for purposes of egress, as per Section 272 of the Labor Law."

and

WHEREAS, the building is non-fireproof, 5 stories in height, 143 ft. 10 in. by 65 ft. 8 in. and 86 ft., irregular in depth; OCCUPIED: 1st story, manufacture of paper boxes, 25 persons; upper stories, manufacture of shoes, paper patterns and musical instruments, 50 persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior wooden stairways, extending from the 1st story to top story; enclosed in wooden partitions with wooden doors at openings; six substandard fire

# MINUTES

escapes; two balcony fire escapes on the front, one balcony and one vertical ladder fire escape in the yard-court, also one balcony and one vertical ladder fire escape on the rear of the building, having non-fireproof openings along the course thereof, extending from 2nd story to top story; the balcony fire escape in yard-court, also the one on the rear, is provided with a gooseneck ladder to roof; with EGRESS from the termination of the rear fire escape by means of gate in fence; ROOFS of adjoining buildings: 1 story lower at east; and

WHEREAS, the petitioner proposes to remove the vertical ladder fire escape from the yard-court also the vertical ladder fire escape from the rear of the building, and to provide a drop ladder in guides from the lowest balcony of each of the two front balcony fire escapes; as to item 2 of Order No. 90800-LD, the petitioner proposes to enclose the stairway at 1st story of east wing, where paper box manufacturing is done; as to item 1 of Order No. 90802-LD, the petitioner

contends that there is no one employed in the cellar, and, furthermore, that none of the barred windows could be used as an exit.

*Resolved*, that the board of standards and appeals does hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted as to item 1, Order No. 90800-LD, only as to design of the fire escapes with the exception of the straight rung ladder from the second to the fifth story, on condition that all supports and stairs shall be made structurally safe, and that the labor law requirements as to openings and all other defects shall be complied with; and denied as to item 2 of Order No. 90800-LD and item 1 of Order No. 90802-LD.

Adjourned 5.30 p. m.

WILLIAM J. O'GORMAN, Secretary.

## RULES

### FIRE ESCAPE RULES

ADOPTED JULY 2, 1918; CAL. NO. 1218-18-S; AMENDED DEC. 12, 1918; CAL. NO. 1708-18-S; AMENDED MAY 9, 1924; CAL. NO. 414-24-SR.

**Rule 1.** In any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, more than five stories in height and not exceeding nine stories in height, nor in any case more than 90 ft. from curb level to top floor level, one of the required means of exit or escape under Section 271-1 of the Labor Law may consist of an outside fire escape, provided that:

(a) Any such fire escape hereafter erected shall comply with all the provisions of Section 273, labor law, and in addition thereto:

(1) The balconies and stairs shall be protected on the outside by substantial railings to a height of at least 4 ft. 6 in., measured from floor of balcony or center of stair tread, constructed of bars at least one-half ( $\frac{1}{2}$ ) inch in diameter, spaced not more than six (6) inches on centers, or of substantial grill work, or of screening not less than No. 10 U. S. gauge wire with not more than one and one-half ( $1\frac{1}{2}$ ) mesh, all rigidly braced;

(2) When there is safe egress from the roof of the building to any adjoining structure, the fire escape stairway shall continue to the roof, and if there be no safe means of egress, a gooseneck ladder shall be provided from the top story balcony to the roof.

(b) Any such fire escape erected prior to October 1, 1913, shall conform in every respect with the requirements of paragraph (a) of this rule, except that balconies may be not less than 3 feet in width; the connecting stairs not less than 20 inches in width, and placed at an angle not exceeding 60 degrees if the building is not over six stories in height, otherwise at an angle of 45 degrees; fire windows leading to balconies may be at window sill level if the steps not less than sixteen (16) inches wide are provided on the inside from floor level, leading thereto.

(c) Any such fire escape erected subsequent to October 1, 1913, and prior to these rules taking effect, unless previously accepted as one of the required means of exit or escape by the administrative official having jurisdiction, shall conform in every respect to paragraph (a) of this rule.

**Rule 2.** A fire escape shall not hereafter be accepted as constituting one of the required means of exit or escape under Section 271-1 of the Labor Law, in any building erected prior to October 1, 1913, now occupied or to be oc-

cupied as a factory, exceeding nine stories in height, or more than 90 feet from curb level to top floor level.

**Rule 3.** When in addition to the required exits from any factory or factory building, there exist other means of egress which are not entirely in accordance with the requirements of the Labor Law and the Rules of the Board of Standards and Appeals, such means of egress may be retained under the following conditions:

(a) Fire Escapes.—All substandard fire escapes on factory buildings shall be removed or reconstructed in accordance with Section 274 of the Labor Law, except that in lieu of a counterbalanced stair a drop ladder in guides from the lowest balcony to ground may be provided. Substandard fire escapes shall not be considered as a basis for increased occupancy of the building. When such substandard fire escapes are located in any court or on the side or rear of a building, proper egress to a point of safety shall be provided, either to open adjoining yards, or the lowest balcony may be connected to an adjoining fire escape, exterior stairway, or to roof of adjoining extension, or other egress satisfactory to the Fire Commissioner. All such fire escapes shall be maintained structurally safe and properly painted.

(b) Interior Stairways.—All interior stairways not conforming to the requirements of the Labor Law or rules of the Board of Standards and Appeals may be retained, provided that egress to same is maintained unobstructed, halls are properly lighted, and all landings, passageways, etc., are maintained free and unobstructed. An easily operated panic bolt or other similar device may be installed at street exit door.

(c) Exterior Screened Stairways.—Exterior screened stairways not serving as a required means of egress shall be either removed or maintained structurally safe and properly painted, exits thereto and all platforms and passageways thereof shall be maintained unobstructed, and egress from termination shall be provided for sub-standard fire escapes in subdivision a.

(d) Horizontal Bridges.—Horizontal bridges and party wall balconies between buildings shall be removed or maintained structurally safe and properly painted, and access thereto and all passageways thereof shall be maintained unobstructed.

(e) No sign of any character shall be placed at openings leading to these sub-standard exits.

# RULES

## FUEL OIL RULES

### CONSTRUCTION AND INSTALLATION OF OIL BURNING EQUIPMENT AND STORAGE AND USE OF FUEL OILS

Adopted by the Board of Standards and Appeals November 6, 1919, Amended January 6, 1922, January 18, 1924, and November 3, 1926.

#### Rule 1. Definition.

The term "fuel oil" under these rules shall include any liquid or mobile mixture, substance or compound derived from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

#### (a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

#### (b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

(c) Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

#### (d) Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, may be used for domestic heating in buildings occupied by not more than two (2) families and in tenement houses and commercial plants. If used in tenement houses or commercial plants, a certificate of fitness for the operator of the plant will be required as per Rule 15.

(e) Where Grade A oil is used in place of Grade B oil in domestic installations it may be used under the requirements for Grade B installations.

(f) No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

#### Rule 2. Manner of Storage for Fuel Oil.

Fuel oil, to be used for heating and power purposes, shall be at all times stored in metal tanks with all openings or connections through the tops of the tanks.

#### Rule 3. General Location of Tanks for Fuel Oil.

(a) In all buildings fuel oil storage tanks shall be buried below the floor of the lowest story or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of any wall separating a building from the subway and, if practical, tanks shall be placed in a lower position than the roadbed of the subway.

#### Rule 4. Location, Protection and Capacity of Tanks for the Storage of Fuel Oil.

##### Subdivision A. Grade A Fuel Oil.

##### Section 1. Inside of Buildings Above Ground.

(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space between the tank and the walls and roof of the enclosure shall be completely filled with dry upland sand or earth well tamped.

(f) Not more than one tank shall be placed in an enclosure.

(g) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "h."

(h) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

##### Section 2. Inside Buildings Below Ground.

(a) When a tank is buried beneath a building its capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Subdivision A, Section 1 (g) and (h).

(b) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, covered by at least six (6) inches of concrete which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(c) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with soft earth or sand. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

##### Section 3. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located

# RULES

outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth ( $1\frac{1}{4}$ ) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above ground, the tanks shall be not less than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

## Section 4. Outside of Buildings Below Ground.

(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

## Subdivision B. Grade B Fuel Oil.

### Section 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When not buried and located inside of a building they shall be placed on the lowest floor level and shall be enclosed in four inches of terra cotta or eight inches of approved masonry, and the aggregate capacity of such storage tanks shall not exceed 275 gallons.

(b) Tanks, when buried, shall be placed with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm soil foundation.

(c) Tanks shall be set on firm soil and surrounded with soft earth or sand and shall be complete encased with (6) inches of concrete, where soil conditions require.

(d) Where in the opinion of the Fire Commissioner extreme difference of grade or soil conditions would work a hardship an anti-syphon valve or other mechanical device to prevent syphoning approved by the U. S. Bureau of Standards, Fire Underwriters Laboratories or other laboratory recognized by the Board of Standards and Appeals, may be used.

### Section 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.

## Rule 5. Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half ( $1\frac{1}{2}$ ) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth ( $\frac{1}{4}$ ) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; of masonry or of impervious reinforced concrete. Earth-work embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half ( $1\frac{1}{2}$ ) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

## Rule 5A. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanketing gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half ( $\frac{1}{2}$ ) inch in size. The boilers shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit there shall be kept ready for use two portable fire extinguishers of not less than 1 quart capacity or other equivalent fire extinguishers for extinguishing oil fires.

## Rule 6. Material and Construction of Tanks for the Storage of Fuel Oil.

### Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Such plates shall be free from physical imperfections, such as laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked, or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$  in. shell,  $\frac{3}{4}$  in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$  in. shell,  $\frac{5}{16}$  in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$  in. shell,  $\frac{3}{8}$  in. heads.

Tanks over 120 inches in diameter to be of  $\frac{3}{8}$  in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should flat heads be used, they must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

# RULES

## (e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell  $\frac{1}{4}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{1}{4}$  in. pitch.

In shell  $\frac{5}{16}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{3}{8}$  in. pitch.

In shell  $\frac{3}{8}$  in. thick,  $\frac{3}{4}$  in. diameter rivets  $2\frac{1}{2}$  in. pitch.

## Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality required for cylindrical tanks, and of a thickness of not less than  $\frac{5}{16}$  of an inch.

(b) Corners may be made up by bending the plates or by the use of angles.

(c) Rivets in seams shall be  $\frac{5}{8}$  of an inch in diameter and spaced not more than  $2\frac{1}{4}$  inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must not be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of six (6) inches center to center on these members.

(f) When structural reinforcing members are tied together with braces, in order to reduce the effective length, the braces shall not be stressed higher than nine thousand (9,000) pounds per square inch taken on the minimum net section.

(g) If structural members are omitted and the sides of the tank are braced by means of rods or bars, these members should not be spaced farther apart than twenty-four (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch on the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars so that the bar will break before the connection will let go.

## Section 3. Vertical Storage Tanks Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality required for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be  $\frac{1}{4}$  inch and the minimum thickness of roof plates  $\frac{1}{8}$  inch.

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

(c) Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate seams shall be designed, with proper efficiency to meet requirements of above formula for shell plates.

(d) In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind will be permitted.

(e) Tanks for storage of grade B oil shall be constructed in accordance with the requirements of this rule, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than  $\frac{3}{16}$  inches in thickness.

(f) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

## Section 4. Welding.

(a) Where welding is to be used for a part or for the entire tank, the tank shall be fabricated as required under Rule 6, Section 1.

(b) All welded seams of plates shall be lapped or butted.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight, metal to metal, before welding and kept tight together during welding. Both inside and outside welds shall be of full 45 degree fillet.

Where a butt joint is used, it shall be of the 90 deg. double V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

(c) All heads shall be flanged, the straight part of the flange being not less than as follows:

For  $\frac{3}{16}$  inch heads,  $1\frac{3}{4}$  inch flange.

For  $\frac{1}{4}$  inch heads, 2 inch flange.

For  $\frac{5}{16}$  inch heads, 2 inch flange.

For  $\frac{3}{8}$  inch heads,  $2\frac{1}{4}$  inch flange.

For heads over 120 inches diameter the flange shall be increased in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a driving fit and the shell shall fit the head closely all around. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head welds for tanks of 1,100 gallon capacity or less and not over 48 inches in diameter, shall be of the 90 deg. single V type welded entirely through and reinforced not more than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the 90 deg. double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

(d) Where tanks are made up of two or more rings the welded longitudinal joints of adjacent sections shall break joints. At no point of a butt girth joint shall the sheet on one side be offset with the sheet on the other side in excess of one-half of the thickness of the plate. All butt girth joints shall be welded inside and out and reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces: in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

## Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar, asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

# RULES

## Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

## Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

## Rule 7. Tests of Tanks for the Storage of Fuel Oil.

### Section 1. Inside of Buildings Above or Below Ground or Outside of Buildings Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks, shall withstand after being set in place, a hydrostatic or air test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

(c) Tanks when subjected to an air pressure test shall be equipped with a safety relief valve set at not more than 32 lbs. per sq. in., and the air compressor device employed in the air testing of the tank shall be of low pressure type, equipped with an automatic pressure regulator set at not less than 35 lbs.

### Section 2. Horizontal Tanks Outside of Building, Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic or air test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

### Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

### Section 4. Test for Tanks. How Conducted.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic or air test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 or 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.

## Rule 8. Piping for Fuel Oil.

### Section 1. Installation of Piping.

(a) Piping shall be run as directly as practicable without sags, and, except as provided in Rule 11A, e, shall be laid so that where practicable pipes shall pitch toward the

supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.

### Section 2. Type and Material.

(a) All piping shall be of standard full weight brass, copper, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ( $\frac{1}{2}$ ) inch inside diameter shall be permitted; except that for Grade B oil  $\frac{1}{4}$ -inch diameter pipes may be used.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Tubing and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. No soldered connection shall be used. The length of tubing shall not exceed that required for direct connections to coupling.

### Section 3a. Tests for Piping. Grade A.

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ( $1\frac{1}{2}$ ) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

### Section 3b. Tests for Piping. Grade B.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.

### Section 3c. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes, when required, shall be not less than one size larger than supply pipe.

### Section 4. Relief Valves.

(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of the pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than  $\frac{1}{2}$  in. by  $\frac{1}{2}$  in., of the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) An automatic by-pass valve of size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with

# RULES

the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.

## Section 5. Fill Pipes.

(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) The fill pipe shall be provided with a trap or seal or carried within four (4) inches of the lowest point in the tank.

(d) The fill pipe shall be made up with screwed or flanged fittings and shall be oil tight and securely held in place.

## Section 6. Vent Pipes.

(a) An open, galvanized iron vent pipe without trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the same class of liquids is installed, vent pipes may be run into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.

(c) Vent openings in tanks shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation. Vents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter (1¼) inches in diameter.

(d) Vent pipes shall be provided with weather proof hoods and terminate outside the building above the street surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direction of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions, to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to tank trucks by tight connections and filled by pressure, a one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow to the fill box and shall be so set as to prevent the passage of vapor to the street.

## Section 7. Return Pipes from Burners.

Return lines from burners, where necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, and shall be connected into the suction line near the pump or into the storage tank. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.

## Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of hot water coils thermostatically controlled and the oil shall not be heated above one hundred and forty (140) degrees Fahrenheit.

## Rule 9. Valves and Control of Flow for Fuel Oil.

### Subdivision A. Grade A Fuel Oil.

(a) Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size

containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the hand-wheel. The use of packing which may be affected by oil or heat is prohibited.

(b) A shut-off valve shall be provided in discharge and suction lines near each pump; in discharge line from each tank as near the tank as practicable, and in branch lines near each burner.

### Subdivision B. Grade B Fuel Oil.

(a) Readily accessible valves shall be provided near each burner and in the discharge line from each storage tank.

(b) A remote control for shutting off the supply of oil to the burners shall be provided.

(c) An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve. Automatic by-pass valves shall be set at not more than fifty (50) per cent above the maximum working pressure. This rule shall not apply to burners and pumps approved as a unit when provided with a pressure relief device.

## Rule 10. Oil Level Indicating Device for Grade A Fuel Oil.

A test well or gauging device shall be installed and so designed as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept locked when not in use.

## Rule 11. Pumps for Fuel Oil.

### Subdivision A. Grade A Fuel Oil.

(a) Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

(b) Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel oil for heating or steam.

(c) Pumps located in the same room where burners are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above ground storage tanks shall be located outside embankment walls, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

(e) Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a gravity of not more than eighteen (18) degrees Baume and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps.

### Subdivision B. Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11A (a).

## Rule 12. Burners for Fuel Oil.

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals. In domestic installations the burner shall be equipped with an overflow attachment or an automatic control to prevent flooding.

# RULES

## Rule 13. General Devices for Grade A Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer wells with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

## Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

## Rule 15. Operation of Plant Other Than Domestic Installations Using Grade A Fuel Oil.

No fuel oil burning plant shall be operated unless in charge of a person holding a certificate of fitness as issued by the fire department. A certificate of fitness will be required for each person who is directly in charge of the operation of the plant at any and all times.

This certificate of fitness will be required for all Grade A installations, and Grade B installations in dwellings or more than two families and in commercial plants. This requirement as to Grade A installations shall not apply to dwellings of less than three families equipped with Grade B installations using Grade A oil.

## Rule 16. Installation.

No fuel oil installation shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil installation shall be submitted to the Fire Commissioner for approval, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

## Rule 17. Auxiliary Tanks for Grade B Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frames or cradles and secured with 2x1/4-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

(d) Where only an auxiliary tank as prescribed in these rules is used it shall in addition to complying with the requirements for auxiliary tanks comply with all requirements for the protection of a storage tank other than in the enclosure.

## Rule 18. Pilot Light.

Automatic systems unless electrically ignited shall be so designed that the flame cannot be extinguished by operation of the automatic control valve and a pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not to be easily extinguished.

## Rule 19. Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices, originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces which vapors might collect are adequately vented, and if used shall be of such construction as to withstand the maximum temperature which the oil burning device when installed may generate.

(b) No damper for closing of more than eighty (80) per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

## Rule 20. Fire Protection for Grade A and Grade B oil in Domestic Installations in dwellings occupied by not more than two families and in old law tenements occupied by three or more families in new law tenements and in commercial plants.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) In dwellings occupied by not more than two (2) families, any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back, or eight (8) feet from the front of the furnace shall be covered with approved fire retarding material; the ceiling except it be of fireproof construction shall be protected with approved fire retarding material extending four (4) feet beyond the sides and back and eight (8) feet from the front of the furnace. In old law tenement houses occupied by three or more families the heating apparatus and oil burning device shall be located in an enclosure the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors and the ceiling of the enclosure, if not of fireproof construction, shall be protected with approved fire retarding material; said enclosure shall be ventilated to the outer air; all vertical openings leading to cellar shall be protected with fireproof material not less than four (4) inches in thickness with all openings therein protected with self-closing fireproof doors.

(c) In new law tenement houses or in commercial plants the room or rooms in which the heating apparatus and oil burning device is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra-cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have entrance from the street, court or yard only, and shall be ventilated to the outer air.

Approved fire retarding material shall be any material complying with the rules of the Board of Standards and Appeals for fire retarding of garages.

(d) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

## Rule 21. Systems Prohibited Where Grade B Fuel Oil Is Used.

The use of auxiliary tanks between pump and burner of the pressure type are prohibited. Systems, fed by gravity between the storage tank and the pump, or force systems, are prohibited.

## Rule 22. Use of Grade A or Grade B Fuel Oil.

(a) These Rules shall not apply to gas companies storing or using fuel oil in the manufacture of illuminating gas for public use.

(b) The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(c) Modification: When for any reason it may be impracticable to comply strictly with the foregoing rules the fire commissioner shall have power to modify their provisions so that the spirit and substance thereof shall be complied with. Such modification shall be endorsed upon the permit over the signature of the fire commissioner.

WILLIAM E. WALSH, *Chairman.*  
WILLIAM J. O'GORMAN, *Secretary.*

WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the

hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth*, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

BOARD OF STANDARDS AND APPEALS,

### DIRECTORY

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays, 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

### CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, November 16, 1926, at 10 a. m.

Minutes of Regular Meeting, November 16, 1926, at 2 p. m.

Concrete Rules.

Fuel Oil Rules.

Progress Report.

### PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, November 23, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, November 30, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman

## CALL OF CLERK'S CALENDAR

**TUESDAY, NOVEMBER 23, 1926, AT 2 P. M.**

*Building Zone Cases.*

747-26-BZ.

APPLICANT—Norman N. Nacman, for Dora A. De-Waltoff, owner.

PREMISES—Southeast corner of Ridge boulevard and 87th street, Brooklyn.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in an "E" area and also residence use district the omission of the required setback and also the occupancy of a greater portion of the lot than that permitted by the zone resolution.

761-26-BZ.

APPLICANT—Charles Kreymborg & Son, for Halpern Construction Co., Inc., owner.

PREMISES—1301-1307 Walton avenue and 24-32 Clarke place, The Bronx.

APPLICATION, under sections 7b and 7c of the building zone resolution,

TO PERMIT in a residence district extending from a business district the erection and maintenance of a building for store occupancy in part of first story.

868-26-BZ.

APPLICANT—Frederick J. Flynn, for 1016 Fifth Avenue Co., Inc., owner.

PREMISES—1016 Fifth avenue and 2-6 East 83rd street, Manhattan.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a 1½ times height district the erection and maintenance of the street wall higher than that permitted by the zone resolution.

473-26-BZ.

APPLICANT—Old Colony Engineering Co., Inc., owner.

PREMISES—1832-1840 Ocean avenue, Brooklyn.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a residence district the erection and maintenance of a gasoline service station and store for automobile accessories.

659-26-BZ.

APPLICANT—Michael Schneiderman, for Aaron Schneiderman, owner.

PREMISES—Northeast corner of Woodhaven boulevard and Flynn avenue, Howard Beach, Borough of Queens.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a gasoline selling station.

**NOVEMBER 23, 1926, 10 A. M.**

*Appeals from Administrative Orders.*

9-26-A—103-109 North 3rd street, Brooklyn.

557-26-A—656 St. Nicholas avenue, Manhattan.

# CALENDAR

568-26-A—6933 Exeter street, Forest Hills, Borough of Queens.

614-26-A—80-92 Third avenue, Brooklyn.

617-26-A—86-112 Hausman street, Brooklyn.

645-26-A—4524-4604 Second avenue, Brooklyn.

655-26-A—73-44 Greenway South, Forest Hills, Borough of Queens.

709-26-A—450-456 West 131st street, Manhattan.

711-26-A—175-06 88th avenue, Borough of Queens.

721-26-A—141-161 King street, Brooklyn.

742-26-A—229-231 Powell street, Brooklyn.

727-26-A—1367-75 Flushing avenue, Ridgewood, Borough of Queens.

903-26-A—331-341 West 86th street, Manhattan.

## Building Zone Applications.

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, *Tuesday morning, November 2, 1926*, at 10 o'clock, in Room 1013, Municipal Building, on the following matters:

L. NO. 289-26-BZ—Application, April 5, 1926, under section 21 of the building zone resolution, of Frederick J. Flynn, applicant, on behalf of H. and S. Sonn, Inc., owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 816-832 Home street, 1217-1223 Prospect avenue, south side Home street, 110.21 ft. east of Union avenue, The Bronx.

L. NO. 264-26-BZ—Application, March 27, 1926, under section 21 of the building zone resolution, of Henry Nordheim, architect, on behalf of 409 Central Park West Co., Inc., owner, to permit in a residence district the alteration and conversion of occupancy in part from residence to business use; premises 2430 Valentine avenue, The Bronx.

L. NO. 680-26-BZ—Application, August 4, 1926, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Ely Moran, owner, to permit in a residence district the erection and maintenance of an apartment house having stores on the first story; premises 95-109 Northern avenue and 92-102 Pinehurst avenue, Manhattan.

L. NO. 681-26-BZ—Application, August 4, 1926, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Save Stations, Inc., owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 8502 Rockaway boulevard, Woodhaven, Borough of Queens.

L. NO. 694-26-BZ—Application, August 10, 1926, under section 21 of the building zone resolution, of John J. Dunnigan, applicant, on behalf of East Fordham Road Syndicate, Inc., owner, to permit in a business district the erection and maintenance of a gasoline selling station; premises 699 East Fordham road, The Bronx.

CAL. NO. 720-26-BZ—Application, August 20, 1926, under section 21 of the building zone resolution, of John J. Dunnigan, applicant, on behalf of Jerome Avenue Exhibition Co., Inc., owner, to permit in a residence district the erection and maintenance of a business building; premises 11-15 West 176th street, The Bronx.

CAL. NO. 565-26-BZ—Application, June 21, 1926, under section 21 of the building zone resolution, of Henry J. Nurick, architect, on behalf of Eyess Realty Corp., owner, to permit in a residence district the alteration and change of occupancy in part from residence to business use; premises 281-289 Brooklyn avenue, northeast corner of Eastern Parkway, Brooklyn.

CAL. NO. 712-26-BZ—Application, August 17, 1926, under section 21 of the building zone resolution, of Thomas J. McCabe, architect, on behalf of Philip H. Reid, owner, to permit in a residence district the erection and maintenance of a gasoline selling station; premises 2211 Emmons avenue, Brooklyn.

CAL. NO. 621-25-BZ—Application, October 26, 1926, under sections 7a, 7b and 7c of the building zone resolution, of McCooey and Conroy, applicants, on behalf of D. Tedesco, owner, to permit the extension from an unrestricted district into a residence district of a proposed addition to an existing garage for the storage of more than five (5) motor vehicles (previously denied); premises 63-67 New York avenue, Brooklyn.

CAL. NO. 535-26-BZ—Application, June 9, 1926, under section 21 of the building zone resolution, of Carl Sherman, applicant, on behalf of Bogild Builders, Inc., owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises east side Jerome avenue, 165.02 ft. north of East 174th street, The Bronx.

WILLIAM E. WALSH, *Chairman.*

## NOVEMBER 23, 1926, 2 P. M.

### Petitions for Variations.

10-26-S—103-109 North 3rd street, Brooklyn.

403-26-S—218 State street, Brooklyn.

665-26-S—48 John street, Manhattan.

Absent ..... 0

### THE RESOLUTION:

(474-26-A)

WHEREAS, W. G. Fitzgerald, for American Druggists Syndicate, owner, filed, May 25, 1926, an appeal from an order

# MINUTES

of the fire commissioner, affecting premises 231-239 Borden avenue, Long Island City, Borough of Queens; and

WHEREAS, the orders of the fire commissioner, dated March 29, 1926, read:

"Order No. 89705-LF:

"1. Disconnect standpipe from sprinkler system."

"Order No. 89709-F:

"1. Provide a tank on roof of at least 3,500 gallon capacity. \* \* \*";

and

WHEREAS, the building is fireproof, 7 stories in height, 140 ft. by 180 ft. in area; OCCUPIED: 1st floor, storage and mill departments, 9 persons; 2nd floor, stock room, 5 persons; 3rd floor, shipping and office, 143 persons; 4th floor, stock room, 5 persons; 5th floor, manufacturing drugs, 107 persons; 6th floor, manufacturing drugs, 21 persons; 7th floor, manufacturing drugs and print shop, 26 persons; total occupancy, 315; and

WHEREAS, appellant contends that the sprinkler system is supplied from pressure and gravity tanks having a combined capacity of 85,000 gallons; and

WHEREAS, it is proposed to have as a source of supply for the standpipe in lieu of providing a gravity tank on the roof, the present 8 in. connection to city main on Borden avenue and to provide a 1,000-gallon-per-minute pump.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* as to Order No. 89709, Item 1, *on condition*, and so long as a static pressure of not less than 25 pounds at the highest outlet is maintained, the supply furnished from an existing direct connection to city main; and that the standpipe installation shall comply with the requirements in all other respects; and that the appeal as to Order No. 89705, Item 1, be and it hereby is *denied*.

686-26-A.

APPELLANT—Alexander S. Traub, for S. H. Pomeroy Co., Inc., lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—282-296 East 134th street, The Bronx.

APPEARANCES—

For Appellant: Alexander S. Traub.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(686-26-A)

WHEREAS, Alexander S. Traub, for S. H. Pomeroy, owner, filed, August 5, 1926, an appeal from an order of the fire commissioner, affecting premises No. 282-296 East 134th street, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated July 19, 1926 (Order No. 98804-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.";

and

WHEREAS, the building is non-fireproof, 2 stories (32 ft.) in height, 150 ft. by 97 ft. 6 in. (approximately 14,000 sq. ft.) in area; OCCUPIED for the manufacture of sheet metal windows and doors: 1st story, 40 persons; 2nd story, 20 persons; and

WHEREAS, appellant contends that the building is provided

with a 2-in. standpipe riser (with hose connections and hose on each story) in the center of the building; that it is directly connected to the city main; that there are three city fire hydrants in the immediate vicinity and that the premises are supervised by watchmen at all times.

Resolved, that the order of the fire commissioner be and it hereby is *granted on condition* that all fire buckets and fire extinguishers, as directed by the fire department, shall be distributed throughout the premises; that the building shall be not increased in height, area or dimension; and *granted* so long as the present occupancy and operation remain substantially unchanged.

696-26-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for R. H. Comey Brooklyn Co., Inc., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—771 Third avenue, Brooklyn.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

THE RESOLUTION:

(696-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for R. H. Comey Brooklyn Co., Inc., owner, filed, August 10, 1926, an appeal from an order of the fire commissioner, affecting premises 771 Third avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated March 18, 1926 (Order No. 92358-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.";

and

WHEREAS, the building is non-fireproof, 2 stories (31 ft. 6 in.) in height, there being a frontage of 80 ft. on Third avenue and 350 ft. 5 in. on East 26th street, an approximate area of 23,000 sq. ft.; OCCUPIED: 1st story, furniture storage, 3 persons; 2nd story, storage of straw braid in bales and cases, 3 persons; and

WHEREAS, appellant contends that the building is equipped with an automatic sprinkler system connected to street mains in both streets and having, also, siamese connections; that there are 3 city fire hydrants in the immediate vicinity; that the building is provided with a central office connection; that the building is low in height and open on three sides.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be not increased in height or area; that it shall be equipped throughout with an approved, dry-pipe sprinkler system, with central office connection, central office boxes to be maintained on 1st and 2nd stories; and *granted* so long as conditions otherwise shall remain substantially unchanged.

## THE RESOLUTION:

(700-26-A)

WHEREAS, G. A. Eweler, for New York Dock Co., owner, filed, August 11, 1926, an appeal from an order of the fire commissioner, affecting premises 238-244 King street, Warehouse No. 252 Clinton Wharf, Borough of Brooklyn; and  
WHEREAS, the order of the fire commissioner, dated July 29, 1926 (Order No. 99380-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basement, cellars and roofs), placed within main stairway enclosure.";

and  
WHEREAS, the building is non-fireproof, 3 stories (38 ft.) in height, 75 ft. 6 in. by 220 ft. 6 in. (approximately 16,000 sq. ft.) in area; OCCUPIED as a warehouse for the storage of sugar, cocoa, syrup, etc., 6 persons in entire premises; and

WHEREAS, appellant contends that the building is accessible to fire boats; that the vicinity is well supplied with city fire hydrants; that the building is supervised at all times by watchmen and that fire buckets have been installed.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* only so long as the merchandise storage shall be confined to cocoa, syrup and sugar in bulk or like and similar storage on condition that watchman patrol shall be maintained, covering the premises at all times; and *granted* so long as conditions otherwise shall remain substantially unchanged.

708-26-A.

APPELLANT—Trustees of Estate of William Beard, owner.

SUBJECT—Appeal from orders of fire commissioner.

PREMISES AFFECTED—Erie Basin Breakwater, 2200 feet westerly from foot of Columbia street, Borough of Brooklyn.

## APPEARANCES—

For Appellant: Edward Hinman.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

## THE RESOLUTION:

(708-26-A)

WHEREAS, Trustees of Estate of William Beard, owner, filed August 1, 1926, an appeal from orders of the fire commissioner, affecting premises Erie Basin Breakwater, 2,200 feet west of Columbia street, Borough of Brooklyn; and  
WHEREAS, the orders of the fire commissioner, dated July 29, 1926, read:

(Order No. 99369-F)

"1. Provide telegraphic communication with Department Headquarters as provided for by City Ordinances. Sec. 20, Ch. 12, Code of Ordinances."

(Order No. 99370-F)

"1. Provide a curtain of incombustible material across pier at intervals of 250 feet and extending from eaves level on 2nd story to the underside of roof and from ceiling on 1st story to a distance of at least 3 feet below same.

"NOTE: An automatic ventilating skylight shall be provided over each section so subdivided. Sec. 20, Ch. 12, Code of Ordinances."

(Order No. 99371-F)

"1. Provide a separate and distinct dry system of automatic sprinklers throughout pier having at least one source of water supply, or other approved fire extinguishing system arranged and equipped as provided in rules for fire extinguishing appliances adopted by the Board of Standards and Appeals, May 24, 1917."

(Order No. 99372-F)

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending the full length of pier, with necessary check valves and 2½ inch regulation Fire Department outlets not more than 100 feet apart."

and

WHEREAS, the premises consist of a pier shed, one story in height, 710 feet by 140 feet in area; constructed of corrugated iron siding, wooden posts and an asphalt covered wood roof; OCCUPIED for the discharge of lumber from ships and re-shipment of same by trucks and lighters; and

WHEREAS, under Cal. No. 480-23-A, the board granted a modification of similar orders; at that time the pier was used for unloading olives in bulk. Premises are now being used for the trans-shipment of lumber; and

WHEREAS, appellant contends that there is no additional hazard and proposes to provide chemical fire-extinguishers on wheels.

Resolved that the orders of the fire commissioner Nos 99370, 99371 and 99372 be and they hereby are *modified*, and the appeal as to these items be and it hereby is *granted* so long as the front of pier, on the Basin front shall be maintained open throughout its entire height and length; that the present standpipe and water lines shall be maintained, equipped with sufficient hose to cover the entire area of pier; that not less than three (3) 40-gallon portable fire extinguishers, one at each end and one at centre of pier, shall be provided; and that the appeal as to Order No. 99369 be and it hereby is *denied*.

722-26-A.

## THE RESOLUTION:

(722-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for William Welsh, owner, filed August 20, 1926, an

# MINUTES

appeal from an order of the fire commissioner, affecting premises Nos. 97-99 First avenue, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated April 15, 1926, reads: (Order No. 93604-F)

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.";

and

WHEREAS, the building is non-fireproof, 2 stories in height, 98 feet 9¾ inches by 131 feet 11½ inches average depth, about 12,500 square feet floor area at 1st story and 98 feet 9¾ inches by 25 feet, about 2,200 square feet floor area above; OCCUPIED: 1st story, assembling of vault lights, 10 persons; 2nd story, office, 9 persons; and

WHEREAS, the appellant claims that the building faces two streets; that 36 fire pails, 3 sand pails and two 2½ gallon extinguishers are kept on the first story; that a gas shut-off valve is provided on the First avenue front; furthermore, the appellant contends that the materials used in the building are incombustible and the floor area is only slightly in excess of 10,000 square feet where a standpipe would not be required.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be not increased in height or dimension; that the present occupancy and operation shall remain unchanged; that all auxiliary fire extinguishing appliances as required by the fire department, shall be installed and maintained; and *granted* so long as conditions otherwise shall remain unchanged.

THE RESOLUTION:

(174-26-A)

WHEREAS, The Stuyvesant Theatre Co., owner, filed March 1, 1926, an appeal from an order of the fire commissioner, affecting premises Nos. 109 and 121 West 44th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 11, 1926, reads: (Order No. 10-A)

"1. Discontinue use of space in basement of theatre, situated below the street level, for dressing room purposes, or obtain a new certificate of occupancy from the Bureau of Buildings, authorizing this use."

and

WHEREAS, the building is fireproof, 3 stories (52 feet) in height, 125 feet by 100 feet 5 inches in area; OCCUPIED as a theatre; orchestra, 446 seats; 1st balcony, 307 seats; 2nd balcony, 247 seats; and

WHEREAS, there are dressing rooms, enclosed in partitions of fireproof material, located in the basement of the theatre; and

WHEREAS, appellant contends that the dressing rooms are temporary, to be used only during the run of the play now being presented and that ample exits are provided.

Resolved that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

THE RESOLUTION:

(605-26-BZ)

WHEREAS, Kramer & Kleinfeld, for Daniel Buonocore, owner, filed, July 12, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a poultry slaughter house; premises 1767-1779 84th street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 16, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 84th street is in both a residence and business district; that New Utrecht avenue is in a business district, and that 18th avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 19, 1926, reads:

"Proposition contrary to the Zone Resolution, Art.

II Sec. 4-a. The erection of a live poultry market (chicken slaughter house) in a business district."

and

WHEREAS, the proposed building is of non-fireproof construction, one story in height, with a frontage of 48 feet and a depth of 55 feet, to be occupied as poultry slaughter house; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship.

Resolved that the decision of the superintendent of buildings be and it hereby is affirmed and that the application be and it hereby is denied.

778-26-BZ.

APPLICANT—William F. Doyle, for Jatison Construction Co., owner.

SUBJECT—Application (re decision of the tenement house commissioner) under section 21 of the building zone resolution, to permit in a 1½ times height district the erection and maintenance of the street wall in excess of the height permitted by the zone resolution.

THE RESOLUTION:

(778-26-BZ)

WHEREAS, William F. Doyle, for Jatison Construction Co., owner, filed, September 21, 1926, an application under the building zone resolution, to permit in a 1½ times height district the erection and maintenance of the street wall in excess of the height permitted by the zone resolution; premises 101-109 East 78th street and 883-887 Park avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 16, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the district maps accompanying the building zone resolution show that Park avenue, East 78th street and East 79th street are all in a 1½ times height district and also a residence district; and

WHEREAS, the decision of the tenement house commissioner, rendered September 20, 1926, reads:

"1. Portion of the building beyond 150 ft. from Park Avenue cannot exceed 90 ft. in height. (Sections 8F and 9B, Art. 3, Bldg. Zone Resolution). Not further considered."

and

WHEREAS, the proposed building is to be of fireproof construction, 14 stories in height, with a frontage of 76 ft. 8 in.

# MINUTES

and a depth of 164 ft. 7 in.; to be occupied as a tenement house; the building being located on a corner, it is proposed to erect the entire street walls to a common height of 150 ft.; such height is permitted by the zone resolution with the exception of the easterly end of the 78th street wall, 14 ft. 7 in. in length, which length is restricted to 90 ft. in height by the zone resolution; and

WHEREAS, the board deemed that applicant was entitled to the height variation requested on the ground of practical difficulty and unnecessary hardship, within the scope of section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the height district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that no part or portion of the structure shall be erected to a height above 148 ft. 6 in. from the mean level of the Park avenue curb; that the requirements of the building zone resolution shall be complied with in all other respects as to area, yard, height and use; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

717-26-BZ.

APPLICANT—John Ebersson, for Laemmle Bldg. Corp., owner.

SUBJECT—Application (re decision of superintendent of buildings) under sections 7c and 21 of the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a store and theater building.

PREMISES AFFECTED—4515-4527 New Utrecht avenue, Brooklyn.

THE RESOLUTION:

(717-26-BZ)

WHEREAS, John Ebersson, for Laemmle Building Corp., owner, filed, August 19, 1926, an application, under the building zone resolution, to permit in a residence district extending from a business district, the erection and maintenance of a store and theatre building; premises 4515-4527 New Utrecht avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 16, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that both 46th street and 45th street are in a residence district, and that New Utrecht avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 16, 1926 (Applic. 12821-26), reads:

"Application is for the erection of a theatre extending into a residential district, contrary to Article II, Section 3 of the Building Zone Resolution."

and

WHEREAS, the proposed building is to be of fireproof construction, 4 stories in height, with a frontage of 100 ft. and a depth of 175 ft.; to be occupied as a store and theatre building; and

WHEREAS, the board deemed that applicant was entitled to

relief under section 7c of the building zone resolution, in view of the fact that among all abutting and contiguous property owners and all owners of properties in the residence streets affected, there is only one objector; all other properties immediately abutting having submitted verified consents; and

WHEREAS, the board acted on a similar application on the same property.

Resolved that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that the northerly gable wall be unpierced throughout its entire height and length; that any openings to the court from auditorium, northerly side, rear of the building, be restricted to two emergency exits; that the open court to the rear be enclosed in a brick wall not less than 12 ft. in height; that the use of the building be restricted to motion picture theatre operation, with stores on the New Utrecht avenue front; that there shall be no advertising signs or billboards displayed or exposed on the 46th street front beyond a point 25 ft. easterly from the New Utrecht avenue front, and that the show window store front return shall not extend beyond 25 ft. from New Utrecht avenue corner; all permits required shall be obtained within 9 months and building completed within 18 months from the date of this action.

THE RESOLUTION:

(692-26-BZ)

WHEREAS, William F. Doyle, for Emil Buff, owner, filed, August 10, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises northeast corner of Metropolitan avenue and 127th (North Wickes) street, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 16, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Metropolitan avenue is in a business and unrestricted district; that 127th (North Wickes) street is in a residence, business and unrestricted district; and that Ambrose (Gould) street is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 5, 1926 (N. B. 10482-25), reads:

"1. That 4,250 square feet of the area of the building is in a business district. The garage is therefore contrary to the zoning resolution."

nd

WHEREAS, the proposed building is of non-fireproof construction, one story in height, with a frontage of 113 ft. 1/8 in. and a depth of 134 ft. 2 1/2 in. and 187 ft. 4 1/2 in.; regular in depth; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the building, for a depth of 100 ft. was in an unrestricted district at the time of its erection and was erected under a permit issued by the bureau of buildings, the board deemed that applicant is entitled to relief under section 7c of the building zone resolution and under section 1 on the ground of practical difficulty and unnecessary hardship.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution and that the ap-

plication be and it hereby is granted as to the 34 ft. projection into the business area, on condition that the northerly gable walls be unpierced throughout their entire height and length; that there shall be no signs erected or displayed within 50 ft. of the corner of Metropolitan avenue on the 127th street frontage; that all permits required shall be obtained within ninety days and any work involved completed within six months.

Sidrowitz, for Julia Brown, owner, filed, October 2, 1926, an application, under the building zone resolution, to permit in a residence district the alteration and change of occupancy in part from residence to a business use; premises 783 St. Nicholas avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 16, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that St. Nicholas avenue, West 149th street and West 150th street are residence; and

WHEREAS, the decision of the superintendent of buildings, rendered September 28, 1926 (re Alt. 762-1926), reads:

"Residence district. No business permitted in a residence district."

and

WHEREAS, the existing building is of non-fireproof construction, 4 stories in height, with a frontage of 20 ft. 5 1/2 in. and a depth of 89 ft. 8 1/4 in.; to be occupied as a business use on the first story; and

WHEREAS, the board deemed that applicant was entitled to relief on the ground of practical difficulty and unnecessary hardship, in view of the abutting and surrounding conditions throughout this street front.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution and that the application be and it hereby is granted only so far as it affects the ground floor, first story, on condition that the business use be restricted to retail mercantile conduct and operation, prohibiting though the use of premises for the conduct of restaurant, delicatessen, butcher shop or fish store; that the remainder of the premises shall be restricted to conforming use; that all necessary permits shall be obtained within ninety days and the work involved completed within six months.

552-25-BZ.

APPLICANT—Philip J. Sinnott, for Fieldstone Garage, Inc., owner.

SUBJECT—Application for reopening, extension of time, re application (decision of superintendent of

# MINUTES

buildings) to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles, and also to permit same to be of non-fireproof construction (garage with one street frontage, exceeding 7,500 sq. ft. in area).

**PREMISES AFFECTED**—East side of Broadway, 224 feet north of 231st street, The Bronx.

**APPEARANCES**—

For Applicant: Philip J. Sinnott.

For Opposition: None.

**ACTION OF BOARD**—Application reopened and extension of time granted.

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle ..... 4

Negative ..... 0

Absent: Chief Kenlon ..... 1

**THE RESOLUTION:**

(552-25-BZ)

WHEREAS, Philip J. Sinnott, for Fieldstone Garage, Inc., owner, filed, May 27, 1925, an application, under the building-zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; and also to permit same to be of non-fireproof construction (garage, with one street frontage, exceeding 7,500 sq. ft. in area); premises east side of Broadway, 224 ft. north of 231st street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 17, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that both Broadway and West 233rd street are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered April 17, 1925, reads:

"1. Erection of proposed garage for storage of more than five motor vehicles in business district is contrary to provisions of Building Zone Resolution.

"2. Garage with one street frontage exceeding 7,500 square feet in area must be of fireproof construction."; and

WHEREAS, the proposed building is of non-fireproof construction, one story in height; with a frontage of 225 ft. and a depth of 97 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that the applicant substantiated the basis of his application under section 21, in that the property, an interior plot situated in the rear of property fronting on a highway of business use skirting a railroad right-of-way cannot be used for dwelling purposes; and it would be a hardship to deprive applicant of the use of the property as proposed; with such conditions as would safeguard the adjoining properties; and

WHEREAS, this application was granted by the board at its meeting, November 17, 1925, on certain conditions and applicant requested a modification of the time limit imposed.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall be constructed fireproof throughout and located on the extreme rear of the property abutting the railroad right-of-way, and that an open courtyard and space of not less than 25 ft. in depth for the entire frontage of the garage shall be maintained open and unencumbered and that a wall of approved masonry shall be constructed, enclosing this yard, said opening to be not less than 10 ft. in height or to the height of doorway of garage above curb level; that an open runway shall be maintained from the open yard direct to the street for a width of not less than 31 ft.; and that the fence wall of approved masonry shall be continuous through the run-

way direct to the Broadway street front on both sides of the driveway; that the proposed garage building shall not exceed a height of 15 ft. above the curb level; that there shall be no advertising signs erected, other than one projecting sign on the street front of the runway, indicating the title of the business; any gasoline storage equipment installed shall be located at the extreme southerly end of the structure; that the gable walls of the structure shall be unpierced throughout their entire height and length.

Resolved, further, all permits necessary for the prosecution of the work shall be obtained within six (6) months and the building completed within one (1) year from the date of this action.

64-26-BZ.

**APPLICANT**—William F. Doyle, for Vincent Valentine, owner.

**SUBJECT**—Application for reopening, modification of resolution, re application (decision of superintendent of buildings) under section 21 of the building zone resolution, to permit on a portion of a street between two intersecting streets in which portion there exists an exit and entrance to a public school, the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

**PREMISES AFFECTED**—540-550 West 58th street, Manhattan.

**APPEARANCES**—

For Applicant: William F. Doyle.

For Opposition: None.

**ACTION OF BOARD**—Application reopened and resolution modified.

**THE VOTE TO REOPEN AND MODIFY RESOLUTION**—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle ..... 4

Negative ..... 0

Absent: Chief Kenlon ..... 1

**THE RESOLUTION:**

(64-26-BZ)

WHEREAS, William F. Doyle, for Vincent Valentine, owner, filed, January 25, 1926, an application, under the building zone resolution, to permit on a portion of a street between two intersecting streets, in which portion there exists an exit and entrance to a public school, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 540-550 West 58th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 20, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 58th street and West 57th street are in unrestricted districts, and that Tenth avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 23, 1925, reads:

"No. 3. Garage may not be erected on any portion of a street between two intersecting streets, in which portion there exists an exit from an entrance to a public school (Art. 5 of Building Zone Resolution)."; and

WHEREAS, the proposed building is of fireproof construction, six stories in height, with a frontage of 150 ft. and a depth at 1st and 2nd stories 100 ft. 5 in., 90 ft. 5 in. above; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, it appears that the building is located more than 520 ft. from any entrance to or exit from the school; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship; and

# MINUTES

WHEREAS, this application was granted by the board at its meeting, April 20, 1926, on certain conditions and applicant requested a modification of the conditions as to storage of gasoline.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted* to permit a garage for the use, occupancy and operation of an automobile manufacturer's agency and distributing station, *on condition* that no part of structure will be conducted or operated as a public garage; that there shall be not more than two tanks for gasoline storage, not exceeding 550 gallons each, which shall be located at the extreme westerly end of the structure at the street front; that no public gasoline selling station shall be conducted or maintained on the premises; that the entire structure shall be constructed fireproof; that the requirements of the building zone resolution shall be complied with in all other respects; that all necessary permits and approval of plans shall be obtained within nine months and the building completed within eighteen months from the date of this action.

Absent: Chief Kenlon .....	1

THE RESOLUTION:

(1221-22-BZ)

WHEREAS, John Brandt, for Estate of Amalie Meyer and George J. Naegle, owners, filed, October 13, 1922, an application, under the building zone resolution, to permit partly in a business and partly in a residence district the extension and conversion of a stable for more than five horses into a garage for the storage of more than five motor vehicles; premises 2495-2497 Amsterdam avenue, Manhattan; and

WHEREAS, this application was denied by the board at its meeting, December 29, 1922, and the owner, through his attorney, Philip J. Sinnott, requested a reopening of the case and permission to amend the basis of appeal to section 7, subdivision C, and section 20, which request was granted by vote of the board May 1, 1923; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, June 12, 1923, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Amsterdam avenue is a business district and West 184th street and Laurel Hill terrace are residence districts; and

WHEREAS, the decision of the superintendent of buildings reads:

"1. The proposed change of occupancy of the present building from a stable to garage with structural altera-

tions is prohibited by the Building Zone Resolution, sec. 6.

"2. The proposed extension of the building for garage occupancy in a residence district is prohibited, sec. 3, Building Zone Resolution.";

and

WHEREAS, the proposed extension is to be of non-fireproof construction, one story and cellar in height, with a frontage of 84 ft. 6 in. and a depth of 101 ft. 8 in., the extension and existing building which is 45 ft. 5 in. by 95 ft.; to be occupied as a garage for more than 5 motor vehicles; and

WHEREAS, under the provisions of section 7, subdivision c, the board is empowered to act; and

WHEREAS, this application was granted by the board at its meeting, June 12, 1923, and February 5, 1924, on certain conditions and applicant requested a modification of these conditions as to exits.

*Resolved*, that the board of appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that all permits necessary for the prosecution of the work shall be obtained within three months and the building completed within three months from the date of this action; that the front of the building on 184th street be faced with finished front brick, with architectural terra cotta or stone trimmings; that the rear of the building, facing Laurel Hill terrace, shall be faced with finished front brick, and that there be not more than one vehicular exit on the 184th street front beyond 25 ft. from the westerly gable wall; that there shall be not more than one vehicular opening from the rear of the building to Laurel Hill terrace, restricted and maintained as an emergency exit; and that a flat form of roof construction shall be installed.

## THE RESOLUTION:

(528-25-BZ)

WHEREAS, Alfred J. Boulton, for Harry Beldin, owner, filed, May 21, 1925, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a poultry slaughter house; premises east side of Bay 37th street, 285 ft. north of Cropsey avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 1, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Bay 37th street is in a residence district; that Bay 38th street is in a residence district, and that Cropsey avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 1, 1925, reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3:

"A poultry slaughter house in a residential district.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 25 ft. and a depth of 75 ft.; to be occupied as a poultry slaughter house; and

WHEREAS, the board deemed that the character of existing development and the sparsely settled condition of the section warranted the exercise of its discretion under sections 7f and 21 of the zoning resolution, to permit a temporary variation for non-conforming use; and

WHEREAS, this application was granted by the board at its meeting, December 1, 1925, and June 1, 1926, on certain conditions, and applicant requested a modification as to time limit.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, for a temporary period of two years from the date of issuance of permit by the health department, *on condition* that the health department authorize the conduct and operation of a chicken slaughter house on these premises; the building shall be restricted in height to a one-story structure above grade; the rear and gable walls shall be unpierced throughout their entire height and length unless opening on property in the same ownership and within the same lot area; and that all permits required by law and ordinances shall be obtained within three months and the building completed within six months from November 16, 1926.

THE RESOLUTION:

(327-26-S)

WHEREAS, Sigmund Schuler, for the United Cigar Stores Co., lessee, filed, April 16, 1926, a petition to the board of standards and appeals for a variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 767-769 Lexington avenue, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner read:  
Order No. 86776-LD:

"Item 2. Provide continuous, safe and unobstructed passageway at least 3' wide throughout their length leading directly to both required means of exit by cutting a door at least 3' wide through the dividing partition on the second, third, fourth and fifth stories. \* \* \*"

Order No. 86775-LD:

"Item 1. Provide exit signs \* \* \* over all exits. \* \* \*"

Order No. 86774-LD:

"Item 1. Provide an outside iron balcony fire escape on the Lexington avenue side of building. \* \* \*"

"Item 2. Extend the interior stairway at the east side of the building to the roof.

"Item 3. Remove the substandard fire escape on the north side of building. \* \* \* Among the defects noted: No stairway from top balcony to roof. No balcony to 2nd story or egress to same from such story. Windows on 4th not fireproof or self-closing. Must be maintained structurally safe and properly painted. No sign of any character shall be placed at openings to same.";

and

WHEREAS, the building is non-fireproof, 5 stories in height, 25 ft. by 80 ft. in area; OCCUPIED: basement, storage only; 1st story, stores, 10 persons; 2nd story, offices, 12 persons; 3rd and 4th stories, tailoring, 27 persons; 5th story, factory, 8 persons; means of EGRESS consisting of an interior stairway extending from the 1st story to the 5th story, enclosed in wood, stud, plaster and metal-covered partitions with fireproof, self-closing doors at the openings with a double-rung iron ladder leading to a scuttle in the roof; a fire escape on the north end of building with landing on the roof of 2-story building adjoining, under the same ownership, with iron balcony on the front of the 2-story roof and vertical ladder to a balcony 10 ft. from the sidewalk; the building being EQUIPPED with an interior fire alarm system and fire drills being conducted; and

WHEREAS, it is proposed to arrange all doors leading to the stairway to swing outwardly and be fireproof, self-closing; to use the present fire escape on the building as a second means of exit by providing an additional balcony on the 2nd story with a counterbalanced drop ladder in guides to street.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Order No. 86776-LD, Item 2, on condition that a standard regulation fire escape shall be erected on the Lexington avenue front covering all necessary openings and that any room not having direct communication with the fire escape shall be provided with a door not less than 3 ft. wide in the subdividing partition between it and the room on the course of the fire escape; and denied as to Order No. 86775, Item 1 and Order No. 86774, Item 1; and granted as to Order No. 86774, Item 2, only so far as the stairs from the top story to the roof are concerned, on condition that a fixed double-rung iron ladder shall be provided in the stair hall from the top story to the scuttle in roof, and that this item shall otherwise be complied with; and granted as to Order No. 86774-LD, Item 3, on condition that the fire escape embraced in this item shall be made structurally safe and that a drop ladder in guides shall be provided from a balcony at 2nd story level to the street, and that the occupancy shall not exceed 25 persons above the second story.

472-26-S.

PETITIONER—Arthur Harft, for Kate Arnold, owner.  
SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PERMISES AFFECTED—36 East 8th street, Manhattan.

APPEARANCES—

For Petitioner: Louis L. Archer.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

Negative .....	0
Absent .....	0

THE RESOLUTION:

(472-26-S)

WHEREAS, Arthur Harft, for Kate Arnold, owner, filed, May 25, 1926, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 36 East 8th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 5, 1926 (Order No. 90647-LD), reads:

"1. Extend the interior stairway at the west side of building to the roof, as per Sec. 271, Labor Law.

"2. Provide a secondary exit from 2nd story, per Sec. 271, Labor Law.

"3. Arrange the fire escapes on the front north side of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sec. 273 and 274 of Labor Law, etc., or carry out a proper alternative method of complying with the requirements of Sec. 271 of the Labor Law.

"Among the defects noted are the following:

"Windows on course not fireproof and self-closing.

"Windows on 3rd and 4th stories are broken and defective.

"Openings on 5th story (18" x 18") not large enough to afford access to balconies.

"Floor opening in balcony at 3rd story level not closed up."

and

WHEREAS, the building is non-fireproof, 4 stories and attic in height, 25 ft. by 75 ft. in area at 1st and 2nd stories, 25 ft. by 65 ft. at 3rd story, and 25 ft. by 50 ft. in area above; OCCUPIED: 1st story, machine shop, 4 persons; 2nd story, manufacture of novelties, 4 persons; 3rd story, manufacture of novelties, 6 persons; 4th story, dressmaking, 10 persons; attic, vacant; EQUIPPED with a fire alarm signal system; EXITS: an interior wooden stairway at the west side, extending from the 1st story to the attic, enclosed in non-fireproof partitions, with hardwood doors at openings, an iron ladder from east side of attic to roof scuttle; a fire escape on the front of the building, having non-fireproof openings along the course thereof extending from the attic to the third story and counter-balanced stairs to sidewalk; ROOFS of adjoining building: 10 ft. 9 in. higher at east, 20 ft. higher at west; and

WHEREAS, the petitioner proposes, as to Item No. 1, to provide a metal scuttle with fixed wire glass and to remove the obstructing partition from attic; as to Item No. 2, petitioner proposes to provide a fire escape balcony at rear of second story, a fireproof window opening on the same and an iron ladder to yard level, and to obtain consent of adjoining owner at west to use his premises as a means of egress to street in case of fire; as to Item No. 3, petitioner proposes to fireproof the openings on the front fire escapes at third and fourth stories; the petitioner contends that the exits will then be adequate; and

WHEREAS, the original petition was dismissed on October 5, 1926, for lack of prosecution by the board, due to non-appearance at the hearing; reopened November 9, 1926, and set for a hearing November 16, 1926; and

WHEREAS, Joseph V. Mitchell has made written request for a hearing of the petition before the board and claims he has charge of the matter due to the death of the original petitioner, "Arthur Harft."

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is denied as to Order No. 90647-LD, Item 1, and granted as to Item 2, on

condition that a fire escape balcony and 60-degree stairs shall be provided on the rear of the building from the second story to the yard with egress through passageway of building adjoining, to street; and granted as to Item 3, only so far as it affects the plate glass windows on the second story, and that the fire escape shall comply with the requirements of the labor law in all other respects.

684-26-S.

PETITIONER—David M. Jones, for Max Amsel, owner.

THE RESOLUTION:

(684-26-S)

WHEREAS, David M. Jones, for Max Amsel, owner, filed, August 4, 1926, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 181-183-185 Mercer street (20 West Houston street), Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 15, 1925, reads:

"Order No. 99169-LD:

"1. Remove the substandard fire escape on the Mercer Street side of the building or reconstruct same as per Section 274 of the Labor Law.

"NOTE: Among the defects noted are the following: Windows on course not fireproof, self-closing. No drop ladder in guides from lowest balcony.

"2. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law. SEE NOTE.

"NOTE: Among the defects noted are the following: Windows on course not fireproof, self-closing. Connecting stairs are not 60°. No fireproof passageway from termination to street."

and

WHEREAS, the building is non-fireproof, 6 stories in height, irregular in shape, having a frontage of 25 ft. on Houston street, 105 ft. on Mercer street, and a depth of 92 ft. 6 in. in area; OCCUPIED: 1st story, jobber in dresses; 2nd story, vacant at present (proposed occupancy 20 persons); 3rd story, manufacturer of trimmings for pocketbooks, 20 persons; 4th story, manufacturer of caps and hats, 26 persons; 5th story, shirt cutter and also manufacturer of underwear, 25 persons; 6th story, manufacturer of materials for hats, 15 persons; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: an interior wooden stairway (at Mercer street front) extending from the 1st story to top story; enclosed in fireproof partitions with fireproof doors at openings; a substandard fire escape on the rear of the building and, also, a substandard fire escape on the Mercer street front of the building, and a standard fire escape on the Mercer street front of the building, having fireproof openings along the course thereof, extending from the top story to the 2nd story balcony, with counter-balanced stair to street; and ROOFS of adjoining buildings: at west, 3 stories lower; at north, 11 ft. higher; and

WHEREAS, petitioner requests the acceptance of the exist-

# MINUTES

ing means of egress in view of the small occupancy and the fact that recently a sprinkler system has been installed.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* as to Item 1, only so far as it affects the fireproofing of the windows on the course of the fire escape, *on condition* that the item of order shall be complied with in all other respects; and *granted* as to Item 2, only so far as it affects egress from the termination of the fire escape, *on condition* that egress shall be maintained through open and unobstructed yards to building adjoining to the north, and that the item of order shall be complied with in all other respects.

733-26-S.

PETITIONER—John J. Gilmartin, for 25th Street Realty Company, owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—138-144 West 25th street, Manhattan.

APPEARANCES—

For Petitioner: John J. Gilmartin.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition denied.

THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5

THE RESOLUTION:

(733-26-S)

WHEREAS, John J. Gilmartin, for 25th Street Realty Co., owner, filed, August 26, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises Nos. 138-144 West 25th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 16, 1926 (Order No. 99309-LD), reads:

"1. Remove all articles or wares of any nature from stairway enclosure at east side of building on the 1st story, as per Rule 5, of the Board of Standards and Appeals, July 29, 1924. Note: Cigar and Candy Stand."; and

WHEREAS, the building is fireproof, 12 stories in height, 90 ft. by 81 ft. in area at 1st story and 90 ft. by 75 ft. in area above; OCCUPIED: 1st story, stores; upper stories, tenant factories, 50 persons per story; petitioner occupying a portion of the easterly entrance hall as a cigar and candy stand; EQUIPPED with a sprinkler system, a fire alarm signal system and a standpipe equipment; EXITS: two interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; an exterior iron stairway on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the 2nd story balcony; with EGRESS from the termination of the exterior stairway by means of a fireproof passageway leading to the westerly entrance hall to the street; and

WHEREAS, petitioner contends that the cigar and candy stand is located in such a position as to afford a 5-foot clearance and that it does not interfere with egress from the building.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

750-26-S.

PETITIONER—Samuel Rosenblum, owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—172 Sands street, Borough of Brooklyn.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(750-26-S)

WHEREAS, Samuel Rosenblum, for Samuel Osfer, lessee, filed, September 10, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 172 Sands street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated February 26, 1926 (Order No. 91706-LD), reads:

"1. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. SEE NOTE.

"Among the defects noted are the following:

"Not screened to a height of 4' 6".

"No stairway from top balcony to roof.

"2. Remove the sub-standard fire escape on the front of building or reconstruct same as per Sec. 274 of the Labor Law and Rule 3 of the Board of Standards and Appeals adopted May 9, 1924. Among the defects noted are the following:

"Windows on course not fireproof, self-closing.

"3. Enclose the interior stairway at the west side of building serving as a required means of exit, and the landings, platforms, and passageways connecting therewith on all sides with partitions of fire-resisting material extending continuously from the cellar to 3 feet above the roof, constructed as per Section 271 of the Labor Law or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law."; and

and

WHEREAS, the building is fireproof, 6 stories in height, 19 ft. by 95 ft. in area; OCCUPIED by one tenant as a candy factory: 1st story, 4 persons; 2nd story, 5 persons; 3rd story, 3 persons; 4th story, 5 persons; 5th story, 5 persons; 6th story, 7 persons; EXITS: an interior wooden stairway, extending from the roof to the open loft on the 1st story; enclosed in fire-retarding partitions (excepting lath and plaster partitions on the 1st story, and accommodation opening on the 3rd story protected by a wooden door and, also, wire glass panels 28 in. by 54 in. in area, in the stair enclosure) with fireproof doors at openings; a sub-standard fire escape on the front of the building, having unprotected openings along the course thereof, extending from the top story to the 2nd story balcony, with drop ladder to street; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the top story to an open court leading to street; ROOFS of adjoining buildings: to west, 3 stories lower; to east, 2 stories lower; and

WHEREAS, petitioner proposes to fire retard the stair enclosure at the 1st story and to provide a fireproof door at the accommodation opening in the stair enclosure on the 3rd story and requests the acceptance of the wire glass panels, and, also, the acceptance of the present termination of the stairway in view of the narrow width of the building; and as to the fire escapes, requests their acceptance as there is no safe egress from the roof, and that the occupancy of the building is small.

# MINUTES

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* as to Item 1, only so far as it affects the stairway from the top story balcony of fire escape to the roof, *on condition* that a goose neck ladder shall be provided from the top story balcony to the roof and that the fire escape shall comply with the requirements of the labor law in all other respects; and *granted* as to Item 2, only so far as it affects the fireproofing of the windows, *on condition* that the fire escape shall comply with the requirements of the labor law in all other respects; and *granted* as to Item 3, only so far as the egress from the termination in the first story is affected, *on condition* that a horizontal exit shall be provided at the termination of the stairs in the stairway enclosure on the ground floor level to the adjoining premises to the west, which is under the same operation and control, and that egress from the said premises to the street shall be maintained free and unobstructed, and that the stair enclosure shall comply with the requirements of the labor law in all other respects.

THE RESOLUTION:

(114-26-S)

WHEREAS, Sugarman and Berger, for 63 Prince Street Corp., owner, filed, February 10, 1926, a petition for variation from the requirements of the labor law as cited in a decision of the superintendent of buildings, affecting premises 63-65-67 Prince street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered January 22, 1926 (N. B. Applic. No. 415-1925), reads:

"1. All windows should conform to Section 264 of Labor Law. No pane in windows may exceed 720 sq. inches.";

and

WHEREAS, the building is fireproof, 15 stories in height, 84 ft. 9 in. by 143 ft. 4 in. in area; OCCUPIED as a tenant factory, 120 persons on each story; and

WHEREAS, the petitioner proposes to install plate glass windows set in metal frames on the two street fronts, the maximum size: 1st story, 10 ft. by 9 ft. 5 in.; 2nd story, 4 ft. 6 in. by 6 ft. 2 in.; the petitioner contends that the windows under this petition will be used as shop windows; and

WHEREAS, this petition was granted by the board at its meeting, May 25, 1926, and September 30, 1926, on certain conditions and petitioner requests a modification of these conditions as to the use of metal-covered frames instead of all metal and as to the size of openings in the 2nd story.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law and that the petition be and it hereby is *granted* only so far as it affects the openings on the street front of the two (2) lower stories *on condition* that all openings shall be equipped with frames and sashes complying with the labor law glazed with  $\frac{1}{4}$  inch polished plate glass, and that the

requirements of the labor law shall be complied with in all other respects, and that the requests as to increasing size of glass panels in openings in the 2nd story be and it hereby is *denied*.

19-23-S.

PETITIONER—Arthur F. Schermerhorn, for George S. Schermerhorn, et al., owners.

SUBJECT—Application for reopening, amendment of resolution, re variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—92 Prince street, Manhattan.

APPEARANCES—

For Petitioner: Edward G. Schermerhorn.

For Administration: Inspector Maher of fire department.

THE RESOLUTION:

(19-23-S)

WHEREAS, Thomas A. Williams, for E. Schermerhorn, owner, filed, January 4, 1923, a petition, with the board of standards and appeals, for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 92 Prince street, Manhattan; and

WHEREAS, the order of the fire commissioner reads:

"1. Arrange the fire escape on the rear of the building, in compliance with the provisions of sections 273 and 274 of the Labor Law.

"NOTE: Among the defects noted on this fire escape are the following: Windows on course of fire escape not fireproof, self-closing; no balconies at second story; no counterbalanced stair to street.";

and

WHEREAS, the building is non-fireproof, 3 stories and basement in height, 26 ft. by 78 ft. in area in the 1st story and 26 ft. by 48 ft. in area above; OCCUPIED: basement, lunch room; 1st story, manufacturing muslin underwear, 5 persons; 2nd and 3rd stories, manufacturing leather novelties, 20 persons; the means of egress consisting of an interior stairway extending from the 1st story to the roof, enclosed in lath and plaster partitions, with wood doors at the openings; a fire escape on the rear of the building, with landing on extension roof in the 2nd story, with balcony leading to extension roof on the Mercer street front, a 60-degree stairs to balcony at the 1st story, with drop ladder in guides to street, with fireproof windows along course of the fire escape, except in the top story; and

WHEREAS, petitioner contends that the fire escape was accepted by the acting chief of the bureau of fire prevention June 24, 1919, and that the means of egress are adequate; and

WHEREAS, the board deemed that the recommendations of the acting chief of the bureau of fire prevention of June 24, 1919, should be ratified; and

WHEREAS, this petition was granted by the board at its meeting, February 13, 1923, on certain conditions, and applicant requested a modification of these conditions as to occupancy.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law and that the petition be and it hereby is *granted on condition* that the recommendations of the acting chief of the bureau of fire prevention of June 24, 1919, shall be complied with and that the occupancy shall not exceed 25 persons above the 1st story.

ACTION OF BOARD—

(325-26-S)

WHEREAS, Arthur Werner, for Morris Katz, owner, filed, April 16, 1926, a petition for variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises No. 831 Third avenue, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated May 1925, read:

Order No. 77015-LD:

"1. Arrange the fire escape at rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sec. 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. (See Note).

"1. Windows on course not fireproof, self-closing. 2. Connecting stairs not 60 degree. 3. Does not extend to roof. 4. No counter-balanced stairs provided at 2nd story balcony to ground, and 5. No direct egress to street from lower termination of the fire escape.

"2. Enclose interior stairway at south side of building in partition of fire resisting material on 3rd story, as per rule 3 of the Board of Standards and Appeals, adopted July 29, 1924.

"3. Extend the interior stairway at the south side of building to the roof, as per Sec. 271 of the Labor Law."

Order No. 77016-LD:

"1. Provide exit signs, letters to be at least 8" in height, at all means of egress with a red light over all

such exits for use in time of darkness, as per Section 272 of the Labor Law."

and

WHEREAS, the building is non-fireproof, 4 stories in height, 35 ft. by 65 ft. in area at 1st and 2nd stories and 35 ft. by 55 ft. in area above; OCCUPIED: cellar, storage of furniture frames and shipping room, no occupancy; 1st story, dry goods store; 2nd story, show room, no occupancy; 3rd story, upholstery, 4 persons; 4th story, draperies, 10 persons; EXITS: an interior wooden stairway, extending from the 1st story to top story (with iron ladder to scuttle in roof); enclosed in wooden partitions with wooden doors at openings; a fire escape on the rear of the building, having non-fireproof openings along the course thereof, extending from the top story balcony to the roof of the 2nd story extension; with EGRESS from the termination of the fire escape by means of a single-rung ladder leading to yard of premises to the east; ROOFS of adjoining buildings are at same level; and

WHEREAS, this petition was denied by the board at its meeting, July 27, 1926, and reopened by vote of the board.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted as to Order No. 77015, Item 1, on condition that a standard labor law 60-degree fire escape shall be erected on the front of the building and that the existing fire escape on the rear shall be made and maintained structurally safe; and denied as to Order No. 77015, Items 2 and 3 and Order No. 77016, Item 1.

# CONCRETE RULES

## USE OF HYDRATED LIME IN CONCRETE.

adopted by the Board of Standards and Appeals, April 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights being the amount of lime which may be incorporated in each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

# RULES

## FUEL OIL RULES

### CONSTRUCTION AND INSTALLATION OF OIL BURNING EQUIPMENT AND STORAGE AND USE OF FUEL OILS

Adopted by the Board of Standards and Appeals November 6, 1919, Amended January 6, 1922, January 18, 1924, and November 3, 1926.

#### Rule 1. Definition.

The term "fuel oil" under these rules shall include any liquid or mobile mixture, substance or compound derived from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

#### (a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

#### (b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

(c) Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

#### (d) Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, may be used for domestic heating in buildings occupied by not more than two (2) families and in tenement houses and commercial plants. If used in tenement houses or commercial plants, a certificate of fitness for the operator of the plant will be required as per Rule 15.

(e) Where Grade A oil is used in place of Grade B oil in domestic installations it may be used under the requirements for Grade B installations.

(f) No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

#### Rule 2. Manner of Storage for Fuel Oil.

Fuel oil, to be used for heating and power purposes, shall be at all times stored in metal tanks with all openings or connections through the tops of the tanks.

#### Rule 3. General Location of Tanks for Fuel Oil.

(a) In all buildings fuel oil storage tanks shall be buried below the floor of the lowest story or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of any wall separating a building from the subway and, if practical, tanks shall be placed in a lower position than the roadbed of the subway.

#### Rule 4. Location, Protection and Capacity of Tanks for the Storage of Fuel Oil.

##### Subdivision A. Grade A Fuel Oil.

##### Section 1. Inside of Buildings Above Ground.

(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space between the tank and the walls and roof of the enclosure shall be completely filled with dry upland sand or earth well tamped.

(f) Not more than one tank shall be placed in an enclosure.

(g) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "h."

(h) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

##### Section 2. Inside Buildings Below Ground.

(a) When a tank is buried beneath a building its capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Subdivision A, Section 1 (g) and (h).

(b) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, covered by at least six (6) inches of concrete which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(c) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with soft earth or sand. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

##### Section 3. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located

# RULES

outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth ( $1\frac{1}{4}$ ) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above ground, the tanks shall be not less than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

## Section 4. Outside of Buildings Below Ground.

(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on firm soil and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete when buried in soil the nature of which would make additional protection necessary.

## Subdivision B. Grade B Fuel Oil.

### Section 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When not buried and located inside of a building they shall be placed on the lowest floor level and shall be enclosed in four inches of terra cotta or eight inches of approved masonry, and the aggregate capacity of such storage tanks shall not exceed 275 gallons.

(b) Tanks, when buried, shall be placed with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm soil foundation.

(c) Tanks shall be set on firm soil and surrounded with soft earth or sand and shall be complete encased with (6) inches of concrete, where soil conditions require.

(d) Where in the opinion of the Fire Commissioner extreme difference of grade or soil conditions would work a hardship an anti-syphon valve or other mechanical device to prevent syphoning approved by the U. S. Bureau of Standards, Fire Underwriters Laboratories or other laboratory recognized by the Board of Standards and Appeals, may be used.

### Section 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.

## Rule 5. Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half ( $1\frac{1}{2}$ ) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth ( $\frac{1}{4}$ ) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; of masonry or of impervious reinforced concrete. Earth-work embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half ( $1\frac{1}{2}$ ) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

## Rule 5A. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanketing gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half ( $\frac{1}{2}$ ) inch in size. The boilers shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit there shall be kept ready for use two portable fire extinguishers of not less than 1 quart capacity or other equivalent fire extinguishers for extinguishing oil fires.

## Rule 6. Material and Construction of Tanks for the Storage of Fuel Oil.

### Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Such plates shall be free from physical imperfections, such as laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked, or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$  in. shell,  $\frac{1}{4}$  in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$  in. shell,  $\frac{5}{16}$  in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$  in. shell,  $\frac{3}{8}$  in. heads.

Tanks over 120 inches in diameter to be of  $\frac{3}{8}$  in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should flat heads be used, they must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

# RULES

## (e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell  $\frac{1}{4}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{1}{4}$  in. pitch.

In shell  $\frac{5}{16}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{3}{8}$  in. pitch.

In shell  $\frac{3}{8}$  in. thick,  $\frac{3}{4}$  in. diameter rivets  $2\frac{1}{2}$  in. pitch.

## Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality required for cylindrical tanks, and of a thickness of not less than  $\frac{5}{16}$  of an inch.

(b) Corners may be made up by bending the plates or by the use of angles.

(c) Rivets in seams shall be  $\frac{5}{8}$  of an inch in diameter and spaced not more than  $2\frac{1}{4}$  inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must not be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of six (6) inches center to center on these members.

(f) When structural reinforcing members are tied together with braces, in order to reduce the effective length, the braces shall not be stressed higher than nine thousand (9,000) pounds per square inch taken on the minimum net section.

(g) If structural members are omitted and the sides of the tank are braced by means of rods or bars, these members should not be spaced farther apart than twenty-four (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch on the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars so that the bar will break before the connection will let go.

## Section 3. Vertical Storage Tanks Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality required for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be  $\frac{1}{4}$  inch and the minimum thickness of roof plates  $\frac{1}{8}$  inch.

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

(c) Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate seams shall be designed, with proper efficiency to meet requirements of above formula for shell plates.

(d) In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind will be permitted.

(e) Tanks for storage of grade B oil shall be constructed in accordance with the requirements of this rule, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than  $\frac{3}{16}$  inches in thickness.

(f) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

## Section 4. Welding.

(a) Where welding is to be used for a part or for the entire tank, the tank shall be fabricated as required under Rule 6, Section 1.

(b) All welded seams of plates shall be lapped or butted.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight, metal to metal, before welding and kept tight together during welding. Both inside and outside welds shall be of full 45 degree fillet.

Where a butt joint is used, it shall be of the 90 deg. double V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

(c) All heads shall be flanged, the straight part of the flange being not less than as follows:

For  $\frac{3}{16}$  inch heads,  $1\frac{3}{4}$  inch flange.

For  $\frac{1}{4}$  inch heads, 2 inch flange.

For  $\frac{5}{16}$  inch heads, 2 inch flange.

For  $\frac{3}{8}$  inch heads,  $2\frac{1}{4}$  inch flange.

For heads over 120 inches diameter the flange shall be increased in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a driving fit and the shell shall fit the head closely all around. If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head welds for tanks of 1,100 gallon capacity or less and not over 48 inches in diameter, shall be of the 90 deg. single V type welded entirely through and reinforced not more than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the 90 deg. double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

(d) Where tanks are made up of two or more rings the welded longitudinal joints of adjacent sections shall break joints. At no point of a butt girth joint shall the sheet on one side be offset with the sheet on the other side in excess of one-half of the thickness of the plate. All butt girth joints shall be welded inside and out and reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

## Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar, asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

# RULES

## Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

## Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

## Rule 7. Tests of Tanks for the Storage of Fuel Oil.

### Section 1. Inside of Buildings Above or Below Ground or Outside of Buildings Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks, shall withstand after being set in place, a hydrostatic or air test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

(c) Tanks when subjected to an air pressure test shall be equipped with a safety relief valve set at not more than 32 lbs. per sq. in., and the air compressor device employed in the air testing of the tank shall be of low pressure type, equipped with an automatic pressure regulator set at not less than 35 lbs.

### Section 2. Horizontal Tanks Outside of Building, Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic or air test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

### Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

### Section 4. Test for Tanks. How Conducted.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic or air test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 or 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.

## Rule 8. Piping for Fuel Oil.

### Section 1. Installation of Piping.

(a) Piping shall be run as directly as practicable without sags, and, except as provided in Rule 11A, e, shall be laid so that where practicable pipes shall pitch toward the

supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.

### Section 2. Type and Material.

(a) All piping shall be of standard full weight brass, copper, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ( $\frac{1}{2}$ ) inch inside diameter shall be permitted; except that for Grade B oil  $\frac{1}{4}$ -inch diameter pipes may be used.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Tubing and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. No soldered connection shall be used. The length of tubing shall not exceed that required for direct connections to coupling.

### Section 3a. Tests for Piping. Grade A.

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ( $1\frac{1}{2}$ ) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

### Section 3b. Tests for Piping. Grade B.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.

### Section 3c. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes, when required, shall be not less than one size larger than supply pipe.

### Section 4. Relief Valves.

(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of the pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than  $\frac{1}{2}$  in. by  $\frac{1}{2}$  in., of the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) An automatic by-pass valve of size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with

# RULES

the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.

## Section 5. Fill Pipes.

(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) The fill pipe shall be provided with a trap or seal or carried within four (4) inches of the lowest point in the tank.

(d) The fill pipe shall be made up with screwed or flanged fittings and shall be oil tight and securely held in place.

## Section 6. Vent Pipes.

(a) An open, galvanized iron vent pipe without trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend through the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the same class of liquids is installed, vent pipes may be run into a main header. Connections to the header shall not be less than one foot above the level of the top of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screened. The main vent pipe and header shall be of an area equal to the aggregate area of vent pipes connected thereto.

(c) Vent openings in tanks shall be screened by 40 mesh non-corrodible wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation. Vents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter (1¼) inches in diameter.

(d) Vent pipes shall be provided with weather proof hoods and terminate outside the building above the street surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direction of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions, to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to tank trucks by tight connections and filled by pressure, a one (1) inch line shall be connected to tank and shall parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow to the fill box and shall be so set as to prevent the passage of vapor to the street.

## Section 7. Return Pipes from Burners.

Return lines from burners, where necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, and shall be connected into the suction line near the pump or into the storage tank. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.

## Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of hot water coils thermostatically controlled and the oil shall not be heated above one hundred and forty (140) degrees Fahrenheit.

## Rule 9. Valves and Control of Flow for Fuel Oil.

### Subdivision A. Grade A Fuel Oil.

(a) Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size

containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the hand-wheel. The use of packing which may be affected by oil or heat is prohibited.

(b) A shut-off valve shall be provided in discharge and suction lines near each pump; in discharge line from each tank as near the tank as practicable, and in branch lines near each burner.

### Subdivision B. Grade B Fuel Oil.

(a) Readily accessible valves shall be provided near each burner and in the discharge line from each storage tank.

(b) A remote control for shutting off the supply of oil to the burners shall be provided.

(c) An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve. Automatic by-pass valves shall be set at not more than fifty (50) per cent above the maximum working pressure. This rule shall not apply to burners and pumps approved as a unit when provided with a pressure relief device.

## Rule 10. Oil Level Indicating Device for Grade A Fuel Oil.

A test well or gauging device shall be installed and so designed as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept locked when not in use.

## Rule 11. Pumps for Fuel Oil.

### Subdivision A. Grade A Fuel Oil.

(a) Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

(b) Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel oil for heating or steam.

(c) Pumps located in the same room where burners are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above ground storage tanks shall be located outside embankment walls, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

(e) Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a gravity of not more than eighteen (18) degrees Baume and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps.

### Subdivision B. Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11A (a).

## Rule 12. Burners for Fuel Oil.

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals. In domestic installations the burner shall be equipped with an overflow attachment or an automatic control to prevent flooding.

# RULES

## Rule 13. General Devices for Grade A Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer wells with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

## Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

## Rule 15. Operation of Plant Other Than Domestic Installations Using Grade A Fuel Oil.

No fuel oil burning plant shall be operated unless in charge of a person holding a certificate of fitness as issued by the fire department. A certificate of fitness will be required for each person who is directly in charge of the operation of the plant at any and all times.

This certificate of fitness will be required for all Grade A installations, and Grade B installations in dwellings or more than two families and in commercial plants. This requirement as to Grade A installations shall not apply to dwellings of less than three families equipped with Grade B installations using Grade A oil.

## Rule 16. Installation.

No fuel oil installation shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil installation shall be submitted to the Fire Commissioner for approval, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

## Rule 17. Auxiliary Tanks for Grade B Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frames or cradles and secured by 2x1/8-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

(d) Where only an auxiliary tank as prescribed in these rules is used it shall in addition to complying with the requirements for auxiliary tanks comply with all requirements for the protection of a storage tank other than the enclosure.

## Rule 18. Pilot Light.

Automatic systems unless electrically ignited shall be so designed that the flame cannot be extinguished by operation of the automatic control valve and a pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not to be easily extinguished.

## Rule 19. Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices, originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless spaces in which vapors might collect are adequately vented, and if used shall be of such construction as to withstand the maximum temperature which the oil burning device when installed may generate.

(b) No damper for closing of more than eighty (80) per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

## Rule 20. Fire Protection for Grade A and Grade B oil in Domestic Installations in dwellings occupied by not more than two families and in old law tenements occupied by three or more families in new law tenements and in commercial plants.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) In dwellings occupied by not more than two (2) families, any woodwork, wooden lath and plaster partition, or other combustible material within four (4) feet of the sides or back, or eight (8) feet from the front of the furnace shall be covered with approved fire retarding material; the ceiling except it be of fireproof construction shall be protected with approved fire retarding material extending four (4) feet beyond the sides and back and eight (8) feet from the front of the furnace. In old law tenement houses occupied by three or more families the heating apparatus and oil burning device shall be located in an enclosure the partitions of which shall be constructed of fireproof material not less than four (4) inches in thickness with openings therein protected with self-closing fireproof doors and the ceiling of the enclosure, if not of fireproof construction, shall be protected with approved fire retarding material; said enclosure shall be ventilated to the outer air; all vertical openings leading to cellar shall be protected with fireproof material not less than four (4) inches in thickness with all openings therein protected with self-closing fireproof doors.

(c) In new law tenement houses or in commercial plants the room or rooms in which the heating apparatus and oil burning device is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra-cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have entrance from the street, court or yard only, and shall be ventilated to the outer air.

Approved fire retarding material shall be any material complying with the rules of the Board of Standards and Appeals for fire retarding of garages.

(d) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

## Rule 21. Systems Prohibited Where Grade B Fuel Oil Is Used.

The use of auxiliary tanks between pump and burner of the pressure type are prohibited. Systems, fed by gravity between the storage tank and the pump, or force systems, are prohibited.

## Rule 22. Use of Grade A or Grade B Fuel Oil.

(a) These Rules shall not apply to gas companies storing or using fuel oil in the manufacture of illuminating gas for public use.

(b) The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(c) Modification: When for any reason it may be impracticable to comply strictly with the foregoing rules the fire commissioner shall have power to modify their provisions so that the spirit and substance thereof shall be complied with. Such modification shall be endorsed upon the permit over the signature of the fire commissioner.

WILLIAM E. WALSH, *Chairman.*

WILLIAM J. O'GORMAN, *Secretary.*

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the

hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth*, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

Corrections.

Fire Retarding Rules.

Reserve Calendar.

Progress Report.

## PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

## HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

## CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, November 30, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, December 7, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

## NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman

Negative .....	0
Absent: Chief Kenlon .....	1

568-26-A.

APPELLANT—Baker Oil Burner Corporation, for L. J. Mayreis, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—6933 Exeter street, Forest Hills, Borough of Queens.

APPEARANCES—

For Appellant: George C. LaBlanc.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(568-26-A)

WHEREAS, the Baker Oil Corporation, for L. J. Mayreis, owner, filed an appeal from an order of the fire commissioner, affecting premises 6933 Exeter street, Forest Hills, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated April 7, 1926, reads:

"Order No. 3056-LC:

"1. Expose buried fuel oil storage tank to view so that a proper hydrostatic pressure test may be made by a representative of the Fire Commissioner, as per Rule 7.

"3. Bury all fuel oil carrying piping, suction and return lines.

"4. Locate shut-off valve on suction line on level with cellar floor inside of cellar wall, as per plan.

"6. Provide a hydrostatic test of not less than 100 lbs. per square inch for all Grade B Fuel Oil carrying piping. \* \* \*";

and

WHEREAS, the building is non-fireproof, 2 stories and attic in height, 22 ft. by 38 ft. in area; OCCUPIED as a dwelling; and

WHEREAS, a fuel oil burning system has been installed, consisting of a 1,100-gallon storage tank (buried outside the premises) an approved Baker Automatic Oil Burner and the necessary valves (the shut-off valve being located above the cellar floor) and piping to make a complete installation; and

WHEREAS, appellant contends as to Item 1 that the tank has undergone a satisfactory test by the manufacturer; as to Items 3 and 4, contends that the piping was installed as shown upon the plans filed with this case in order to avoid sewer pipes and other obstructions; and as to Item 6, con-

tends that all piping is standard, full-weight galvanized wrought iron.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* as to Item 1 *on condition* that certificate of factory test shall be filed with the fire commissioner as to the tank; as to Item 3 *granted on condition* that all pipes, where exposed above the cellar floor or projecting beyond the walls, shall be encased in cement concrete, not less than two inches beyond the face of the pipe in any line; as to Item 4, *granted on condition* that the control of the shut-off valve shall be located on the face of the wall, at all times accessible and so marked; as to Item 6, *granted on condition* that all piping shall be of standard, full-weight wrought iron; and that the installation shall comply with the fuel oil rules in all other respects.

614-26-A.

APPELLANT—Wm. F. Conran, for Borden Farm Produce Co., owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—80-92 3rd avenue, Brooklyn.

APPEARANCES—

For Appellant: Wm. F. Conran.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(614-26-A)

WHEREAS, Wm. F. Conran, for the Borden Farm Produce Co., owner, filed an appeal from an order of the fire commissioner, affecting premises 80-92 Third avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated February 7, 1924, reads:

"Order No. 54636:

"Install a standpipe system with risers 4 in. in diameter, tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½" regulation Fire Department outlets on each story, including basements, cellars and roofs, placed within main stairway enclosure.";

and

WHEREAS, the building is fireproof, 2, 3 and 4 stories (52 ft.) in height, having a frontage of 175 ft. on Third avenue and a frontage of 140 ft. on Dean street, a total area of approximately 27,000 sq. ft., divided into sub-areas by masonry partition walls, with the openings therein protected by self-closing fireproof doors; OCCUPIED as a milk bottling plant; 1st story, 25 persons; 2nd story, 57 persons; 3rd story, 6 persons; 4th story, no persons; and

WHEREAS, appellant contends that practically all of the area of the building is occupied by ice boxes, chill rooms, ice tanks, etc., and that the premises are always saturated with water due to the washing of bottles and cans, and contends further that only a small portion of the plant is heated; and

WHEREAS, there is no single area in this entire group in excess of 7,600 sq. ft.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* so long as the present use and operation shall remain substantially unchanged; that the building shall be not increased in height or area; and that all horizontal openings as now equipped with fireproof doors shall be so maintained,

# MINUTES

617-26-A.

APPELLANT—Seldner & Enequist, Inc., owners.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—86-112 Hausman street, Brooklyn.

APPEARANCES—

For Appellant: Samuel Rosenblum.  
For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(617-26-A)

WHEREAS, Samuel Rosenblum, for Seldner & Enequist, Inc., owner, filed, July 14, 1926, an appeal from an order of the fire commissioner, affecting premises 86-112 Hausman street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated June 26, 1926, reads:

"Order No. 4491-LC:

"1. Install a standpipe 4 in. in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves. \* \* \*

"2. Provide an approved means of ventilation for each compartment where collodion, alcohol, rubber cement and benzole are stored in metal sealed cans.

"3. Discontinue the practice of filling metal-sealed cans from drums of alcohol and benzole on the premises.

"6. Provide separate compartment for filling metal-sealed cans of benzole and alcohol, such compartment to be built with suitable foundations."

and

WHEREAS, the premises consist of a plot of ground, having a frontage on Hausman street, and also on Apollo street, upon which are located a group of buildings forming the plant of Seldner & Enequist, Inc., manufacturing chemists; buildings No. 6 and No. 9 being the ones in question relative to Item 1 of the orders; and building No. 7 being the one in question relative to Items 2, 3 and 6 of the fire department orders; buildings No. 6 and No. 9 being separated by a 16-inch masonry wall with six windows therein, (each 2 ft. 10 in. by 4 ft. 8 in. in area), are non-fireproof, one story in height; No. 6 being 67 ft. by 121 ft. (inside area 7,660 sq. ft.) in area; and No. 9 being 26 ft. by 100 ft. (inside area 2,440 sq. ft.) in area, a total area of 10,100 sq. ft.; building No. 7 is fireproof, one story in height, 26 ft. by 60 ft. in area, separated into three sections by fireproof partitions, the middle section being used for the storage of alcohol and the remainder of the building for the storage of collodion, rubber cement, etc.; and

WHEREAS, the appellant contends, as to Item 1, that the buildings are but slightly in excess of 10,000 sq. ft. and that the windows are necessary in the conduct of the business; as to Items 2, 3 and 6, appellant contends that the plant is constantly under the supervision of persons holding certificates of fitness; that five alarm boxes with direct communication to headquarters are distributed throughout the premises; that the plant runs through from street to street and requests the acceptance of existing conditions.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal as to Item 1 be and it hereby is granted on condition that the building shall be not increased in area and that the existing ground shall not exceed, approximately, 10,100 sq. ft.; and that the appeal as to Items 2, 3 and 6 be and it hereby is denied.

645-26-A.

APPELLANT—Bush Terminal Co., owner.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—4524-4604 2nd avenue, Brooklyn.

APPEARANCES—

For Appellant: A. K. Vollmer.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Absent .....	0

THE RESOLUTION:

(645-26-A)

WHEREAS, Bush Terminal Co., owner, filed, July 26, 1926, an appeal from an order of the fire commissioner, affecting premises 4524-4604 Second avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, Order No. 98194-F, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basement, cellars and roofs), placed within main stairway enclosure."

and

WHEREAS, the building is fireproof, one story in height, 114 ft. 11¼ in. by 100 ft. 10½ in., about 11,500 sq. ft. in area; OCCUPIED for furniture packing, 40 persons, and known as Warehouse No. 89 of the Bush Terminal Plant, having a 6-inch underground fire main fed from a 12-inch fire main, supplied by two 1,500-gallon fire pumps, electrically driven; and

WHEREAS, the appellant proposes to install a 2½ inch hose outlet taken off the existing 6-inch underground main, tapped in on the water side of the dry pipe valve; the appellant contends that such an installation would have protection against frost and the advantage of being operated by pumps and tanks of the existing fire protection system.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

655-26-A.

APPELLANT—Baker Oil Burner Corporation, for Christopher Smiles, owner.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—73-44 Greenway So., Forest Hills, Borough of Queens.

APPEARANCES—

For Appellant: George C. LaBlanc.  
For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

Absent .....	0

THE RESOLUTION:

(655-26-A)

WHEREAS, Baker Oil Burner Corp., for Christopher Smiles, owner, filed, July 27, 1926, an appeal from an order of the fire commissioner, affecting premises No. 73-44 Greenway So., Forest Hills, Borough of Queens; and

# MINUTES

WHEREAS, the order of the fire commissioner, dated June 5, 1926 (Order No. 4146-LC), reads:

"1. Provide a hydrostatic test of fuel oil storage tank or tanks of at least 30 lbs. per square inch, for all welded tanks, as per Rule 7, Sec. 1-b of the Fuel Oil Rules

"4. Provide a hydrostatic test of not less than one hundred pounds per square inch for all Grade B Fuel Oil carrying piping, as per Rule 25, Sec. 2 of the Fuel Oil Rules."

and

WHEREAS, the building is non-fireproof, 2 stories and attic in height, 25 ft. by 32 ft. in area; OCCUPIED as a dwelling; and

WHEREAS, a fuel oil burning system has been installed, consisting of a 550-gallon storage tank, (buried outside the premises), an approved Baker Automatic Oil Burner and the necessary valves and piping to make a complete installation; and

WHEREAS, appellant contends that the tank and also the piping were tested by the manufacturer and contends, further, that all piping is standard full-weight galvanized wrought iron.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* as to Item 1, *on condition* that affidavit of certificate of factory test shall be filed with the fire commissioner as to tank; as to Item 4, *on condition* that all piping used throughout the installation shall be of standard, full-weight wrought iron; and that the installation shall comply with the rules in all other respects.

711-26-A.

APPELLANT—Finley R. Porter, for Edward W. Mammen, owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—175-06 88th avenue, Jamaica, Borough of Queens.

APPEARANCES—

For Appellant: None.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

THE RESOLUTION:

(711-26-A)

WHEREAS, Finley R. Porter, for Edward W. Mammen, owner, filed an appeal from a decision of the fire commissioner, affecting premises 175-06 88th avenue, Jamaica, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, re Application No. 10420-1926, dated May 7, 1926, reads:

"24. Burners must be of a type approved by the Board of Standards and Appeals."

and

WHEREAS, the building is frame, 3 stories in height, 19 ft. by 38 ft. in area; OCCUPIED as a dwelling; and

WHEREAS, a fuel oil burning system has been installed consisting of a 200-gallon fuel oil storage tank, a 55-gallon auxiliary tank, a Walker Oil Burner and the necessary valves and piping to make a complete installation; and

WHEREAS, the appellant requests a temporary permit for the use of the fuel oil burning system, pending an inspection of the burner by the board; and

WHEREAS, at the hearing the representative of fire department stated that applicant has made no answer to objections raised by plan examiners of the fire prevention bureau.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is

*granted*, only so far as the use of burner is concerned, for a temporary period of thirty (30) days, *on condition* that the installation shall comply with the fuel oil rules in all other respects; and, further, that applicant shall amend plans to meet objections of the examiners of the bureau of fire prevention.

721-26-A.

APPELLANT—Salterini & Gallo Iron Corp., lessee.

SUBJECT—Appeal from orders of fire commissioner.

PREMISES AFFECTED—141-161 King street, Brooklyn.

APPEARANCES—

For Appellant: D. McFarlane, S. B. Murray.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Negative .....	0
Absent .....	0

THE RESOLUTION:

(721-26-A)

WHEREAS, Salterini & Gallo Iron Corp., for Reinhard Hall, owner, filed, August 20, 1926, an appeal from an order of the fire commissioner, affecting premises Nos. 141-161 King street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated June 22, 1926 (Order No. 97856-F), reads:

"Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure."

and

WHEREAS, the building is non-fireproof, 3 stories in height, 200 ft. by 96 ft. 6 in. and 30 ft., irregular in depth, about 18,000 sq. ft. in area; OCCUPIED for the manufacture of metal lamps, 38 persons on each story; the building being divided into four sections at first story and into three sections on the 2nd and 3rd stories; and

WHEREAS, the appellant claims that each story is divided into three sections: front section, 5,600 sq. ft.; south section, 2,508 sq. ft.; rear section, 9,120 sq. ft.; the first story having an additional section (boiler and coal room) of 826 sq. ft. in area; that the dividing walls are of brick, 12 in. in thickness, with fireproof doors on some of the openings; and

WHEREAS, the appellant proposes to brick up the openings between the front section and the boiler room section, and also to provide approved fire doors for all other openings in the dividing walls on all stories in accordance with law.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that a doorway shall be provided from the boiler room in the westerly gable wall opening to the open yard; that the present door openings in the southerly and westerly walls of the boiler room shall be bricked up; that the two remaining openings from the boiler room shall be equipped with fireproof, self-closing doors; that all openings subdividing the building at the southerly end, between the south and north shall be bricked up or provided with automatic, self-closing doors on both sides; and that any excelsior stored on the premises shall be maintained in a masonry enclosed structure, located in rear of open yard, with plain glass skylight in roof of same; and *granted* only so long as the existing buildings shall be not increased in height, area or dimensions; and that the present use and operation shall remain substantially unchanged.

THE RESOLUTION:

(742-26-A)

WHEREAS, Samuel Rosenblum, for Cohn & Epstein, owners, filed, August 30, 1926, an appeal from an order of the fire commissioner, affecting premises 229-231 Powell street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, rendered May 10, 1924 (Order No. 88780-LC), reads:

"Sec. 272-c prohibits the use of wholesale drugs in a building used as a factory.

"1. You are therefore ordered to discontinue the business of wholesale drug house, as such business is prohibited in any building used as a factory.";

and

WHEREAS, the building is non-fireproof, 2 stories and basement in height, 44 ft. by 90 ft. in area; OCCUPIED: basement, storage of empty bottles, no persons; 1st story, drugs and sundries, 5 persons; 2nd story, manufacture of sweaters, 8 persons; and

WHEREAS, appellant contends that the building is small in area and height; that the ceiling of the 1st story is metal covered; that the premises are amply provided with exits; that permits for the use and storage of alcohol, etc., have been issued by the fire department since 1923; that there is no manufacturing or compounding of chemicals done on the premises and that the quantity of chemicals stored is such that the business of applicant should not be classified as a wholesale drug house.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that there shall be no manufacturing or compounding of chemicals on the premises; that no quantity of any chemicals in excess of that permitted by the code of ordinances for the conduct and operation of retail pharmacy or druggist shall be maintained; that the quantity of alcohol stored on the premises shall at no time exceed fifty (50) gallons, maintained in an approved metal drum.

727-26-A.

APPELLANT—Grinell Bros., Inc., owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—1367-75 Flushing avenue, Ridgewood, Borough of Queens.

APPEARANCES—

For Appellant: Max Krauss.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5	and

Negative .....	0
Absent .....	0

THE RESOLUTION:

(727-26-A)

WHEREAS, Grinell Brothers, Inc., owner, filed, August 24, 1926, an appeal from a decision of the fire commissioner, affecting premises 1367-1375 Flushing avenue, Ridgewood, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, rendered August 11, 1926 (N. B. Applic. No. 1259-1926), reads:

"1. As plans indicate floor area to be over 20,000 sq. ft., provide a gravity tank with necessary appurtenances elevated 20 feet above main roof.";

and

WHEREAS, the building, facing on two street fronts, is non-fireproof, one story (19 ft) in height, 90 ft. by 300 ft. (approximately 26,000 sq. ft.) in area; OCCUPIED for the manufacture of sheet metal specialties (stoves), 25 persons; and

WHEREAS, appellant contends that the building is open on three sides, there being also an 8 ft. space along the rear; that there will be no forges or furnaces on the premises; that no inflammable material will be stored; that the premises will be equipped with an approved sprinkler system; that there are city fire hydrants in the immediate vicinity and appellant proposes to provide a 4-in. standpipe system with direct connection to the city main in Flushing avenue; said city main being fed two ways and a 45-pound pressure per sq. in. being maintained therein.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building be not increased in height or area; that an open court of not less than 8 ft. in width, for the entire length of the building, shall be maintained along the westerly lot line; that the building shall be equipped with an approved sprinkler system; and that the use, operation and conduct otherwise shall remain unchanged.

626-26-A.

APPELLANT—Leonard W. Kautz, for J. D. Williams, Inc., owner.

SUBJECT—Application for reopening, modification, re appeal from order of fire commissioner.

PREMISES AFFECTED—2941-47 Atlantic avenue, Brooklyn.

APPEARANCES—

For Appellant: Leonard W. Kautz.

ACTION OF BOARD—Appeal reopened and resolution amended.

THE VOTE TO REOPEN AND AMEND RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	4
Negative .....	0
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(626-26-A)

WHEREAS, Leonard W. Kautz, for J. D. Williams, Inc., owner, filed, July 16, 1926, an appeal from an order of the fire commissioner, affecting premises 2941-2947 Atlantic avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated June 15, 1926 (Order No. 4269-LC), reads:

"You are hereby notified that an inspection of the above premises, used for the storage of peroxide, etc., shows that the following must be done before the permit requested by you can be issued:

FORTHWITH

1. Install standpipe 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets, etc.";

# MINUTES

WHEREAS, the building is non-fireproof, 4 stories (54 ft. 8 in.) in height, 90 ft. by 140 ft. (approximately 11,600 sq. ft.) in area; OCCUPIED: basement, dressing furs, 35 persons; 1st story, dressing furs, 45 persons; 2nd story, fur dyeing and also dress manufacture, 75 persons; 3rd story, dress manufacture, 75 persons; 4th story, shoe manufacture, 50 persons; and

WHEREAS, appellant contends that the building faces on two street fronts, with a 10-ft. alleyway on side and back; that it is equipped with an automatic sprinkler system; that the building is amply provided with exits; that night watchmen patrol the premises; and that there are 5 city fire hydrants within 100 ft. of the building; and proposes to erect a boiler room in the rear yard; and

WHEREAS, this appeal was granted by the board at its meeting, October 19, 1926, on certain conditions, and the appellant requested a modification of these conditions as to location of exterior stairs and fill towers in courts.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be equipped throughout with an approved sprinkler system; that the building shall be not increased in height or area; that the existing rear and side courts, as shown on plans filed August 31, 1926, shall be maintained free and unobstructed except as to existing stairs and proposed boiler room; and *granted* only so long as the present occupancy and use shall remain unchanged.

THE RESOLUTION:

(264-26-BZ)

WHEREAS, Henry Nordheim, for 409 Central Park West Co., Inc., owner, filed, March 27, 1926, an application, under the building zone resolution, to permit in a residence district the alteration and conversion of occupancy in part from residence to a business use; premises 2430 Valentine avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 23, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Valentine avenue, East 187th street and Tiebout avenue are all in residence districts; and

WHEREAS, the decision of the superintendent of buildings, rendered March 26, 1926, reads:

"Proposed alteration and conversion of dwelling in residence district to be occupied for business purposes is contrary to provisions of Building Zone Resolution.";

and  
WHEREAS, the existing building is of non-fireproof construction, 3 stories in height, with a frontage of 31 ft. and a depth of 48 ft.; to be occupied as dwellings; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship.

Resolved that the decision of the superintendent of buildings be and it hereby is affirmed and that the application be and it hereby is denied.

680-26-BZ.

APPLICANT—Wm. F. Doyle, for Ely Moran, owner.

SUBJECT—Application (re decision of superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence district the erection and maintenance of an apartment house having stores on the first story.

PREMISES AFFECTED—95-109 Northern avenue, 92-102 Pinehurst avenue, Manhattan

Negative: Chief Kenlon .....	1
Absent .....	0

THE RESOLUTION:

(680-26-BZ)

WHEREAS, William F. Doyle, for Ely Moran, owner, filed, August 14, 1926, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of an apartment house having stores on the first story; premises 95-109 Northern avenue and 92-102 Pinehurst avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 23, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Northern avenue, Pinehurst avenue and West 181st street are all in residence districts; and

WHEREAS, the decision of the superintendent of buildings, rendered July 28, 1926, reads:

"Applic. N. B. 344-1926 (92-102 Pinehurst Ave.):

"3. Proposed use of stores is contrary to Sec. 3, Art. 2 of the Zone Resolution."

"Applic. N. B. 345-1926 (95-109 Northern Ave.):

"3. Proposed use of stores is contrary to Section 3, Art II, of the Zone Resolution.";

and

WHEREAS, the proposed building is to be of fireproof construction, six (6) stories in height, with a frontage of 209 ft. 4 in. on West 181st street and 280 ft. 3 in. on Pinehurst avenue and 341 ft. 1 in. on Northern avenue; to be occupied as stores on 1st story and remainder of building as apartments; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship for local and community accommodation and convenience in view of surrounding like and similar uses.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution and that the application be and it hereby is granted, only so far as it affects the first story on the street grade of the 181st street front for a depth not exceeding 55 ft., on condition that the business use shall be restricted to the occupancy of retail mercantile stores, specifically restricted from the conduct of any fish or meat market or delicatessen store; that there shall be no return of any store windows or business display on the Northern avenue and on the Pinehurst avenue frontage; that this store use shall be only in conjunction with the development of a six-story (or higher) apartment house under authority and permit of the tenement house and building departments; that any advertising display or signs shall be restricted to the plate glass show windows of the proposed stores; and that the requirements of the building zone resolution shall be complied with in all other respects; that all necessary permits shall be obtained within 9 months and the building completed within 18 months from the date of this action.

720-26-BZ.

THE RESOLUTION:

(720-26-BZ)

WHEREAS, John J. Dunnigan, for Jerome Avenue Exhibition Co., Inc., owner, filed, August 20, 1926, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a business building; premises 11-15 West 176th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 23, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Jerome avenue is in a business district, and that West 176th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 13, 1926, reads:

"1. Erection of a business building in a residential zone is contrary to the provisions of the Zone resolution."

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 60 ft. and a depth of 85 ft.; to be occupied as stores; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution and that the application be and it hereby is granted only so far as it affects the frontage on 176th street, lower Jerome avenue grade level, for not more than sixty feet frontage, and for a depth of approximately 85 ft., and a height of approximately not more than 11 ft., for the use and conduct of retail mercantile shops or stores; that any structure above the first story of the lower level of this plot shall be restricted to conforming uses; that the westerly gable wall shall be unpierced throughout its entire height and length; that the street frontage, other than the store show windows shall be finished with face brick and architectural terra cotta or stone trimmings; that any advertising display shall be restricted to flat wall signs; and that all necessary permits shall be obtained within six months and the work completed within one year from the date of this action.

THE RESOLUTION:

(665-26-S)

WHEREAS, the Broun-Green Co., lessee, filed, July 30, 1926, a petition for a variation of the labor law, as cited in an order of the fire commissioner, affecting premises 48 John street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 30, 1925, reads:

"Order No. 74802-LD:

"1. Enclose the interior stairway at east side of building, serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire-resisting material, extending continuously from the sub-cellar to 3 ft. above the roof. \* \* \*

"2. Arrange the fire-escapes on the rear of building and the openings leading thereto and the windows opening on the course thereof, so that same are in compliance with the provisions of Sec. 273 and 274 of the Labor Law. \* \* \*

"Among the defects noted are the following:

"2. No fireproof passageway;"

and

WHEREAS, the building is non-fireproof, 4 stories in height at front and 6 stories in height at rear, with cellar and sub-cellar, 20 ft. by 85 ft. 6 in. in area; OCCUPIED by one concern as printers and manufacturing stationers; sub-cellar, no persons; cellar, 17 persons; 1st story, 17 persons; 2nd story, 14 persons; 3rd story, 19 persons; 4th story, 20 persons; 5th and 6th stories, storage, no persons; EQUIPPED with a fire alarm signal system; EXITS: an open, interior

# MINUTES

wooden stairway, extending from the 1st story to top story; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the top story to the 1st story balcony, with EGRESS from the termination of the fire escape by means of a connecting bridge to the fire escape on the building to the rear, No. 43 Maiden lane; ROOFS of adjoining buildings: approximately the same level to east and west; and

WHEREAS, petitioner requests the acceptance of the existing means of egress from the termination of the rear fire escape and proposes to erect upon the front of the building a standard 45-degree fire escape, extending from the top story to the 2nd story balcony, with counter-balanced stair to street.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted as to Order No. 74802-LD, Item 1, on condition that the stairs shall be boxed in with fire-retarding material, with self-closing, fireproof doors at openings; and granted as to Item 2, only so far as egress from the termination of the rear fire escape is concerned, on condition that an iron balcony bridge shall be constructed at the termination of the fire escape on the level of the first story to a fire escape on the rear of premises No. 43 Maiden lane; and on condition that a standard 45-degree fire escape shall be constructed on the front of the building with counter-balanced stair from the lowest balcony to street; and that a gooseneck ladder shall be provided from the top story of the front fire escape to the roof; and on condition that a 45-degree stairs shall be provided on the rear of the 6th story extension to the roof of the 4th story main building; and on condition that the occupancy shall not exceed 25 persons above the second story.

748-26-S.

PETITIONER—Exide Battery Depots, Inc., for New York Central Railroad Company, owner.

SUBJECT—Variation of the labor law as cited in order of superintendent of buildings.

PREMISES AFFECTED—101-107 West End avenue, Manhattan.

APPEARANCES—

For Petitioner: Mintin Roof.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Negative .....	0
Absent .....	0

THE RESOLUTION:

(748-26-S)

WHEREAS, Exide Battery Depots, Inc., for New York Central Railroad Co., owner, filed, September 3, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises Nos. 101-107 West End avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated May 17, 1926, reads:

"Before a Certificate of Occupancy can be issued on the above premises relative to converting the occupancy from garage to a factory, the rear fire stairs should be enclosed by fireproof partitions as per Section 270 of the Labor Law."

nd

WHEREAS, the building is fireproof, 4 stories in height, having a frontage of 108 ft. on West End avenue and a frontage of 124 ft. 6 in. on West 64th street; OCCUPIED by one concern for the manufacture of storage batteries:

1st story, 22 persons; 2nd story, 30 persons; 3rd story, 30 persons; 4th story, 20 persons; EQUIPPED with a fire alarm signal system; EXITS: an interior fireproof stairway, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; an exterior iron stairway in a brick-enclosed court at the west side of the building, with fireproof openings along the course thereof, the court being entirely enclosed on the 1st story; with EGRESS from the termination of the exterior iron stairway by means of enclosed fireproof passageway to West 64th street; ROOFS of adjoining building: to west, 3 stories lower; and

WHEREAS, petitioner contends that the erection of the required enclosing wall at the west would be a hardship and would not add to the safety of this means of exit, and that existing conditions enable the occupants to get into the open air and away from smoke and flames.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition, that there shall be no openings to the rear exterior iron stairway other than the one exit from each floor to the balcony at floor level; and that an enclosed fireproof passageway shall be constructed on the 1st story level leading from the platform landing direct to the street; and that the occupancy shall be limited to the legal capacity of the interior stairway.

774-26-S.

PETITIONER—Samuel Rosenblum, for Eleven St. Clair Place Corp., owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—11-21 St. Clair place, and 608 West 130th street, Manhattan.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE RESOLUTION:

(774-26-S)

WHEREAS, Samuel Rosenblum, for Eleven St. Clair Place Corp., owner, filed, September 17, 1926, a petition for variation from the requirements of the labor law as cited in an order of the fire commissioner, affecting premises 11-21 St. Clair place and 608 West 130th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 30, 1926 (Order No. 213-LD), reads:

"1. Enclose the interior stairways at the east side of building (east wing) and at the northwest side of building (west wing) serving as required means of exit and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from cellar to three feet above the roof constructed as per Sec. 271 of the Labor Law and rule 1 of the Board of Standards and Appeals, adopted July 29, 1924.

"2. Provide an additional means of egress from 3rd and 4th stories at north side of 608 West 130th street as per Sec. 271 of the Labor Law."

and

WHEREAS, the building is non-fireproof, 3 stories and basement in height, 125 ft. by 199 ft. 10 in.; divided into five floor areas: 8,250, 1,100, 1,650, 1,200 and 9,000 sq. ft.; OCCUPIED for the manufacture of ink: basement, 36

# MINUTES

persons; 1st story, 43 persons; 2nd story, 68 persons; 3rd story, 13 persons; EQUIPPED with a sprinkler system and a fire alarm system; EXITS: one interior fireproof enclosed stairway at north, extending from cellar to roof; one interior wooden enclosed stairway at south, extending from cellar to roof; one wooden stairway at east enclosed by brick walls extending from 1st story to top story; one open wooden stairway at west extending from basement to top story; an exterior iron stairway at east extending from 1st story to roof; a fire escape at the south side of inner court extending from ground to roof, with EGRESS from the termination of fire escapes through driveway to West 130th street; ROOFS of adjoining buildings: 2 stories lower at east and west; and

WHEREAS, the petitioner contends that the area indicated on plans as No. 5 is constructed entirely fireproof; that the five floor areas are separated from each other by fireproof walls, with horizontal exits; that the two stairways affected by Item 1 of the order are accommodating stairways and should not be considered as exits; that the aggregate occupancy of all floor areas above the 2nd story does not exceed 15 persons; furthermore, that the occupancy is small and the exits are adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is denied as to Order No. 213-LD, Item 1, and granted as to Item 2, on condition that an iron balcony with 45-degree stairs shall be provided from the top story to the roof of building No. 4; and on condition that an open casement door shall be provided from the level of the third story, north section, to the roof of building No. 4, with egress therefrom through two horizontal exits to building No. 3.

Connell, Holland and Guilfoyle and

Chief Kenlon ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(105-26-S)

WHEREAS, Anthony P. Ollocca, for Gennaro Gragnano, owner, filed, February 4, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the board of health, affecting premises No. 433-437 Metropolitan avenue, Borough of Brooklyn; and

WHEREAS, the decision of the board of health, dated February 3, 1926, reads:

"At a meeting of the Board of Health of the Department of Health of The City of New York, held July 21st, 1925, your application for a permit for a sanitary certificate for a cellar bakery at 435 Metropolitan Avenue, in the Borough of Brooklyn, was denied."

and

WHEREAS, the building is non-fireproof, 3 stories and cellar in height, 20 ft. by 40 ft. in area; OCCUPIED: cellar, bakery; 1st story, store and one family; 2nd story, one family; 3rd story, one family; the height of the cellar bakery being 8 ft. 3 in.; the ceiling being 3½ in. above the curb level and the floor being 7 ft. 8 in. below the rear yard;

the means of ventilation being three windows, the front window being 1 ft. 8 in. by 3 ft. 5 in. in area, and the 2 rear windows being each 2 ft. 5½ in. by 2 ft. 8 in. in area; and

WHEREAS, the original petition was denied by the board on July 6, 1926; and

WHEREAS, the petitioner requests to have the case reopened for the purpose of submitting documentary evidence as to the continued use of the cellar as a bakery and the installation of the bake oven; the petitioner has filed Alt. Application No. 130-1920, approved March 13, 1920, by the tenement house commissioner, for the removal of bake oven at rear of cellar and installation of a new bake oven under the sidewalk at front of cellar; a street vault permit No. 1693, issued March 11, 1920, by the borough president; a plumbing permit under Application No. 2607-1920, approved March 23, 1920, by the superintendent of buildings; also permit No. 25276, issued March 20, 1920, by the superintendent of highways for the use of the sidewalk.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, as cited in the order of the health department, on condition that two double-hung windows at the rear of the bakery, to be not less than 2 ft. 6 in. by 4 ft. 6 in. shall be provided; and that a window shall be provided near the ceiling in the front of the cellar, not less than 1 ft. 8 in. by 3 ft. 5 in. and that a sliding sash panel shall be provided in the door at the front of the cellar bakery; and that all required permits shall be obtained within 60 days.

Deputy Chief Martin ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(1036-22-SA)

WHEREAS, the Maxon Furnace and Engineering Co., filed, August 10, 1922, a petition with the board of standards and appeals for approval of their device known as the Maxon Oil Burner; and

WHEREAS, a committee of the board inspected this device in operation at the Delavergne Machine Co., 138th street and East River, on October 6, 1922, and reported that the burner is especially designed and intended for industrial use and recommended against its approval for general fuel oil burning installations, which was the subject of the original petition; and

WHEREAS, this application was withdrawn October 17, 1922, and petitioner requested a reopening of the case and the approval of the burner for industrial use only.

Resolved, that the board of standards and appeals does hereby approve the Maxon Oil Burner for use and operation in industrial installations only, the installation equipment to be subject to the approval of the fire department in all instances, in accordance with the fuel oil rules of the board of standards and appeals.

Adjourned 4:45 p. m.

WILLIAM J. O'GORMAN, Secretary.

## \*CORRECTION.

The minutes of the meeting of the board of standards and appeals held Tuesday, October 26, 1926, as they appeared in Bulletin No. 44, Vol. XI, are hereby corrected to read as follows:

## THE RESOLUTION:

(508-26-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Ledom Realty Co., lessee, filed, June 3, 1926, a petition for a variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 68-72 Church street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 13, 1926 (No. 94156-LD), reads:

"1. Enclose the interior stairway at south side of building serving as a required means of exit and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the 1st story to and including the bulkhead on roof, constructed as per Section 271 of the Labor Law. \* \* \*";

and  
WHEREAS, the building is non-fireproof, 5 stories in height, 64 ft. 2 in. by 50 ft. 2 in. in area; OCCUPIED: 1st story, store; 2nd story, office, 30 persons; 3rd story, shipping room, 16 persons; 4th story, manufacture of insulators, 13 per-

\*Correction—Word "easterly" changed to "westerly" in line 43.

sons; 5th story, storage only; EQUIPPED with a fire alarm signal system; EXITS: an interior wooden stairway, extending from the 1st story to roof, enclosed partly in plastered partitions and partly in wooden partitions up to the 5th story, open at 5th story, with fireproof doors at 1st and 2nd stories and wooden doors at 3rd and 4th stories at openings; two fire escapes, (one on each street front of the building), having fireproof openings along the course thereof, extending from top story to the 2nd story and drop ladder to sidewalk; ROOFS of adjoining buildings: 7 ft. higher at south; 5 ft. 6 in. higher at west; and

WHEREAS, the petitioner claims that a similar order to enclose the interior stairs was issued by the State Labor Department in 1916; at that time the building was provided with only one standard fire escape; by agreement, the owner constructed another standard fire escape and the Labor Department dismissed the order; furthermore, the petitioner contends that the occupancy is small and the exits are adequate.

Resolved, that the board of standards and appeals does hereby make a variation in the requirements of the labor law, and that the petition be and it hereby is granted on condition that a standard labor law fire escape shall be provided at the extreme westerly end of the building on the Vesey street front, and that a standard labor law fire escape shall be constructed and maintained approximately in the center of the building on the Church street front; and only so long as conditions as to use and occupancy remain substantially unchanged.

## FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 13A, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

## \*CORRECTION.

The minutes of the meeting of the board of standards and appeals held Tuesday afternoon, November 16, 1926, as they appeared in Bulletin No. 47, Vol. XI, are hereby corrected to read as follows:

THE RESOLUTION:

(750-26-S)

WHEREAS, Samuel Rosenblum, for Samuel Osfer, lessee, filed, September 10, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 172 Sands street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated February 26, 1926 (Order No. 91706-LD), reads:

"1. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. SEE NOTE.

"Among the defects noted are the following:

"Not screened to a height of 4' 6".

"No stairway from top balcony to roof.

"2. Remove the sub-standard fire escape on the front of building or reconstruct same as per Sec. 274 of the Labor Law and Rule 3 of the Board of Standards and Appeals adopted May 9, 1924. Among the defects noted are the following:

"Windows on course not fireproof, self-closing.

"3. Enclose the interior stairway at the west side of building serving as a required means of exit, and the landings, platforms, and passageways connecting therewith on all sides with partitions of fire-resisting material extending continuously from the cellar to 3 feet above the roof, constructed as per Section 271 of the Labor Law or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law."

and

WHEREAS, the building is non-fireproof, 6 stories in height, 19 ft. by 95 ft. in area; OCCUPIED by one tenant as a

candy factory: 1st story, 4 persons; 2nd story, 5 persons; 3rd story, 3 persons; 4th story, 5 persons, 5th story, 5 persons; 6th story, 7 persons; EXITS: an interior wooden stairway, extending from the roof to the open loft on the 1st story; enclosed in fire-retarding partitions (excepting lath and plaster partitions on the 1st story, and accommodation opening on the 3rd story protected by a wooden door and, also, wire glass panels 28 in. by 54 in. in area, in the stair enclosure) with fireproof doors at openings; a sub-standard fire escape on the front of the building, having unprotected openings along the course thereof, extending from the top story to the 2nd story balcony, with drop ladder to street; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the top story to an open court leading to street; ROOFS of adjoining buildings: to west, 3 stories lower; to east, 2 stories lower; and

WHEREAS, petitioner proposes to fire retard the stair enclosure at the 1st story and to provide a fireproof door at the accommodation opening in the stair enclosure on the 3rd story and requests the acceptance of the wire glass panels, and, also, the acceptance of the present termination of the stairway in view of the narrow width of the building; and as to the fire escapes, requests their acceptance as there is no safe egress from the roof, and that the occupancy of the building is small.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted as to Item 1, only so far as it affects the stairway from the top story balcony of fire escape to the roof, on condition that a gooseneck ladder shall be provided from the top story balcony to the roof and that the fire escape shall comply with the requirements of the labor law in all other respects; and granted as to Item 2, only so far as it affects the fireproofing of the windows, on condition that the fire escape shall comply with the requirements of the labor law in all other respects; and granted as to Item 3, only so far as the egress from the termination in the first story is affected, on condition that a horizontal exit shall be provided at the termination of the stairs in the stairway enclosure on the ground floor level to the adjoining premises to the west, which is under the same operation and control, and that egress from the said premises to the street shall be maintained free and unobstructed, and that the stair enclosure shall comply with the requirements of the labor law in all other respects.

# RULES

## FIRE RETARDING RULES

Adopted by the Board of Standards and Appeals August 30, 1917; Amended November 1, 1917, and Feb. 3, 1922.

**Rule 1. Fire Retarding Materials for Garages, Motor Vehicle Repair Shops and Oil Selling Stations.** In garages, motor vehicle repair shops and oil selling stations any material or form of construction shall be deemed fire-retarding within the meaning of §73, subdivision 3, of the building code, that resists the action of flame and heat when subjected to a continuous fire for one hour at an average temperature of seventeen hundred (1700) degrees Fahrenheit without the passage of flame, and with a maximum temperature rise to four hundred (400) degrees Fahrenheit on the side away from the fire. The point at which the temperature of transmitted heat is measured shall be protected from external air and weather conditions.

When the test specimen is in the form of partition construction, the area under test shall be not less than one hundred (100) square feet and least dimension shall be not less than nine (9) feet. When in the form of floor construction, the area under test shall be not less than two hundred (200) square feet and the least dimension shall be not less than fourteen (14) feet.

During the fire, the floor construction shall support the live load for which it is designed, and after the fire shall safely sustain twice the designed live load with a maximum deflection of not more than one two-hundredth (1/200) part of the span.

**Rule 2. Wood Joisted Floor Construction.** Wood joisted floor construction shall be accepted as fire-retarding construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations when the beams are protected on the upper and under sides with the fire-retarding materials specified in rules for floor and ceiling coverings.

**Rule 3. Floor Covering.** Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the upper sides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) Seven-eighths ( $\frac{7}{8}$ ) inch wood underflooring protected with a membrane of two-ply waterproofing covered with not less than two and one-half ( $2\frac{1}{2}$ ) inches of 1:2½:5 concrete or better, reinforced with not less than one-fourth ( $\frac{1}{4}$ ) of one (1) per cent of steel mesh.

(b) Two and one-half ( $2\frac{1}{2}$ ) inches of 1:2:4 concrete applied directly to the top of the joists, with or without temporary support, reinforced with not less than one-fourth of one per cent steel rods, mesh or steel lath, and having the tops of the joists coated with approved waterproof paint or protected by tar paper on the top and on the sides for a distance of three inches from the top. (Amendment, Nov. 1, 1917.)

**Rule 4. Ceiling Covering.** Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the undersides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) One-half ( $\frac{1}{2}$ ) inch plaster boards, or three-eighths ( $\frac{3}{8}$ ) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers;

(b) Two thicknesses of one-quarter ( $\frac{1}{4}$ ) inch asbestos board laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring

strips when the floor beams are more than sixteen (16) inches on centers.

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $\frac{3}{4}$ ) inch thick.

**Rule 5. Attachment to Ceiling.** Fire-retarding ceilings in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations shall be attached to wood floor beams and girders in such manner as to maintain an air space between the wood beams, and all wood beams shall be seasoned before applying the protective coat.

**Rule 6. Openings in Fire-Retarding Floors.** Pipes or conduits which pass through floors shall be fitted with metal thimbles and made watertight for a height of three (3) inches above the floor.

**Rule 7. Columns.** All structural posts and columns in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials accepted in fireproof construction; except that an air space shall not be required around steel or cast iron columns.

Where necessary for protection against mechanical injury, the fire-retarding protection on columns shall be jacketed to a height of five (5) feet from the ground with No. 4 U. S. gauge metal.

**Rule 8. Girders.** All girders in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials acceptable in fireproof construction; except that an air space need not be provided around steel girders.

**Rule 9. Shaft Enclosures.** Existing stairways and vertical shafts in non-fireproof business buildings hereafter converted to be used as garages, motor vehicle repair shops or oil selling stations shall be enclosed in fire-retarding partitions continued through the non-fireproof floor construction, and when unfilled wood stud partitions are used, the space between the floor beams shall be fire-stopped with incombustible materials. All openings in such partitions shall be protected with accepted metal-covered fire doors or windows. Wherever necessary for protection against mechanical injury, the partition shall be jacketed to a height of five (5) feet on the garage side with No. 4 U. S. gauge metal. Any one of the following forms of partitions shall be accepted for the enclosure:

(a) Two by four inch wood studs, spaced not more than sixteen (16) inches on centers, covered both sides with metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $\frac{3}{4}$ ) of an inch thick;

(b) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $\frac{7}{8}$ ) inch wood sheathing, one-half ( $\frac{1}{2}$ ) inch plaster boards with pointed joints and No. 26 U. S. gauge sheet metal with one-inch lapped seams;

(c) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $\frac{7}{8}$ ) inch wood sheathing, two thicknesses of one-quarter ( $\frac{1}{4}$ ) inch asbestos boards laid with tight staggered joints and jacketed with No. 16 U. S. gauge metal on the garage side to a height of five (5) feet.

(d) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, filled in solidly between the studs with four inches of approved fireproof materials and covered on both sides with No. 26 U. S. gauge metal;

(e) Existing wood stud, lath and plaster partitions covered on the garage side with No. 26 U. S. gauge sheet metal with one-inch lapped seams.

## BOARD OF STANDARDS AND APPEALS.

### *Appliances Submitted for Approval.*

- 53-21-SA—Angle Hose Valve, approval of.  
 1372-21-SA—Ford Fire Line Reducing Valve, approval of.  
 357-22-SA—Quinn Acme Crude Oil Burner, approval of.  
 392-22-SA—The Surface-Combustion Company Low Pressure Gas and Oil Burner, approval of.  
 447-22-SA—Howard Water Pressure Reducing Devices, approval of.  
 610-22-SA—Crocker Gas Valve, approval of.  
 799-22-SA—Kennell Gas Cut-Off Valve, approval of.  
 1104-22-SA—Dean Fuel Oil Pump, approval of.  
 1173-22-SA—Anti-Syphon Valve, approval of.  
 1230-22-SA—Thermostats for Automatic Fire Alarm Systems, approval of.  
 1249-22-SA—Coen Oil Burner, approval of.  
 1274-22-SA—Rodriguez Oil Burner, approval of.  
 1391-22-SA—Dempsey High & Low Pressure Fuel Oil Burner, approval of.  
 1526-22-SA—Delaney Fuel Oil Burner, approval of.  
 57-23-SA—Collin Patent Automatic Gas Cut-Off Valve, approval of.  
 124-23-SA—Master Gas Shut-Off Valve, approval of.  
 125-23-SA—Packless Gas Shut-Off Valve, approval of.  
 127-23-SA—S. & K. Gas Shut-Off Valve, approval of.  
 232-23-SA—Manual and Thermal Gas Cut-Off Valve, approval of.  
 275-23-SA—Wm. E. Toelle Manual & Automatic Gas Shut-Off Valve, approval of.  
 279-23-SA—Heil Standard 200 Gal. Truck Tank, approval of.  
 297-23-SA—"Automatic" Deluge Valve, approval of.  
 345-23-SA—Cornell Falat Oil Burner, approval of.  
 392-23-SA—"Billow" Class G. R. Oil Burner, approval of.  
 393-23-SA—"Billow" Class C. R. F. Oil Burner, approval of.  
 397-23-SA—Cornell No. 1 Type "A" Oil Burner, approval of.  
 443-23-SA—Automatic Gas Shut-Off, approval of.  
 525-23-SA—Tilman-White Gas Cut-Off Valve, approval of.  
 888-23-SA—Lewis Oil Burner, approval of.  
 898-23-SA—Enco Type 700 Steam Atomizing Burner, approval of.  
 952-23-SA—Automatic Gas Cut-Off, approval of (Brooklyn Co.).  
 959-23-SA—Hydro Carbon Oil Burner, approval of.  
 960-23-SA—Crescent Combustion Fuel Oil Burner, approval of.  
 1046-23-SA—Frankfort Type "P" Low Pressure Oil Burner, approval of.  
 1050-23-SA—Marsh Fuel Oil Burner and Pump, approval of.  
 1146-23-SA—Pennsylvania Globe Rotary Oil Burner, approval of.  
 1178-23-SA—Ziegler Oil Burner, approval of.  
 1246-23-SA—Ludlow Gas Cut-Off Valve, approval of.  
 1339-23-SA—National Light Service Oil Pump, approval of.  
 1346-23-SA—Heatiator Oil Burner, approval of.  
 1358-23-SA—Worthington Oil Burner, approval of.  
 1364-23-SA—Staples & Pfeiffer Oil Burner, approval of.  
 1415-23-SA—Enco Mechanical Atomizing Fuel Oil Burner, approval of.  
 1429-23-SA—Kerrihard Oil Burner, approval of.  
 1493-23-SA—Newport Rotary Oil Burner, approval of.  
 1538-23-SA—Lillibridge Oil Vapor Burner, approval of.  
 1550-23-SA—Apex Gas Cut-Off Valve, approval of.  
 254-24-SA—Sherman Oil Burner, approval of.  
 269-24-SA—Universe Oil Burner, approval of.  
 365-24-SA—Koaless Oil Burner, approval of.  
 379-24-SA—Sure Heat Automatic Oil Burner, approval of.  
 492-24-SA—Holtzer-Cabot Type "C" Fire Alarm Box, approval of.  
 501-24-SA—Hagan Swivel Type Burner for Fuel Oil, approval of.  
 536-24-SA—Climax Oil Burner, approval of.  
 634-24-SA—Marvel Oil Burner, approval of.  
 702-24-SA—Simplex Mechanical Oil Burner, approval of.  
 755-24-SA—Wills Automatic Gas Shut-Off Valve, approval of.  
 803-24-SA—Holmes-Williams Domestic Oil Burner, approval of.  
 826-24-SA—Heymsfield Low Pressure Burner, approval of.  
 907-24-SA—Dempsey Domestic Burner and Fuel Oil Pump, approval of.  
 1016-24-SA—Milnes Oil Burner, approval of.  
 1108-24-SA—Simplicity Fuel Oil Burner, approval of.  
 1134-24-SA—Peerless Automatic Oil Burner, approval of.  
 1142-24-SA—Decker Oxohydrogen Oil Burner, approval of.  
 1146-24-SA—Salvo Fire Extinguisher, approval of.  
 1192-24-SA—Kemp Oil Burner, approval of.  
 1197-24-SA—Yankee Oil Burner, approval of.  
 1337-24-SA—Sure Heat Gravity Oil Burner, approval of.  
 1359-24-SA—Oliver Oil Gas Burner No. 30-A, approval of.  
 1372-24-SA—Adga High Pressure Burner, approval of.  
 1395-24-SA—Deming Power Rotary Force Pump, approval of.  
 1500-24-SA—Smolensky Check Valve, approval of.  
 26-25-SA—Keenan Brilliant Burner, approval of.  
 228-25-SA—Silent Glow Oil Burner, approval of.  
 340-25-SA—McCann-Harrison Low Pressure Oil Burner, approval of.  
 535-25-SA—Universe Automatic Oil Burner, approval of.  
 558-25-SA—Globe Dry Pipe Valve Accelerator, approval of.  
 683-25-SA—Billow Fuel Oil Burner, approval of.  
 729-25-SA—The Hauck Venturi Low Pressure Oil Burner, approval of.  
 814-25-SA—Aetna Automatic Siphon Breaker, approval of.  
 836-25-SA—National Rotary Oil Burner, approval of.  
 865-25-SA—Kennan High Pressure Brilliant Gas Oil Burner, approval of.  
 938-25-SA—Morse Conical Type Steam Atomizing Burner, approval of.  
 939-25-SA—Morse Fan Tail Type Steam Atomizing Burner, approval of.  
 951-25-SA—Sword Automatic Oil Burner, approval of.  
 985-25-SA—Amdyco Foam Fire Extinguisher, approval of.  
 1106-25-SA—Modern Oil Burner, approval of.  
 1151-25-SA—Florence Garage Heater, approval of.  
 1211-25-SA—Homer Domestic Fuel Oil Burner, approval of.

*Cases listed in the Reserve Calendar are cases upon which action by the board has been deferred pending committee reports, of this board, court or department actions, and will remain thereon until the aforesaid reports, court or departmental actions are consummated. Whereupon the case or cases will be restored to the regular calendar and due notice of the date set for hearing will be mailed to the appellant, applicant or petitioner of record.*

## RULES

### COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS.

*Amended Resolution Adopted by the Board of Appeals, March 16, 1920, Under Cal. No. 549-17-BZ.*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed

under the building zone resolution in the absence of any definition therein to the contrary.

*Resolved*, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

## CONCRETE RULES

### USE OF HYDRATED LIME IN CONCRETE.

Adopted by the Board of Standards and Appeals, April 19, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated for each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the

hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth*, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—WORTH 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays, 9 a. m. to 12 noon.

All communications should be addressed to the chairman of the board.

### CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, November 30, 1926, at 10 a. m.

Minutes of Regular Meeting, November 30, 1926, at 2 p. m.

Correction.

Smoking in Factory Rules.

Reserve Calendar.

Progress Report.

### PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, December 7, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, December 14, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman

## CALL OF CLERK'S CALENDAR

**TUESDAY, DECEMBER 7, 1926, AT 2 P. M.**

*Building Zone Cases.*

662-26-BZ.	APPLICANT—Israel Richel, owner. PREMISES—Southeast corner of Boston road and Eastchester road, The Bronx. APPLICATION, under section 21 of the building zone resolution, TO PERMIT in a business district the erection and maintenance of a gasoline selling station.
811-26-BZ.	APPLICANT—George S. A. McNeil, for Ben Fooshkill, owner. PREMISES—9100 Atlantic avenue, Woodhaven, Borough of Queens. APPLICATION, under section 21 of the building zone resolution, TO PERMIT in a business district the erection and maintenance of a gasoline selling station.
819-26-BZ.	APPLICANT—Thomas W. Lamb, for Park Slope Amuse Corp., owner. PREMISES—314-332 8th street and 345a-349 9th street, Brooklyn. APPLICATION, under sections 7c and 21 of the building zone resolution, TO PERMIT the extension from a business district into a residence district of a proposed theatre.
841-26-BZ.	APPLICANT—Frederick J. Flynn, for Prospect Hill Apartments, Inc., owner. PREMISES—45-67 Prospect place, Manhattan. APPLICATION, under section 21 of the building zone resolution, TO PERMIT in a 1½ times height district the erection and maintenance of the street wall in excess of the height permitted by the zone resolution.
861-26-BZ.	APPLICANT—William F. Doyle, for A. E. Norton, Inc., owner. PREMISES—685 Fifth avenue, Manhattan. APPLICATION, under section 21 of the building zone resolution, TO PERMIT in a 1½ times height district the erection and maintenance of the street wall in excess of the height permitted by the zone resolution.
862-26-BZ.	APPLICANT—William F. Doyle, for Roseberg Holding Co., Inc., owner. PREMISES—Northwest corner of Bay Parkway and 59th street, Brooklyn. APPLICATION, under section 21 of the building zone resolution, TO PERMIT in a residence district the erection and maintenance of a gasoline service station.
412-25-BZ.	APPLICANT—William F. Doyle, for Rosie Kellner, owner. PREMISES—840 Washington avenue, Brooklyn. APPLICATION, under section 21 of the building zone resolution, TO PERMIT in a residence district the erection and maintenance of an apartment house, the first story to be used for store purposes (previously denied).

# CALENDAR

490-26-BZ.

APPLICANT—Ferdinand Savignano, for August Kuhne, owner.

PREMISES—8124-8202 18th avenue, Brooklyn.

APPLICATION, under sections 7e and 21 of the building zone resolution,

TO PERMIT on a plot, the layout of which on the ground differs from that shown on the use district map, located partly in a residence district and partly in a business district, the erection and maintenance of a garage for the storage of more than five (5) motor vehicles, and the omission of the required rear yard or equivalent.

## DECEMBER 7, 1926, 10 A. M.

### *Appeals from Administrative Orders.*

APPELLANT—Bernard Herzbrum, for Starnic Realty Corporation, owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—229-239 Knickerbocker avenue, Brooklyn.

APPEARANCES—

For Appellant: James Matthews.

For Administration: Inspector Carroll of fire department.

# MINUTES

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and  
Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(373-26-A)

WHEREAS, Bernard Herzbrum, for Starnic Realty Corp., owner, filed, April 28, 1926, an appeal from a decision of the fire commissioner, affecting premises Nos. 229-239 Knickerbocker avenue, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, dated February 27, 1926 (N. B. 218-A-26), reads:

"1. Provide a 250 gallon per minute fire pump with 25 horse power electric motor, etc., suctioning from a 5,000 gallon tank, all according to Rule No. 38, Board of Standards and Appeals rules.

"2. Provide a gravity tank of at least 3,500 gallon fire reserve, bottom tank to be 20 feet above the roof.";  
and

WHEREAS, the building, facing on two street fronts, is fireproof, one story (29 ft.) in height, 100 ft. by 100 ft. in area; OCCUPIED as a motion picture theatre: the auditorium seating 1,013 persons, and the roof garden, 902 persons; there being, also, 5 stores on the Knickerbocker avenue front of the premises; and

WHEREAS, appellant contends that the building faces on two streets; that the existing standpipe system (the highest outlet being 34 ft. above grade), is supplied by a direct 4-in. connection to the 20-in. city main in Knickerbocker avenue; that the main is fed two ways and has a hydrostatic pressure of 45 pounds and contends that a hydrostatic pressure test was made on the highest outlet at the westerly wall, said test showing, thereat, a constant pressure of 41 pounds on the gauge; and

WHEREAS, the original appeal was denied by the board on July 6, 1926, reopened on July 27, 1926, and set for a rehearing September 21, 1926; and

WHEREAS, the existing standpipe equipment is supplied direct from the city main, fed two ways, and the use and occupancy of the building shall be restricted to the display of motion pictures only, and the board deemed that the gravity and suction tanks could be omitted.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* as to Item 2 (requiring the installation of gravity tank), *on condition* that Item 1, as to pump installation shall be complied with, by installing a 25-H.P. pump with not less than 4-in. intake pipes, fed from both mains; and that the building shall be not increased in height or area; and *granted* only so long as the use and occupancy are limited to the conduct of a motion picture theatre, and no dressing rooms, stage or scenery incorporated therein.

462-26-A.

APPELLANT—James Matthews, for Valentine Theatre Corporation, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—237 East Fordham road, The Bronx.

## APPEARANCES—

For Appellant: James Matthews.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal denied.

## THE VOTE TO GRANT—

Affirmative ..... 0  
Negative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and  
Chief Kenlon ..... 5  
Absent ..... 0

## THE RESOLUTION:

(462-26-A)

WHEREAS, James Matthews, for Valentine Theatre Corp., owner, filed, May 22, 1926, an appeal from an order of the fire commissioner, affecting premises 237 East Fordham road, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated May 11, 1926 (N. B. Applic. No. 282-1926), reads:

"2. Provide a gravity tank with all appurtenances of at least 3,500 gallon fire reserve, bottom to be 20' above the roof.

"3. Provide an electric fire pump of 250 gallons per minute capacity with a 25 horse power motor, suctioning from a 5,000 gallon tank, etc., all according to the Rule No. 38.";

and

WHEREAS, the building is fireproof, having a frontage of 129 ft. 10 in. on Fordham road and 106 ft. 10 in. on Valentine avenue (a total area of approximately 11,500 sq. ft.), with an orchestra, balcony and roof garden; OCCUPIED as stores and offices on the easterly Fordham road front and the remainder of the premises as a motion picture theatre: orchestra, 850 seats; balcony, 400 seats; roof garden, 500 seats; and

WHEREAS, appellant contends that to provide the roof tank would require a substantial reinforcement of the building and as to installing the suction tank, contends that it is not practicable to excavate further under the structure because of the rock formation under the building and proposes to provide siamese connections, with a standpipe system (with outlets on each floor) having a direct connection to the city main in Fordham road; and further contends that the street main in Fordham road is fed two ways and that the pressure is in excess of 50 pounds per square inch.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

628-26-A.

APPELLANT—Elco Shoe Mfrs., Inc., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—73-81 Stone avenue, Brooklyn.

## APPEARANCES—

For Appellant: J. P. Leary and William Goldback.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and  
Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(628-26-A)

WHEREAS, Elco Shoe Manufacturers, Inc., owner, filed, July 19, 1926, an appeal from an order of the fire commissioner, affecting premises 73-81 Stone avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated June 26, 1926 (Order No. 4441-LC), reads:

"1. Reduce the quantity of volatile inflammable mixture (rubber cement) stored, handled or used above the 1st story to 5 gallons. Sec. 112-E. Ch. 10. C. of O.";

and

WHEREAS, the building is non-fireproof, 4 stories and basement in height, 125 ft. by 95 ft. in area; OCCUPIED for the manufacture of shoes: basement, 5 persons; 1st story, 40 persons; 2nd story, 35 persons; 3rd story, 50 persons; 4th story, 75 persons; and

# MINUTES

WHEREAS, the appellant proposes to store 20 gallons of rubber cement at night in a metal cabinet on the roof, and during working hours the rubber cement is to be kept in safety pots on the 4th story for use.

*Resolved*, that the order of the fire commissioner be and hereby is *modified*, and the appeal be and it hereby is *granted on condition* that not more than twenty (20) gallons of this material shall be stored and maintained on premises any one time, confined in an approved metal cabinet, located on the roof of main building; and that the material work shall be maintained in metal safety pots, not exceeding one quart capacity each.

10-26-A.

APPELLANT—Sigmund Schuler, for Elsinore Perfume Co., lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—25 Bergen street, Borough of Brooklyn.

APPEARANCES—

For Appellant: Sigmund Schuler.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(650-26-A)

WHEREAS, Sigmund Schuler, for Elsinore Perfume Co., see, filed, July 27, 1926, an appeal from an order of the fire commissioner, affecting premises 25 Bergen street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated July 1926 (Order No. 4599-LC), reads:

"1. Provide a fireproof room or vault with a self-closing, fireproof door for the storage of alcohol, said enclosure to be well ventilated to the outer air."

WHEREAS, the building is non-fireproof, 3 stories in height, 40 ft. by 89 ft. in area; OCCUPIED: 1st story, wood storage, 3 persons; 2nd story, manufacture of perfume and the storage of 200 gallons of alcohol, 5 persons; 3rd story, manufacture of extracts, 3 persons; and

WHEREAS, the appellant contends that the alcohol is stored in a vault at the centre of 2nd story, constructed of wood, fire-retarded with a fireproof, self-closing door to same; and

WHEREAS, the board deemed that the floor was sufficiently strong to support an enclosure of fireproof material.

*Resolved*, that the order of the fire commissioner be and hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the alcohol stored on the premises shall not exceed 200 gallons at any one time maintained in metal drums stored in an enclosure, located at the rear of building (northwesterly corner), constructed of four-inch gypsum partitions or other fireproof material, with double-hung window, opening to the outer air; the door opening to be equipped with a self-closing, tin-clad door.

1-26-A.

APPELLANT—Frederick L. Green, for The Fraser Tablet Company, E. R. Ewart, president, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—443-455 Nineteenth street, Brooklyn.

APPEARANCES—

For Appellant: Frederick L. Green.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(710-26-A)

WHEREAS, Frederick L. Green, for the Fraser Tablet Company, owner, filed August 17, 1926, an appeal from the order of the fire commissioner, affecting premises 443-455 Nineteenth street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated December 16, 1925, reads:

No. 99864-LC

"You are hereby notified that an inspection of the above premises, used for the storage of sulphur, acid, etc., shows that the following must be done before the permit requested by you can be issued:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch extending from cellar to roof, etc., Sec. 581, Chap. 5, Code of Ordinances."

and

WHEREAS, the main building is non-fireproof, two stories (32 feet) in height, having a frontage of 137 feet on 19th street, 49 feet on 18th street and a depth of 197 feet (13,500 sq. ft. approximately) in area; there is also a one-story metal building 18 feet 6 inches by 56 feet in area and a one-story non-fireproof building 39 feet by 102 feet in area; the total area of all the buildings being approximately 17,000 square feet; OCCUPIED for the manufacture of drug preparations, pills, etc.; and

WHEREAS, appellant contends that the premises face on two street fronts; that ample exits are provided; that the buildings are divided into subareas by fireproof walls with fireproof doors at openings therein; and that very little inflammable material is stored on the premises.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building be not increased in height or area; and that the floor areas as now sub-divided shall be not increased, changed or altered; and that the premises shall be equipped throughout with an approved sprinkler system.

728-26-A.

APPELLANT—Edward P. Doyle, for H. S. Karp, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—27 Wilbur avenue, Long Island City, Borough of Queens.

APPEARANCES—

For Appellant: Edward P. Doyle.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(728-26-A)

WHEREAS, Edward P. Doyle, for Grubman Engineering Company, Inc., lessee, filed August 26, 1926, an appeal with the board of standards and appeals, from an order of the fire commissioner, affecting premises 27 Wilbur ave., Long Island City, Borough of Queens; and

# MINUTES

WHEREAS, the order of the fire commissioner, dated August 23, 1926, reads:

Order No. 4910-LC:

"You are hereby notified that an inspection of the above premises used for the storage of nitro cellulose products shows that the following must be done before the permit requested by you can be issued:

"2. Provide jets of water where saws or cutting tools are used on 3rd story, which are likely to heat the nitro-cellulose product to the firing point of friction or otherwise, so that same shall continuously play upon the point of contact.

"3. Discontinue the use of flame or fire in room or compartment where nitro-cellulose are stored or used for the manufacture of articles therefrom.

"5. Discontinue use of portable lights on extension cords in any room in which nitro-cellulose products are handled or stored.

"7. Protect all steam pipes or risers that are within 6 ft. 0 in. of floor with wire guards or non-combustible pipe covering.

"8. Provide suitable guards around radiator (steam-pipes) to prevent combustible material from coming in contact therewith."

and

WHEREAS, the building is fireproof, 5 stories in height, 70 feet by 185 feet in area; OCCUPIED: Cellar, manufacture of metal boxes, 70 persons; 1st story, manufacture of gas heaters, 70 persons; 3rd story, occupied by appellant for the manufacture of dolls' eyes (celluloid on buckram) and mechanism for dolls' voices, 75 persons; 4th story, manufacture of hair waving machines, 40 persons; and

WHEREAS, appellant contends that the building is protected with a sprinkler system; that all celluloid not in work is stored in a fireproof vault and that under Cal. No. 1270-25-A permission was granted to use 25 pounds of celluloid, and contends that the small amount of celluloid used would make a compliance with the orders a great hardship.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* as to Item 1 *on condition* that the requirements as stipulated under resolution of this board Cal. No. 1270-25-A, affecting these premises, shall be complied with; as to Item 2 of this order *on condition* that a water bucket shall be provided and maintained at each end and center of table when work on this material is done and that not more than one cutting machine shall be operated for this use in the premises; the appeal as to Item 3 be and it hereby is *denied*; Item 5 *granted on condition* that the flexible cord drop lights shall be hung from the fixed ceiling socket; as to Items 7 and 8, *granted on condition* that the steam coils and radiators, within five feet in any direction of the work bench, shall be covered with  $\frac{1}{4}$  inch wire mesh guard; and that not more than 25 pounds of celluloid shall be used, stored or maintained on the premises at any one time.

## THE RESOLUTION:

(736-26-A)

WHEREAS, Eidlitz & Hulse, for Thompson-Starrett Company, owners, filed, August 27, 1926, an appeal from an order of the fire commissioner, affecting premises 245 Hunterspoint avenue, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated July 12, 1926, reads:

Order No. 98549-F:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof in Building A, with necessary check valves and  $2\frac{1}{2}$ -inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure."

and

WHEREAS, the building is a steel frame structure, covered on the exterior with corrugated iron, the inside from base line to eaves being lined with beaver board; the roof being metal; one clerestory (40 feet to peak of roof) in height, 81 ft.  $3\frac{1}{2}$ -in. by 145 ft. 7 in. (approximately 11,700 sq. ft.) in area; OCCUPIED as a sheet metal shop, 30 persons; and

WHEREAS, appellant contends that there is a city fire hydrant in the immediate vicinity of the building; and that there are many windows and doorways affording ready access to the interior of the building.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building be not increased in height or area; that the use and occupancy shall be restricted to the operation of sheet metal work; and that the premises shall be equipped with not less than five (5) 40-gallon water casks, acceptable to the fire department, same to be distributed throughout the building.

THE RESOLUTION:

(903-26-A)

WHEREAS, David E. Kennedy, Inc., for C. S. & K. Construction Co., owner, filed, November 5, 1926, an appeal from a decision of the superintendent of buildings, affect-

ing premises 331-341 West 86th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated June 15, 1926 (re N. B. App. 552-1925), reads:

"Replying to your letters of June 15th, 1926, requesting approval for the use of cork tile flooring at above premises, you are advised that inasmuch as this building is more than 150 ft. high, the use of combustible material for flooring is not permissible.";

and

WHEREAS, the building is fireproof, 20 stories, 230 ft. in height, 118 ft. by 90 ft. 1 in. in area; OCCUPIED as a hotel; and

WHEREAS, the appellant proposes to cover the floors of rooms and corridors with  $\frac{1}{4}$  in. cork tile flooring made by the single slab method of manufacture; and

WHEREAS, the appellant contends that the cork tile flooring will be placed only in fireproof rooms and corridors; that the conditions of the building and material are similar to those granted by the board under Cal. No. 576-26-A; and

WHEREAS, it is not proposed to use or install this material in substitution for any floor construction, required by the building code.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the material installed as floor cover furnishing shall be in addition to any and all structural requirement, finish and surfacing required by the building code.

THE RESOLUTION:

(528-26-BZ)

WHEREAS, David L. Malbin, for Oscar E. Hayman, owner, filed, June 8, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 2150-2176 Gravesend avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 30, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Gravesend avenue is in both a business and unrestricted district; that Avenue T is in a business district, and that Lake street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 15, 1926, reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 4, 2, 15.

"The erection of a public garage for more than five motor vehicles in a business district."

and

WHEREAS, the proposed building is to be of non-fire-proof construction, one story in height, with a frontage of 225 ft. 2 in. and a depth of 75 ft. and 76 ft. 7¾ in., irregular; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

THE RESOLUTION:

(703-26-BZ)

WHEREAS, Hannah E. Plant and George Robinson, owners, filed, August 13, 1926, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a building with stores on the first story; premises 430-436 East 21st street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 30, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Cortelyou road, east of East 21st street, is in a business district; that Cortelyou road, west of East 21st street, is in a residence district, and that East 21st street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 16, 1926, reads:

"1. Stores in residential district—contrary to Zone Resolution—Art. 11, S. 3.";

and

WHEREAS, the proposed building is of non-fireproof construction, 1 and 2 stories in height, with a frontage of 113 ft. 6¼ in. on Cortelyou road and 59 ft. on East 21st street; to be occupied as stores and dwelling; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and that the application be and it hereby is denied.

726-26-BZ.

APPLICANT—John J. Mackey, for Hyman Grobelsky & Harry Slater, owners.

SUBJECT—Application (re decision of superintendent of buildings) under section 7b of the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of an extension used for business purposes.

PREMISES AFFECTED—4806-4810 New Utrecht avenue, Borough of Brooklyn.

APPEARANCES—

For Applicant: John J. Mackey.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Connell, Holland and Guilfoyle and  
Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

THE RESOLUTION:

(726-26-BZ)

WHEREAS, John J. Mackey, for Hyman Grobelsky and Harry Slater, owners, filed, August 24, 1926, an application, under the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of an extension used for business purposes; premises 4806-4810 New Utrecht avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 30, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that New Utrecht avenue is business and 48th street and 49th street are residence; and

WHEREAS, the order of the superintendent of buildings, rendered June 9, 1926 (re Viol. No. 35470-1926), reads:

"You will please take notice that there exists a violation of the Building Code at the premises herein-after described, in that,

"Rear corner of proposed extension extends into a residential zone. In violation of Building Zone Resolution.

"You are hereby required to remove said violation forthwith, or legal proceedings will be commenced against you.";

and

WHEREAS, the existing building is of non-fireproof construction, 3 stories in height, with a frontage of 40 ft. and a depth of 83 ft. 9½ in. to 116 ft. 8 in., irregular; to be occupied for business uses; a new one story extension has been erected at rear, the extreme westerly end extending 16 ft. 8 in. into the residence district; and

WHEREAS, the board deemed that applicant was entitled to relief under section 7b of the building zone resolution and that to deprive him of the proposed use would entail practical difficulty and unnecessary hardship.

Resolved, that the board of standards and appeals does hereby make a variation of the application of the use district regulations of the building zone resolution and that the application be and it hereby is granted, only so far as it affects a small, irregular, triangular gore at the rear of this plot for business use, on condition that any structure erected in the residence use district area of these premises shall not exceed in height one story above curb; that the walls wholly within the residence district shall be unpierced throughout their entire height and length; that the requirements of the building zone resolution shall be complied with in all other respects and that all permits required for the prosecution of the work shall be obtained within six months and the building completed within one year from the date of this action.

762-26-BZ.

APPLICANT—John DeHart, for Ernest J. Coates, owner.

SUBJECT—Application (re order of fire commissioner) under sections 7b and 21 of the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a business building.

PREMISES AFFECTED—140 Remson street, Brooklyn.

APPEARANCES—

For Applicant: John DeHart, Dr. Ernest J. Coates, Charles F. Kingsley.

For Opposition: Albert Conway, Edward G. O'Neill, Oscar W. Swift.

ACTION OF BOARD—Application denied.

Absent ..... 0

THE RESOLUTION:

(762-26-BZ)

WHEREAS, John DeHart, for Ernest J. Coates, owner, filed, September 15, 1926, an application, under the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a business building; premises 140 Remsen street, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 30, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the build-

# MINUTES

ing zone resolution show that Clinton street is business, and Kemsens street and Hunt alley are residence; and

WHEREAS, the decision of the superintendent of buildings, rendered August 19, 1926 (re App. 14977-1926), reads:

"Proposition contrary to the Zone Resolution, Art. 2, Sec. 3, the erection of an office building partly in a residential district.";

and

WHEREAS, the proposed building is to be of fireproof construction, 10 stories in height, with a frontage of 22 ft. and a depth of 109 ft.; to be occupied as business; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 7b of the building zone resolution and that under existing conditions on this street front the existing building within the business area influence of Clinton street abutting this property is occupied by conforming residence district occupancy; denial of application would not involve practical difficulty or unnecessary hardship.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and that the application be and it hereby is denied.

853-26-BZ.

APPLICANT—Hugo E. Magnuson, for William Peat, owner.

SUBJECT—Application (re decision of superintendent of buildings) under section 21 of the building zone resolution, to permit in a residence district the erection and maintenance of an ice manufacturing plant.

PREMISES AFFECTED—416-426 West 204th street, Manhattan.

APPEARANCES—

For Applicant: Leroy P. Ward.

For Opposition: J. H. Friedlander.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Negative .....	0
Absent .....	0

THE RESOLUTION:

(853-26-BZ)

WHEREAS, Hugo E. Magnuson, for William Peat, owner, filed, October 19, 1926, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of an ice manufacturing plant; premises 416-426 West 204th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 30, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 204th street is in a residence district; that 10th avenue is in a business and unrestricted district, and that 9th avenue is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 8, 1926, reads:

"1. Business and manufacturing buildings in residence districts are unlawful—Art. II of Zoning Resolution.";

and

WHEREAS, the proposed building is of fireproof construction, 2 stories in height, with a frontage of 150 ft. and a depth of 99 ft. 11 in.; to be occupied as an ice manufacturing plant; and

WHEREAS, the board deems that it would impose a condition of hardship if this applicant were deprived of the

proposed use of this property which was designated on the zoning maps as unrestricted at the time of purchase and was purchased for the specific use and operation of his business conducted in the vicinity on property taken by the city for public utility service.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution and that the application be and it hereby is granted on condition that the building shall not exceed a height of 2 stories above grade; that the westerly gable wall shall be unpierced throughout its entire height and length; that the loading platform shall be confined to the easterly front of the premises not exceeding a distance of 90 ft. from the easterly gable wall; that the remainder of the street front on the first story shall be restricted for office and operative use of the business conducted on these premises; the front elevation of the building shall be finished with face brick and architectural terra cotta or natural stone trimmings; any chimney stack erected shall be carried at least 25 ft. above the roof of the abutting building to the west; that no roof signs shall be erected or maintained; any sign placed on the front of the building shall be restricted to flat wall panels, indicating the name and title of the business conducted on the premises; that all permits necessary for the prosecution of the work shall be obtained within 9 months and any work involved completed within 18 months from the date of this action.

## CASES DISMISSED.

### Appeals from Administrative Orders.

The chairman called attention to the following cases, where notices of intention to appeal were offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative official in the performance of his duty:

(24-26-A)

Filed January 9, 1926—Premises 1328 President street, Brooklyn. Decision of the fire commissioner. Appellant M. J. Sage. Dismissed for lack of prosecution.

(89-26-A)

Filed January 29, 1926—Premises 67-69 Murray street, Manhattan. Order of the fire commissioner. Appellant Griffin Manufacturing Co., Inc. Dismissed for lack of prosecution.

(177-26-A)

Filed March 1, 1926—Premises 100 Kent street, Brooklyn. Order of the fire commissioner. Appellant Knute Olsen. Dismissed for lack of prosecution.

(197-26-A)

Filed March 8, 1926—Premises 24½ Grove street, Manhattan. Order of the fire commissioner. Appellant Simon Weisenberg. Dismissed for lack of prosecution.

## THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	4
Negative .....	0
Absent: Chief Kenlon .....	1

## THE RESOLUTION:

WHEREAS, the foregoing appellants have filed with the board of standards and appeals appeals from orders affecting the premises in question; and

WHEREAS, the appellants have failed to complete their papers, though duly notified to do so.

Resolved, that the foregoing appeals be and they hereby are dismissed for lack of prosecution.

## *Under the Building Zone Resolution.*

The chairman called attention to the following cases, where notices of intention to appeal were offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative official in the performance of his duty:

(46-26-BZ)

Filed January 19, 1926—Premises 820-830 Empire boulevard, Brooklyn. Decision of the superintendent of buildings. Applicant Croker National Fire Prevention Engineering Co. Dismissed for lack of prosecution.

(254-26-BZ)

Filed March 24, 1926—Premises south side of East New York avenue, 337 ft. 6 in. east of Schenectady avenue, Brooklyn. Decision of the superintendent of buildings. Applicant R. K. R. Building Co., Inc. Dismissed for lack of prosecution.

### THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle..... 4  
Negative ..... 0  
Absent: Chief Kenlon..... 1

### THE RESOLUTION:

WHEREAS, the foregoing applicants have filed with the board of standards and appeals applications under the building zone resolution affecting the premises in question; and

WHEREAS, the applicants have failed to complete their papers, though duly notified to do so.

Resolved, that the applications be and they hereby are dismissed for lack of prosecution.

## APPROVAL OF PLANS.

199-26-BZ.

APPLICANT—William F. Doyle, for Hyman Greenberg, owner.

SUBJECT—Application for approval of returned plans (re decision of the tenement house commissioner) under sections 7c and 21 of the building zone resolution, to permit in an "F" area district extending from a "C" area district the erection and maintenance of a tenement house with the area of lot occupied, yard and courts designed as required by the zone resolution for a "C" area district.

PREMISES AFFECTED—South west corner of Forest parkway and Ruth place, Woodhaven, Borough of Queens.

APPEARANCES—None.

ACTION OF BOARD—Plans submitted approved as being in practical compliance with resolution.

### THE VOTE TO APPROVE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle ..... 4  
Negative ..... 0  
Absent: Chief Kenlon ..... 1

## AREA FIXED.

The chairman read a communication from James W. Byrnes, requesting the board to fix an area deemed affected and within which to obtain consents to permit in a business district a rag store or baling shop; premises No. 145 Frost street, Brooklyn.

The following area was approved by the board:

"Both sides of Frost Street from a point 100 feet west of Manhattan Avenue to a point 100 feet east of Graham Avenue, also the premises adjoining at rear and for a distance of 50 feet each side of the side lot lines of the premises under appeal."

Adjourned 2.15 p. m.

WILLIAM J. O'GORMAN, *Secretary.*

663-26-S.

PETITIONER—George & Edward Blum, for Lawrence Building Co., owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—225-231 West 35th street, Manhattan.

APPEARANCES—

For Petitioner: Edward P. Doyle.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition denied.

THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin .....	5
Absent .....	0

THE RESOLUTION:

(663-26-S)

WHEREAS, Edward P. Doyle, substituted for George and Edward Blum, for Lawrence Building Co., Inc., owner, filed, July 30, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises Nos. 225-231 West 35th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 22, 1925 (Order No. 85692-LD), reads:

"1. Remove combustible articles from stair enclosures 1st story east side of building (cigar stand), as per Rule 5 of Board of Standards and Appeals.";

and

WHEREAS, the building is fireproof, 16 stories in height, 84 ft. 4 in. by 98 ft. 9 in. in area at 1st story and 84 ft. 4 in. by 88 ft. 9 in. in area above; OCCUPIED: 1st story, stores; upper stories, offices, show rooms and tenant factories, 110 persons per story, petitioner occupying a cigar stand on the 1st story in the stair enclosure at the east side of the building; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, petitioner contends that the cigar stand does not obstruct the means of egress from the building.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the petition be and it hereby is denied.

677-26-S.

PETITIONER—William F. Doyle, for Aran Aaront, owner.

SUBJECT—Variation of the labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—560 Seventh avenue, Manhattan.

APPEARANCES—

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(677-26-S)

WHEREAS, William F. Doyle, for Aran Aaront, owner, filed, August 2, 1926, a petition for variation from the requirements of the labor law, as cited in the decision of the

superintendent of buildings, affecting premises 560 Seventh avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated May 20, 1926, reads:

"An inspection was made of the above premises on May 3, 1926, and it was found that the building should be fireproof construction for proposed factory occupancy and two means of egress as per section 270 of the Labor Law should be provided.";

and

WHEREAS, the building is non-fireproof, 5 stories (72 ft.) in height, 25.1 ft. by 61 ft. in area; OCCUPIED: 1st story, stores; 2nd story, part offices and partly vacant at present, 10 persons; 3rd story, manufacture of dresses, 16 persons; 4th story, manufacture of dresses, 19 persons; 5th story, manufacture of embroidery, 15 persons; EQUIPPED with a fire alarm signal system; EXITS: a horizontal exit at the rear (protected with self-closing, fireproof doors) leading to the stairway of the adjoining building to west, 203 West 40th street; a horizontal exit at north leading into open loft of 562 Seventh avenue and, also, a party wall fire escape on the front of the building; ROOFS of adjoining buildings: to west 12 ft. lower; to north, same height; and

WHEREAS, petitioner contends, in view of the small area of the building and the small occupancy, that the existing means of egress are adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects that portion, 25.1 ft. by 61 ft., of the combined premises located at the corner of 40th street and Seventh avenue, on condition that all exit requirements of the labor law for an existing factory building shall be provided and maintained, with the exception of the counterbalanced drop ladder from the lowest balcony of fire escape on the front of the building which is hereby allowed to remain; and that the building shall not be increased in height, area or dimension.

698-26-S.

PETITIONER—George & Edward Blum, for 247 West 30th Street Corp., owner.

SUBJECT—Variation of the labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—247-249 West 30th street, Manhattan.

APPEARANCES—

For Petitioner: Edward Blum.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell and Holland and Deputy Chief Martin .....	4
Negative: Commissioner Guilfoyle .....	1
Absent .....	0

THE RESOLUTION:

(698-26-S)

WHEREAS George and Edward Blum, for 247 West 30th Street Realty Co., Inc., owner, filed, August 11, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 247-249 West 30th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered August 6, 1926 (N. B. Applic. No. 195-1926), reads:

"8. Windows should conform to sec. 264 Labor Law. No pane may exceed 720 square inches in area.";

and

WHEREAS, the building is fireproof, 16 stories in height, 49 ft. 11 in. by 98 ft. 9 in. in area; OCCUPIED: 1st story, stores; upper stories, offices, show room and 25 per cent manufacturing, 70 persons per story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior fireproof stairways, extending from the 1st

# MINUTES

story to roof; enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings on the 1st, 2nd and 3rd stories in the street wall of the building, glazed with  $\frac{1}{4}$  in. thick plate glass; the maximum area of the glass on the 1st story being 8 ft. 6 $\frac{1}{2}$  in. by 8 ft. 4 in.; on the 2nd story being 5 ft. 6 $\frac{1}{2}$  in. by 7 ft. 1 in., and on the 3rd story being 5 ft. 2 $\frac{1}{2}$  in. by 7 ft. 1 in. in area; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the lower three stories and would, also, detract from the architectural appearance of the building.

Resolved, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* only so far as the order affects the windows on the street front of the three lower stories, *on condition* that these openings be equipped with approved metal frames, glazed with  $\frac{1}{4}$  in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

699-26-S.

PETITIONER—George & Edward Blum, for 251 West 30th Street Corp., owner.

SUBJECT—Variation of the labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—251-255 West 30th street, Manhattan.

APPEARANCES—

For Petitioner: Edward Blum.

THE RESOLUTION:

(699-26-S)

WHEREAS, George and Edward Blum, for 251 West 30th Street Corp., owner, filed, August 11, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 251-255 West 30th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered August 3, 1926 (N. B. Applic. No. 178-1926), reads:

"1. Windows on 1st, 2nd and 3rd floors should be constructed as per Section 264 of Labor Law and Rule 503 of Industrial Code."

and

WHEREAS, the building is fireproof, 16 stories in height, 75 ft. by 98 ft. 9 in. in area at 1st story and 75 ft. by 88 ft. 9 in. in area above; OCCUPIED: 1st story, stores; upper stories, offices, show rooms and 25 per cent manufacturing, 70 persons per story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: two interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings on the 1st, 2nd and 3rd stories, in the street walls of the building, glazed with  $\frac{1}{4}$  in. thick plate glass; the maximum area of the glass on the 1st story being 9 ft. 10 in. by 6 ft. 8 in.; on the 2nd story, 6 ft. 1 $\frac{1}{2}$  in. by 6 ft. 7 in., and on the 3rd story being 4 ft. 8 in. by 7 ft. 3 in. in area; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the lower three stories and would, also, detract from the architectural appearance of the building.

Resolved, that the board of standards and appeals does

hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* only so far as the order affects the windows on the three lower stories on the street front, *on condition* that all openings be equipped with approved metal frames, glazed with  $\frac{1}{4}$  in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION:

(769-26-S)

WHEREAS, George and Edward Blum and S. Walter Katz, for 40 West 48th Street Corp., owner, filed, September 16, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 15 East 31st street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 23, 1926 (Order No. 99795-LD), reads:

"1. Discontinue the use of these premises for manufacturing purpose, for the reason that the exit facilities do not comply with the provisions of Sec. 270 of the Labor Law, for buildings erected after Oct. 1, 1913.

"Present interior stairway has not been provided with on all stories with fire doors providing an unobstructed width of at least 44 in., Sec. 270 of the Labor Law.

"No second means of egress provided. 'Either an interior or exterior enclosed fireproof stairway or a horizontal exit.' Sec. 270 of the Labor Law. 'No exit signs at least 8" in height, illuminated by lights having red globes in time of darkness, provided at all means of egress, as per section 272 of the Labor Law. Fireproof of windows not provided as per Sec. 264 of the Labor Law.'";

and

WHEREAS, the building is fireproof, 8 stories in height, 20 ft. 10 $\frac{1}{2}$  in. by 99 ft. in area; OCCUPIED: 1st story, stores, 15 persons; 2nd to 8th stories, inclusive, manufacturing, 15 persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: an interior iron and slate stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner claims that the exit doors to stair hall at each story have an unobstructed width of 36 in.; that the front windows are of  $\frac{1}{4}$  in. plate glass, the maximum size of glass at 1st story, 4 ft. 9 in. by 7 ft. 3 in., and 5 ft. 4 $\frac{1}{2}$  in. by 5 ft. at the 2nd story; all other windows in the building comply with the labor law; that the building was erected in November of 1924; furthermore, the petitioner proposes to construct a fire escape on the front of the building with ladder extension to roof and drop ladder to sidewalk, in lieu of an interior or exterior enclosed fireproof stairway.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

Negative .....	0
Absent .....	0

THE RESOLUTION:

(786-26-S)

WHEREAS, Sugarman and Berger, for Furland Co., Inc., owner, filed, September 23, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises Nos. 144-154 West 30th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated June 18, 1926 (N. B. 10-1926), reads:

"25. All windows must comply with Section 264-7 of Labor Law.";

and

WHEREAS, the building is fireproof, 20 stories in height, 137 ft. 11 in. by 98 ft. 9 in. in area at 1st story; OCCUPIED: 1st story, stores, 120 persons; mezzanine story, offices, 60 persons; upper floors, manufacturing, 112 persons on each story; EQUIPPED with a sprinkler system; EXITS: an interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; also a fire tower; and

WHEREAS, the petitioner proposes to install large plate glass windows on front of the building, the maximum size glass to be used at 1st story, 10 ft. 6 in. by 7 ft. 9 in.; at 2nd story, 8 ft. 6 in. by 6 ft. 6 in., and at 3rd story, 6 ft. 6 in. by 7 ft. in area; the petitioner contends that the windows under this petition are to be used as show windows; that all other windows will comply with the labor law; and

WHEREAS, no one appeared when this case was called.

*Resolved*, that the petition be and it hereby is *dismissed* for lack of prosecution.

THE RESOLUTION:

(838-26-S)

WHEREAS, William F. Doyle, for Bethlehem Engineering Corp., owner, filed, October 13, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises Nos. 3-5 East 55th street and Nos. 705-713 Fifth avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered July 30, 1926 (N. B. 355-1926), reads:

"9. No pane of glass must exceed 5 square feet in area.";

and

WHEREAS, the building is fireproof, 15 stories in height, 120 ft. 5 in. by 150 ft. in area; OCCUPIED: 1st story, stores; upper stories, lofts, offices and show rooms; EQUIPPED with a sprinkler system; EXITS: an interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; also a fire tower; and

WHEREAS, the petitioner proposes to install large plate glass windows on front of the building the maximum size glass to be used at 1st story, 9 ft. 8 in. by 5 ft. 6 in., and at 3rd story, 5 ft. 6 in. by 7 ft. 6 in. in area; the petitioner contends that to divide the glass into smaller lights would destroy the purpose of stores and detract from the architectural design of the building.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* only so far as it affects the windows of the three lower stories on the street front, *on condition* that all openings be equipped with approved metal frames, glazed with  $\frac{1}{4}$  in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION:

(856-26-S)

WHEREAS, Renwick, Aspinwall and Guard, for V. Green Co., owner, filed, October 19, 1926, a petition for variation from the requirements of the labor law, as cited in a de-

# MINUTES

cision of the superintendent of buildings, affecting premises Nos. 18-24 Vestry street and Nos. 182-200 Hudson street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated September 15, 1926 (N. B. 175-26), reads:

"17. All windows must comply with Sec. 264-7 Labor Law, or Rule 478/20S Board of Standards and Appeals.";

and  
WHEREAS, the building is fireproof, 12 stories in height, 200 ft. 11 $\frac{3}{4}$  in. by 138 ft. 10 $\frac{1}{4}$  in. in area; OCCUPIED: 1st story, stores and manufacturing, 135 persons; upper stories, manufacturing, 210 persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system; EXITS: three interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to use double thick plain glass, instead of  $\frac{1}{4}$  in. plate or wire glass, in all front windows facing Canal street, Hudson street and Vestry street; and

WHEREAS, the petitioner contends that the lights of the proposed double thick plain glass are very small, not to exceed 14 in. by 20 in. in area, which is almost one third of the area permitted by the labor law.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the petition be and it hereby is denied.

1228-25-S.

PETITIONER—Albert J. Courtney of Gross & Brown Co., for Ruth A. Wallace, owner.

SUBJECT—Application for reopening, amendment to resolution, re variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—27-37 West 60th street, Manhattan.

For Petitioner: Albert J. Courtney.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition reopened and resolution amended.

THE VOTE TO REOPEN AND AMEND RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(1228-25-S)

WHEREAS, Ruth A. Wallace, owner, filed, November 25, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 27-37 West 60th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 17, 1925 (Order No. 82927-LD), reads:

"1. Discontinue manufacturing on these premises except on the 11th floor rear as stipulated in Certificate of Occupancy 8601, 1924; which permitted factory occupancy on 11th floor rear as per variation of the Labor Law, granted by the Board of Standards and Appeals, calendar No. 362-24-S.

"For the reason that manufacturing is being conducted also on the 3rd, 5th, 6th, 9th and 10th stories and the second required means of exit on the rear of the building does not conform with the requirements of Section 270 of the Labor Law and no interior electric fire alarm system is installed throughout the building as required by Section 279 of the Labor Law, and all doors throughout building do not open outwardly as required by Section 270 of the Labor Law and fire drills are not con-

ducted at least once a month as required by Subdivision 2 of Section 279 of the Labor Law and exit signs at least 8 in. in height, illuminated by lights having red globes in time of darkness are not provided at all means of egress as required by Section 272 of the Labor Law, and no unobstructed passageway is provided leading to both required means of exit on all stories. At present it is necessary to pass through doors in partitions enclosing offices and factories at rear of building, thence through lofts to reach 2nd means of exit at rear of building.";

and

WHEREAS, the building is fireproof, 11 stories in height, 109 ft. by 100 ft. 5 in. in area; OCCUPIED: 1st and 2nd stories, showrooms, 64 persons; 3rd, 5th, 6th, 9th and 10th stories, stockrooms, assembling goods and light manufacturing, such as piston rings, automobile accessories, jewelry and hat stretchers, about 26 persons on each story; 4th story, offices, 70 persons; 7th and 8th stories, offices and stockrooms, 20 persons on each story; 11th story, manufacture of jewelry, 80 persons; EQUIPPED with a sprinkler system and two standpipe lines. EXITS: one interior fireproof stairway, extending from 1st story to roof, enclosed in fireproof partitions, with fire doors at the openings; an exterior iron stairway on rear of building, extending from roof to the yard, having fireproof openings along the course thereof, with egress through 1st story mezzanine passage to interior stairway, thence to street; ROOFS of adjoining building 118 ft. lower at east, 70 ft. lower at west; and

WHEREAS, the petitioner claims that exit signs and red lights have been provided at all exits; that all doors leading to rear exits, to interior stairs and to fireproof passage open outward; that fire drills are unnecessary as the building is 100 per cent sprinklered; the petitioner further contends that the occupancy is small and the manufacturing is of a light nature; and

WHEREAS, this petition was granted by the board at its meeting, May 11, 1926, on certain conditions and petitioner requested a modification of these conditions.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that an approved exterior screened iron stairway shall be provided and maintained on the rear of the building, with unobstructed egress leading to both means of egress on each story; except that on the ninth story the egress to exterior screened stair shall be by a corridor extending along the easterly wall to the open deck of the 8th story exterior setback, which shall be maintained free and unobstructed, directly to the exterior screened stairway opening at westerly end of building, and that a fixed iron railing not less than 3 ft. in height shall be set on and above the existing parapet wall of the exterior deck; and that the occupancy otherwise shall remain unchanged; and egress to be maintained from the lowest termination on the mezzanine floor level, with fireproof passageway to front of building leading direct to and connected with the main entrance hall at front of building, and that an interior fire alarm system shall be installed; denied in all other respects.

## THE RESOLUTION:

(686-26-A)

WHEREAS, Alexander S. Traub, for S. H. Pomeroy, owner, filed, August 5, 1926, an appeal from an order of the fire commissioner, affecting premises No. 282-296 East 134th street, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated July 9, 1926 (Order No. 98804-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure."

nd  
WHEREAS, the building is non-fireproof, 2 stories (32 ft.)

in height, 150 ft. by 97 ft. 6 in. (approximately 14,000 sq. ft.) in area; OCCUPIED for the manufacture of sheet metal windows and doors: 1st story, 40 persons; 2nd story, 20 persons; and

WHEREAS, appellant contends that the building is provided with a 2-in. standpipe riser (with hose connections and hose on each story) in the center of the building; that it is directly connected to the city main; that there are three city fire hydrants in the immediate vicinity and that the premises are supervised by watchmen at all times.

Resolved, that the order of the fire commissioner be and it hereby is *modified* and the appeal be and it hereby is *granted on condition* that all fire buckets and fire extinguishers, as directed by the fire department, shall be distributed throughout the premises; that the building shall be not increased in height, area or dimension; and *granted* so long as the present occupancy and operation remain substantially unchanged.

# RULES

## SMOKING IN FACTORIES.

Adopted by the Board of Standards and Appeals,  
August 13, 1918.

### RULE 1. PERMIT.

(a) **Prohibition.** No person shall smoke, or carry a lighted cigar or cigarette in any factory as defined in Article 1, Section 2, of the State Labor Law, nor in any portion of a factory, within the City of New York, except such protected portions or special classes of occupancies as are specified in Rule 2 of these rules, and then only after the issuance of a permit by the fire commissioner.

It shall be the joint and several duty of the owner and the lessee or lessees of the building containing such factory or factories to cause to be posted in each and every entrance hall, stairhall or room throughout the building, as well as in every elevator-car, in English, and also in such other language or languages as the fire commissioner shall direct, a notice of such prohibition, and the penalty for its violation.

(b) **Application.** Application for such permit shall be made only by the owner of the building on suitable blank forms to be furnished by the fire commissioner.

(c) **Time Limit.** Such permit shall be for a definite period, not exceeding one year, and shall not be renewed upon expiration until a reinspection of the premises for which it is issued has been made for the purpose of determining whether existing conditions warrant a renewal.

(d) **Conditions.** The permit shall state the conditions under which, the hours between which, and the place or places in such factory where smoking may be permitted, and this permit shall be framed and kept posted in a conspicuous place in the factory.

(e) **Revocation.** Violation of any of the conditions specified in the permit, in addition to incurring such penalties as are prescribed by law, shall be full and sufficient cause for the revocation of such permit by the fire commissioner, and he shall not again issue a permit for the same premises until at least one year has elapsed.

### RULE 2. PERMISSIBLE CASES.

Smoking may be permitted in:—

(a) Factories engaged in the manufacture of cigars, cigarettes, or smoking tobacco, when necessary for the efficient conduct of the business, provided that:

(1) No smoking other than that for sampling, testing and experimental purposes is carried on.

(2) Such smoking is conducted in a room provided especially for that purpose, separated from the rest of the building by fireproof or fire-resisting partitions, with all openings therein protected by self-closing fire doors, and, further, unless the building is of fireproof construction or equipped with an approved automatic sprinkler system, the floor and ceiling of such room shall be covered with fire-retarding material.

(3) Such chemical fire extinguishers as the fire commissioner may direct are installed.

(4) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

(b) Factories devoted entirely to one of the following occupancies:

Blacksmithing or horseshoeing;  
Boiler making;  
Brick, terra cotta or artificial stone works;  
Forge shops;  
Foundries;  
Iron, steel, brass or copper works;  
Machine shops;  
Smelting;  
Stone or monumental works;

provided that in any case:

(1) The building is not of wooden construction;

(2) Such chemical fire extinguishers as the fire commissioner may direct are installed;

(3) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

## FORMS FOR NOTICES TO PROPERTY OWNERS

If applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such forms are not to be supplied by this office. The applicant is entitled only to one copy of Form 13A, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

*Cases listed in the Reserve Calendar are cases upon which action by the board has been deferred pending committee reports, of this board, court or department actions, and will remain thereon until the aforesaid reports, court or departmental actions are consummated. Whereupon the case or cases will be restored to the regular calendar and due notice of the date set for hearing will be mailed to the appellant, applicant or petitioner of record.*

## RULES

### COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS.

*Amended Resolution Adopted by the Board of Appeals, March 16, 1920, Under Cal. No. 549-17-BZ.*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed

under the building zone resolution in the absence of any definition therein to the contrary.

*Resolved*, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

## CONCRETE RULES

### USE OF HYDRATED LIME IN CONCRETE.

Adopted by the Board of Standards and Appeals, April 9, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated in each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the

hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth*, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

## PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

## HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

## CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, December 14, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, December 21, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

## NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

## MINUTES

### BOARD OF STANDARDS AND APPEALS

#### REGULAR MEETING.

TUESDAY MORNING, DECEMBER 7, 1926.

Present: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon.

The minutes of the regular meeting of the board, held on Tuesday morning, November 30, 1926, and the minutes of the regular meeting of the board, held on Tuesday afternoon, November 30, 1926, were approved as printed in the Bulletin, No. 49, Vol. XI.

#### APPEALS FROM ADMINISTRATIVE ORDERS.

541-26-A.

APPELLANT—Greenpoint Metallic Bed Co., Inc., lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—234-236 Franklin street, Brooklyn.

APPEARANCES—

For Appellant: None

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Laid over to December 28, 1926, at 10 a. m., on written request of appellant.

746-26-A.

APPELLANT—De Kruger, Weclaw & Co., Inc., for Hearn 45th Street Corporation, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—45 West 45th street, Manhattan.

APPEARANCES—

For Appellant: Robert S. Tipping.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	4
Negative .....	0
Absent: Chief Kenlon .....	1

#### THE RESOLUTION:

(746-26-A)

WHEREAS, DeKruger, Weclaw & Co., Inc., lessee, filed, September 3, 1926, an appeal from an order of the fire commissioner, affecting premises No. 45 West 45th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 14, 1926 (Order No. 35100-LC), reads:

"1. Have each operator of a blow-pipe or other similar device or apparatus for heating, melting or welding apply for and secure a Certificate of Fitness."

and

WHEREAS, the building is fireproof, 16 stories in height, 81.3 ft. by 90.5 ft. in area; OCCUPIED: 1st story, stores; upper stories, offices and light manufacturing, approximately 25 persons per story, appellant occupying part of the 10th story as a manufacturing jeweler; and

WHEREAS, appellant contends that the oxygen gas used is safe and non-inflammable; that it is used simply to intensify the heat of the city gas flame in melting and soldering; that the one cylinder containing 220 cu. ft. of oxygen is located near a window and 20 ft. from the work benches; that the operators of the blow pipes do not regulate or have anything to do with the cylinder of oxygen and that the large torch is operated by a person holding a certificate of fitness.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that not more than one cylinder of oxygen shall be maintained on the premises at any one time, and that the person operating the tank and large platinum torch shall obtain a certificate of fitness.

758-26-A.

APPELLANT—Major Manufacturing Co., for Estate of Martha T. Sands, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—461 Pearl street, Manhattan

APPEARANCES—

For Appellant: William J. Watt.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

#### THE RESOLUTION:

(758-26-A)

WHEREAS, Major Manufacturing Co., for Estate of Martha T. Sands, filed, September 14, 1926, an appeal from an order of the fire commissioner, affecting premises 461 Pearl street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 27, 1926, (Order No. 35236-LC), reads:

"1. Discontinue the storage, sale and use of any inflammable mixture not manufactured under a permit or certificate of approval issued by the Fire Commissioner."

and

WHEREAS, the building is non-fireproof, 3 stories in height, 12 ft. 4 in. by 40 ft. 8 in. and 46 ft. 8 in., irregular in depth; OCCUPIED: 1st story, store, one person; 2nd story, filling room, 3 persons; 3rd story, storage room, one person; and

WHEREAS, the appellant claims that not more than one barrel (50 gallons) of rubber cement and not more than 10

# MINUTES

gallons of leather cement are stored on the 3rd story, drawn off by gravity to 2nd story, where small bottles of different sizes are filled, packed and stored ready for shipment; furthermore, the appellant contends that the present business has been conducted during the past 40 years without a fire.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that not more than two barrels of this material shall be stored and maintained on the premises at any one time; and only so long as the entire premises remain in single operation and occupancy, and that all auxiliary fire protectives as required by the fire department shall be installed and distributed throughout the premises, such as fire pails, sand buckets and portable fire extinguishers.

759-26-A.

APPELLANT—D. Everett Waid, Arct. for Metropolitan Life Insurance Co., owner.

SUBJECT—Appeal from decision of superintendent of buildings.

PREMISES AFFECTED—1 Madison avenue, Manhattan.

APPEARANCES—

For Appellant: D. Everett Waid.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(759-26-A)

WHEREAS, D. Everett Waid, for Metropolitan Life Insurance Co., owner, filed, September 15, 1926, an appeal from a decision of the superintendent of buildings, affecting premises 1 Madison avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered August 6, 1926 (Elevator Application No. 577-1926), reads:

"3. The records of this Bureau show the car speed of these elevators to be 300' per min. A pit 5 feet in depth must be provided due to the increase in speed. Rules 4 and 36 of the elevator rules."

and

WHEREAS, the building is fireproof, 11 stories in height 197 ft. 6 in. by 425 ft. in area; OCCUPIED by the Metropolitan Life Insurance Co.'s Home Office; 29 interior hydraulic elevators are being changed to electric power elevators in accordance with law except as to the depth of the pits of two elevators located at the center of the building and known as Nos. 7 and 8; and

WHEREAS, the appellant proposes to make the pits 4 ft. 2 in., instead of 5 ft. in depth, for elevators Nos. 7 and 8; the lesser depth is necessitated from the fact that plumbing pipes, electric conduits, air lines and pneumatic conveyor pipes are located directly beneath the pits; the cost of removing such pipes would be prohibitive; furthermore, the appellant contends that the change is being made for better service; the old cars travel 300 F. P. M.; the new cars will travel 350 F. P. M., and are equipped with automatic floor levelling devices, oil buffers for cars and counterbalances, instead of spring bumpers, and will also be of modern construction.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *modified*, and the appeal be and it hereby is *granted* only so far as it affects the pits of elevators Nos. 7 and 8, *on condition* that the clearances in these pits shall be not less than 4 ft. 2 in. in depth, and that the requirements of the elevator rules shall be complied with in all respects on all other elevators throughout the premises.

766-26-A.

APPELLANT—C. Leslie Weir, for Knickerbocker Ice Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—146 Elizabeth street and 346-354 Broome street, Manhattan.

APPEARANCES—

For Appellant: C. Leslie Weir, Everett E. Fowler.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(766-26-A)

WHEREAS, C. Leslie Weir, for Knickerbocker Ice Co., owner, filed, September 15, 1926, an appeal from an order of the fire commissioner, affecting premises 146 Elizabeth street and 346-354 Broome street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 3, 1926 (Order No. 914-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main-stairway enclosure."

and

WHEREAS, the building is fireproof, 5 stories in height, 101 ft. 5½ in. frontage on Broome street, 112 ft. 2¾ in. frontage on Elizabeth street by 98 ft. in depth, about 12,250 sq. ft. in area; OCCUPIED for the manufacture of ice, 4 persons on each story; and

WHEREAS, the appellant claims that on each story above the first story, at least 3 ft. 6 in. of water or brine is carried over the entire floor area, with the exception of the passageway and chutes through which the ice is lowered to street; furthermore, the appellant contends that there is nothing in the building that can burn; that the installation of standpipes would be a hardship; that it was not the intent of the ordinance under the condition in this particular building.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so long as the present use and occupancy as artificial ice manufacturing plant remains unchanged.

770-26-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Royal Building Corp., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—68-70 William street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(770-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for the Royal Building Corp., owner, filed, September

# MINUTES

17, 1926, an appeal from an order of the fire commissioner, affecting premises 68-70 William street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated June 15, 1926 (Order No. 97989-F), reads:

"1. Provide approved fireproof windows, with metal or kalameined frames, glazed with wire glass for all openings in the exterior wall above the 1st story, which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at north side of building, or other approved protection. \* \* \*";

and

WHEREAS, the building is fireproof, 16 stories in height, 54 ft. 6 in. by 124 ft. 2 in. in area; OCCUPIED for banking and office purposes, about 25 persons on each story; and

WHEREAS, the appellant claims that the building is provided with a standpipe system, a watchman's time system, a National District Central Office Fire Alarm Box in the basement and on the 8th and 15th stories; portable fire extinguishers; also a 40-gallon chemical extinguisher on wheels at the 15th story; that the premises constituting the exposure are occupied similar to the premises under appeal; that the windows on north side in the rear court wall from the 12th story down, also the toilet windows are of heavy corrugated prism glass; all other exterior windows are glazed with plate glass; furthermore, the appellant proposes to provide approved, fireproof windows for all openings in the rear court wall, which are not now provided with heavy wood pivot sash, glazed with heavy corrugated prism glass.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects the openings embraced in this order not within 30 ft. horizontally or 50 ft. vertically of any openings on the course of elevator shaft or stairhall.

777-26-A.

APPELLANT—DePace and Juster, for Adtha Durland, owner.

SUBJECT—Appeal from decision of superintendent of buildings.

PREMISES AFFECTED—168 East 95th street, Manhattan.

APPEARANCES—

For Appellant: Anthony DePace and Frederick L. Durland.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(777-26-A)

WHEREAS, DePace & Juster, for Adtha Durland, owner, filed, September 20, 1926, an appeal from a decision of the superintendent of buildings, affecting premises 168 East 95th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered September 11, 1926 (Alt. Applic. No. 1913-926), reads:

"1. The use of living quarters on more than 2 stories above the garage is contrary to Chapter 10, Sec. 154 of the Code of Ordinances.

"2. It appears that building is occupied by more than 1 family. Two means of exit should be provided to comply with Chapter 10, Sec. 154 of the Code of Ordinances.";

nd

WHEREAS, the building is non-fireproof, 4 stories in height, 8 ft. 9 in. by 48 ft. 8 in. in area; OCCUPIED for residence

purposes on the 1st, 2nd, 3rd and 4th stories; the 1st floor level being 2 ft. below the curb level; and

WHEREAS, the appellant proposes to erect a one-story rear extension for servants, also to install a one-car garage in front room of 1st story; and

WHEREAS, the appellant contends that there will be only one door opening between the garage and dwelling; that only two stories above the garage will be occupied for living purposes; that the building will be occupied by one family of 2 persons and 2 servants, the 4th story will be used for storage and spare rooms.

Resolved, that the decision of the superintendent of buildings be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the garage portion of the premises shall be restricted to the dimensions indicated on the plans filed and that the enclosing walls of the garage on the first story shall be constructed of fireproof material, and that there shall be no opening from the garage area to the interior of the house, with the exception of one door opening to the vestibule at the street front, equipped with a self-closing, fireproof door; the floor of the garage portion shall be finished with not less than 3 in. of cinder concrete construction, with wire reinforcement, and that the ceiling of the garage shall be fire retarded with cement mortar on metal laths and that there shall be not more than one automobile of the pleasure-car type, the property of the owner residing on the premises stored therein; and there shall be no gasoline storage equipment installed or maintained on the premises and that a balcony fire escape shall be constructed at the rear of the building embracing at least one window on each story with connecting stairs not more than 60 degrees between all balconies and 60 degree stairs from lowest balcony to the yard level.

345-26-A.

APPELLANT—Edward P. Doyle, for Rhinelander Real Estate Company, owner.

SUBJECT—Appeal from decision of tenement house commissioner.

PREMISES AFFECTED—56 Greenwich avenue, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Absent .....	0

THE RESOLUTION:

(346-26-A)

WHEREAS, Edward P. Doyle, for Rhinelander Real Estate Co., owner, filed, April 20, 1926, an appeal from a decision of the tenement house commissioner, affecting premises 56 Greenwich avenue, Borough of Manhattan; and

WHEREAS, the decision of the tenement house commissioner, dated March 9, 1926, reads:

"26. Provide a gas shut valve of approved design for the above building, according to the provisions of the ordinance, adopted January 16, 1923, by the Board of Aldermen for the control of gas. NOTE: The gas shut off valve must conform in all respects to the rules and regulations governing same adopted by the Board of Standards and Appeals, January 11, 1924.";

and

WHEREAS, the building is non-fireproof, 4 stories in height, 25 ft. 2 in. by 50 ft. in area; OCCUPIED: cellar, storage; 1st story, store; 2nd, 3rd and 4th stories, one family on each story; and

WHEREAS, the appellant claims that there are two meters on the gas main; that the gas is used for cooking, lighting and heating purposes; furthermore, the appellant contends that the installation of a gas shut-off valve would not assure the protection of any person in case of fire, nor is it his duty to protect persons against gas until it passes through the meter and becomes his property.

# MINUTES

*Resolved*, that the decision of the tenement house commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

752-26-A.

APPELLANT—Lawton-Stephens Co., Inc., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—419-427 Marcy avenue, Borough of Brooklyn.

APPEARANCES—

For Appellant: Edward M. Stephens.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(752-26-A)

WHEREAS, Lawton-Stephens Co., Inc., owner, filed an appeal from an order of the fire commissioner, affecting premises 419-427 Marcy avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 2, 1926 (Order No. 99911-F), reads:

"1. Install a standpipe system with risers 4" in diameter, tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½" regulation Fire Department outlets on each story. \* \* \*";

and

WHEREAS, the building is of frame and brick construction, one and 3 stories (35 ft) in height, 100 ft. by 175 ft. (17,500 sq. ft.) in area; OCCUPIED for the manufacture of hollow steel doors on 1st story, 108 persons; 2nd story, office, 8 persons; 3rd story, office, 3 persons; and

WHEREAS, the appellant claims that the greater part of the building is of heavy brick construction, one story in height; that the 3-story frame portion of the building at the southwest corner is separated from the other portion of the building by automatic fireproof doors; that the building is equipped with National District Telegraph Fire Alarm boxes; that there are a large number of fire hydrants located in the immediate vicinity; furthermore, that the appellant contends that he has occupied the premises since 1918 without a fire.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so long as the present use and occupancy, the manufacturing of hollow steel doors, and the adjoining offices are maintained substantially unchanged, *on condition* that there shall be no manufacturing of any kind or description in the 3-story section of these premises, and that any auxiliary fire protectives, as directed by the fire commissioner, be distributed and maintained throughout the premises, and under further condition that the building shall be not increased in height, area or dimension.

785-26-A.

APPELLANT—William Michels, for Mantua Realty Co., Inc., owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—177-183 Dyckman street, Manhattan.

APPEARANCES—

For Appellant: William Michels.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(785-26-A)

WHEREAS, William Michels, for Mantua Realty Co., Inc., owner, filed, September 23, 1926, an appeal from a decision of the fire commissioner, affecting premises 177-183 Dyckman street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, dated June 26, 1926 (re Amendment to N. B. App. 2197-1926), reads:

"1. Storage garage may not be permitted in a building occupied as a place of public assembly (pool parlor).";

and

WHEREAS, the building is non-fireproof, 2 stories in height, 100 ft. by 100 ft. in area; OCCUPIED: 1st story, stores and garage for more than five cars; 2nd story, billiard room; and

WHEREAS, the appellant claims that the ceiling of the stores and billiard parlor are lined with asbestos boards and covered with 26 gauge metal; that the garage portion of the building is constructed entirely fireproof and separated from the rest of the building by 8 in. and 12 in. masonry walls, extending 3 ft. above the roof; furthermore, the appellant contends that the building is constructed and occupied in accordance with Certificate of Occupancy No. 11688, issued May 27, 1926, by the superintendent of buildings.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the garage portion of the premises shall be separated from the business portion of the premises by walls, ceilings and floors of approved masonry, and that the use and occupancy of the business portion of the premises shall be limited and restricted to the stipulations approved by the superintendent of buildings under the certificate of occupancy now in force issued in accordance with the resolution of the board of standards and appeals under Cal. No. 409-23-BZ.

790-26-A.

APPELLANT—Samuel Rosenblum, for 2315-17 Third Avenue Corp., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—2315-2317 Third avenue, Manhattan.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

THE RESOLUTION:

(790-26-A)

WHEREAS, Samuel Rosenblum, for 2315-2317 Third Avenue Corp., owner, filed, September 24, 1926, an appeal from an order of the fire commissioner, affecting premises 2315-2317 Third avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 3, 1926 (Order No. 99762-F), reads:

"1. Provide a separate and distinct system of Automatic Sprinklers throughout cellar and on 1st story, having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals. \* \* \*";

and

# MINUTES

WHEREAS, the building is of frame construction, 3 stories in height, 50 ft. by 75 ft. in area; OCCUPIED: cellar, storage; 1st story, stores, barber shop, restaurant, hardware and crockery; 2nd and 3rd stories, lodging house for 129 persons; and

WHEREAS, the appellant proposes to vacate all hazardous occupancies, such as the storage of second-hand furniture in the cellar; furthermore, the appellant contends that the building is equipped with an interior fire alarm system, adequate exit facilities, and also that the premises are under constant supervision by watchmen.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

775-26-A.

APPELLANT—John L. Gwydir, for Ammann Mfg. & Construction Co., lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—155-163 Avenue D and 738-750 East 11th street, Manhattan.

APPEARANCES—

For Appellant: John L. Gwydir.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Negative .....	0
Absent .....	0

THE RESOLUTION:

(775-26-A)

WHEREAS, John L. Gwydir, for Ammann Manufacturing and Construction Co., lessee, filed, September 20, 1926, an appeal from an order of the fire commissioner, affecting premises No. 155-163 Avenue D and 738-750 East 11th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 4, 1926 (Order No. 95390-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main-stairway enclosure."

and

WHEREAS, the building is non-fireproof, 4 stories and basement (52 ft.) in height, 103 ft. by 125 ft., about 12,000 sq. ft. in area; OCCUPIED: basement, woodworking shop, 4 persons; 1st story, woodworking shop, 9 persons; 2nd story, assembling, 20 persons; 3rd story, assembling, 20 persons; 4th story, finishing, 12 persons; and

WHEREAS, the appellant proposes to equip the premises with an approved system of automatic sprinklers in lieu of installing standpipes as called for in Fire Department Order No. 95390-F; the appellant contends that a sprinkler system would give much more protection than a standpipe system.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be not increased in height, area or dimension, and that the premises shall be equipped throughout with an approved sprinkler system.

788-26-A.

APPELLANT—Coca Cola Bottling Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—428-430 East 166th street and 431 East 165th street, The Bronx.

APPEARANCES—

For Appellant: Joseph J. Ahearn.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(788-26-A)

WHEREAS, Coca Cola Bottling Co., owner, filed, September 23, 1926, an appeal from an order of the fire commissioner, affecting premises 428-430 East 166th street and 431 East 165th street, The Bronx; and

WHEREAS, the order of the fire commissioner, dated March 21, 1926 (Order No. 28741-LC), reads:

"1. Install a standpipe system with risers 4" in diameter, tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½" regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure. \* \* \*";

and

WHEREAS, the building is non-fireproof, 2 stories in height, 25 ft. frontage on East 165th street, extending through the block 432 ft., with 50 ft. frontage on East 166th street; about 21,000 sq. ft. in area at 1st story, and 7,000 sq. ft. in area at 2nd story; OCCUPIED for the purpose of bottling syrup (known as Coca Cola), and also as a garage for the storage of commercial cars, used in connection with the bottling business conducted on the premises; and

WHEREAS, the appellant claims that the premises originally were two separate buildings; the 165th street building operated legally as a bottling establishment, and the 166th street building operated legally as a garage; the two buildings have since been connected by a doorway, also a chute opening, both at rear; the doorway is protected by automatic rolling steel shutters, and the chute opening by automatic traps; furthermore, the appellant contends that the garage is provided with a 2½ in. standpipe system, having three outlets at the 1st story and one outlet in the basement with 50 ft. of hose.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the opening at the rear connecting these two buildings shall not exceed a width of 3 ft. 6 in. and shall be equipped with self-closing, fireproof doors on each side of the opening, and that any conveyor opening between the buildings shall be equipped with an automatic fireproof or steel shutter on each side of opening, and *on condition* that the building shall be not increased in height, area or dimension, and *granted* only so long as the occupancy and use remain substantially unchanged.

THE RESOLUTION:

(520-26-BZ)

WHEREAS, Jacob Lubroth, for Charles Fineman, owner, filed, June 7, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline selling station; premises northeast corner of Vineland avenue and Journeay avenue, Borough of Richmond; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 7, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Journeay avenue, Vineland avenue and Huguenot avenue are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered April 30, 1926 (N. B. 557-26), reads:

"Contrary to Zoning Resolution. Gasoline station in a business zone.";

and

WHEREAS, the premises consist of a plot of ground having a frontage of 177 ft. on Journeay avenue and 187 ft. on Vineland avenue, upon which it is proposed to erect a gasoline selling station; and

WHEREAS, this entire section for several blocks in either direction is as yet undeveloped by any structural improvement and the 85 per cent consents obtained in this application are from the real estate corporation owning all property on the street front affected; this application should more properly be addressed to the board of estimate and apportion-

# MINUTES

ment. The variation if granted in virgin territory might be stressed for further prohibitive uses as an opening wedge and commitment of this board to this street for further unrestricted district uses; therefore, the board exercising the discretion vested in it by authority of the building zone resolution deemed that the application should be denied.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

660-26-BZ.

APPLICANT—J. M. Felson, for Felco Realty Co., owner.

SUBJECT—Application (re decision of superintendent of buildings) under section 7b of the building zone resolution, to permit the extension from an unrestricted district into a residence district of a proposed garage for the storage of more than five (5) motor vehicles.

THE RESOLUTION:

(660-26-BZ)

WHEREAS, J. M. Felson, for Felco Realty Co., owner, filed, July 20, 1926, an application, under the building zone resolution, to permit the extension from an unrestricted district into a residence district, of a proposed garage for the storage of more than five motor vehicles; premises west side of Sheridan avenue, 198.22 ft. south of East 158th street, The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 7, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Sheridan avenue is in an unrestricted district, Mott avenue is in a residence district, East 156th street is in an unrestricted district, and East 158th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 23, 1926 (N. B. 1898-1926), reads:

"1. Erection of public garage for storage of more than five motor vehicles in unrestricted district extending into residence district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the proposed building is of non-fireproof construction, two stories in height, with a frontage of 25 ft. on Mott avenue, 141 ft. along the rear lot line and a depth of 125 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that the applicant substantiated his basis of appeal under section 7b.

*Resolved*, that the board of standards and appeals does hereby *make a variation* of the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that the building shall be restricted in height to a two-story structure above the curb level of Sheridan avenue; that the westerly and easterly gable walls shall be unpierced throughout their entire height and length; that the roof shall be of flat de-

sign and construction; that the southerly exits and entrances as indicated on plans filed in this appeal shall be maintained, opening to a private street not less than 40 ft. in width, connecting with and directly to Sheridan avenue; that the entire front on Sheridan avenue shall be maintained as vehicle openings for use and operation of the garage; that no skylights shall be installed within 25 ft. of westerly gable wall; that the front elevation on Sheridan avenue and the private street shall be finished with face brick and architectural terra cotta and stone trimmings; that there shall be no roof signs erected or maintained; that any gasoline storage equipment installed shall be located and maintained wholly within the unrestricted area of the premises; that all permits required shall be obtained within nine months and any work involved thereby completed within eighteen months from the date of this action.

## APPEARANCES—

For Applicant: Frederick J. Flynn and Harry Prince.

For Opposition: Frank A. Sincerbeaux, George A. Reiss, Ralph E. Sturges, M. B. Fox and J. McCarthy.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle ..... 4

Negative ..... 0

Absent: Chief Kenlon ..... 1

## THE RESOLUTION:

(868-26-BZ)

WHEREAS, Frederick J. Flynn, for 1016 Fifth Avenue Co.,

Inc., owner, filed, October 25, 1926, an application, under the building zone resolution, to permit in a 1½ times height district the erection and maintenance of the street wall higher than that permitted by the zone resolution; premises 1016 Fifth avenue and 2-6 East 83rd street, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 7, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Fifth avenue, East 83rd street and East 82nd street are in 1½ times height and also residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 22, 1926 (N. B. 446-26), reads:

"1. Provide proper set back for front of building facing East 83rd street where more than 150' from 5th Avenue—Zone Resolution—Sec. 9.";

and

WHEREAS, the proposed building is to be of fireproof construction, 15 stories and pent house in height, with a frontage of 172 ft. 5 in. and a depth of 76 ft. 6 in; to be occupied as an apartment house; and

WHEREAS, it is proposed to erect the street walls of an apartment house 150 ft. in height without a setback, such height is in accordance with the zone resolution on the Fifth avenue front, also on 83rd street front for a distance of 150 ft. from Fifth avenue; the 22 ft. 5 in. length of the 83rd street front wall beyond the 150 ft. point is limited to 90 ft. in height by the zone resolution; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 21.

Resolved, that the board of standards and appeals does hereby make a variation of the application of the use district regulations of the building zone resolution and that the application be and it hereby is granted on condition that the building shall not exceed a depth of more than 172 ft. 5 in. from the corner formed by the intersection of Fifth avenue and 83rd street; that the structure shall not be erected in excess of the permissible height of the Fifth avenue frontage; that the easterly gable wall shall be finished with face brick throughout; that the requirements of the building zone regulations otherwise shall be complied with in all respects; that all permits required shall be obtained within nine months and the building completed within eighteen months from the date of this action.

599-25-BZ.

APPLICANT—Eugene DeRosa, for Maxian Theatre Corp., owner.

SUBJECT—Application for reopening, and amendment of resolution, adopted March 16, 1926, re appeal from decision of superintendent of buildings under section 7c of the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a building to be used for business and theatre purposes.

PREMISES AFFECTED—Southeast corner Sheridan avenue and East 167th street, The Bronx.

## APPEARANCES—

For Applicant: Lawrence S. Bologenino.

For Opposition: None.

ACTION OF BOARD—Application reopened and resolution modified.

CONDITIONS—As specified in resolution.

## THE VOTE TO REOPEN AND MODIFY RESOLUTION—

Chief Kenlon ..... 5

Negative ..... 0

Absent ..... 0

## THE RESOLUTION:

(599-25-BZ)

WHEREAS, William F. Doyle, for Maxlan Theatre Corporation, owner, filed, June 10, 1925, an application; under the

# MINUTES

building zone resolution to permit in a residence district extending from a business district the erection and maintenance of a building to be used for business and theatre purposes; premises southeast corner of Sheridan avenue and East 167th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 16, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 167th street is in a business district, and that Sheridan avenue and Sherman avenue are in residence districts; and

WHEREAS, the decision of the superintendent of buildings, rendered September 23, 1925, reads:

"1. Erection of building to be used for business and theatrical purposes in a business district extending into a residence district is contrary to provisions of building zone resolution."; and

WHEREAS, the proposed theatre building is to be of fire-proof construction, one story in height, with balcony and stores and offices on the 167th street front; with a frontage of 79 ft. 10 3/4 in. and a depth of 250 ft.; the proposed building extending 150 ft. into the residence district; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 7c of the building zone resolution; and

WHEREAS, this application was granted by the board at its meeting, March 16, 1926, on certain conditions and applicant requested an amendment and interpretation of these conditions.

*Resolved*, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall not exceed a depth at the easterly line of the plot from 167th street of 150 ft., the rear line of building to be parallel to the line of 167th street; that the exterior face of the easterly and southerly walls shall be finished with light-colored face brick; that the front elevations on 167th street and Sheridan avenue shall be finished with face brick, with architectural terra cotta or stone trimmings; that there shall be no signs, billboards or advertising display erected or maintained within the residence area of the plot nor on any portion of Sheridan avenue; the main entrance of the theatre shall be restricted to the 167th street front of the building; the building to be constructed in accordance with section 25, article 5, of the code of ordinances; all permits necessary for the prosecution of the work shall be obtained within nine (9) months and the building completed within eighteen (18) months from the date of this action.

## AREAS FIXED.

(971-26-BZ)

The chairman read a communication from Cord Meyer Development Co., requesting the board to fix an area deemed affected and within which to obtain consents to permit in a residence district the erection and maintenance of twenty-six (26) individual attached garages, for the storage of pleasure motor vehicles; premises east side of Puritan avenue, south of Queens boulevard, Forest Hills, Borough of Queens.

The following area was approved by the board:

Both sides of Martel place (76th avenue), also Puritan avenue (75th road) from Queens boulevard to Austin street.

(936-26-BZ)

The chairman read a communication from James W. Byrnes, requesting the board to fix an area deemed affected and within which to obtain consents to permit the erection of a garage for more than five (5) motor vehicles; premises 189 Hull street, Borough of Brooklyn.

The following area was approved by the board:

Both sides of Hull street from a point 100 ft. east of Stone avenue to Rockaway avenue, also the premises at rear and for a distance of 50 ft. on either side of the side lot lines of the premises in question.

## PLANS APPROVED.

## THE RESOLUTION:

(557-26-A)

WHEREAS, James McGuire, for Slater Estates, owner, filed, June 18, 1926, an appeal from an order of the fire commissioner, affecting premises 656 St. Nicholas avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 28, 1926 (Order No. 34257-LC), reads:

"14. Provide fuel oil pump or pumps of a type approved by the Board of Standards and Appeals, as per Rule 11, Section a of the Fuel Oil Rules.

"18. Provide fuel oil burner or burners of a type approved by the Board of Standards and Appeals, as per Rule 12 of the Fuel Oil Rules."

and

WHEREAS, the building is fireproof, 5 stories in height, 50 ft. by 84 ft. in area; OCCUPIED as an apartment house; and

WHEREAS, a fuel oil burning equipment has been installed, consisting of a 2,000-gallon fuel oil storage tank (buried outside the premises), a Winslow motor pump, a Winslow Industrial oil burner and the necessary valves and piping to make a complete installation; and

WHEREAS, appellant requests a temporary permit for the use of the installation, pending the board's approval of the pump and burner.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* only so far as the pump is concerned, pending the determination of the board's inspection, *on condition* that the burner and all other equipment installed complies with the requirements of the fuel oil rules.

714-26-A.

APPELLANT—William J. Gorman, for Geo. Haiss Mfg. Co., lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—381 Rider avenue and 384 Canal place, The Bronx.

APPEARANCES—

For Appellant: William J. Gorman.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE RESOLUTION:

(714-26-A)

WHEREAS, William J. Gorman, for Geo. Haiss Manufacturing Co., lessee, filed, August 18, 1926, an appeal from an order of the fire commissioner, affecting premises 381 Rider avenue and 384 Canal place, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated April 5, 1926 (Order No. 93727-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure."

and

WHEREAS, the building facing on two street fronts is non-fireproof, 2 stories (28 ft.) in height on the Canal place front, the remainder of the building being one story in height, 100 ft. by 125 ft. (approximately 11,500 sq. ft.), irregular, in area; OCCUPIED as an iron fabricating plant, 20 persons in entire premises; and

WHEREAS, appellant contends that the area of the premises is but slightly in excess of that for which standpipes are not required; that the occupancy is not hazardous and that there are no torches or open flames in the building.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be not increased in height, area or dimension, and only so long as the present occupancy and use remain substantially unchanged, and that any auxiliary fire extinguishing appliance, as directed by the fire commissioner, shall be installed.

## THE RESOLUTION:

(743-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Queen Street Realty Corp., owner, filed, September 2, 1926, an appeal from an order of the fire commissioner, affecting premises Nos. 10-24 Orchard street, L. I. City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated January 6, 1926 (Order No. 88590-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main-stairway enclosure."

and

WHEREAS, the premises consist of a plot of ground having a frontage of 350 ft. on Orchard street, 200 ft. on Jackson avenue and 300 ft. on Queens street, upon which are located a group of interconnected buildings: Building No. 1 is non-fireproof, 3 stories (49 ft.) in height, 100 ft. by 175 ft., irregular, (approximately 20,000 sq. ft.) in area; OCCUPIED: vacant at present, but to be occupied as a shoe factory; Building No. 2 is non-fireproof, 3 stories (44 ft. 6 in.) in height, 150 ft. by 100 ft. (15,000 sq. ft.) in area; subdivided into two sections by a brick wall with fireproof doors on both sides of openings therein (the area of the maximum sub-section being 10,000 sq. ft.); OCCUPIED: 1st story, manufacture of corrugated paper containers, 3 persons; the upper stories are vacant at present. Building No. 3 is fireproof, 5 stories (79 ft.) in height, 225 ft. 6 in. by 100 ft. (approximately 22,500 sq. ft.) in area; OCCUPIED as a shoe factory: 1st story, 25 persons; 2nd story, 124 persons; 3rd story, 114 persons; 4th story, 42 persons; 5th story, 212 persons. There being also a non-fireproof, 2-story office building 25 ft. by 100 ft. in area and, also, a non-fireproof, 2-story machine shop, 25 ft. by 85 ft. in area; and

WHEREAS, appellant proposes to brick up the openings between Building No. 1 and No. 2 and to brick up the openings between Building No. 1 and the machine shop and contends that the entire premises is provided with a sprinkler system, supplied by means of a 25,000-gallon gravity tank (on roof of Building No. 3), two 9,000-gallon pressure tanks and a 6-in. connection to the city main; and contends, further, that the building is protected by a fire alarm signal system with central office connections and that fire drills are conducted.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the buildings shall be not increased in height, area or dimension and that the entire premises throughout, embracing all buildings of the group, shall be equipped with an approved 2-source sprinkler system; and that Building No. 1 shall be separated from Buildings No. 2 and 3, and that any horizontal opening between Buildings No. 1 and 3 shall be equipped with approved self-closing, fireproof doors, and that there shall be no hazardous occupancy permitted or maintained in any part of the premises, and that the industrial operation throughout the premises shall be limited to shoe manufacturing.

575-26-A.

APPELLANT—A. J. Cordier, for Lalance & Grosjean Manufacturing Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—West side Canal street, 173 feet north of Chichester avenue, Woodhaven, Borough of Queens.

## APPEARANCES—

For Appellant: F. W. Kobbe and B. Burvenick.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(575-26-A)

WHEREAS, William F. Doyle, for Lalance and Grosjean Manufacturing Co., owner, filed, June 24, 1926, an appeal from an order of the fire commissioner, affecting premises on the west side of Canal street, 173 ft. north of Chichester avenue, Woodhaven, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated June 4, 1926 (Order No. 4061-LC), reads:

"1. Remove all fuel oil from the premises until a permit has been issued by the Fire Commissioner, as per Rule 16 of the Fuel Oil Rules.

"3. Discontinue the storage of fuel oil in containers other than metal tanks with all openings or connections through the top as per Rule 2 of the Fuel Oil Rules.

"4. Provide a fire wall between fuel oil storage tanks erected prior to January 18, 1924, that are located closer than one and one-quarter (1¼) tank diameters apart, the fire wall shall be built to a height of at least two (2) feet above highest tank, completely separating tanks for their full diameters or lengths, as per Rule 4, Sec. 3-c of the Fuel Oil Rules.

"6. Brace all that surfaces of rectangular fuel oil storage tank or tanks, as per Rule 5, Sec. 2-d of the Fuel Oil Rules.

"7. Provide bracing for flat heads of cylindrical fuel oil storage tank or tanks, as per Rule 5, Sec. 2-d, Fuel Oil Rules.

"8. Brace tank or tanks of over 120" in diameter by angle rings or equivalent members so as to retain their cylindrical form, as per Rule 5, Sec. 1-c, Fuel Oil Rules.

"9. Provide a hydrostatic test of fuel oil storage tank or tanks of at least 25 lbs. per sq. inch, for all riveted tanks, or as per Sec. 1-b of the Fuel Oil Rules.

"10. Provide a hydrostatic test for fuel oil storage tank or tanks of at least 25 lbs. per sq. inch for all riveted tanks, as per Rule 7, Sec. -b of the Fuel Oil Rules.

"11. Remove cross-connections permitting gravity flow from one fuel oil tank to another, as per Rule 8, Sec. 1-b of the Fuel Oil Rules.

"12. Provide a hydrostatic test of not less than 150 lbs. per square inch for all fuel oil carrying piping of a normal working pressing of less than 100 lbs. as per rule 8, sec. 3 of the Fuel Oil Rules.

"13. Provide a separate fill pipe for each fuel oil storage tank, as per Rule 8, Sec. 5-a of the Fuel Oil Rules.

"16. Provide fuel oil pump or pumps of a type approved by Board of Standards and Appeals, as per Rule 11, Sec. A of the Fuel Oil Rules.

"17. Provide fuel oil burner or burners of a type approved by the Board of Standards and Appeals as per Rule 27 of the Fuel Oil Rules.

"24. Provide an enclosure around all locked tanks

# MINUTES

with an unpierced wall and floor of approved masonry or reinforced concrete, made oilproof and waterproof and not less than 12" in thickness and also of sufficient thickness to properly support any lateral pressure and to be of lateral dimensions at least 1' greater on all sides than the outside dimension of the tank. These walls are to be carried up to a height of at least 1' above the tank or the supply in feet connections thereto, roofed over with reinforced concrete or its equivalent at least 12" thick and capable of sustaining a live load of at least 300 lbs. per square foot. If not buried below the ground, placed so as to leave a clear and open space (except for pipe connections) of at least 2' between such roof over the enclosure and the underside of the ceiling above. The roof of every enclosure shall contain a manhole with a fireproof cover properly weighted, but not fastened, in top of tank. When found impracticable to set the bottom of the tank 3' below the surface of the lowest story, the tank shall rest on steel or masonry supports, and the bottom of the tank shall be at least 1' above the floor of the enclosure and the enclosure wall and floor above specified shall be unpierced and the space below the horizontal centre line of the tank and within the enclosure formed by the surrounding unpierced wall shall have a capacity of at least 60% of the capacity of the tank. The space within the enclosure surrounding the tanks shall be at all times vented to the outer air outside of the building by iron or other fireproof conduit at least 2½" diameter connecting the enclosure at a point just above the floor level and which shall furnish above the street surface with a proper connection at that point to permit the Fire Department to flood the enclosure. A separate similar vent without Fire Department connections shall enter the enclosure just below its ceiling in accordance with Rule 4.

"27. Provide iron covers on the two rectangular tanks used for the storage of fuel oil, covers to be of the same material and strength as used in the construction of the tanks, without any other openings than those provided in Fuel Oil Rules adopted by the Board of Standards and Appeals, Rule 5, Sec. 2.

"28. Provide smoke pipes to be installed between the burners and the chimneys and any dampers in smoke pipes shall not exceed 80" of the area of the pipe. Rule 29. Necessary regulation of draft shall be accomplished by dampers in fire or ash-pit doors. Rule 29.

"29. Provide a manhole on two rectangular tanks of not less than 11" x 16", as per Rule 5, Sec. 7 of the Fuel Oil Rules."

and

WHEREAS, the building No. 57 housing 8 fuel oil storage tanks is of brick and metal construction, one story in height, 63 ft. by 30 ft., and an extension 17 ft. by 20 ft. in area; OCCUPIED for the storage of fuel oil, the total capacity of tanks being 56,242 gallons; the largest individual tank being 16,074 gallons capacity; and

WHEREAS, the appellant claims that the plant embraces a large area; that the building used for the storage of fuel oil is separated from the main buildings of the plant; that there are two fire hydrants on Canal street and one fire hydrant in the yard; that the storage tanks are cylindrically constructed of ¾ in. metal and set 2 to 4 ft. into the ground with the tops not above the street level; that the piping used is known to the trade as "standard"; furthermore, the appellant contends that the fuel oil stored has a flashpoint of 205 degrees Fahrenheit, that it is not used for commercial, power nor heating purposes; that the present use and storage of fuel oil has been safely carried on for the past 30 years; that the company is prepared to install a system for extinguishing purposes and make other improvements which do not require extensive alterations.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the use and operation of the fuel oil burning equipment on the premises shall be restricted to

industrial operation of the business operated on the premises, and *on condition* that the flash point of fuel oil shall be not less than 205 degrees Fahrenheit, and that the operation of the fuel oil burning equipment throughout the premises shall be under the supervision of a licensed engineer.

THE RESOLUTION:

(699-23-A)

WHEREAS, Loening Aero. Eng. Corp., lessee, filed, June 5, 1923, an appeal from a decision of the fire commissioner, affecting premises 436 East 31st street, Manhattan; and

WHEREAS, the decision of the fire commissioner reads:

"1. Section 74, chapter 5, code of ordinances, limits one story buildings to only 1,250 sq. ft. and side walls 15 ft. high, building is therefore classed as a frame building. Storage of gasoline or other occupancy is therefore not permitted in a frame building."

and

WHEREAS, the premises consist of a plot of ground on the bulkhead line at the East River, on which is located a one-story steel frame and sheet iron airplane hangar, 50 ft. by 40 ft. in area, and an 18 ft. by 18 ft. shed; it is proposed to install a 550-gallon gasoline tank and pump on vacant portion of property; the entire plot being covered with a concrete floor; and

WHEREAS, appellant contends that the metal structure with concrete floor should not be classified as a frame building; and

WHEREAS, this appeal was granted by the board at its meeting, July 10, 1923 and October 27, 1925, on certain conditions, and appellant requested a modification of the time limit imposed.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the gasoline storage be limited to 550 gallons, the tank to be buried below grade, access to same to be enclosed and roofed over with a corrugated metal shed; and *granted* for a temporary period not to extend beyond December 7, 1928.

## THE RESOLUTION:

(1182-25-A)

WHEREAS, J. Schneider, Sr., owner, filed, November 13, 1925, an appeal from a decision of the fire commissioner, affecting premises 147 Twelfth avenue, Long Island City, Borough of Queens; and

WHEREAS, the decision of the superintendent of buildings, rendered November 5, 1925 (Alt. Applic. No. 2437-1925), reads:

"1. Burner must be of a type approved by Board of Standards and Appeals. Examination continued when additional information is received.";

and  
WHEREAS, the building is of frame and glass sash construction, one story in height, 100 ft. by 100 ft. in area; OCCUPIED as a greenhouse; the appellant having installed an oil burning system, consisting of a 2,000-gallon storage tank, all necessary piping and valves in accordance with the fuel oil rules, except as to the burners; and

WHEREAS, the appellant has submitted plans to the fire department, which were disapproved; and

WHEREAS, the appellant claims that he is using four burners, known as the "Strong, Carlisle & Hammond Burner," which is now before the board for its consideration under Calendar No. 1046-23-S; the appellant requests a temporary permit to operate the fuel oil system, pending the approval of the burner; and

WHEREAS, this appeal was granted by the board at its meeting, March 9, 1926, for a temporary period and appellant requests a further extension of this period.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, for a temporary period of ninety days from the date of this action.

## BUILDING ZONE CASES.

621-25-BZ.

APPLICANT—McCooey and Conroy, for D. Tedesco owner.

SUBJECT—Application for reconsideration (re decision of superintendent of buildings) under sections 7a, 7b and 7c of the building zone resolution, to permit the extension from an unrestricted district into a residence district of a proposed addition to an existing garage for the storage of more than five (5) motor vehicles (previously denied).

PREMISES AFFECTED—63-67 New York avenue, Brooklyn.

THE RESOLUTION:

(573-26-BZ)

WHEREAS, John J. Dunnigan, for East Fordham Road Syndicate, Inc., owner, filed, June 24, 1926, an application, under the building zone resolution, to permit the extension from a business district into a residence district of a proposed building to be used for business purposes; premises 636 East Fordham road, southwest corner of Belmont avenue, The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 7, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East Fordham road is in a business district, Belmont avenue is in a residence district, and East 189th street is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered June 22, 1926 (N. B. 1514-26), reads:

"1. Erection of business building partly in business district and partly in residence district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 25.41 ft. on East Fordham road and 147.34 ft. on Belmont avenue; to be occupied as an auto show room and automobile storage room; and

WHEREAS, the board deemed that applicant had substantiated the bases of his application under the provisions of section 7, subdivision C, and section 21.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that the rear and gable walls shall be unpierced throughout their entire height and length; that no door opening on the Belmont avenue front shall exceed a width of 3 ft. 8 in.; any openings within the residence area district on the Belmont avenue front shall be restricted to double-hung windows, the sills of which shall be not less than 4 ft. 6 in. above sidewalk grade; that the elevations on the street fronts other than the show windows shall be finished with face brick and architectural terra cotta or stone trim; that there shall be no signs or advertising of any nature or description displayed within the residence area of the plot; and that all permits required shall be obtained within nine months and all work involved thereby to be completed within eighteen months from the date of this action.

THE RESOLUTION:

(685-26-BZ)

WHEREAS, John J. Dunnigan, for 165 Street Arcade Corp., owner, filed, August 5, 1926, an application, under the building zone resolution, to permit the extension from an unrestricted district into a business district, of a proposed garage for the storage of more than five motor vehicles; premises 2861-2869 Bailey avenue, The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 7, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Bailey avenue is in a business district, Heath avenue is in a residence district and Exterior street is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 31, 1926 (N. B. 1956-26), reads:

"1. Erection of proposed garage for storage of more than five motor vehicles in business district extending into unrestricted district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story and basement in height, with a frontage of 75 ft. and a depth of 206.62 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant had substantiated the basis of his application under the provisions of section 7, subdivision c and 21.

*Resolved*, that the board of standards and appeals does hereby *make a variation* of the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that the building shall not be erected in excess of one story above grade, and that the use of the front of premises for a depth of not less than 40 ft. other than the two runways, shall be maintained and conducted as retail shops or stores separated from the garage by walls of fireproof construction, that the gable walls shall be unpierced throughout their entire height and length; at least two skylights shall be installed in the roof, not less than 20 sq. ft. each, of fixed louvres, glazed with plain glass, provided with wire guards above and below; that there shall be no advertising signs erected or displayed other than the one projecting sign on the front of the building, that any other advertising shall be restricted to the plate glass show windows of the stores; and that the front elevation other than the store front windows shall be finished with face brick and architectural terra cotta or stone trimming; and that no portable gasoline tanks shall be operated or maintained outside the building line; and that all permits required shall be obtained within nine months and all work involved to be completed within eighteen months from the date of this action.

THE RESOLUTION:

(681-26-BZ)

WHEREAS, William F. Doyle, for Save Service Stations, Inc., owner, filed, August 4, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 8502 Rockaway boulevard, Woodhaven, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 7, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Rockaway boulevard is in a business district, Lutheran place is in a residence district and 86th street is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 31, 1926 (Pan. No. 12729-26 N. B.), reads:

"This erection of a public garage in a business district is contrary to art. 2, sec. 4, subd. a 15 of the Zone Law.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 111.19 ft. on Rockaway boulevard and 197.3 ft. on Lutheran place; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, there existed on a portion of this plot a gasoline service which was removed by the city on the widening of Rockaway boulevard and the proposed building is an improvement on conditions; and the board deemed that applicant had substantiated the basis of his application under section 21.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that the building shall not exceed one story in height above grade, that the rear and gable walls shall be unpierced throughout their entire height and length, that the exterior of the gable walls shall be finished with face brick, that the gasoline pump and tanks shall be maintained inside the lot line of the property; at the street front the structure will be erected with an open recess and store spaces not less than 35 ft. in depth; that there shall be no portable gasoline pumps permitted or operated outside the building line; that any advertising display shall be restricted to the recess portion on Rockaway boulevard and there shall be no advertising sign or display of any nature or description on the Lutheran place front of the premises; that the street elevations shall be finished with face brick and architectural terra cotta or stone trimming and that not less than five skylights shall be incorporated in the roof of the structure, glazed with plain glass, provided with wire guards above

THE RESOLUTION:

(935-19-BZ)

WHEREAS, Interboro Iron and Steel Structural Co., Inc., on behalf of Edna Cooper and Andrew E. Kreek, part owners, filed, December 10, 1919, with the board of appeals, an application under the building zone resolution, to permit in a business district the erection of a garage for more than five motor vehicles; premises 1728-1750 Bedford avenue, west side of Bedford avenue, running from Sullivan street to Malbone street, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 6, 1920, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Bedford avenue is located in a business district, that Sullivan street, east of Bedford avenue, is located in a residence district, west of Bedford avenue in a business district, and that Malbone street is located in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 8, 1919, in acting on Application No. 14915, reads:

"1. Proposition in Business Zone contrary Art. II, No. 4. Recom. denial. Denied.";

and

WHEREAS, the proposed building is to be of fireproof construction, one story in height, with a frontage on Bedford avenue of 200 ft., on Malbone street 140 ft., and on Sullivan street 100 ft.; and

WHEREAS, applicant has filed the duly acknowledged consents of the owners of 80 per cent of the property frontage deemed by the board to be affected; and

WHEREAS, originally, this application was granted by the board, January 13, 1920, under certain conditions; and

WHEREAS, the Hon. Thomas I. Sheridan, in behalf of the Harris Garage Corp., present owner, has made written request for a modification of the resolution so as to permit a drive-in entrance at the southeast corner of the building, in order that service may be rendered to its clients, on the premises rather than perform those duties on the sidewalk or roadway, and has also filed revised plans showing the proposed entrance.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that the rear wall of the structure be impierced throughout the entire length and height; that the side walls facing on both Sullivan street and Malbone street be of ornamental character constructed of pressed brick and limestone trim; that the frontage on Bedford avenue, excepting the corner formed by the intersection of Empire boulevard and Bedford avenue for a depth of 30 ft. shall be devoted to showrooms or offices; that there shall be no vehicular entrance from the Bedford avenue front, except for the corner service station at Bedford avenue and Empire boulevard;

Resolved, further, that any permits necessary for the prosecution of the work shall be obtained within 9 months and the work completed within 18 months from the date of this action.

Negative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle ..... 4

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(535-26-BZ)

WHEREAS, Carl Sherman, Esq., for Bogild Builders, Inc., owner, filed, June 9, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises east side of Jerome avenue, 165.02 ft. north of East 174th street, The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 7, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Jerome avenue is in a business district, East 174th street is in a business district and Townsend avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 3, 1926 (N. B. 978-26), reads:

"1. Erection of proposed garage of more than five motor vehicles in business district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of fireproof construction, one story in height, with a frontage of 100 ft. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant had failed to substantiate the basis of his appeal under section 21; for the reason that the only cases granted by this board on this street front granted under section 7, subdivision c.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the application be and it hereby is denied.

606-26-BZ.

APPLICANT—John J. Dunnigan, for Mary A. Klug, owner.

SUBJECT—Application for reopening, reconsideration, re application (decision of superintendent of buildings) under section 7e of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

On November 16, 1926, through council, adjoining property owners requested the reopening and reconsideration of the foregoing subject on the grounds that through error or oversight they were denied an opportunity of presenting their objections.

PREMISES AFFECTED—445-449 East 189th street, The Bronx.

APPEARANCES—

For Applicant: John J. Dunnigan.

For Opposition: James S. McDonough, Nathan Waxberg, Mrs. Donnelly, Mr. Kennedy, C. Procissi, Mr. Tilgner, of the Board of Education.

# RULES

## COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS.

*Amended Resolution Adopted by the Board of Appeals, March 16, 1920, Under Cal. No. 549-17-BZ.*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed

under the building zone resolution in the absence of any definition therein to the contrary.

*Resolved*, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

# CONCRETE RULES

## USE OF HYDRATED LIME IN CONCRETE.

Adopted by the Board of Standards and Appeals, April 19, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated for each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the

hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth*, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

This issue of the Bulletin contains, in the order given—

- Docket.
- Call of Clerk's Calendar.
- The Trial Calendar.
- Notices in Building Zone Cases.
- Minutes of Regular Meeting, December 14, 1926, at 10 a. m.
- Minutes of Regular Meeting, December 14, 1926, at 2 p. m.
- Correction.
- Fire Retarding Rules.
- Elevator Rules.
- Progress Report.

### PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, December 21, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, December 28, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, *Chairman*

### *Building Zone Applications.*

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, *Tuesday morning, January*

4, 1927, at 10 o'clock, in Room 1013, Municipal Building, on the following matters:

CAL. NO. 490-26-BZ—Application, May 28, 1926, under sections 7e and 21 of the building zone resolution, of Ferdinand Savignano, architect, on behalf of August Kuhne, owner, to permit on a plot the layout of which on the ground differs from that showing on the use district map located partly in a residence district and partly in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; and the omission of the required rear yard or equivalent; premises 8124-8202 18th avenue, Brooklyn.

CAL. NO. 412-25-BZ—Application, November 19, 1926, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Rosie Kellner, owner, to permit in a residence district the erection and maintenance of an apartment house, the first story to be used for store purposes (previously denied); premises 840 Washington avenue, northwest corner of Lincoln place, Brooklyn.

CAL. NO. 878-26-BZ—Application, October 28, 1926, under sections 7c and 21 of the building zone resolution, of O. B. Almgren, applicant, on behalf of Edwin Construction Co., Inc., owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 107-115 Crown street, Brooklyn.

CAL. NO. 889-26-BZ—Application, November 1, 1926, under sections 7e and 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Salvatore Cino, owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles and also the omission of the rear yard required by the zone resolution; premises 8-10 East 2nd street, Manhattan.

WILLIAM E. WALSH, *Chairman*.

## BOARD OF STANDARDS AND APPEALS

### REGULAR MEETING.

TUESDAY MORNING, DECEMBER 14, 1926.

Present: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon (also Deputy Chief Martin substituting).

The minutes of the regular meeting of the board, held on Tuesday morning, December 7, 1926, and the minutes of the regular meeting of the board, held on Tuesday afternoon, December 7, 1926, were approved as printed in the Bulletin No. 50, Vol. XI.

### APPEALS FROM ADMINISTRATIVE ORDERS.

737-26-A.

APPELLANT—United States Tire Company, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—1790 Broadway, Manhattan.

APPEARANCES—

For Appellant: Morris E. Dry.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Laid over to January 4, 1926, at 10 a. m., on request of appellant's representative.

947-26-A.

APPELLANT—Emmar Amusement Co., owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—306-310 West 52nd street, Manhattan.

APPEARANCES—

For Appellant: Edward Bimberg.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Laid over to January 11, 1926, at 10 a. m., on request of appellant's representative.

797-26-A.

APPELLANT—Charles August, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—1357 Plimpton avenue, The Bronx.

APPEARANCES—

For Appellant: Harold Kohn.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle ..... 4

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(797-26-A)

WHEREAS, Charles August filed, September 28, 1926, an appeal from an order of the fire commissioner, affecting premises 1357 Plimpton avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated August 18, 1926 (Order No. 35134-LC), reads:

"1. Remove all motor vehicles the fuel tanks of which are not empty.

"REASON: Dwelling occupied by other than applicant and one other tenant. Chapter 10, Section 154, Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, 2 stories in height, 20 ft. by 81 ft. 4 in. in area; OCCUPIED: cellar, one-car garage and boiler room; 1st and 2nd stories, 2 families on each story; and

WHEREAS, the appellant claims that the garage in the cellar is separated from the rest of the building by fireproof construction, an 8-inch brick dividing wall in the cellar, also,

the ceiling is of steel beams and concrete arches; furthermore, the appellant contends that the owner occupies an apartment on the 2nd story and uses the garage in the cellar to store his own pleasure car.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

804-26-A.

APPELLANT—Ferdinand Savignano, for Cherry Lane Players, lessee.

SUBJECT—Appeal from orders of fire commissioner.

PREMISES AFFECTED—38-40 Commerce street, Manhattan.

APPEARANCES—

For Appellant: Thomas G. Chamberlain, William S. Rainey, Arnold W. Lederer.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle ..... 4

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(804-26-A)

WHEREAS, Ferdinand Savignano, for Cherry Lane Players, lessee, filed, September 30, 1926, an appeal from orders of the fire commissioner, affecting premises 38-40 Commerce street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated August 30, 1926, read:

Order No. 842-F:

"1. Provide telegraphic communication with Department Headquarters as provided for by City Ordinances. Section 20, Chapter 12, Code of Ordinances."

Order No. 843-F:

"1. Provide a separate and distinct system of *Automatic Sprinklers* throughout building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals May 24th, 1917, as amended May 2, 1918, and January 21, 1919, effective February 17, 1919.";

and

WHEREAS, the building is non-fireproof, 3 stories in height, 29 ft. 11 in. by 75 ft. 5 in. in area; OCCUPIED: 1st story, theatre, 193 seats; 2nd story, property and dressing rooms; 3rd story, 2 studio apartments; and

WHEREAS, the appellant proposes to provide two 3-gallon extinguishers, two axes and two 6-foot fire hooks for orchestra; two 25-gallon tanks with buckets for property room; one fire hook, one axe, one three-gallon extinguisher, one 25-gallon tank and buckets for the dressing rooms; four 3-gallon extinguishers, four axes, six fire hooks, two 10 feet, two 15 feet and two 25 feet in length; a 40-gallon tank and buckets for the stage; furthermore, the appellant contends that the building is not occupied for theatre purposes but is used for the purpose of giving young actors, authors and new plays their initial tryouts.

*Resolved*, that the orders of the fire commissioner be and they hereby are *affirmed*, and the appeal be and it hereby is *denied*.

806-26-A.

APPELLANT—Wm. F. Doyle, for Mrs. Esther Sears, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—466 Vanderbilt avenue, Borough of Brooklyn.

APPEARANCES—

For Appellant: William F. Doyle.

For Administration: Inspector Maher of fire department.

# MINUTES

ACTION OF BOARD—Appeal denied.  
THE VOTE TO GRANT—

Affirmative: Commissioner Holland ..... 1  
Negative: Chairman Walsh, Commissioners  
Connell and Guilfoyle ..... 3  
Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(806-26-A)

WHEREAS, William F. Doyle, for Mrs. Esther Sears, owner, filed, October 1, 1926, an appeal from an order of the fire commissioner, affecting premises 466 Vanderbilt avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated March 6, 1925 (Order No. 94031-LC), reads:

"With reference to your application, dated August 13, 1924, for a permit to maintain a garage at the above location, I regret to inform you that I am without power to grant such a permit for the reason that Section 154, Chapter 10, Code of Ordinances, provides that a permit shall not be issued for a garage in a building in which more than two (2) stories above the garage are used for living apartments.

"You are therefore ordered to remove all automobiles from the premises, and discontinue the maintenance of a garage on the premises.";

and

WHEREAS, the building is non-fireproof, 4 stories in height, 20 ft. by 40 ft. in area; OCCUPIED: cellar, one-car garage and boiler room; one living apartment on each story above; and

WHEREAS, the appellant claims that the garage is separated from the rest of the cellar by an 8-inch cement block wall and a fireproof, self-closing door; that the ceiling is protected by plaster board and metal covering; furthermore, the appellant contends that the owner occupies the apartments on the three upper stories and one other tenant occupies the apartment on the first story; that it would be a great hardship to deprive the owner the right of storing her pleasure car in the cellar.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

822-26-A.

APPELLANT—John J. Gilmartin, for Joseph G. Abramson, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—40-42 East 19th street, Manhattan.

APPEARANCES—

For Appellant: John J. Gilmartin.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and  
Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

THE RESOLUTION:

(822-26-A)

WHEREAS, John J. Gilmartin, for Joseph G. Abramson, owner, filed, October 7, 1926, an appeal from an order of the fire commissioner, affecting premises 40-42 East 19th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 10, 1926 (Order No. 536-F), reads:

"1. Replace the defective shutters with proper iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30' from any opening in any other building and not in the same plane with said openings and which are not more than 50' above a neighboring roof at west and south

sides of building, or other approved protection, as per Sec. 375, Art. 18, Ch. 5 of the Code of Ordinances.";

and

WHEREAS, the building is fireproof, 9 stories and pent house in height, 43 ft. by 92 ft. in area at 1st story and 43 ft. by 84 ft. in area above; OCCUPIED: pent house, vacant at present; 9th floor, vacant at present; 8th floor, manufacturing linens, 15 persons; 7th floor, manufacturing infants wear, 15 persons; 6th floor, stock and salesroom for novelties, 10 persons; 5th floor, stock and salesroom for novelties, 10 persons; 4th floor, manufacturing knitted goods, 15 persons; 3rd floor, stock and salesroom for stationery, 5 persons; 2nd floor, stock and salesroom for notions and fancy goods, 5 persons; 1st story, restaurant; and

WHEREAS, there are four windows in the south wall on each story above the 1st story within 30 ft. of openings or within 50 ft. of the extension roof of a neighboring building to the south and, also, there are two (2) windows on each story within 30 ft. of openings in a neighboring building to the west; and

WHEREAS, appellant proposes to comply with the order in so far as it applies to the installation of shutters on the windows in the south wall of the building and, as the owner of the building to the west has provided a galvanized sheet metal fence extending across the windows in question in the west wall, appellant requests the omission of the required shutters on these windows; and

WHEREAS, the exposures in the adjoining building in this rear court are equipped with fireproof windows and a metal shield on steel frame is built up to the windows on premises under appeal.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted only so far as it affects the two windows on each story, at rear of premises in westerly gable wall, so long as conditions as to occupancy and use shall remain substantially unchanged.

826-26-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for John Rankin, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—105-109 West 71st street and 110-112 West 72nd street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and  
Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

THE RESOLUTION:

(826-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for John Rankin, owner, filed, October 9, 1926, an appeal from an order of the fire commissioner, affecting premises 105-109 West 71st street and 110-112 West 72nd street; and

WHEREAS, the order of the fire commissioner, dated May 20, 1926 (Order No. 96638-F), reads:

"1. Raise standpipe tank to 20' above the outlet on the highest story and provide a reserve of 3,500 gallons for standpipe use. Sec. 20, Ch. 12, Code of Ordinances.";

and

WHEREAS, the building is fireproof, 12 stories (150 ft.) in height, 63 ft. frontage on 71st street, extending through the block 204 ft. 4 in. at the first story, and 50 ft. frontage on

# MINUTES

72nd street; above the first story the building is divided into two wings by a court across the centre of the lot; OCCUPIED as a hotel; and

WHEREAS, the appellant claims that the present standpipe system is connected to both 71st and 72nd street mains, cross connected at the cellar, with siamese connections on each street front; a rising standpipe line extending up to a roof tank on each wing of the building, of 3,000 and 4,000 gallon capacity, both tanks are connected to the house supply having a 2,000 gallon reserved for standpipes on the south wing, and a 3,150 gallons reserved for standpipes on the north wing; the system is also supplied by means of automatic steam pumps drawing from a 1,500-gallon suction tank in the cellar; and in addition a Worthington fire pump; and

WHEREAS, the appellant contends that the difference in height of roof tanks required by Fire Department Order No. 96638-F is small, in that the bottom of tank on south wing is 17 ft. above and on the north wing is 18 ft. above the outlet in the 12th story.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* as to the height of the tanks above outlets on condition that the pent house as now existing and occupied shall not be increased in height or area; that a 2½-gallon approved fire extinguisher shall be maintained in the corridor of each pent house section; that the house supply from the tank shall be taken from the outside of the tanks, maintaining a reserve of not less than 3,500 gallons for a standpipe supply.

828-26-A.

APPELLANT—Sallie Rosenberg, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—1359 Plimpton avenue, The Bronx.

APPEARANCES—

For Appellant: Robert L. Rubenstein, Edward Rosenberg.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Absent .....	0

THE RESOLUTION:

(828-26-A)

WHEREAS, Sallie Rosenberg, owner, filed, October 26, 1926, an appeal from an order of the fire commissioner, affecting premises 1359 Plimpton avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated August 14, 1926 (Order No. 35084-LC), reads:

"Your application for a permit for a non-storage garage has been denied and you are therefore ordered to:

"1. Remove all motor vehicles the fuel tanks of which are not empty.

"REASON: Dwelling occupied by other than applicant and one other tenant. Chapter 10, Section 154, Code of Ordinance.";

and

WHEREAS, the building is non-fireproof, 2 stories in height, 20 ft. by 82 ft. 4 in. in area; OCCUPIED: cellar, one-car garage; 1st and 2nd stories, two apartments on each story; and

WHEREAS, the appellant claims that the garage in the cellar is entirely separated from the rest of the cellar by an 8-inch brick wall; that the ceiling is constructed of steel beams and 6-inch concrete arches; that the owner occupies the apartment immediately above the garage, the other apartment immediately above the garage on 2nd story is occupied by a tenant; furthermore, the appellant contends that the superintendent of buildings issued a certificate of occupancy, March 12, 1926, and the tenement house department issued a similar certificate of occupancy, March 13, 1926, for the

legal occupancy comprising 4 living apartments and a garage.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

837-26-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Edward E. Rieck Co., Inc., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—South east corner of Nelson avenue and Van Dam street, L. I. City, Borough of Queens.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(837-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Edward E. Rieck Co., Inc., owner, filed, October 13, 1926, an appeal from an order of the fire commissioner, affecting premises southeast corner of Nelson avenue and Van Dam street, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated February 10, 1926 (Order No. 89350-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.";

and

WHEREAS, the building is fireproof, 3 stories and basement (52 ft. 4 in.) in height, 75 ft. by 180 ft. and an extension 25 ft. by 30 ft., about 14,000 sq. ft. in area; OCCUPIED for the manufacture of ice cream, 42 persons in all; and

WHEREAS, the appellant claims that the building faces three streets, with a 25-foot driveway along the fourth side; that the building is equipped with 12 fire extinguishers and an American District watchmen's service; that the largest open floor area at basement story is 5,500 sq. ft.; at 1st story, 5,800 sq. ft.; at 2nd story, 7,800 sq. ft., and at 3rd story, 12,000 sq. ft.; that there is a gas shut-off valve on the outside of the building, also a fire hydrant directly opposite the premises on Nelson avenue; furthermore, the appellant contends that the greater part of the floors of these premises are continually running with water due to the nature of business conducted therein.

Resolved, that the decision of the fire commissioner be and it hereby is *modified* and the appeal be and it hereby is *granted on condition* that the building be not increased in height, area or dimension and so long as present use and occupancy in the single tenancy and operation shall remain unchanged, and that all horizontal openings be equipped with self-closing, fireproof doors with the exception of the openings to loading platform which are now equipped with rolling steel shutters.

BUILDING ZONE CASES.

556-26-BZ.

APPLICANT—Herbert Ascher, substituted for John L. Buckley, for George Ehret, owner.

SUBJECT—Application (re decision of superintendent of buildings) under section 21 of the building zone resolution, to permit partly in a residence district and partly in a business district the erection and maintenance of more than five (5) individual garages, and also to permit in a busi-

# MINUTES

ness district the erection and maintenance of a gasoline selling station.

## APPEARANCES—

For Applicant: Philip J. Sinnott.

For Opposition: None.

ACTION OF BOARD—Application reopened and set for calendar call December 28, 1926, at 2 p. m.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

813-26-BZ.

APPLICANT—Samuel Rosenblum, for Rosheg Realty Corp., owner.

SUBJECT—Application (re decision of tenement house commissioner) under section 21 of the building zone resolution, to permit in a residence district the erection and maintenance of a building to be used as a store on the first story and dwellings as above.

PREMISES AFFECTED—1642 Benson avenue and 86 Bay 14th street, Brooklyn.

## APPEARANCES—

For Applicant: Samuel Rosenblum, Joseph Esberg.

For Opposition: Joseph Corral, Rose Gambaro, Mrs. Bono.

ACTION OF BOARD—Application denied.

## THE VOTE TO GRANT—

Affirmative: Deputy Chief Martin .....	1
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	4
Absent .....	0

## THE RESOLUTION:

(813-26-BZ)

WHEREAS, Samuel Rosenblum, for Rosheg Realty Corp., owner, filed, October 5, 1926, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a building to be used as a store on the first story and dwellings above; premises 1642 Benson avenue and 86 Bay 14th street, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 14, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Bay 14th street, Bay 13th street and Benson avenue are in residence districts; and

WHEREAS, the decision of the tenement house commissioner, rendered August 25, 1926 (N. B. Plan No. 648-1926), reads:

"15. Amendment and plan filed 8/24/26 not acceptable or further considered, as proposed store located within a residential district is unlawful and in violation of Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, 3 stories in height, with a frontage of 20 ft. on Bay 14th street and 79 ft. 4 in. on Benson avenue; to be occupied as a dwelling and store; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the decision of the tenement house commissioner be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

496-26-BZ.

APPLICANT—William F. Doyle, for The Debb Corporation, owner.

SUBJECT—Application (re decision of superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles

PREMISES AFFECTED—South east corner of Jerome avenue and East Van Cortlandt avenue, The Bronx.

## APPEARANCES—

For Applicant: William F. Doyle and Paul Cannon.

For Opposition: Daniel V. Sullivan, G. L. Carroll and others.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	4
Negative: Chief Kenlon .....	1
Absent: .....	0

## THE RESOLUTION:

(496-26-BZ)

WHEREAS, William F. Doyle, for The Debb Corp., owner, filed, June 2, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises southeast corner of Jerome avenue and East Van Cortlandt avenue, The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 14, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Jerome avenue and East Van Cortlandt avenue are in business districts and Villa avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 21, 1926, reads:

"Erection of the proposed garage for storage of more than five motor vehicles in business district is contrary to provisions of the Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 61.59 ft. on Jerome avenue and 118.39 ft. on East Van Cortlandt avenue; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that

# MINUTES

the application be and it hereby is *granted on condition* that the building to be erected shall be restricted to a one-story structure above grade; that the easterly and southerly gable walls shall be unpierced throughout their entire height and length; that there shall be no vehicular entrance incorporated on the East Van Cortlandt avenue front within twenty-five (25) ft. of the easterly gable wall; that the location of any gasoline storage equipment installed shall be restricted to the Jerome avenue front and located at the southerly end of the structure; that the elevations on Van Cortlandt avenue and Jerome avenue street fronts shall be finished with face brick and architectural terra cotta or stone trimmings; that there shall be no signs erected or advertising displayed other than one electric projecting sign restricted to the Jerome avenue front; that all permits necessary for the prosecution of the work shall be obtained within nine months and any work involved completed within eighteen months from the date of this action.

794-26-BZ.

APPLICANT—Wm. F. Doyle, for Milef Realty Corp., owner.

SUBJECT—Application (re decision of superintendent of buildings) under section 21 of the building zone resolution, to permit in a  $2\frac{1}{2}$  times height district the erection and maintenance of the street walls in excess of the height permitted by the zone resolution.

PREMISES AFFECTED—65-69 Broad street and 30-36 Beaver street, Manhattan.

APPEARANCES—

For Applicant: William F. Doyle, Abraham E. Leafcourt.

For Opposition: Edmund L. Bayliss, Peter McAllister, Albert S. Ridley, Winthrop W. Aldrich, George W. Jaques, Henry H. Curran, Theodore E. Videto, William Shirden.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Holland and Guilfoyle and Chief Kenlon	4
Negative: Commissioner Connell	1
Absent	0

THE RESOLUTION:

(794-26-BZ)

WHEREAS, William F. Doyle, for Milef Realty Corp., owner, filed, September 27, 1926, an application, under the building zone resolution, to permit in a  $2\frac{1}{2}$  times height district the erection and maintenance of the street walls of a proposed building in excess of the height permitted by the zone resolution; premises 65-69 Broad street and 30-36 Beaver street, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 14, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Beaver street, Broad street and Marketfield street are in  $2\frac{1}{2}$  times height district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 14, 1926 (N. B. 427-1926), reads:

"1. Proposed height is excessive. Art. 3 Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of fireproof construction, 25 stories in height, with a frontage of 112 ft. 2 in. on Beaver street, 99 ft. 8½ in. on Broad street and a depth of 120 ft. 6 in., to be occupied as stores and offices; it is proposed to erect the street walls of a corner building 248 ft. in height without a setback; above this height it is proposed to erect 5 stories, setting back 20 ft. for an additional height of 57 ft. 6 in. Under the zone resolution the street walls may be erected 145 ft. in height, the width of

the street being 58 ft., then set back 1 ft. for every additional 5 ft. in height; and

WHEREAS, the property is located in an unrestricted use district; and

WHEREAS, the board deemed, in the exercise of its discretion, that the proposed building as restricted would more equitably protect adjoining properties and minimize any fire risk than a structure erected with setbacks, also 60 per cent of the frontage of the property faces on open public spaces, he was entitled to relief from the strict application of the height regulations under section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby *make a variation* in the application of the height district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that no part or portion of any building erected on this property shall exceed the fixed height throughout of two hundred and forty-eight ft. (248 ft.) above curb level; that the use and occupancy of the premises shall be restricted, confined and limited to such uses only as are permitted in a business use district; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

108-26-BZ.

APPLICANT—Eugene de Rosa, for Emerdyke Realty Corp., owner.

SUBJECT—Application (re decision of superintendent of buildings) under sections 7-b and 21 of the building zone resolution, to permit the extension from a business district into a residence district of a proposed theatre building.

PREMISES AFFECTED—4915-4923 Broadway, Manhattan.

APPEARANCES—

For Applicant: J. Henry Walters.

For Opposition: Helen C. Williams, Dr. Barringer and Mrs. Barringer.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon	5
Negative	0
Absent	0

THE RESOLUTION:

(108-26-BZ)

WHEREAS, Eugene DeRosa, for Emordyke Realty Corp., owner, filed, February 5, 1926, an application, under the building zone resolution, to permit the extension from a business district into a residence district of a proposed theatre building; premises 4915-4923 Broadway, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 14, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Broadway is in a business district, Cooper street is in a residence district and West 207th street is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 26, 1926, reads:

"1. The proposed use or occupancy for theatre purposes of that part of the lot which extends into a residence district is prohibited by the Building Zone Resolution, Article 2, Section 3. Reconsideration denied.";

and

WHEREAS, the proposed building is to be of fireproof construction, one story, 50 ft. in height, with a frontage of 163 ft. and a depth of 138 ft.; to be occupied as theatre and stores; and

# MINUTES

WHEREAS, the board deemed that the applicant had substantiated the basis of his application under the provisions of section 7, subdivision "b" and section 21.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that a rear court of not less than 12 ft. in depth for the entire width of the premises shall be maintained at the rear of the premises; that the structure from the Broadway building line shall not exceed a depth of 138 ft.; that any door openings in the rear wall shall be restricted to emergency exits, required under the building code regulations; that the entrance to the stage for the operation and conduct of the theatre, its uses and operators shall be located in the southerly gable wall, within 50 ft. of the Broadway building line; that any windows opening on the rear court shall be glazed with translucent wire glass; that there shall be no roof sign erected beyond 50 ft. of the Broadway building line; that the exterior exposed surfaces of the rear and southerly gable walls shall be finished with light-colored face brick; that there shall be no advertising display signs or billboards of any nature or description permitted or maintained on the southerly gable wall nor the rear wall; that the structure shall be erected in accordance with Article 25 of the building code; and that all permits required shall be obtained within nine months and that any work involved thereby shall be completed within eighteen months from the date of this action.

831-26-BZ.

APPLICANT—Edward P. Doyle, for Mrs. L. R. Penn, Elizabeth Haggerty and Arthur Hummerstone, owners.

SUBJECT—Application (re order of superintendent of buildings) under section 21 of the building zone resolution, to permit in an "E" area district the maintenance of a building erected along the street line of the lot instead of setting back as required by the zone resolution.

PREMISES AFFECTED—South east corner of Lyons avenue and Ditmars Boulevard, East Elmhurst, Borough of Queens.

APPEARANCES—

For Applicant: Edward P. Doyle and Elizabeth Haggerty.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(831-26-BZ)

WHEREAS, Edward P. Poyle, for L. R. Penn, Elizabeth Haggerty and Arthur Hummerstone, owners, filed, October 11, 1926, an application, under the building zone resolution, to permit in an "E" area district the maintenance of a building erected along the street line of the lot instead of setting back as required by the zone resolution; premises southeast corner of Lyons avenue and Ditmars boulevard, East Elmhurst, Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 14, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Ditmars boulevard, Lyons avenue and Butler street are in "E" area districts and also residence districts; and

WHEREAS, the order of the superintendent of buildings, rendered August 23, 1926, reads:

"You will please take notice that there exists a violation of the Building Code at the premises hereinafter described, in that

"Building is listed in "E" district, front of building is on building line (2 attached buildings).";

and

WHEREAS, the proposed building is to be of non-fireproof construction, 2½ stories in height, with a frontage of 44 ft. and a depth of 58 ft.; to be occupied as a dwelling; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship, in view of the fact that adjoining and adjacent buildings on same street front throughout are built to the building line and this property is the only one on the block affected by the zoning amendment of March 14, 1924, and has filed the consents of all neighboring property owners.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the area district regulations of the building zone resolution and that the application be and it hereby is *granted*, only so far as it affects the setback requirement from the building line, *on condition* that the requirements of the building zone resolution be complied with in all other respects, and that all permits required for the prosecution of the work shall be obtained within sixty days and the work completed within six months from the date of this action.

621-25-BZ.

APPLICANT—McCooey and Conroy, for D. Tedesco, owner.

SUBJECT—Application for reconsideration (re decision of superintendent of buildings) under sections 7a, 7b and 7c of the building zone resolution, to permit the extension from an unrestricted district into a residence district of a proposed addition to an existing garage for the storage of more than five (5) motor vehicles (previously denied).

PREMISES AFFECTED—63-67 New York Avenue, Brooklyn.

APPEARANCES—

For Applicant: John H. McCooey, Jr.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(621-25-BZ)

WHEREAS, McCovey and Conroy, substituted for C. Alfred Foster, for D. Tedesco, owner, who filed, June 16, 1925, an application, under the building zone resolution, to permit the extension from an unrestricted district into a residence district of a proposed garage for the storage of more than five motor vehicles; premises 63-67 New York avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 14, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Atlantic avenue is in an unrestricted district and that Pacific street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 7, 1925, reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3.

# MINUTES

"The erection of a public garage for more than five motor vehicles partly in a residential district (20 ft.)."; and

WHEREAS, the proposed building is of non-fireproof construction, two stories and cellar in height, with a frontage of 60 ft. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, this application was denied by the board at its meeting, May 25, 1926, and reopened by vote of the board at its meeting, October 26, 1926; and

WHEREAS, the board deemed that applicant was entitled to relief under section 7b of the building zone resolution and also under section 21 on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that the height of the building shall be restricted to two stories above grade of the New York avenue curb level; that the building shall be constructed fireproof throughout; that a rear yard shall be maintained, not less than 10 ft. in depth, for the entire width of the premises, at the second story level; that the gable walls shall be unpierced throughout their entire height and length; that fixed louvre ventilators, attached to the rear wall above the roof of the first story extension, shall be provided; that fireproof windows, with metal frames and sash, glazed with wire glass, shall be provided on the rear of the second story, with not more than one ventilator to each sash; that there shall be no vehicular entrance within the residence use area of the premises; that no sign or advertising of any nature or description shall be permitted within the residence use area of the premises; that not more than one electric projecting sign, indicating the title of the garage, shall be permitted on the street front; that the exterior of the southerly gable wall shall be finished with light-colored face brick; that the front of the building shall be finished with face brick and architectural terra cotta or stone trimmings; that any gasoline storage equipment installed shall be located at the extreme northerly end of the premises at the street front; that a return of the elevation drawings shall be made to the board for approval before submitting them to the superintendent of buildings; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

647-26-BZ.

APPLICANT—Levy & Berger, for Shula Weiman, owner.

SUBJECT—Application (re order of tenement house commissioner) under section 21 of the building zone resolution, to permit in a residence district the maintenance of the first story for business (store) purposes.

PREMISES AFFECTED—327 Kosciusko street, Borough of Brooklyn.

APPEARANCES—

For Applicant: Joseph Levy, Jr.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

THE RESOLUTION:

(647-26-BZ)

WHEREAS, Levy and Berger, for Shula Weiman, owner, filed, July 27, 1926, an application, under the building zone resolution to permit in a residence district the maintenance

of the first story for business (store) purposes; premises 327 Kosciusko street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 14, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Kosciusko street is in a residence district; that DeKalb avenue is in a business district, and Throop avenue is in a business district; and

WHEREAS, the order of the tenement house commissioner, rendered June 28, 1926, reads:

"In violation of Section 3 of Article 2 of the Building Zone Regulations the premises are used for business purposes in that:

"A. Grocery business being conducted in store on 1st story.";

and

WHEREAS, the existing building is of frame construction, 3 stories in height, with a frontage of 25 ft. and a depth of 47 ft. at 1st story and 31 ft. above; to be occupied as store and tenement; and

WHEREAS, there exists between this premises and Throop avenue, on intervening properties throughout, business and store use, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted*, only so far as it affects the front room on the ground floor of this premises, for the conduct of a retail candy shop, operated by the owner and occupant of the premises.

747-26-BZ.

APPLICANT—Norman N. Nacman, for Dora A. DeWaltoff, owner.

SUBJECT—Application (re decision of tenement house commissioner) under section 21 of the building zone resolution, to permit in an "E" area and also residence district the omission of the required set back and also the occupancy of a greater portion of the lot than that permitted by the zone resolution.

PREMISES AFFECTED—Southeast corner of Ridge Boulevard and 87th street, Brooklyn.

APPEARANCES—

For Applicant: Norman N. Nacman, Dr. DeWaltoff, Jacob Lubroth.

For Opposition: Anthony B. Parascandola, Edward X. Modocpuise and others.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Connell and Holland and Chief Kenlon	4
Negative: Commissioner Guilfoyle .....	1
Absent .....	0

THE RESOLUTION:

(747-26-BZ)

WHEREAS, Norman N. Nacman, for Dora DeWaltoff, owner, filed, September 3, 1926, an application, under the building zone resolution, to permit in an "E" area and also residence use district the omission of the required set back and the occupancy of a greater portion of the lot than that permitted by the zone resolution; premises southeast corner of Ridge boulevard and 87th street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 14, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

# MINUTES

WHEREAS, the use district maps accompanying the building zone resolution show that 87th street is in an "E" area and residence use district, and that 88th street is in a "C" area and residence use district; and

WHEREAS, the decision of the tenement house commissioner, rendered July 1, 1926 (N. B. 651-26), reads:

"1. These premises are located in an "E" residential district and building is not shown 10' from line of streets also courts and percent of lot occupied not shown to conform to requirements of these districts. Violation zone resolutions.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, 6 stories in height, with a frontage of 100 ft. on Ridge boulevard and 90 ft. on 87th street, to be occupied as an apartment house; it is proposed to omit the 10 ft. set back from the building line and to occupy approximately 84 per cent of the lot on all stories; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the area district regulations of the building zone resolution and that the application be and it hereby is granted on condition that the building, throughout its entire length, on the 87th street front, shall be set back 10 ft. from the building line, and that all permits necessary for the prosecution of the work shall be obtained within 9 months and the building completed within 18 months from the date of this action.

761-26-BZ.

APPLICANT—Charles Kreymborg & Son, for Halpern Construction Co., Inc. owner.

SUBJECT—Application (re decision of superintendent of buildings) under sections 7b and 7c of the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a building for store occupancy in part of first story.

PREMISES AFFECTED—1301-1307 Walton avenue and 24-32 Clarke place, The Bronx.

THE RESOLUTION:

(761-26-BZ)

WHEREAS, Chas. Kreymborg & Son, for Halpern Construction Co., Inc., owner, filed, September 15, 1926, an application, under the building zone resolution, to permit in a residence district, extending from a business district, the erection and maintenance of a building for store occupancy in part of the first story; premises 1301-1307 Walton avenue and 24-32 Clarke place, The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 14, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Walton avenue is in a residence district, that Clarke place is in a residence district, and that East 169th street is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 20, 1926 (N. B. 1791-1926), reads:

"1. Proposed stores partly in residence district. Same contrary to Zoning Resolution.";

and

WHEREAS, the proposed building is of non-fireproof construction, 6 stories in height, with a frontage of 96 ft. ¼ in. on Walton avenue, 109 ft. 8⅝ in. on Clarke place, and a depth of 95 ft.; to be occupied as stores and apartments; and

WHEREAS, the board deemed that applicant was not entitled to relief under sections 7b and 7c of the building zone resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and that the application be and it hereby is denied.

646-26-BZ.

APPLICANT—Palmer & Serles, for Arthur B. Walsh, for 510 Park Avenue Corp., owner.

SUBJECT—Application for reopening, reconsideration, re application (decision of superintendent of buildings) under sections 7c and 21 of the building zone resolution, to permit in a residence district the conversion of occupancy of part of the first story from a conforming use to a business use.

PREMISES AFFECTED—508-518 Park avenue, Manhattan.

APPEARANCES—

For Applicant: A. R. Palmer.

For Opposition: None.

ACTION OF BOARD—Application reopened and resolution amended.

CONDITIONS—As specified in resolution.

THE RESOLUTION:

(646-26-BZ)

WHEREAS, Arthur B. Walsh, for 510 Park Avenue Corp., owner, filed, July 26, 1926, an application, under the building zone resolution, to permit in a residence district the conversion of occupancy of part of the first story from a conforming use to a business use; premises 508-518 Park avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 14, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Park avenue is in a residence and business district; that East 60th street is in a business district, and that East 59th street is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 9, 1926 (Certificate of Occupancy), reads:

"Relative to application for Certificate of Occupancy for use of 1st floor of above premises for real estate office, we beg to state that application has been disapproved for the reason that the Building Zone Resolution prohibits the use of any part of a building which is situated in a residence district for business purposes.";

and

WHEREAS, the existing building is of fireproof construction, 13 stories in height, with a frontage of 100 ft. 5 in. and a depth of 120 ft.; to be occupied for business use in the first story facing Park avenue and apartments above; and

WHEREAS, the board of standards and appeals under Cal. No. 1099-24-BZ permitted a variation in the application of the use district regulations only so far as the first story was affected on condition that the business use and occupancy of the premises on the first story be restricted and limited to the conduct and operation of a public bank; that there shall be no commercial delivery exit or entrance operated or maintained within the residence area of this property; that the applicant shall file with this board and the superintendent of

# MINUTES

buildings a stipulation agreeing to restrict the conduct of business to the 1st story and that the business use shall be limited to a public bank; that counsel shall make a return to this board of such stipulation and shall file same before applying for approval of plans to the superintendent of buildings; and that all permits necessary for the prosecution of the work shall be obtained within nine months and the work forwarded to completion without interruption or delay; and

WHEREAS, applicant now requests a modification of the terms of the original resolution to permit other than bank use within the same area of 1st floor originally modified on the Park avenue front.

*Resolved*, that the board of standards and appeals does hereby *modify* the resolution adopted under Cal. No. 1099-24-BZ, October 28, 1924, *on condition* that the original resolution shall be unchanged so far as the corner store area is concerned; and that the space, south of the main entrance, first story, may be used for business purposes, the use to be restricted to the conduct of a real estate business office or stock brokerage office; that no advertising of any nature or description or signs shall be erected on the outside of the building and that the existing architectural design shall remain unchanged; that any lettering indicating the title of the business be restricted to the plate glass panels of the store entrance doors only.

546-26-BZ.

APPLICANT—John J. Dunnigan, for William H. Booth, owner.

SUBJECT—Application (re decision of superintendent of buildings) under section 7-g of the building zone resolution, for the maintenance of a public garage for the storage of more than five (5) motor vehicles in a business district.

PREMISES AFFECTED—2236-2238 East 177th street, The Bronx.

APPEARANCES—None.

ACTION OF BOARD—Application dismissed.

THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and  
Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

THE RESOLUTION:

(546-26-BZ)

WHEREAS, John J. Dunnigan, architect, for William H. Booth, owner, filed, June 15, 1926, an application, under the building zone resolution to permit in a business district the erection of a garage for the storage of more than five motor vehicles; and

WHEREAS, there is on this street between the intersecting streets a public school and a supreme court decision has held that the board has no discretion in the matter of garages on school streets.

*Resolved*, that the application be and it hereby is *dismissed*.

AREA FIXED.

(659-26-BZ)

The chairman read a communication from Michael Schneideman, requesting the board to fix an area deemed affected and within which to obtain consents to permit the erection and maintenance of a gasoline selling station; premises northeast corner of Woodhaven boulevard and Flynn avenue, Howard Beach, Long Island, Queens.

The following area was approved by the board:

Both sides of Woodhaven boulevard from Egan avenue to a point 200 ft. south of Flynn avenue.

Adjourned 4.40 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

THE RESOLUTION:

(768-26-S)  
WHEREAS, Robert Teichman, for John L. O'Connor, trustee, care of Marston & Co., owner, filed, September 16,

1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 39-41 West 29th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 25, 1926 (Order No. 93304-LD), reads:

"1. Provide safe and unobstructed egress from the lower termination of the exterior enclosed fireproof stairway by constructing a fireproof passageway with an unobstructed width of at least 44" throughout leading to the street, independent of the other exits from the building, adequately lighted at all times during working hours, or by means of providing access to an open area having communication with the street, as per Sec. 266 & 270 of the Labor Law."

and

WHEREAS, the building is fireproof, 12 stories in height, 50 ft. by 89 ft. 9 in. in area; OCCUPIED as a tenant factory, about 15 persons on each story; EQUIPPED with a sprinkler system; EXITS: an interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; an exterior enclosed fireproof stairway on the rear of the building, extending from the roof to the 2nd story balcony, which balcony extends across the rear of the building connecting with a fireproof hall, leading to the interior stairs, thence to the street through entrance hall; ROOFS of adjoining buildings: 90 ft. lower; and

WHEREAS, the petitioner contends that the new building plans and application No. 414 was filed with the superintendent of buildings on September 16, 1913; that the two present means of egress were approved; also new building application No. 949 was filed with the fire commissioner in August of 1913; furthermore, the petitioner claims that the Fire Department Order No. 93304-LD, calling for an independent fireproof passageway applies to buildings erected after October 1, 1913.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* only so far as it affects the egress from the termination of the rear, fireproof, enclosed stairway, *on condition* that an unobstructed passageway shall be maintained across the rear of the building at the second story level connecting with an unpierced, fireproof passageway to the interior stairway of the building, also connecting with the existing fire escape on the adjoining premises to the west, and that the occupancy shall be limited to the legal capacity of the interior stairway.

779-26-S.

PETITIONER—Julius Eckmann, for Estate of Edw. M. Brown, owner; John G. Agar, trustee.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—45 West 46th street, Manhattan.

APPEARANCES—

For Petitioner: Julius Eckmann.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE RESOLUTION:

(779-26-S)  
WHEREAS, Julius Eckmann, for Estate of Edward M. Brown, owner, filed, September 21, 1926, a petition for variation from the requirements of the labor law, as cited in an

# MINUTES

order of the fire commissioner, affecting premises No. 45 West 46th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 23, 1926 (Order No. 99854-LD), reads:

"1. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.

"Among the defects noted are the following: No safe egress to street from lowest termination. No fireproof windows on course of fire escape on 3rd, 4th and 5th stories.

OR

"Comply with the modification as stipulated in Resolution of the Board of Standards and Appeals, Calendar No. 1362-17-S.";

and

WHEREAS, the building is non-fireproof, 5 stories in height, 20 ft. by 95 ft. in area at 1st story, 20 ft. by 88 ft. in area at 2nd story, and 20 ft. by 56 ft. in area above; OCCUPIED: 1st story, manufacture of shirts, 12 persons; 2nd story, photographer, 5 persons; 3rd, 4th and 5th stories, manufacture of clothing, 8 persons on each story; EXITS: an interior, wooden stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; a fire escape on the rear of the building, having non-fireproof openings at the 3rd, 4th and 5th stories and fireproof openings at the 1st and 2nd stories along the course thereof, extending from the roof to the west yard court; no legal means of egress from the termination of the fire escape; ROOFS of adjoining buildings on the same level; and

WHEREAS, the petitioner proposes to provide safe egress from the termination of rear fire escapes to the adjoining yard at west and through the hallway of adjoining building at west to the street; the petitioner claims that the windows on the course of the rear fire escapes are provided with iron shutters; that the building is small and there are less than 25 persons above the 2nd story.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects the egress from the termination of the fire escape, on condition that free and unobstructed egress shall be maintained from the termination of the fire escape on the 3rd story extension roof to the adjoining premises to the east and that a balcony fire escape with 60-degree stairs shall be provided at the second story level rear extension to the roof of the extension, and a 60-degree stairs to yard level with an unfastened door provided at yard level for egress to the adjoining premises to the west; and, on condition that the occupancy at no time shall exceed twenty-five (25) persons above the first story.

783-26-S.

PETITIONER—Cordley and Hayes, for Walter Baker & Company, lessee.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—9 Leonard street and 155-159 Franklin street, Manhattan.

THE RESOLUTION:

(783-26-S)

WHEREAS, Cordley & Hayes, for A. C. Bechstein, owner, filed, September 22, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 9 Leonard street and Nos. 155-159 Franklin street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 31, 1926 (Order No. 938-LF), reads:

"1. Install an adequate interior electric fire alarm system in accordance with the rules of the Board of Standards and Appeals and the enclosed approved layout.";

and

WHEREAS, the building is non-fireproof, 6 stories in height, 50 ft. frontage on Leonard street, 85 ft. frontage on Franklin street by 125 ft. in depth; OCCUPIED: 1st story, shipping; 2nd and 3rd stories, offices, 22 persons on each story; 4th story, storage, 4 persons; 5th story, packing department, 8 persons; 6th story, painting and decorating water coolers 5 persons; EXITS: an interior wooden stairway, extending from the 1st story to top story, enclosed in fire retarding partitions with fireproof doors (except one wooden door) at openings; a fire escape on each of the two street fronts of the building, having fireproof openings along the course thereof, extending from the top story to 2nd story and drop ladder to sidewalk; and

WHEREAS, the petitioner contends that no manufacturing is done in the building except the 6th story where water coolers are painted and decorated, only five persons are engaged at such work.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the petition be and it hereby is denied.

719-26-S.

PETITIONER—Edward P. Doyle, for Buckley Newhall Co., Inc., owner.

SUBJECT—Variation of the labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—709-711 Sixth avenue, Manhattan.

APPEARANCES—

For Petitioner: Edward P. Doyle.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE RESOLUTION:

(719-26-S)

WHEREAS, Edward P. Doyle, for Buckley Newhall Co., Inc., owner, filed, August 20, 1926, a petition for variation of the labor law as cited in decision of the superintendent of buildings, affecting premises 709-711 Sixth avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated July 19, 1926 (Order No. 3453), reads:

"You are hereby notified that the building known as No. 709-11 Sixth Ave., in the Borough of Manhattan, does not conform to Section 5 of the Building Code in the respects noted below:

"In that of occupying the 6th and 11th floors for factory use, contrary to Certificate of Occupancy 1826, which calls for stores, showrooms and offices.

"You are hereby directed to immediately discontinue the said use of the above described building until you obtain a new Certificate of Occupancy from the Superintendent of Buildings.";

and

# MINUTES

WHEREAS, the building is fireproof, 12 stories in height, 98 ft. 9 in. by 125 ft. in area; OCCUPIED: 1st, 2nd and 3rd stories, furniture showrooms and offices, total of 40 persons; 4th and 5th stories, offices, 150 persons per story; 6th story, offices, 35 persons, and photograph studios, 10 persons; 7th, 8th, 9th and 10th stories, offices, 65 persons per story; 11th story, offices, 50 persons, and blue print establishment, 12 persons; 12th story, offices, 50 persons; EQUIPPED with a sprinkler system; EXITS: three interior, fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, petitioner contends that the building is adequately provided with exits; that the photograph studio on the 6th story occupies but 2,000 sq. ft. and the blue print business on the 11th story occupies only 2,200 sq. ft. of space and contends, further, that when the leases of these two firms expire, the factory use will be discontinued (Leases of factories in question have two more years to run).

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects that portion of the 6th story now occupied as a photographic studio and like and similar portion of the 11th story occupied as a blueprint developing studio, on condition that the space so occupied shall be enclosed in partitions constructed of hardburned terra cotta blocks, equipped with self-closing, fireproof doors at openings, and that such use and occupancy shall be discontinued on or before May 1, 1927, and the building maintained in accordance with the stipulations of the certificate of occupancy now in force.

760-26-S.

PETITIONER—I. Gerber, owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—177-179 Stagg street, Brooklyn.

APPEARANCES—

For Petitioner: Otto C. Infangar.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(760-26-S)

WHEREAS, I. Gerber, owner, filed, September 15, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises Nos. 177-179 Stagg street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 15, 1925 (Order No. 83825-LD), reads:

"1. Provide a secondary means of egress on 1st story remote from front entrance. Sec. 371 of the Labor Law."

and

WHEREAS, the building is non-fireproof, 3 stories in height, 50 ft. 2½ in. by 100 ft. in area at 1st and 2nd stories and 50 ft. 1½ in. by 80 ft. in area above; OCCUPIED for the manufacture of aprons and gloves: 1st story, 50 persons; 2nd story, 50 persons; 3rd story, 25 persons; EXITS: an interior, fireproof stairway, extending from the 1st story to top story; enclosed in brick walls with fireproof doors at openings; a fire escape on the front of the building, having fireproof openings along the course thereof, extending from the 2nd story to top story, and

counter-balanced stairs to sidewalk; ROOFS of adjoining buildings: 10 ft. lower at west; same level at east; and

WHEREAS, the petitioner claims that the exits are adequate; that in addition to the three exit doors to the street there are seven windows on the west side and 3 windows on the east side at 1st story, leading to adjoining yards; furthermore, the appellant contends that it is impossible to provide an exit at the rear of 1st story on account of the building occupying the entire area of the plot.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so long as the present layout of the 1st story remains substantially unchanged.

608-26-S.

PETITIONER—Croker National Fire Prevention Engineering Co., for L. C. Tiffany Furnaces, Inc., owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—Northwest corner of Kingsland avenue and Luydig place, Corona, Borough of Queens.

Absent .....	0

THE RESOLUTION:

(608-26-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for L. C. Tiffany Furnaces, Inc., owner, filed, July 13, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises northwest corner of Kingsland avenue and Lydig place, Corona, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated January 16, 1926 (Order No. 89841-LD), reads:

"1. Provide an additional means of exit from the 2nd story of building on northeast corner as per rule 3, Board of Standards and Appeals, adopted July 29, 1924."

and

WHEREAS, the building (being one of a group occupied by the Tiffany Furnaces, Inc.) is frame, 2 stories in height, 25 ft. by 50 ft. (irregular) in area at 1st story and 20 ft. by 30 ft. in area at 2nd story; OCCUPIED: 1st story, offices, 5 persons; 2nd story, studio, 2 persons; EXITS: an interior wooden stairway, extending from the 1st to 2nd story, enclosed in wood lath and plaster partitions with wooden doors at openings; and

WHEREAS, petitioner proposes to provide a portable iron drop ladder on the roof of the 1st story, directly outside of the northerly windows on the 2nd story and requests the acceptance of this additional means of egress in view of the small occupancy and area of the second story of the building.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that a portable iron ladder chained to the parapet shall be provided on the roof of the first story on the Hunt street side of the building; that the building shall be not increased in height, area or dimension, and the occupancy of the second story shall be limited to two persons.

Negative .....	0
Absent .....	0

THE RESOLUTION:

(635-26-S)

WHEREAS, Daniel Campbell, Jr., for Jacob Gottlieb and Herman Seiff, owners, filed, July 21, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 167-173 Rockaway road, Jamaica, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated July 29, 1924 (Order No. 63045-LD), reads:

"1. Enclose the interior stairway at the east and at the west side of the building serving as a required means of exit and the landings, platforms and passageways connecting therewith on all sides with partitions of fireproof material extending continuously from the lowest story to which the stairway extends to 3' above the roof, constructed as per Section 270 of the Labor Law, or carry out a proper alternative method of complying with the requirements of Section 270 of the Labor Law. Building erected in 1919. Defects in present stairway enclosure are that stairways are enclosed in fire resisting material instead of fireproof material and enclosure of stairway at west side does not extend 3' above the roof.

"2. Extend the interior stairway at the west side of building to the roof, as per Section 270 of the Labor Law, said extension and the landings and passageways connected therewith to be enclosed on all sides with partitions of fireproof material, extending at least 3' above the roof as per Section 270 of the Labor Law."

Order No. 63048-LD:

"1. Provide two required means of exit on each floor of the building remote from each other in accordance with Section 270 of the Labor Law. Building erected in 1923. Defects in present exits, interior stairway is only 36" in width, instead of 44" and horizontal exits do not conform with the requirements of Section 267 of the Labor Law."

and

WHEREAS, the building is non-fireproof, 2 and 3 stories in height, 71 ft. 4 in. by 102 ft. in area; OCCUPIED: 1st story, stores; 2nd story, factory, 20 persons; 3rd story, factory, 10 persons; EQUIPPED with a fire alarm signal system; EXITS: three interior, fireproof stairways, the westerly stairway extending from 1st story to 2nd story, the easterly stairway extending from 1st story to roof, and the northeasterly stairway extending from 1st story to 3rd story; enclosed in fireproof partitions with fireproof doors at openings; a fire escape on the Rockaway road front of the building, having fireproof openings along the course thereof extending from the 3rd story to 2nd story and counter-balanced stairs to sidewalk; ROOFS of adjoining buildings: same level at north; and

WHEREAS the petitioner claims that the 2-story portion of the building is separated from the 3-story portion by a fire wall, with fireproof doors at openings; that instead of complying with Orders No. 63045-LD and No. 63048-LD, the

petitioner has constructed a counter-balanced fire escape on the Rockaway road front of the building, and also a steel bridge extending over the roof of the 2-story portion of the building, which connects the 3rd story of the 3-story portion of the building with the stairhall bulkhead of the 2-story portion of the building; furthermore, the petitioner contends that the exits are now adequate, in that there are three interior stairways, two of them are connected at the top by a steel bridge across the roof, two have direct exit at foot to the street, the other one has exit at foot to an alley 5 ft. in width extending along the easterly side of the building and leading direct to the street.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted as to Order No. 63045-LD, Item 1, on condition that the stairway shall be enclosed in fire-resisting material in accordance with the rules of the board of standards and appeals, and that openings therein shall be equipped with fireproof doors opening out; and granted as to Item 2, on condition that the stairs at the easterly side shall be continued to the roof of the 2-story building; and granted as to Order No. 63048-LD, Item 1, on condition that the existing horizontal openings on the 1st and 2nd story shall be maintained at the easterly and westerly end of dividing partitions equipped with self-closing, fireproof doors; and that a double-rung iron ladder shall be provided within the stairhall from the top story to a scuttle in roof at the west side of building; and that an iron bridge shall be provided from the easterly window of the 3-story portion across the roof of the 2-story building connecting with the easterly stairhall of the 2-story building; that a counter-balanced drop ladder in guides from the second story balcony shall be provided and maintained on the fire escape on the 3-story section, and that the occupancy of the building shall be restricted to the legal capacity of the easterly stairs at the front of the building.

Negative .....	0
Absent .....	0

THE RESOLUTION:

(656-26-S)

WHEREAS, N. D. Q. Specialty Corp. filed, July 28, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the fire commissioner, affecting premises 2566-2570 Atlantic avenue, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, dated June 2, 1926 (File No. 330.01), reads:

"Replying to your communication of the 29th ult., requesting permit to smoke in your office, I beg to advise you that in accordance with the resolution adopted by the Board of Standards and Appeals, August 13th, 1918, and effective September 3rd, 1918, smoking may be permitted under certain conditions in the following class of buildings:

"(2) Factories engaged in the manufacture of cigars, cigarettes, smoking tobacco, when necessary for the efficient conduct of the business, provided—etc.

"(b) Factories devoted entirely to one of the fol-

# MINUTES

lowing occupancies: Blacksmith, Horseshoeing, Boiler making, Brick, terra cotta or artificial stone works, Forge shop, Foundries, Iron, steel, brass or copper works, Machine shop, Smelting, Stone or Monumental works, provided that in any case, said building is not of wood construction, etc.'

"You will, therefore note that no provision has been made in the above ruling allowing smoking in buildings occupied other than the above.

"I regret to state that the Fire Commissioner is without authority to grant your request.";

and  
WHEREAS, the building is non-fireproof, 3 stories in height, 60 ft. by 129 ft. 7 in., irregular in area; OCCUPIED by one firm for the manufacture of candy specialties: 1st story, 20 persons; 2nd story, 20 persons; 3rd story, 20 persons; EXITS: an interior, fireproof stairway, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; a fire escape on the front of the building, having fireproof openings along the course thereof, extending from the top story to the second story balcony; with EGRESS from the termination of the fire escape by means of counter-balanced stairs to street; ROOFS of adjoining building are at same level; and

WHEREAS, petitioner requests permission to allow smoking in office located on the 1st story of the building and contends that the office is separated from the factory portion of the premises by a hardwood sash partition extending from the floor to the ceiling; and

WHEREAS, the only matter before the board is a variation of the smoking rules.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, permitting smoking within the confines of the office on the street front ground floor, *on condition* that there shall be no movable opening in the partition other than one door from each section, which shall be equipped with self-closing devices.

## \*CORRECTION.

The minutes of the meeting of the board of standards and appeals held Tuesday, November 30, 1926, as they appeared in Bulletin No. 49, Vol. XI are hereby corrected to read as follows:

762-26-BZ.

APPLICANT—John DeHart, for Ernest J. Coates, owner.

SUBJECT—Application (re decision of superintendent of buildings) under sections 7b and 21 of the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a business building.

PREMISES AFFECTED—140 Remsen street, Brooklyn.

## APPEARANCES—

For Applicant: John DeHart, Dr. Ernest J. Coates, Charles F. Kingsley.

For Opposition: Albert Conway, Edward G. O'Neill, Oscar W. Swift.

ACTION OF BOARD—Application denied.

## THE VOTE TO GRANT—

Affirmative: Commissioner Holland and Chief  
Kenlon ..... 2  
Negative: Chairman Walsh, Commissioners  
Connell and Guilfoyle..... 3  
Absent ..... 0

*\*Correction—(re order of fire commissioner) changed to (re decision of superintendent of buildings) in line 3 of digest.*

## THE RESOLUTION:

(762-26-BZ)

WHEREAS, John DeHart, for Ernest J. Coates, owner, filed, September 15, 1926, an application, under the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a business building; premises 140 Remsen street, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, November 30, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Clinton street is business, and Remsen street and Hunt alley are residence; and

WHEREAS, the decision of the superintendent of buildings, rendered August 19, 1926 (re App. 14977-1926), reads:

“Proposition contrary to the Zone Resolution, Art. 2, Sec. 3, the erection of an office building partly in a residential district.”;

and

WHEREAS, the proposed building is to be of fireproof construction, 10 stories in height, with a frontage of 22 ft. and a depth of 109 ft.; to be occupied as business; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 7b of the building zone resolution and that under existing conditions on this street front the existing building within the business area influence of Clinton street abutting this property is occupied by conforming residence district occupancy; denial of application would not involve practical difficulty or unnecessary hardship.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

---

# CONCRETE RULES

---

## USE OF HYDRATED LIME IN CONCRETE.

Adopted by the Board of Standards and Appeals, April 19, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated for each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

# RULES

## FIRE RETARDING RULES

Adopted by the Board of Standards and Appeals August 30, 1917; Amended November 1, 1917, and Feb. 3, 1922.

**Rule 1. Fire Retarding Materials for Garages, Motor Vehicle Repair Shops and Oil Selling Stations.** In garages, motor vehicle repair shops and oil selling stations any material or form of construction shall be deemed fire-retarding within the meaning of §73, subdivision 3, of the building code, that resists the action of flame and heat when subjected to a continuous fire for one hour at an average temperature of seventeen hundred (1700) degrees Fahrenheit without the passage of flame, and with a maximum temperature rise to four hundred (400) degrees Fahrenheit on the side away from the fire. The point at which the temperature of transmitted heat is measured shall be protected from external air and weather conditions.

When the test specimen is in the form of partition construction, the area under test shall be not less than one hundred (100) square feet and least dimension shall be not less than nine (9) feet. When in the form of floor construction, the area under test shall be not less than two hundred (200) square feet and the least dimension shall be not less than fourteen (14) feet.

During the fire, the floor construction shall support the live load for which it is designed, and after the fire shall safely sustain twice the designed live load with a maximum deflection of not more than one two-hundredth (1/200) part of the span.

**Rule 2. Wood Joisted Floor Construction.** Wood joisted floor construction shall be accepted as fire-retarding construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations when the beams are protected on the upper and under sides with the fire-retarding materials specified in rules for floor and ceiling coverings.

**Rule 3. Floor Covering.** Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the upper sides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) Seven-eighths ( $\frac{7}{8}$ ) inch wood underflooring protected with a membrane of two-ply waterproofing covered with not less than two and one-half ( $2\frac{1}{2}$ ) inches of 1:2½:5 concrete or better, reinforced with not less than one-fourth ( $\frac{1}{4}$ ) of one (1) per cent of steel mesh.

(b) Two and one-half ( $2\frac{1}{2}$ ) inches of 1:2:4 concrete applied directly to the top of the joists, with or without temporary support, reinforced with not less than one-fourth of one per cent steel rods, mesh or steel lath, and having the tops of the joists coated with approved waterproof paint or protected by tar paper on the top and on the sides for a distance of three inches from the top. (Amendment, Nov. 1, 1917.)

**Rule 4. Ceiling Covering.** Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the undersides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) One-half ( $\frac{1}{2}$ ) inch plaster boards, or three-eighths ( $\frac{3}{8}$ ) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers;

(b) Two thicknesses of one-quarter ( $\frac{1}{4}$ ) inch asbestos board laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring

strips when the floor beams are more than sixteen (16) inches on centers.

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $\frac{3}{4}$ ) inch thick.

**Rule 5. Attachment to Ceiling.** Fire-retarding ceilings in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations shall be attached to wood floor beams and girders in such manner as to maintain an air space between the wood beams, and all wood beams shall be seasoned before applying the protective coat.

**Rule 6. Openings in Fire-Retarding Floors.** Pipes or conduits which pass through floors shall be fitted with metal thimbles and made watertight for a height of three (3) inches above the floor.

**Rule 7. Columns.** All structural posts and columns in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials accepted in fireproof construction; except that an air space shall not be required around steel or cast iron columns.

Where necessary for protection against mechanical injury, the fire-retarding protection on columns shall be jacketed to a height of five (5) feet from the ground with No. 4 U. S. gauge metal.

**Rule 8. Girders.** All girders in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials acceptable in fireproof construction; except that an air space need not be provided around steel girders.

**Rule 9. Shaft Enclosures.** Existing stairways and vertical shafts in non-fireproof business buildings hereafter converted to be used as garages, motor vehicle repair shops or oil selling stations shall be enclosed in fire-retarding partitions continued through the non-fireproof floor construction, and when unfilled wood stud partitions are used, the space between the floor beams shall be fire-stopped with incombustible materials. All openings in such partitions shall be protected with accepted metal-covered fire doors or windows. Wherever necessary for protection against mechanical injury, the partition shall be jacketed to a height of five (5) feet on the garage side with No. 4 U. S. gauge metal. Any one of the following forms of partitions shall be accepted for the enclosure:

(a) Two by four inch wood studs, spaced not more than sixteen (16) inches on centers, covered both sides with metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $\frac{3}{4}$ ) of an inch thick;

(b) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $\frac{7}{8}$ ) inch wood sheathing, one-half ( $\frac{1}{2}$ ) inch plaster boards with pointed joints and No. 26 U. S. gauge sheet metal with one-inch lapped seams;

(c) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $\frac{7}{8}$ ) inch wood sheathing, two thicknesses of one-quarter ( $\frac{1}{4}$ ) inch asbestos boards laid with tight staggered joints and jacketed with No. 16 U. S. gauge metal on the garage side to a height of five (5) feet.

(d) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, filled in solidly between the studs with four inches of approved fireproof materials and covered on both sides with No. 26 U. S. gauge metal;

(e) Existing wood stud, lath and plaster partitions covered on the garage side with No. 26 U. S. gauge sheet metal with one-inch lapped seams.

# RULES

## ELEVATOR RULES

RULES FOR THE CONSTRUCTION, MAINTENANCE AND OPERATION OF ELEVATORS,  
ADOPTED JULY 30, 1918, BY THE BOARD OF STANDARDS AND APPEALS, EFFECTIVE  
AUGUST 26, 1918; REVISED MAY 13, 1919.

**Rule 1. Application of Elevator Rules.** Every elevator, escalator, freight conveyor or amusement device, within the City of New York, in addition to conforming to all provisions of the labor law, building code or other laws or ordinances, as are applicable thereto, shall comply with the requirements of these rules.

Existing and future installations shall at all times be maintained by the owner in a safe condition and in conformity with the requirements of these rules.

**Rule 2. Definitions Relating to Elevators.**

(a) The terms "elevator," "passenger elevator," "freight elevator" and "amusement device" shall have the meanings indicated in §560 of the building code.

(b) The term "dumbwaiter" shall apply to such special form of freight elevator, whether power driven or manually operated, the dimensions of which do not exceed nine square feet in horizontal section nor four feet in height.

(c) The term "hand power elevator" shall apply to such forms of passenger or freight elevators which are manually operated and the dimensions of which exceed nine square feet in horizontal section.

(d) The term "sidewalk type elevator" shall apply to such special form of freight elevator, either power driven or manually operated, the platform of which does not exceed fifty (50) square feet in area and is suspended or supported at one or more points on the underside.

(e) The term "escalator" shall apply to a moving continuous inclined stairway or runway designed for elevating or lowering passengers.

(f) The term "freight conveyor" shall apply to a device used for elevating or lowering freight in a vertical or inclined direction on a continuous moving carrier without the services of an operator thereon.

(g) The term "future installations" shall apply to any elevator, machinery or equipment used in connection therewith, installed after these rules become effective.

(h) The term "existing installations" shall apply to any elevator, machinery or equipment used in connection therewith, either already installed, in process of installation, or for which plans are on file with the superintendent of buildings prior to August 26, 1918.

(i) The term "alteration" shall include any essential change to the elevator car, counterweights, rails, machinery, safeties or other equipment or direct motive power; except that any repair work made necessary by the ordinary operation of the elevator shall not be deemed an alteration.

(j) The term "power driven elevator" shall apply to any form of elevator except those operated by hand power, gravity in both directions, or through friction grip on the pull rope.

**Rule 3. Permits.** The application required by §562, building code, for the installation or alteration of elevators, amusement devices, etc., shall be in triplicate on blanks furnished by the superintendent of buildings, stating the size, manner of construction, speed, capacity, other essentials, and mode of operation of the same, and accompanied by necessary drawings; except that applications for the installation of dumbwaiters, and conveyors or hoists may consist of a notice to the superintendent of buildings that such installation is to be made.

**Rule 4. Alterations.** In making alterations to existing installations, the parts changed or altered must conform in every respect to the rules governing future installations, and where parts of the elevator are damaged from any cause, the damaged parts must be completely re-

newed, at the discretion of the superintendent of buildings.

Where hand power elevators are changed to power-driven elevators, they shall conform to every rule governing power-driven elevators, except, that when the rise is not more than thirty-five feet and the capacity is not increased, existing wood guide rails may remain in use. In such conversions the use of a power-driven friction grip device is prohibited when the capacity exceeds 800 pounds.

**Rule 5. Change of Classification.** In future, no freight elevator shall be used for passenger service, unless such elevator conforms to the rules governing future installations of passenger elevators in so far as they relate to safety equipment, hoist ropes, carrying capacity, car enclosure, including gates and emergency exit, shaft openings and doors, and motive power.

In existing installations where such change of classification is made and the hatchway is unenclosed, a substantial enclosure of lawful partitions extending from floor to ceiling and flush with the hatchway shall be constructed, with all openings protected by proper shaft doors.

**Rule 6. Tests of New Elevators.** In future installations all elevators shall be tested as follows:

The cars of all power-driven elevators shall be loaded to their maximum carrying capacity and operated up and down the shaft several times to test the lifting capacity of the machinery and the operation of the upper and lower automatic limit devices. The car shall be stopped at various levels in the shaft to test the operation of the machine brake.

The cars of all power-driven elevators having speeds exceeding one hundred (100) feet per minute, and of hand-power elevators with a rise of more than fifteen (15) feet, shall be loaded to their maximum carrying capacity, run to the top landing and made to travel downward beyond normal speed, so as to automatically operate the speed retarder or speed governor and car safety device and the slack rope device when required, and (except for hand-power elevators) to stop the machine. This rule shall not be construed, however, to require safe lift elevators to be tested with safe lift load.

The cars of power-driven elevators having speeds of one hundred (100) feet per minute or less shall be loaded to their maximum carrying capacity, run to the top landing and started down at normal speed. At this speed the governor shall be manually operated to test the action of the safety equipment.

**Rule 7. Carrying Capacity.** In existing installations the owner, lessee or other person having charge or control of any elevator, except a dumbwaiter, and in future installations the manufacturer of any such elevator, shall cause to be fastened in a conspicuous place in the car of said elevator a metal plate, having suitable letters and figures on same, which shall designate the number of pounds weight which said elevator can safely carry.

Future installations shall be designed to sustain in all their parts a load per square foot of platform area inside the car of not less than the following:

- (a) 75 pounds for power-driven passenger elevators;
- (b) 50 pounds for power-driven freight elevators having platform areas not exceeding 100 square feet;
- (c) 50 pounds for hand-power passenger elevators.

**Rule 8. Rules to be Posted.** In the car of every passenger elevator the superintendent of buildings shall cause to be posted and maintained, in a conspicuous place, for the guidance and information of operators and passengers, such of the rules relating to the oper-

# RULES

ation of elevators as he may deem necessary to insure public safety, including the number of passengers that such car may carry at one time.

**Rule 9. Full Automatic Push Button Elevators.** In future installations full automatic push button elevators must be so designed and equipped that the car, at its rated speed and load, will automatically stop when the car floor is level with or not more than three inches from the designated landing floor.

The car gate and shaft doors shall be equipped with approved devices that will prevent the operation of the car until the car gate is closed and the shaft door is closed and locked. The shaft door shall not be capable of being opened unless the floor of the car is within three inches of the landing. A push button to operate an alarm bell shall be provided in the car, for the purpose of notifying the person in charge of the premises, in case the car becomes stopped in the shaft from any cause. The shaft doors shall be so arranged that they cannot be opened after the car leaves the landing, except in emergency cases, and then only by a special key which must be provided and kept in the possession of the person having charge of the building.

**Rule 10. Belt or Chain Drives.** In future installations no hoisting machine driven by a chain or belt device from a motor or countershaft shall be used in connection with any passenger elevator.

**Rule 11. Shaft Openings.** In shafts hereafter constructed for passenger elevators, no more than one opening shall be allowed in each story, and all openings in the several stories shall be located one above the other, except that doors may be located on opposite or adjacent sides in the several stories when the distance from the car operating device to the door lock does not exceed forty-eight inches and can at all times be fully controlled by the elevator operator without leaving the car operating device. Door openings may be located on opposite or on adjacent sides of the shaft in the first or main entrance story and in the top story, provided that the openings in the remaining stories are all on the same side of the shaft, that a satisfactory device is installed preventing the operation of the car while the car gate distant from the operator is open, that an attendant is always present to control the shaft doors located in the first or top stories, and that there are no offsets or recesses on the inside of the shaft walls.

No alteration not in compliance with the above provision shall be made to any existing passenger elevator shaft.

**Rule 12. Hoistway Enclosure.** In the existing and future installations where no enclosure of solid partitions is required around the hoistway by the provisions of the building code, labor law or these rules, there shall be provided a substantial vertical enclosure extending from the floor for a distance of not less than six (6) feet on the side or sides where there are no openings in the car for loading purposes. On all other sides, gates or doors must be provided. Such enclosure may be constructed of mesh work, grille work or slatted partitions, provided that when mesh work is used it shall be of not less than No. 10 U. S. gauge wire or No. 13 U. S. gauge expanded metal, with mesh not exceeding one and one-half ( $1\frac{1}{2}$ ) inches; when grille work is used there shall be not more than one and one-half ( $1\frac{1}{2}$ ) inches space between any two members, except that where plain straight bars, not filled in with scroll, are used, there shall be not more than one (1) inch space between members; when wood slats are used they shall be not less than three-eighths ( $\frac{3}{8}$ ) of an inch thick, spaced not more than one (1) inch between slats.

In all cases where existing grille work permitted by law or regulation as a shaft enclosure is altered, such

alteration shall be of substantial material and construction, properly braced and carried the full height of openings, with not more than one and one-half inch space between any two members; except that where straight bars, not filled in with scroll work, are used, there shall be not more than one inch between members. Where deemed necessary, existing grille work with spaces exceeding those specified in this rule shall be made safe by suitable screen or wire mesh, or wire glass construction.

**Rule 13. Shaft Doors.** In existing and future installations all gates or doors leading to any shaft in which power-driven passenger elevators are operated (except full automatic push button elevators) shall be locked, bolted or securely fastened on the shaft side. Such shaft doors or gates shall be closed by the operator before the car is put in motion.

In future installations of passenger elevators, keys for opening the shaft doors or gates from the outside of the shaft, in case of emergency, shall be provided and shall be restricted in use to persons in responsible charge of the building.

In existing and future installations in factory buildings only, the openings in every passenger or freight elevator shaft or hoistway enclosure shall be protected in one of the following manners:

- (a) by properly constructed sliding doors;
- (b) by combination slide and swing doors;
- (c) by hinged or swinging doors equipped with approved devices to insure the shaft doors being closed and locked before the car can start from the landing;
- (d) by hinged or swinging doors, either manually operated or self-closing, with auxiliary gates not less than five (5) feet six (6) inches in height, substantially constructed of wood or metal, with not more than two (2) inches space between any two parallel members, and the bottom of the gate not more than ten (10) inches from the floor, except at the top and bottom landings when the distance from the floor to the bottom of the gate may be increased to give the required head room, and shall close automatically upon the car leaving the landing in either direction; except further that for hand power elevators having the pull rope located in front of the shaft entrance, gates may be two (2) feet six (6) inches in height.

When shaft doors are equipped with electric contacts or other locking devices, an approved emergency release shall be provided on the car within easy reach of the operator.

**Rule 14. Car Gates.** In existing and future installations, all entrances to the cars of power-driven passenger elevators shall be provided with substantial folding or sliding gates or doors, and where floor tracks are used the same must be kept level with the finished floor surface of the car. All folding gates over three feet wide at the entrance to shaft or car shall have top and bottom braces, spaced not more than eighteen inches on centers when the gates are fully expanded. All car gates shall be closed by the operator before the car is put in motion.

In future installations passenger elevator car gates shall be equipped with an approved device or devices that will prevent the operation of the car while the car gates are open, and an approved emergency release shall be provided on the car within easy reach of the operator.

**Rule 15. Counterweights.** In future installations all counterweights shall have their sections securely bolted together with one or more rods, as determined by the superintendent of buildings. Such rods must pass through all the sub-weights and at least one portion of the frame work. No continuous forged straps shall be permitted.

In existing and future installations where counterweights run in the same shaft as the car, they shall, when at the

# RULES

uppermost position, be protected on all exposed sides the full length of the counterweight with substantial and properly secured shields of iron or steel not less than No. 16 U. S. gauge; except that for plunger or fixed stroke piston hydraulic or traction type elevators no top shield shall be required. Where no compensating chains or ropes are attached to the counterweight, similar shields shall be provided eighteen inches above the bottom of the counterweight runway and extending upwards at least five feet. In existing installations, where the clearance between car and counterweight is not more than one and one-half inches, neither top nor bottom shields shall be required, but in lieu thereof tell-tale metal chains not less than five feet long, spaced not more than six (6) inches on centres from rail to rail, shall be suspended from the bottom of the counterweight.

**Rule 16. Speed Governors.** All power-driven elevators with a rise of more than fifteen feet not already equipped with a speed governor and safety (except sidewalk type elevators and existing freight elevators in buildings not exceeding five stories in height and direct plunger elevators) shall have at the top of the elevator shaft a governor properly connected to a safety device attached to the underside of the car platform, in such manner that the car will be brought to rest with an easy and gradual stop, or in a distance not greater than nine feet at a speed of seven hundred feet per minute, provided that on elevators having a speed of one hundred feet per minute or less, safeties of the instantaneous type may be used. Every governor operating a car safety shall be set to trip the safety at a speed not exceeding forty per cent above the rated speed given in the application, but in no case exceeding eight hundred and fifty feet per minute; but this shall not require any governor to trip the safety at a speed less than one hundred and fifty feet per minute. When a speed governor has been set for the rated speed it shall be sealed. When safeties of the instantaneous type are used, a proper flexible means of application must be interposed between the safety and the governor.

**Rule 17. Limit Devices.** In future installations all power-driven elevators shall have approved limit devices as follows:

(a) for Drum Type Electric Elevators, except sidewalk type elevators with speeds not exceeding seventy-five (75) feet per minute, limit switches on the machine and in the shaft or on the car;

(b) for Traction Type Electric Elevators, limit switches in the shaft or on the car;

(c) for Electric Drum Sidewalk Type Elevators, with speeds not exceeding seventy-five (75) feet per minute, machine automatics will be required but stopping devices on the operating rope will be accepted in lieu of limit switches in the shaft or on the car;

(d) for Hydraulic Elevators, with speeds not exceeding one hundred and fifty (150) feet per minute, stopping devices on the operating rope;

(e) for Hydraulic Elevators, with speeds exceeding one hundred and fifty (150) feet per minute, limit devices on the machine;

(f) for Lever or Crank-Operated Hydraulic Elevators, limit devices on the machine.

**Rule 18. Elevator Brake.** In future installations every electric elevator shall be equipped with an electric or electro-mechanical brake that will bring the car to rest when the car operating device is brought to the stop position or when any of the electric safety devices operate.

When the elevator is driven by a belt from an electric motor, the brake must be arranged to operate should the motor belt break or leave the pulleys.

**Rule 19. Operating Device.** In future installations every elevator driven by electric power and operated by hand rope, lever, wheel or other non-self-centering device, shall be provided with an approved device preventing the

operation of the car, after the interruption of the current, until the operating device has been first returned to the inoperative position, and electric car operating switches shall be self-centering and self-locking in the inoperative position.

**Rule 20. Reverse Phase Relays.** In future installations every elevator motor operated by polyphase alternating electric current shall be equipped with a reverse phase relay.

**Rule 21. Slack Rope Device.** In future installations all power-driven elevators, including power-driven sidewalk elevators, operated by drum hoisting machines, shall have approved automatic slack rope devices that will stop the machine if, from any cause, any car hoisting rope or chain attached to the drum becomes slack.

**Rule 22. Car Locking Device.** No elevator shall be used for the carrying of safes or other material of a greater weight than the normal lifting power of such elevator, unless the machine is provided with special equipment and the car is equipped with an approved locking device which will hold it at any landing, independent of the hoisting ropes while such safe or other material is being loaded or unloaded.

**Rule 23. Hand-Power Elevator Safety Devices.** In future installations every hand-power elevator (except sidewalk type elevators) with a rise of more than fifteen feet, shall be equipped with an approved safety device that will immediately stop and hold the car with a full load if the rope breaks, and with an approved automatic speed retarder and a hand-operated brake operating in both directions.

Grip hoists and elevators operated by gravity in both directions shall comply with the requirements for hand power elevators.

**Rule 24. Escalators.** In future, every escalator installed shall be equipped with an approved safety device to prevent any accidental downward reversal and with an approved stopping device.

**Rule 25. Car Construction.** In future installations the car and car frame of every power-driven elevator and of every hand-power elevator with a rise of more than thirty-five (35) feet shall be of incombustible materials; except that the platform may be of wood covered on the underside with incombustible materials. The car enclosure and flooring may be of hard wood. The car, car frame and enclosure of every hand-power elevator with a rise of thirty-five (35) feet or less may be constructed of wood.

**Rule 26. Passenger Car Enclosures.** In existing and future installations every passenger elevator car shall be fully enclosed on all sides not used for loading or unloading, and on the top, with substantial construction.

In future installations where grille work is used for the car enclosure, including the top, it shall be constructed with not more than one and one-half inch space between any two members; except that where straight bars not filled in with scroll work are used there shall be not more than one inch space between members. When the clearance between car and counterweight is less than two (2) inches, that part of the car enclosure opposite the counterweight runway shall be of solid construction or screened with not more than one-half ( $\frac{1}{2}$ ) inch mesh of not lighter than No. 16 U. S. gauge wire, to a height of not less than six (6) feet six (6) inches.

In existing installations in factory buildings only, where the spaces exceed those specified for future installations, it shall be deemed satisfactory if the grille work is made safe by suitable screen or wire mesh fastened to the car enclosure.

**Rule 27. Emergency Exit.** In future installations every power-driven passenger elevator car shall have a trap

# RULES

door in the top, of such a size as to afford easy egress for passengers, but not less than sixteen inches in least dimension nor less than four hundred square inches in area. When there is more than one elevator in a shaft and the vertical distance between any two consecutive shaft door openings exceeds thirty (30) feet, there shall be provided in addition to the trap door an emergency side exit to the adjacent car.

In existing installations not already provided with an emergency exit, a trap door as specified for future installations shall be provided; except that when the cross head or car top construction renders it impracticable to provide such trap door, this requirement may be waived by the superintendent of buildings, if egress, in case of emergency, is possible through shaft openings, or to an adjacent car.

**Rule 28. Freight Car Enclosure.** In existing and future installations in factory buildings only, every freight elevator car shall be enclosed on all sides not used for loading or unloading, with substantial construction, to a height of five (5) feet six (6) inches, or to the cross head, when this is less than five (5) feet six (6) inches above the car platform.

In future installations, where an enclosure of open construction is used, the space between any two parallel members shall not exceed one inch.

**Rule 29. Freight Elevator Cover.** In existing and future installations in factory buildings only, every freight elevator car shall be provided with a substantial cover or grating constructed of not less than No. 8 U. S. gauge wire or its equivalent in strength, and of a mesh that will reject a one and one-half ( $1\frac{1}{2}$ ) inch diameter ball. Sections of the cover or grating may be arranged to swing upward for handling long material, but such cover or grating shall be closed at all other times. In covers hereafter installed (except where car gates are provided) that part of the cover facing the entrances to the hoistway, extending the full width of the car, shall be hinged on a line not less than eight (8) inches nor more than twelve (12) inches back from the edge of the landing, and the hinged section shall be self-closing.

**Rule 30. Space Between Saddles and Car.** In future installations there shall be not more than one and one-quarter inch, nor less than three-quarters of an inch space between the floor of the car and the floor saddles, and where the saddles project into the shaft the same shall be properly bevelled on the underside at an angle of not less than sixty degrees to the horizontal.

**Rule 31. Lights.** In existing and future installations the cars of all elevators shall be properly lighted at all times when in service.

**Rule 32. Guide Rails.** In future installations, guide rails for both car and counterweights of all elevators (except dumbwaiters, and hand-power elevators with a rise of thirty-five feet or less) shall be of iron or steel. They shall be fastened to the sides of the shaft with wrought or cast iron brackets of such strength and design and so spaced that the guide rails and their fastenings shall be able to safely withstand the application of the safety when stopping a fully loaded car under test. For elevators requiring safeties, the guiding surfaces of the car guides shall be finished smooth and joints shall be tongued and grooved or dowelled, and rails shall extend to the level of or above the overhead beams and shall be bottomed on a suitable support.

The weights of steel or iron guide rails shall be not less than given in the following table:

## WEIGHT OF GUIDE RAILS PER LINEAL FOOT.

Total Weight of Car and Live Load, or Weight of Counterweight	Weight of Car Guide Rails		Weight of Counterweight Guide Rails	
	With Safeties.	Without Safeties.	With Safeties.	Without Safeties.
0-4000 lbs. ....	7½	7½	7½	6½

**Rule 33. Ropes.** In future installations, all elevators (except dumbwaiters) shall have not less than two ropes independently connected to the car and to each set of counterweights. In drum type machines, the lifting and counterweight ropes shall have at least one full turn of the rope on the drum when they have reached the limit of travel. Every rope hereafter used shall have a factor of safety of not less than six for freight elevators, and not less than eight for passenger elevators. The diameter of any hoist or counterweight rope hereafter installed (except for hand-power elevators and sidewalk type elevators) shall be not more than one-fortieth ( $1/40$ ) of the diameter of any sheave or drum over which it passes. All ropes used in the operation of elevators shall be of steel, iron or marlin covered steel. Ropes of other material than metal may be used as hand ropes and brake ropes in hand power elevators or as centering ropes in power driven elevators with hand rope control. Where overhead machines are used, equalizer arms will be permitted on the car and counterweights. Nothing in this rule shall prohibit the use of chains on sidewalk elevators instead of ropes.

**Rule 34. Auxiliary Freight Compartments.** In future installations no elevator shall be permitted to have attached above, below or on the side of the car a freight compartment or similar device.

In existing installations, entrances to freight compartments shall be protected by folding gates, as required for passenger elevators, and so arranged that the elevator cannot be operated until the gate is closed.

**Rule 35. Overhead Gratings.** In every elevator shaft (except existing elevator shafts, dumbwaiter shafts or the shafts of sidewalk elevators outside the building line) immediately under the sheaves at the top of the shaft, or when the machine is located at the top of the shaft, at the level of the top of the machine beams, there shall be provided and placed a substantial grating of iron or steel capable of sustaining not less than seventy-five pounds per square foot. No two members of such grating shall be spaced more than one and one-half inches apart. When such grating does not extend over the entire area of the shaft, the open edges shall be protected by substantial screened railings not less than three feet high. Every such grating shall extend at least two and one-half feet beyond the general contour of the sheaves or machinery. Deflecting sheaves extending below the machine level, or hoist and counterweight sheaves located at the sides of the shaft, shall be protected by gratings or cradles of a construction similar to that required for the gratings. Fireproof floor construction shall be accepted as the equivalent of the grating.

Nothing in this rule shall prevent the placing of a trap door in such a grating where other suitable access cannot be had.

Any grating hereafter placed in an existing elevator shaft shall conform to the requirements of this rule.

**Rule 36. Elevator Pit.** In every elevator shaft hereafter constructed (except shafts for dumbwaiters, for sidewalk elevators and for hand-power elevators with a rise of less than thirty-five feet), the distance from the floor saddle of the lowest landing to the bottom of the pit shall not be less than four feet when the speed does not exceed two hundred and fifty feet per minute, not less than five feet when the speed exceeds two hundred and fifty but does not exceed four hundred feet per minute, and not less than six feet when the speed exceeds four hundred feet per minute, and in no case shall there be less than two feet in the clear between the bottom of the pit and the lowest point of the underside of the car floor framing when the car is at the lowest possible position. In the case of power-driven side-

---

# RULES

---

walk type elevators, the clear space between the bottom of the pit and underside of the car floor structure shall be not less than six inches. The pits herein required at the bottom of elevator shafts shall not be used for piping, machinery, or for any purpose not required for the elevator equipment; but this shall not prevent the encroachment upon such pits, in the case of new elevators installed in existing buildings, of the foundations of bearing walls and columns to an extent not exceeding twenty-five per cent of the area of the pit.

**Rule 37. Overhead Clearance for Cars.** For all elevator shafts hereafter installed (except shafts for sidewalk type elevators) there shall be provided a sufficient clear space, when the car is at the top landing, to allow a run-by of not less than two feet for elevators having a speed not exceeding one hundred feet per minute, not less than three feet for elevators having a speed exceeding one hundred feet per minute and not exceeding three hundred and fifty feet per minute, and not less than five feet for elevators having a speed exceeding three hundred and fifty feet per minute.

**Rule 38. Overhead Clearance for Counterweights.** In future installations there shall be provided in all elevator shafts a sufficient clear space when the car has completely compressed the pit buffers to allow of a run-by of the counterweight of not less than two (2) feet for traction and hydraulic type elevators, and not less than three (3) feet for drum type elevators.

**Rule 39. Machinery Room.** All parts of the elevator machinery for power-driven elevators shall be properly enclosed, and suitable light provided. In buildings hereafter erected free and safe access must be provided to all parts of the elevator machinery, and there shall be not less than twelve (12) inches clearance at limit stop devices on machine and outboard bearings of motor. In future installations in existing buildings, such clearance shall be provided as

deemed necessary by the superintendent of buildings, but need not exceed that specified for buildings hereafter erected. When the machine is located at the bottom of the shaft, it shall be protected with a substantial pit pan.

**Rule 40. Speed.** The speed of all power-driven elevators shall not exceed seven hundred feet per minute.

**Rule 41. Buffers.** In future installations for all power-driven elevators (except sidewalk type elevators) there shall be provided substantial spring buffers, pneumatic buffers, or oil buffers for the car and counterweights provided that for the cars and counterweights of all elevators having speeds of more than three hundred and fifty feet per minute, substantial oil buffers shall be installed.

**Rule 42. Supporting Beams.** Supporting beams hereafter installed for elevator sheaves or machinery (except in dumbwaiter shafts) shall be of iron or steel.

**Rule 43. Determination of Questions.** When any existing installation for either passenger or freight service is deemed by the Superintendent of Buildings to be in an unsafe or dangerous condition it shall be made safe in such manner as he shall prescribe, and all defective parts necessary of replacement shall conform, in so far as possible, with the rules governing future installations.

Where there are practical difficulties in the way of carrying out the strict letter of the foregoing rules, the Superintendent of Buildings shall have power to vary their provisions so that the spirit of the law shall be observed and public safety secured and substantial justice done, provided that whenever such variations are granted by a superintendent of buildings it shall be indorsed in writing upon the permit over the signature of such superintendent.

## COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS.

*Amended Resolution Adopted by the Board of Appeals,  
March 16, 1920, Under Cal. No. 549-17-BZ.*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed

under the building zone resolution in the absence of any definition therein to the contrary.

*Resolved*, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First,* That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second,* That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third,* That no plea of ignorance of the date of the

hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth,* That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth,* That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

## PUBLIC HEARINGS

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

## HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

## CALL OF CLERK'S CALENDAR

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, December 28, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, January 4, 1927, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

## NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman

## CALL OF CLERK'S CALENDAR

**TUESDAY, DECEMBER 28, 1926, AT 2 P. M.**

### *Building Zone Cases.*

693-26-BZ.  
APPLICANT—Jamaica Water Supply Co., owner.  
PREMISES—West side of 144th street, 100 ft. south of 116th avenue, Jamaica, Borough of Queens.  
APPLICATION, under section 21 of the building zone resolution,  
TO PERMIT in a residence district the erection and maintenance of a pumping station.

706-26-BZ.  
APPLICANT—Jamaica Water Supply Co., owner.  
PREMISES—South side of 89th avenue, 70 ft. west of 162nd street, Jamaica, Borough of Queens.  
APPLICATION, under section 21 of the building zone resolution,  
TO PERMIT in a residence district the erection and maintenance of a pumping station.

707-26-BZ.  
APPLICANT—Jamaica Water Supply Co., owner.  
PREMISES—Southwest corner of 89th avenue and 162nd street, Jamaica, Borough of Queens.  
APPLICATION, under sections 7a and 21 of the building zone resolution,  
TO PERMIT in a residence district the extension of an existing office building.

872-26-BZ.  
APPLICANT—Charles G. Wessel, for Sebastiano Barbarino, owner.  
PREMISES—1259-1271 Gravesend avenue, Brooklyn.  
APPLICATION, under section 21 of the building zone resolution,  
TO PERMIT in a business district the change of occupancy of an existing building to a garage for the storage of more than five (5) motor vehicles.

880-26-BZ.  
APPLICANT—Rehcansie Realty Co., owner.  
PREMISES—Northeast corner of Clarke place and Jerome avenue, The Bronx.  
APPLICATION, under section 21 of the building zone resolution,  
TO PERMIT the extension from a business district into a residence district of a proposed business building (swimming pool).

904-26-BZ.  
APPLICANT—John J. Dunnigan, for Halpern Construction Co., owner.  
PREMISES—1894 Inwood avenue, The Bronx.  
APPLICATION, under sections 7c and 21 of the building zone resolution,  
TO PERMIT partly in an unrestricted district and partly in a residence district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

910-26-BZ.  
APPLICANT—John N. Linn, for Carl I. Dingfelder and Benjamin Balish, owners.  
PREMISES—2657-2671 Ocean avenue, Brooklyn.  
APPLICATION, under section 21 of the building zone resolution,  
TO PERMIT in a residence district the erection and maintenance of an apartment house with stores on the first story.

911-26-BZ.  
APPLICANT—John W. Clancy, for Robert Trilling, owner.

# CALENDAR

PREMISES—Southeast corner of Boston road and Kingsland avenue, The Bronx.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a gasoline selling station.

846-26-BZ.

APPLICANT—Robert W. Maloney, for Patrick J. Hangley, owner.

PREMISES—southwest corner of Boston Post road and Burke avenue, The Bronx.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the erection and maintenance of a gasoline selling station.

263-25-BZ.

APPLICANT—Philip J. Sinnott, for Isotta Motors, Inc., owner.

PREMISES—131 West 52nd street, Manhattan.

APPLICATION, under section 21 of the building zone resolution,

TO PERMIT in a business district the maintenance of a motor vehicle repair shop on the first story (previously denied).

## DECEMBER 28, 1926, 10 A. M.

### *Appeals from Administrative Orders.*

31-26-A—100-120 Sutton street, Brooklyn.

33-26-A—406-408 Gates avenue, Brooklyn.

899-26-A—142-144 West 26th street, Manhattan.

900-26-A—104 Harrison street, Brooklyn.

1254-25-A—Certificate of approval for combustible mixture (Flit).

### *Building Zone Applications.*

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, *Tuesday morning, December 28, 1926, at 10 o'clock, in Room 1013, Municipal Building, on the following matters:*

CAL. NO. 861-26-BZ—Application, October 22, 1926, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of A. E. Norton, Inc., owner, to permit in a  $1\frac{1}{4}$  times height district the erection and maintenance of the street wall in excess of the height permitted by the zone resolution; premises

685 Fifth avenue, southeast corner of East 54th street, Manhattan.

CAL. NO. 862-26-BZ—Application, October 22, 1926, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Roseberg Holding Co., Inc., owner, to permit in a residence district the erection and maintenance of a gasoline service station; premises northwest corner of Bay Parkway and 59th street, Brooklyn.

CAL. NO. 835-26-BZ—Application, October 11, 1926, under section 21 of the building zone resolution, of Philip J. Sinnott, applicant, on behalf of Bon Ton Realty Co., owner, to permit in a business district the erection and maintenance of a motor vehicle repair shop; premises southwest corner of Jerome avenue and West 181st street, The Bronx.

CAL. NO. 840-26-BZ—Application, October 13, 1926, under section 21 of the building zone resolution, of James W. Byrnes, applicant, on behalf of Filomine Clementi, owner, to permit in a residence district the erection and maintenance of a garage for the storage of four (4) commercial motor vehicles used in connection with a trucking business conducted by the owner residing on the premises; premises 67-69 Cumberland street, Brooklyn.

CAL. NO. 851-26-BZ—Application, October 18, 1926, under section 21 of the building zone resolution, of Christ Callas, applicant, on behalf of Constantine Callas, owner, to permit in a business district the erection and maintenance of a gasoline selling station; premises northeast corner of Morell avenue and Woodhaven boulevard, Howard Beach, Borough of Queens.

CAL. NO. 854-26-BZ—Application, October 19, 1926, under section 21 of the building zone resolution, of Joseph Orlando, architect, on behalf of Clinton Enterprises, Inc., owner, to permit partly in a business district and partly in a residence district the erection and maintenance of a business and theatre building; premises 708-716 East Tremont avenue, The Bronx.

CAL. NO. 855-26-BZ—Application October 19, 1926, under section 21 of the building zone resolution, of Joseph Orlando, architect, on behalf of Broadway and Dyckman Building Corp., owner, to permit partly in a business district and partly in a residence district the erection and maintenance of a business and theatre building; premises 4761-4779 Broadway and 231-239 Dyckman street, Manhattan.

CAL. NO. 941-26-BZ—Application, November 16, 1926, under sections 7b and 21 of the building zone resolution, of John DeHart, applicant, on behalf of Max Stoorman, owner, to permit in a residence district extending from a business district the alteration and conversion of occupancy in part from residence to business use; premises 1963 Prospect avenue, The Bronx.

WILLIAM E. WALSH, *Chairman.*

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	4
Negative .....	0
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(80-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for S. E. Howard's Son & Co., owner, filed, January 28, 1926, an appeal from an order of the fire commissioner, affecting premises Nos. 507-513 Kent avenue and Nos. 17-19 Rush street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, (Order No. 87454-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure;"

and

WHEREAS, the premises consist of a group of non-fireproof buildings; the building on Rush street being five stories and basement (56 ft.) in height, having a frontage of 56 ft. on Rush street and a depth of 125 ft., is irregular in area; the buildings on Kent avenue being one and three stories in

height, 100 ft. by 100 ft. in area; there being also a basement extension to the Rush street building (approximately 31 ft. by 80 ft., irregular in area), occupied as a boiler room. The only openings between the buildings on Rush street and on Kent avenue being on the basement story of the Rush street building and lead to the 1st story of the Kent avenue buildings; said openings being protected on both sides by fireproof, self-closing doors. The area of the Rush street buildings being approximately 9,600 sq. ft., a total combined area of 14,800 sq. ft. OCCUPIED by one concern for the manufacture of brushes, 90 persons in entire premises; and

WHEREAS, petitioner contends that the five-story building on Rush street is protected by a two-source sprinkler system; that the entire premises are at all times under the supervision of a watchman and contends further, that the combined areas do not exceed 15,000 sq. ft. and no area on either side of the fire wall exceeds 10,000 sq. ft.; and

WHEREAS, the dimensions of this building group come within the rules of exception for standpipes.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the building shall be not increased in height, area or dimension; that the horizontal openings to boiler room shall be equipped with fireproof doors on both sides; and that the five-story unit of this group shall be equipped throughout with an approved wet sprinkler system.

180-26-A.

APPELLANT—Julius Eckmann, for City Real Estate Company, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—422-424 East 4th street, Manhattan.

APPEARANCES—

For Appellant: Julius Eckman.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	4
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(180-26-A)

WHEREAS, Julius Eckmann, for City Real Estate Co., owner, filed, March 2, 1926, an appeal from an order of the fire commissioner, affecting premises Nos. 422-424 East 4th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 10, 1926 (Order No. 87552-F), reads:

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30' from any opening in any other building and not in the same plane with said openings and which are not more than 50' above a neighboring roof at east and west side of building, or other approved protection, as per Sec. 375, Art. 18, Ch. 5, Code of Ordinances;"

and

WHEREAS, the building is non-fireproof, 7 stories in height, 40 ft. by 90 ft. in area; OCCUPIED as a tenant factory (clothing), 30 persons per story; and

WHEREAS, there is one window in the north end of the easterly wall on the 5th, 6th and 7th stories within 50 ft. of the roof of a neighboring building to the east; in the south end of the east wall there is one window (two on the 4th story only) within 30 ft. of openings in or within 50 ft. of the roof of a neighboring one-story stable to the east; in the west wall there are openings on the 3rd to 7th, inclusive, story within 50 ft. of the roof of a one-story garage to the west; and

WHEREAS, appellant proposes to provide iron shutters at the windows in the west wall on the 3rd and 4th stories.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

48-26-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Vanity Fair Building, Inc., lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—3 East 38th street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle ..... 4  
Negative ..... 0  
Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(48-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Vanity Fair Building, Inc., lessee, filed, January 19, 1926, an appeal from an order of the fire commissioner, affecting premises No. 3 East 38th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 18, 1925 (Order No. 77166-F), reads:

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30' from any opening in any other building and not more than 50' above a neighboring roof at rear of building, or other approved protection, as per Sec. 375, Article 18, Ch. 5 of the Code of Ordinances."; and

WHEREAS, the building is non-fireproof, 6 stories and basement in height, 25 ft. by 94 ft. 9 in. in area at 1st story and 25 ft. by 89 ft. 9 in. in area above; OCCUPIED: basement, kitchen, 12 persons; 1st floor, stores, 4 persons, and tea room, 6 persons; 2nd floor (front), beauty parlor, 6 persons, (rear), tea room, 4 persons; 3rd floor (front), millinery, 4 persons, (rear), vacant at present only; 4th floor (front), millinery, 15 persons, (rear), vacant at present; 5th floor (front), millinery, 3 persons, (rear), dressmaking, 7 persons; 6th floor, vacant at present, to be occupied; and

WHEREAS, there is one window in the rear wall of the building on each story above the 2nd story within 50 ft. of the extension roof of a neighboring building to the rear and, also, within 30 ft. of openings in a neighboring building to the east; and

WHEREAS, appellant contends that the windows in the sprinklered building constituting the exposure to the east are fireproof and requests the acceptance of the unprotected window on each story.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* only so far as it affects the windows on the 4th, 5th and 6th stories *on condition* and only so long as the existing adjoining exposures remain unchanged.

278-26-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Empire Steel Partition Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—Southeast corner of 3rd avenue and 11th street, College Point, Borough of Queens.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Meyer of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle ..... 4  
Negative ..... 0  
Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(278-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for the Empire Steel Partition Co., owner, filed, April 3, 1926, an appeal from an order of the fire commissioner, affecting premises southeast corner of Third avenue and 11th street, College Point, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated October 22, 1925, reads:

"Order No. 98911-LC:

"5. Provide a room or enclosure of approved fire-retarding material, properly ventilated to the outer air and equipped with a self-closing, fireproof door, for benzine cleaning process in cellar.

"6. Provide an approved storage system for storing and handling all volatile inflammable oils and liquids. Plans and specifications in duplicate to be filed. \* \* \* \*

"7. Provide a direct means of filling benzine washing tank from the underground storage system.";

and

WHEREAS, the building is of frame construction, two stories and basement in height, 38 ft. by 90 ft. in area; OCCUPIED for the manufacture of steel partitions: basement, rolling, 4 persons; 1st story, assembling, 15 persons; 2nd story, office and painting, 15 persons; and

WHEREAS, the appellant claims that items 5, 6 and 7 of Fire Department Order No. 98911-LC were issued on account of the use of benzine on the premises; the appellant also contends that not more than seven gallons of benzine are stored on the premises at any time; that it is used only in the basement in a steel trough about one foot deep and twenty feet in length, for the purpose of removing rust from steel bars; the trough is equipped with covers held open by chains with fusible links; the ceiling over the trough for a distance of five feet on all sides is protected by sheet metal; that there are no open flames used on this story; also that the prior permits allowed more than seven gallons of benzine to be used on the premises.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the ceiling of basement story shall be fire retarded throughout according to the rules of the board of standards and appeals; that not more than one metal bath trough shall be permitted on these premises for the use of any volatile oil mixture; that the trough shall be equipped with a counter-balanced metal cover, provided with fusible link attachment; that there shall be not more than ten (10) gallons of benzine used or maintained on these premises at any time, confined to the trough; that there shall be no open flames used or operated in the basement except the existing gas radiators which shall be provided with a metal shield for the full width and height of each radiator.

791-26-A.

APPELLANT—Pennsylvania Tunnel and Terminal Railway Corporation, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—123-133 Borden avenue, L. I. City, Borough of Queens.

APPEARANCES—

For Appellant: E. J. Freedman and Merton H. Thompson.

For Administration: Inspector Maher of fire department.

## THE RESOLUTION:

(791-26-A)

WHEREAS, Pennsylvania Tunnel & Terminal Railway Corp., owner, filed, September 23, 1926, an appeal from an order of the fire commissioner, affecting premises 123-133 Borden avenue, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, (Order No. 880-F), reads:

"1. Provide two approved fire hydrants, as per Rule 37, adopted by the Board of Standards and Appeals. \* \* \* \*";

and

WHEREAS, the premises consist of several small one-story frame structures; OCCUPIED as an office and sheds for the storage of lumber, also driveways and unprotected lumber piles on a plot 375 ft. by 90 ft. and 115 ft., irregular in depth, about 36,250 sq. ft. in area; and

WHEREAS, the appellant claims that there are seven fire hydrants and two fire alarm boxes on the streets surrounding the block in which the premises under appeal are located; furthermore, that the premises have been occupied for the same purposes during the past thirteen years without a fire.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the premises shall be not increased in area; that no lumber shall be stacked in excess of 15 ft. in height; that there shall be two gangways not less than 15 ft. wide at right angle to Borden avenue, direct and connecting to the existing driveway running lengthwise on the property; that the lumber pile running parallel to Borden avenue shall be subdivided, approximately, in three parts; and that there shall be distributed throughout the yard not less than twenty (20) fire casks, painted red and equipped in accordance with the direction of the fire department.

Negative .....	0
Absent: Chief Kenlon .....	1

## THE RESOLUTION:

(847-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Estate of Helen C. Juilliard, Central Union Trust Co., trustee, owner, filed, October 18, 1926, an appeal from an order of the fire commissioner, affecting premises 462-464 Broadway and 22-24 Crosby street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 3, 1926 (Order No. 93700-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.";

and

WHEREAS, the building is non-fireproof, 6 stories (92 ft.) in height, having a frontage of 200 ft. 11 in. on Grand street and 50 ft. 2½ in. on Broadway and also on Crosby street, approximately 9,500 sq. ft. inside area; there being openings, protected on both sides by automatic, fireproof

doors on the basement, 1st and 2nd stories in the north wall of the building in question leading to the building adjoining on the north; OCCUPIED: 1st floor, salesroom, showroom and shipping, 35 persons; 2nd floor, office, 40 persons, assembling window shades, 50 persons; 3rd floor, assembling shades, 60 persons; 4th floor, manufacturing fountain pens and pencils, 40 persons; 5th floor, leather belt manufacturing, 50 persons; 6th floor, typewriter exchange, 17 persons; and

WHEREAS, appellant contends that the height of the building is only 7 ft. in excess of the height requiring standpipes; that the building is equipped with a sprinkler system (with an 11,000-gallon gravity tank 20 ft. above the roof), an interior fire alarm system and that portable fire extinguishers are distributed throughout the building.

Resolved that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be equipped throughout with an approved sprinkler system with central office connection; that horizontal exits shall be equipped with fireproof doors; and *granted* so long as the conditions as to use and occupancy shall remain substantially unchanged.

Negative .....	0
Absent: Chief Kenlon .....	1

## THE RESOLUTION:

(849-26-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Hunter Illuminated Car Sign Co., owner, filed, October 18, 1926, an appeal from an order of the fire commissioner, affecting premises 174 Linden avenue, Flushing, Borough of Queens; and

WHEREAS, the order of the fire commissioner, (Order No. 97756-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.";

and

WHEREAS, the building facing on two street fronts is non-fireproof, one and two stories (29 ft.) in height, 125 ft. by 177 ft., irregular, (approximately 16,000 sq. ft.) in area; OCCUPIED by one concern for the manufacture of illuminated signs for electric (trolley) cars: 1st story, 40 persons; 2nd story, 15 persons; and

WHEREAS, appellant contends that the business conducted on the premises is non-hazardous; that there is installed a National District watchman's time service; that the building is equipped with a sprinkler system with connection to the city main on Linden avenue, in which there is a 60 pound pressure; that there is a yard hydrant with 200 ft. of 2½ in. hose in courtyard and that there are three city fire hydrants in the immediate vicinity.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be not increased in height or area; that the premises throughout shall be equipped with an approved sprinkler system; that the existing 25 ft. side yard and 50 ft. rear yard shall be maintained unobstructed.

Connell, Holland and Guilfoyle ..... 4

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(807-26-A)

WHEREAS, Murray & Hill Co., owner, filed, October 1, 1926, an appeal from an order of the fire commissioner, affecting premises Nos. 387-405 Southern boulevard, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated November 14, 1924 (Order No. 67594-F), reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basement, cellars and roofs), placed within main stairway enclosure.";

and

WHEREAS, the premises consist of a group of fireproof buildings, interconnected by openings protected with fireproof doors; the main building being 4 stories (55 ft.) and cellar in height, 100 ft. by 100 ft. (10,000 sq. ft.) in area; a building one story and cellar in height (to the north), 73 ft. by 139 ft., irregular, (approximately 6,000 sq. ft.) in area; a one and two story boiler and engine room (at west-erly rear), 50 ft. by 45 ft., (approximately 2,000 sq. ft.) in area; and three 1 and 2 story buildings, fronting on St. Mary's street, 207 ft. 6 in. by 40 ft., irregular, (approx-imately 6,000 sq. ft.) in area; the total combined area being approximately 24,000 sq. ft.; OCCUPIED for the manu-facture of silk underwear, 20 persons per story; and

WHEREAS, appellant contends that there is a 4-inch stand-pipe system, located near the center of the main building (36 ft. from stair enclosure) with 2½ inch outlets and 100 ft. of linen hose on each story; that the system is sup-plied from a 5,800-gallon tank, located on the roof and 11 feet. above the highest outlet, and proposes to provide two siamese connections (one on each street front) to the stand-pipe system.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle ..... 4  
Negative ..... 0  
Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(1021-25-BZ)

WHEREAS, William F. Doyle, for Daniel P. Devaney, owner, filed, October 5, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline selling station; premises east side of Coney Island avenue, 315 ft. south of Avenue N, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 21, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Coney Island avenue is in a business district; that East 12th street is in a residence district, and that Avenue N is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered October 3, 1925, reads:

"1. A gasoline service station may not be permitted in a business district. Appeal may be taken to the Board of Appeals."

and

WHEREAS, the premises consist of a plot of ground, 50 ft. by 100 ft., upon which it is proposed to erect and maintain a gasoline selling station, consisting of a small building located near the center of the plot, and also gasoline tanks and pumps; and

WHEREAS, the original application was denied by the board January 12, 1926, reopened November 16, 1926, for reconsideration on the further facts: that the owner operated a gasoline service station directly opposite to the premises in question, where he was forced to vacate on account of the prohibitive increase in rent; he then purchased the premises in question under this application, erected a five-car garage, crank case service station, a store for automobile accessories, a wash stand and also installed a 550-gallon gasoline storage tank, under the supervision and approval of the bureau of buildings and the fire department; the applicant contends that this application is a request to sell gasoline to patrons; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 on the ground of practical difficulty and unnecessary hardship.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution and that the application be and it hereby is granted on condition that no pump installed shall be more than 50 ft. from the building line, and that no pumps shall be erected to the rear of the existing office accessory building; that any arc lights or electric light stanchions shall be equipped with reflectors at the rear of the light to prevent glare towards the adjoining

premises in the rear; that any permits required shall be obtained within sixty days and the work involved completed within ninety days from the date of this action.

842-26-BZ.

APPLICANT—Louis A. Sheinart, for Sadie Stein, owner.

SUBJECT—Application (re decision of tenement house commissioner) under section 21 of the building zone resolution, to permit in an "E" area and residence district the erection and maintenance of an apartment house, planned and designed under the requirements of a "C" area district.

PREMISES AFFECTED—1601 Avenue H, Brooklyn.

APPEARANCES—

For Applicant: Louis A. Sheinart.

For Opposition: Philip M. Bromberg, Alderman  
Thomas J. Cox, Joseph E. Law, August P.

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(842-26-BZ)

WHEREAS, Louis A. Sheinart, for Sadie Stern, owner, filed, October 14, 1926, an application, under the building zone resolution, to permit in an "E" area and residence use district the erection and maintenance of an apartment house, planned and designed under the requirements of a "C" area district; premises 1601 Avenue H, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 21, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the district maps accompanying the building zone resolution show that north side of Avenue H and east side of East 17th street are in an "E" area and also residence use district; south side of Avenue H and west side of East 17th street are in a "C" area and also residence use district; and

WHEREAS, the decision of the tenement house commissioner, rendered October 2, 1926 (re N. B. 957-1926), reads:

"Premises being within an "E" residence district, proposed building must conform to Section 15 Zoning Resolution. Note open areas occupied and unoccupied percentage, etc. \* \* \* \*";

and

WHEREAS, the proposed building is of non-fireproof construction, six stories in height, with a frontage of 110 ft. and a depth of 94 ft. 6 in.; to be occupied as an apartment house; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship.

Resolved, that the decision of the tenement house commissioner be and it hereby is affirmed, and that the application be and it hereby is denied.

687-26-BZ.

APPLICANT—John J. O'Connor, for Alonzo E. DeBaum, owner.

SUBJECT—Application (re decision of fire commissioner) under section 21 of the building zone resolution, to permit partly in a business district and partly in a residence district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

## THE RESOLUTION:

(811-26-BZ)

WHEREAS, George S. A. McNeil, for Ben Fooskill, owner, filed, October 5, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline selling station; premises 9100 Atlantic avenue, southwest corner of Woodhaven boulevard, Woodhaven, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 21, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Atlantic avenue, south side, west of Woodhaven boulevard, is in an unrestricted district, except property in question which is in a business district; and that Atlantic avenue, south side, east of Woodhaven boulevard, is in a residence district; that Atlantic avenue, north side, is in an unrestricted district, and that Woodhaven boulevard is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 29, 1926 (N. B. 12915-26), reads:

"1. The erection, use and occupancy of a building as a gasoline station in a business district is contrary to Article 2, Section 4, Building Zone Resolution."

and

WHEREAS, the premises consist of a plot of ground having a frontage of 100 ft. on Woodhaven boulevard and 150 ft. on Atlantic avenue, upon which is located a garage and stores; part of the plot being in the unrestricted district. On the northeast part of the plot (which portion is in a business district) it is proposed to erect a gasoline selling station; and

WHEREAS, the board deemed, on account of the surrounding unrestricted district use encompassing these premises that the applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that any pump or tank equipment erected on these premises shall be located within the building line; that there shall be no portable gasoline tanks operated outside the property lines of these premises; that all required permits shall be obtained within ninety days and all work involved completed within six months from the date of this action.

841-26-BZ.

APPLICANT—Frederick J. Flynn, for Prospect Hill Apartments, Inc., owner.

SUBJECT—Application (re decision of superintendent of buildings) under section 21 of the building zone resolution, to permit in a 1½ times height district the erection and maintenance of the street wall in excess of the height permitted by the zone resolution.

PREMISES AFFECTED—45-67 Prospect place, Manhattan.

APPEARANCES—

For Applicant: Frederick J. Flynn.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners

Connell, Holland and Guilfoyle . . . . . 4

Negative . . . . . 0

Absent: Chief Kenlon . . . . . 1

## THE RESOLUTION:

(841-26-BZ)

WHEREAS, Frederick J. Flynn, for Prospect Hill Apartments, Inc., owner, filed, October 13, 1926, an application, under the building zone resolution, to permit in a 1½ times

height district the erection and maintenance of the street wall in excess of the height permitted by the zone resolution; premises 45-67 Prospect place, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 21, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that area on the west side of a north and south line located 100 ft. west of First avenue is in a 1½ times height and also a business district; and that area on the east side of a north and south line located 100 ft. west of First avenue is in a 2 times height and also unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 11, 1926 (N. B. Applic. No. 481-1926), reads:

"1. Proposed height is excessive. Art. III of Building Zone Resolution."

and

WHEREAS, the proposed building is to be of fireproof construction, 23 stories in height, with a frontage of 200 ft. 9½ in. and a depth of 58 ft.; to be occupied as an apartment hotel; and

WHEREAS, it appears that the Prospect place front of the building extends 8 ft. into the 1½ times height district, and is the only portion affected by this application. It is proposed to erect all street walls 195 ft. 11½ in. in height without a setback, and also to erect walls to an additional height of 19 ft. over the middle front wing under the dormer provision. The zone resolution limits the street wall on Prospect place to 150 ft. in height for a distance of 150 ft. north of 42nd street and to 90 ft. in height for the rest of the distance toward 43rd street; the street walls of the remainder of the building could be erected 200 ft. in height; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the height district regulations of the building zone resolution and that the application be and it hereby is *granted* only so far as it affects the height of the street wall, without a setback, for 196 ft., *on condition* that the requirements of the building zone resolution be complied with in all other respects; that all permits necessary for the prosecution of the work shall be obtained within nine months and the work completed within eighteen months from the date of this action.

## CASES DISMISSED.

### *Appeals from Administrative Orders.*

The chairman called attention to the following cases, where notices of intention to appeal were offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative official in the performance of his duty:

(205-26-A)

Filed March 11, 1926—Premises north side of Grand street, 500 ft. north of 74th street, Elmhurst, Queens. Order of the fire commissioner. Appellant Improved Office Partition Co. Dismissed for lack of prosecution.

(284-26-A)

Filed April 5, 1926—Premises 317-329 East 153rd street, The Bronx. Order of the fire commissioner. Appellant Wilhelmina Wuensch. Dismissed for lack of prosecution.

(343-26-A)

Filed April 20, 1926—Premises 162 East 86th street, Manhattan. Order of the fire commissioner. Appellants

# MINUTES

Selbinger and Schlesinger. Dismissed for lack of prosecution.

(476-26-A)

Filed May 26, 1926—Premises 648 Broadway, Manhattan. Order of the fire commissioner. Appellant Abraham Mutnick. Dismissed for lack of prosecution.

(482-26-A)

Filed May 27, 1926—Premises 213 West 53rd street, Manhattan. Order of the fire commissioner. Appellant Benjamin F. Thomas. Dismissed for lack of prosecution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

WHEREAS, the foregoing appellants have filed with the board of standards and appeals appeals from orders affecting the premises in question; and

WHEREAS, the appellants have failed to complete their papers, though duly notified to do so.

Resolved, that the foregoing appeals be and they hereby are dismissed for lack of prosecution.

### *Under the Building Zone Resolution.*

The chairman called attention to the following cases, where notices of intention to appeal were offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative official in the performance of his duty:

(323-26-BZ)

Filed April 15, 1926—Premises 626-630 Pacific street, Brooklyn. Decision of superintendent of buildings. Applicants James W. Byrnes and George Alexander, Jr. Dismissed for lack of prosecution.

(354-26-BZ)

Filed April 22, 1926—Premises 742 Fifth avenue, Manhattan. Decision of superintendent of buildings. Applicant

Fifty-seventh Street and Fifth Avenue Corp. Dismissed for lack of prosecution.

(366-26-BZ)

Filed April 26, 1926—Premises south side of North street, 15 ft. east of Davidson avenue, The Bronx. Decision of superintendent of buildings. Applicant Thomas Dunn. Dismissed for lack of prosecution.

(509-26-BZ)

Filed June 3, 1926—Premises northwest corner of Northern boulevard and 227th street, Bayside, Queens. Decision of superintendent of buildings. Applicant George W. Godfrey. Dismissed for lack of prosecution.

(561-26-BZ)

Filed June 21, 1926—Premises 437-453 Prospect avenue, Brooklyn. Decision of superintendent of buildings. Applicants Seelig & Finklestein. Dismissed for lack of prosecution.

(566-26-BZ)

Filed June 22, 1926—Premises 10766 Woodhaven boulevard, Ozone Park, Queens. Decision of the fire commissioner. Applicant Walter C. Adler. Dismissed for lack of prosecution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

WHEREAS, the foregoing applicants have filed with the board of standards and appeals applications under the building zone resolution affecting the premises in question; and

WHEREAS, the applicants have failed to complete their papers, though duly notified to do so.

Resolved, that the applications be and they hereby are dismissed for lack of prosecution.

Adjourned 3.35 p. m.

WILLIAM J. O'GORMAN, *Secretary.*

THE RESOLUTION:

(47-26-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Vanity Fair Building, Inc., lessee, filed, January 19, 1926, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 3 East 38th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 14, 1925 (Order No. 77162-LD), reads:

"1. Provide an additional means of exit from the cellar and 1st story, said exit to be located at the rear of the building in accordance with the provisions of Section 271 of the Labor Law.

"2. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law. SEE NOTE.

"NOTE: Among the defects noted on this fire escape are the following:

"No safe passageway to the street from the termination.

"Windows on course not automatic, self-closing. Does not extend to ground. No stairway from lowest balcony to ground.

"3. Enclose the interior stairway at the centre of building serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the 1st story to 3' above the roof, constructed as per Section 271 of the Labor Law. SEE NOTE.

"NOTE: Among the defects noted on this enclosure are as follows:

"No fireproof base at 1st story.

"Doors leading to stairway enclosure on 2nd story have wire glass two panels each 15" x 72";

and

WHEREAS, the building is non-fireproof, 6 stories and basement in height, 25 ft. by 94 ft. 9 in. in area at 1st, 2nd and 3rd stories, and 25 ft. by 89 ft. 9 in. in area above; OCCUPIED: basement, kitchen, 12 persons; 1st story, stores, 4 persons, tea room, 6 persons; 2nd floor (front), beauty parlor, 6 persons, (rear), tea room, 4 persons; 3rd floor (front), millinery, 4 persons, (rear), vacant at present; 4th floor (front), millinery, 15 persons, (rear), vacant at present; 5th floor (front), millinery, 3 persons, (rear), dressmaking, 7 persons; 6th floor, vacant at present; EXITS: an interior wooden stairway, extending from the 1st story to roof, enclosed in wire lath and  $\frac{3}{4}$  in. Portland cement partitions with fireproof, self-closing doors at openings (excepting two glass-paneled doors opening from the stair enclosure to a balcony on the 2nd story); a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the 2nd story balcony, with EGRESS from the fire escape by means of a connecting iron stairway at the 3rd story leading to the extension roof of the building at the rear; ROOFS of adjoining buildings: to east, 6 stories higher; to west, 12 ft. lower; and

WHEREAS, petitioner proposes, as to item 1 to provide doors at the rear of the basement and the 1st story, leading to a proposed 60-degree stairway, extending from the basement to the 2nd story fire escape balcony; as to item 2, requests the acceptance of the proposed 60-degree iron stairway as a substantial compliance with this item of the order; as to item 3, requests the acceptance of the existing No. 26 gauge wire lath and  $\frac{3}{4}$  in. Portland cement mortar ceiling of the basement in lieu of the fireproof base at 1st story and contends that the 15 in. by 72 in. wire glass panels in the doors at the 2nd story are subdivided by ornamental metal strips into lights  $3\frac{1}{2}$  in. by  $6\frac{3}{4}$  in.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted as to Order No. 77162-LD, item 1, on condition that a doorway shall be provided at the rear basement and first story to balcony fire escapes, and granted as to item 2, on condition that a 60-degree connecting stairs to balcony fire escapes shall be provided from the basement to the roof of the adjoining 2nd story extension at the rear with egress therefrom through plain glass windows through said premises to the street; and granted as to item 3, on condition that the ceiling of the cellar under the stairhall shall be fire retarded in accordance with the rules of the board of standards and appeals; and granted as to the doorway on 2nd story leading to the stairhall only so far as the panels of wire glass not exceeding 15 in. by 72 in. in area are concerned, on condition that the doorway otherwise shall comply with the requirements of the labor law; and that the factory occupancy throughout the premises shall not exceed 25 per cent of the area of the building and maintained in accordance with the certificate of occupancy now in force.

79-26-S.

PETITIONER—Croker National Fire Prevention Engineering Co., for S. E. Howard's Son & Co., owner.

SUBJECT—Variation of the labor law as cited in order of fire commissioner.

PREMISES AFFECTED—507-13 Kent avenue and 17-19 Rush street, Brooklyn.

## THE RESOLUTION:

(79-26-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for S. E. Howard's Son & Co., owner, filed, January 28, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner affecting premises Nos. 507-513 Kent avenue and Nos. 17-19 Rush street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated November 28, 1925 (Order No. 87449-LD), reads:

"1. Arrange the fire escape on the rear of the three story section of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law. SEE NOTE.

"Among the defects noted on this fire escape are the following:

"Windows on course not fireproof nor self-closing.

"No stairway from top balcony to roof. No stairway from lowest balcony to ground. No safe passageway to the street from the termination.

"2. Arrange the fire escape on the northwest corner of the 5 story section of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law. SEE NOTE.

"Among the defects noted on this fire escape are the following:

"Windows opening on course on 5th story not fireproof nor self-closing. No stairway from lowest balcony to ground. No safe passageway to the street from the lowest termination. Windows on course not self-closing."

and

WHEREAS, the premises consist of a group of non-fireproof buildings: the building on Rush street being five stories and basement in height, 56 ft. by 125 ft. (irregular) in area; the buildings on Kent avenue being one and three stories in height, 100 ft. by 100 ft. in area; (the 3-story section being 25 ft. by 75 ft. in area on the 1st and 2nd story and 25 ft. by 50 ft. in area at 3rd story); there being, also, a basement extension (boiler room) to the Rush street building, 31 ft. by 80 ft. (irregular) in area; the building on the Rush street front and on the Kent avenue front being interconnected on the 1st story by openings protected by fire doors; OCCUPIED by one concern for the manufacture of brushes; Kent avenue building: 1st story, 16 persons; 2nd story, 2 persons; 3rd story, 8 persons; Rush street building: basement, 2 persons; 1st story, 12 persons; 2nd story, 8 persons; 3rd story, 19 persons; 4th story, 23 persons; 5th story, storage, no occupancy. The Rush street building EQUIPPED with a sprinkler system; EXITS: Rush street building: an interior fireproof stairway, extending from the 1st to top story; enclosed in fireproof partitions with fireproof doors at openings; a fire escape on the northwest corner of building, having fireproof openings (excepting on the 5th story) along the course thereof, extending from the main roof to the roof of the basement extension (boiler room). Kent avenue building: an interior wooden stairway extending from the 1st to top story, enclosed in wood partitions with wood doors at openings; a substandard fire escape on the easterly rear extending from the 2nd story extension roof of the 3-story section to the roof of the one-story extension; and

WHEREAS, petitioner, as to item 1, proposes to provide a 60-degree fire escape, having fireproof windows along the course thereof, on the front of the 3-story section of the buildings on Kent avenue, extending from the 3rd story to the 2nd story balcony, with counter-balanced stair to street; as to item 2, proposes to extend (to the south) the 2nd story balcony of the existing fire escape and to provide a ladder leading to the roof of the one-story section of the buildings facing on Kent avenue; EGRESS from this roof by means of the proposed fire escape on the front of the 3-story section of buildings on Kent avenue.

Resolved, that the board of standards and appeals does

hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted as to Order No. 87449-LD, item 1, on condition that a fire escape as shown on plans filed shall be erected on the Kent avenue front extended to the roof of the two-story building adjoining to the east, with counter-balanced stairs; and granted as to item 2, on condition that the existing balcony at the 2nd story level shall be extended to the roof of the building to the south with iron stairs from the balcony to the roof level of the said building, with egress across the roof of the one-story building connecting with the balcony fire escape on the Kent avenue front; and granted only so long as conditions as to use and occupancy remain unchanged.

## THE RESOLUTION:

(279-26-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Empire Steel Partition Co., owner, filed, April 3, 1926, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises southeast corner of Third avenue and 11th street, College Point, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated March 30, 1926 (Order No. 77606-LD), reads:

"1. Provide an additional means of exit from the cellar, said exit to be located at the east end of the building in accordance with the provisions of Rule 3 and 4, Board of Standards and Appeals, adopted July 29, 1924.

"2. Enclose the interior stairway at east and in partitions of fire-resisting material from floor of 1st story to the underside of the second story, including any exposed soffits, landings and passageways, openings shall be provided with approved self-closing fire doors as per rule 4, Board of Standards and Appeals, adopted July 29, 1924.

"3. Enclose the interior stairway on the north side in partitions of fire resisting material from floor of cellar to the underside of the second story, including any exposed soffits, landings and passageways; openings shall be provided with approved self-closing fire doors as per rule 2 and 4, Board of Standards and Appeals, adopted July 29, 1924."

and

WHEREAS, the building is of frame construction, 2 stories and basement in height, 38 ft. by 90 ft. in area; OCCUPIED for the manufacture of steel partitions: basement, rolling department, 4 persons; 1st story, assembling, 15 persons; 2nd story, office and painting, 15 persons; EXITS: two interior wooden stairways, the westerly stairway extending from the basement and the easterly stairway extending from 1st story, both to 2nd story; enclosed in wooden partitions with a wooden door at 1st story opening of easterly stairway, otherwise stairways open; no adjoining building; and

# MINUTES

WHEREAS, the petitioner contends, as to item 1 of the order: that there are now two means of egress from the basement, by an interior stairway leading to 1st story and also an exit door leading to the street; as to items 2 and 3 of the order, the petitioner claims that prior permits permitted about 50 gallons of benzine to be stored in the basement, which is evidently responsible for the issuance of such orders; furthermore, the petitioner contends that the easterly stairway is now enclosed in wood partitions at 1st story and not more than 7 gallons of benzine are stored on the premises at any time.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* as to Order No. 77606-LD, item 1, *on condition* that the southerly window on the first story front shall be cut down and equipped with a door; and *denied* as to items 2 and 3.

THE RESOLUTION:

(871-26-S)

WHEREAS, Samuel Rosenblum, for Dorf Realty Co., owner, filed, October 26, 1926, a petition for a variation of the labor law, as cited in order of the fire commissioner, affecting premises 55 West 45th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 28, 1926, reads:

"Order No. 76188-LD:

"1. Arrange the fire escape on the north side of building and the openings leading thereto and the windows opening on the course thereof, so that same are in compliance with the provisions of Sec. 273 and 274 of the Labor Law.

"Among the defects noted on this fire escape are the following:

"No stairway from lowest balcony to ground.

"No safe egress to street from the termination.

"No 45 degree stairways connecting balconies.

"No openings to balconies 2 ft. by 6 ft. provided.

"Order issued for the reason that conditions have changed since modification of Section 271 and 274.

\* \* \* \*

"Adjoining buildings have been altered and reconstructed, thereby cutting off means of egress to street from termination.";

and

WHEREAS, the building is non-fireproof, 7 stories in height, 18 ft. 9 in. by 97 ft. 5 in. in area at 1st story and 18 ft. 9 in. by 90 ft. in area; OCCUPIED: 1st floor, furrier store, 6 persons; 2nd floor, furriers, 25 persons; 3rd floor, manufacturing of dresses, 5 persons; 4th floor, tailoring, 11 persons; 5th floor, embroideries, 12 persons; 6th floor, manufacture of feather trimmings for hats, 18 persons; 7th floor, manufacturing of novelty dolls, 11 persons. (82 persons above the 1st story); EQUIPPED with a fire alarm signal system; EXITS: an interior wooden

stairway, extending from the 1st story to roof; enclosed in fire retarded partitions with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the 1st story balcony, with EGRESS from the termination of the fire escape by means of a proposed iron stairs leading to the extension roof of the building to the west, where additional exit may be had to a fire escape on rear of No. 56 West 46th street; ROOFS of adjoining buildings: to east, 4 stories higher; to west, 2 stories higher; and

WHEREAS, petitioner contends that since the board modified similar orders under Cal. No. 1279-17-S, the then accepted means of egress to the east from the termination of the fire escape has been cut off by the erection of a new building and requests the acceptance of the proposed means of egress from the termination of the fire escape; petitioner contends, further, that the occupancy of the premises varies from that at the time of the prior consideration of this case and requests that number of persons per story be limited to the capacity of the interior stairway alone.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* so far as the egress from the termination of the fire escape is concerned, *on condition* that the fire escape to the rear of the building shall be provided throughout with connecting stairs not more than 60 degrees, and that a balcony shall be provided at the easterly end of the 2nd story and a balcony at the westerly side of the 1st story connected with a 45-degree stairway and to the roof of the adjoining hotel premises to the west, with egress therefrom off the roof through windows of the hotel and to the 45-degree stairway of the premises No. 56 West 46th street; and *on further condition* that all openings on fire escape shall be fireproof, self-closing.

THE RESOLUTION:

(782-26-S)

WHEREAS, Raffaele Caruso, for Raffaele Caruso and Marianna Caruso, owners, filed, September 21, 1926, a petition for variation from the requirements of the labor law, as cited in a notice of the health department, affecting premises No. 87 Roebling street, Borough of Brooklyn; and

WHEREAS, the notice of the health department, dated July 13 1926, reads:

"At a meeting of the Board of Health of the Department of Health of the City of New York held July 13th, 1926, your application for a Sanitary Certificate for a Cellar Bakery at 87 Roebling Street, in the Borough of Brooklyn, was denied.";

and

WHEREAS, the building is non-fireproof, 4 stories in height, 25 ft. by 40 ft. in area; OCCUPIED: 1st story, bakery store; 2nd, 3rd and 4th stories, one family on each story; and

WHEREAS, the petitioner has filed plans showing a bakery in the cellar: 10 ft. in height from floor to ceiling; the ceiling 1 ft. 2 in. above curb level: a bake oven under the sidewalk at front; a window (2 ft. 8 in. by 5 ft. 8 in.) opening to rear area, the floor of which is level with the bakery floor, and provided with iron grating at the top; a

# MINUTES

pivot sash window 1 ft. by 4 ft. 2 in. over the bake oven opening to the street; also a window opening to a small front area, with a perforated iron cover at the top; and

WHEREAS, the petitioner contends that a sanitary certificate has been issued during the past 8 years; that the bakery in cellar is in a good sanitary condition and would have been permitted if the owner had made timely application; that the present owner purchased the building because of the presence of the bakery and expended a great deal of money.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that a double-hung window not less than 2 ft. 8 in. by 5 ft. 8 in. shall be provided in the rear of the cellar opening to the area at rear of the building, and a window shall be provided at the front of the building not less than 1 ft. by 4 ft. 2 in., with divided sash.

THE RESOLUTION:

(808-26-S)

WHEREAS, John J. Gilmartin, for B. Peter Cerussi, owner, filed, October 1, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 655 East Fordham road, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated December 30, 1925 (Order No. 89063-LD), reads:

"Item 2. Provide approved self-closing fire doors at least 44" in width at openings leading to stairway enclosure at center of building and at north side opening outwardly so as not to obstruct the stairway as per section 270 of the Labor Law and Rule 502 of the Industrial Code."

and

WHEREAS, the building is fireproof, 5 stories in height, 51 ft. by 135 ft. 9 in. in area; OCCUPIED for manufacturing and storage (storage being metal frames and lamp stands), 50 persons per story; EXITS: two interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof, self-closing doors at openings; there being two doors, 36 in. wide and 42 in. wide, respectively, leading to the stairway enclosure at the center of the building and a door 36 in. wide leading to the stairway enclosure at north side of the building; and

WHEREAS, petitioner, in view of the three doors leading to the stair enclosure, requests the acceptance of the existing conditions as to the required width of doors.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted* only so far as it affects the width of the doorways to the stairs, *on condition* that the stairhall otherwise shall comply with the requirements of the labor law, and that any opening to stairhall in the center and at north end shall be not less than 3 ft. in width; and that an additional doorway to the

stairs at the center shall be provided on the 4th and 5th stories not less than 42 in. in width; and the building shall be maintained in accordance with the certificate of occupancy now in force.

THE RESOLUTION:

(829-26-S)

WHEREAS, Jack Feurer, owner, filed, October 11, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises Nos. 3652-3656 Park avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated September 21, 1926 (Order No. 1090-LD), reads:

"1. Rearrange the fire escape on the south side of building to conform to Section 273 of the Labor Law and Rule 3, Board of Standards and Appeals, adopted July 29, 1924.

"Among the defects noted are the following:

- "1. Balcony not 4' wide.
- "2. No gooseneck ladder to roof.
- "3. Windows on course not fireproof, self-closing.
- "4. No stairway to ground.
- "5. No door leading to balcony."

and

WHEREAS, the building is non-fireproof, 2 stories in height, 46 ft. by 45 ft. in area at 1st story and 30 ft. by 45 ft. in area above; OCCUPIED for the manufacture of embroidery: 1st story, 8 persons; 2nd story, 6 persons; EXITS: an open interior wooden stairway, extending from the 1st story to 2nd story; a fire escape balcony on the south side of the building at 2nd story, having non-fireproof openings to the 2nd story balcony, with a gooseneck ladder leading to the roof; no adjoining buildings; and

WHEREAS, the petitioner proposes to construct an iron stairway 22 in. in width from the 2nd story fire escape balcony to the ground; furthermore, the petitioner contends that in addition to the two exit windows leading to the 2nd story fire escape balcony there are five exit windows on the north side of 2nd story leading to the roof of the 1st story extension.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted on condition* that a balcony fire escape shall be provided on the second story in the southerly gabled walls, embracing not less than 2 windows with a fixed 45-degree stairway not less than 22 in. wide from the balcony to the street level at the front of the building, with a gooseneck ladder from the balcony to the roof; and *granted* only so long as the present occupancy and use remain unchanged.

## THE RESOLUTION:

(832-26-S)

WHEREAS, George Provot, for Bullock Holding Corp., owner, filed, October 1, 1926, a petition for a variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 356-358 West 40th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 23, 1926 (Order No. 1154-LD), reads:

"1. Remove the substandard fire escape on the rear of the building or construct same as per 274 of the Labor Law and rule 3, Board of Standards and Appeals, adopted May 9th, 1924.

"Among the defects noted are the following:

"1. Windows on course not fireproof, self-closing.

"2. No stairs to roof.

"3. No drop ladder in guides from lowest balcony to ground.

"2. Provide an outside iron balcony fire escape on the front of the building with balconies 4' in width connected by stairways not less than 22" wide placed at an incline of not more than 45° extending from the ground to the highest story, constructed as per Section 273 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with Section 271 of the Labor Law.

"3. Enclose the interior stairway serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the cellar to 3 feet above the roof, constructed as per Section 271 of the Labor Law or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law."

and

WHEREAS, the building is non-fireproof, 6 stories in height, 38 ft. 2½ in. by 50 ft. in area; OCCUPIED: cellar, boiler room and storage of metal, 1 person; 1st story, office and showrooms; 2nd, 3rd, 5th and 6th stories, metal manufacture; 4th story, printing; 10 persons on each story; EXITS: an interior wooden stairway, extending from the 1st story to top story; enclosed in non-fireproof partitions at 1st and 2nd stories, in wood partitions at 3rd, 4th and 5th stories, and in 2 in. cement partitions at 6th story with wooden doors at openings; a double-rung iron ladder from top story to roof; substandard fire escape on the rear of the building, having non-fireproof openings along the course thereof, extending from the top story to the 1st story, with no legal means of egress from the termination of the same; ROOFS of adjoining buildings: 35 ft. lower at east and west; 20 ft. lower at south; and

WHEREAS, the petitioner proposes, as to item 1 of fire department order, to reconstruct the rear fire escapes so as to meet all requirements of a standard fire escape except as to egress at foot, which will be provided through gate in fence to adjoining yard at south, thence through cellar of adjoining building at south to the street; as to item 3 of fire department order, the petitioner proposes to cover the hall side of stairhall partitions with wire lath and cement plaster, and provide fireproof doors at all openings; furthermore, the petitioner contends that due to the small area and occupancy of the building the exits will then be adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor

law, and that the petition be and it hereby is *granted* as to Order No. 1154-LD, item 1, only so far as it affects the windows on the course of the fire escapes from the 1st story to roof, *on condition* that a gooseneck ladder shall be provided from the top balcony to the roof and a drop ladder in guides from the lowest balcony to the yard in the rear; and *denied* as to items 2 and 3.

## THE RESOLUTION:

(786-26-S)

WHEREAS, Sugarman & Berger, for Furland Co., Inc., owner, filed, September 23, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises Nos. 144-154 West 30th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated June 18, 1926 (N. B. 10-1926), reads:

"25. All windows must comply with Section 264-7 of Labor Law."

and

WHEREAS, the building is fireproof, 20 stories in height, 137 ft. 11 in. by 98 ft. 9 in. in area at 1st story; OCCUPIED: 1st story, stores, 120 persons; mezzanine story, offices, 60 persons; upper floors, manufacturing, 112 persons on each story; EQUIPPED with a sprinkler system; EXITS: an interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; also a fire tower; and

WHEREAS, the petitioner proposes to install large plate glass windows on front of the building, the maximum size glass to be used at 1st story, 10 ft. 6 in. by 7 ft. 9 in.; at 2nd story, 8 ft. 6 in. by 6 ft. 6 in., and at 3rd story, 6 ft. 6 in. by 7 ft. in area; the petitioner contends that the windows under this petition are to be used as show windows, that all other windows will comply with the labor law; and

WHEREAS, this petition was dismissed November 30, 1926, for lack of prosecution and petitioner requested a reopening of the case.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition only so far as it affects the windows on the street front of the three lower stories be and it hereby is *granted on condition* that all openings shall be equipped with approved metal frames, glazed with ¼ in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

## THE RESOLUTION:

(189-26-S)

WHEREAS, William I. Hohausser, Inc., for 315 Seventh Avenue Corporation, owner, filed, March 5, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 315 Seventh avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered February 18, 1926 (N. B. Application No. 776-1926), reads:

"9. All windows must comply with Section 264 of the Labor Law and Rule 503 of the Industrial Code."; and

WHEREAS, the proposed building is fireproof, 21 stories in height, 78 ft. 1½ in. by 56 ft. 11½ in. in area; OCCUPIED as a tenant factory, about 30 persons on each story; and

WHEREAS, the petitioner proposes to install plate glass windows in fireproof frames on both street fronts, the maximum size glass at 2nd, 3rd and 4th stories to be 5 ft. by 6 ft., at 1st story to be 9 ft. 6 in. by 10 ft. in area; and

WHEREAS, the petitioner contends that the windows on the first four floors will be show windows; that the rental value of these floors would be affected if compelled to cut up the windows into small lights; and

WHEREAS, this petition was granted by the board at its meeting, June 8, 1926, on certain conditions and petitioner requested a modification of these conditions as to windows below the belt course.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the windows on the street front below the 4th story belt course, on condition that the openings shall be equipped with approved metal frames and sashes, glazed with ¼ in. polished plate glass, and that the labor law requirements be complied with in all other respects.

## THE RESOLUTION:

(674-26-S)

WHEREAS, Shampan & Shampan, for Realty Construction Corp., owner, filed, July 31, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 150-154 West 28th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered July 23, 1926 (N. B. Applic. No. 227-1926), reads:

"10. All windows should comply with Section 264 of Labor Law and Rule 503 of Industrial Code."; and

WHEREAS, the building is fireproof, 18 stories in height, 76 ft. by 98 ft. in area at 1st story and 76 ft. by 88 ft. in area above; OCCUPIED: 1st story, stores; upper stories, tenant factories, 56 persons per story; EQUIPPED with a sprinkler system; EXITS: two interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings on the 1st, 2nd and 3rd stories in the street walls of the building, glazed with ¼ in. thick plate glass; the maximum area of the glass on the 1st story being 5 ft. 4 in. by 6 ft., and on the 2nd and 3rd stories being 7 ft. by 6 ft. 8 in.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the three lower stories and contends, further, that all windows above the 3rd story will comply with the labor law excepting as to the omission of self-closing devices on the street front windows below the 13th story of the building; and

WHEREAS, this petition was dismissed for lack of prosecution, reopened and granted by the board November 9, 1926, under certain conditions; and

WHEREAS, the petitioner has made a written request for a reopening and modification of the resolution, so as to permit the show windows to be constructed similar to those permitted under the resolution adopted by the board October 5, 1926, in acting on Cal. No. 563-26-S, affecting the adjoining building, having the same architectural design and under the same ownership as the premises in question.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition only so far as it affects the windows on the street front of the three lower stories be and it hereby is granted on condition that all openings shall be equipped with approved metal frames, glazed with ¼ in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

## APPLIANCES SUBMITTED FOR APPROVAL.

890-26-SA.

PETITIONER—United States Gypsum Company.

SUBJECT—Pyrolithic Floor and Ceiling Construction, approval of.

## APPEARANCES—

For Petitioner: R. P. Miller.

ACTION OF BOARD—Laid over to January 18, 1927, at 2 p. m., on request of petitioner.

340-25-SA.

PETITIONER—Walter Pfaendler, for McCann-Harrison Corporation.

SUBJECT—Approval of McCann-Harrison Low Pressure Oil Burner.

## APPEARANCES—None.

ACTION OF BOARD—Petition withdrawn.

## THE VOTE TO WITHDRAW—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin .....	5
Negative .....	0
Absent .....	0

379-24-SA.

PETITIONER—Economy Heater Co., owner.

SUBJECT—Approval of Economy Sure Heat Automatic Oil Burner.

## APPEARANCES—None.

ACTION OF BOARD—Petition withdrawn.

## THE VOTE TO WITHDRAW—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and  
Deputy Chief Martin ..... 5  
Negative ..... 0  
Absent ..... 0

## CASES DISMISSED.

### *Variations of the Labor Law.*

The chairman called attention to the following cases, where notices of intention to petition were offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative official in the performance of his duty:

(341-26-S)

Filed April 19, 1926—Premises 181 Troutman street, Brooklyn. Order of the fire commissioner, labor law. Petitioner Charles P. Cannella. Dismissed for lack of prosecution.

(402-26-S)

Filed May 8, 1926—Premises 45-47 West 57th street, Manhattan. Order of the fire commissioner, labor law. Petitioner Samuel Lessin. Dismissed for lack of prosecution.

(558-26-S)

Filed June 18, 1926—Premises 2048 LaFontaine avenue, The Bronx. Decision of superintendent of buildings, labor law. Petitioner Charles S. Clark. Dismissed for lack of prosecution.

## THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and Deputy  
Chief Martin ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

WHEREAS, the foregoing petitioners have filed with the board of standards and appeals petitions for variation of the labor law, affecting the premises in question; and

WHEREAS, the petitioners have failed to complete their papers, though duly notified to do so.

*Resolved*, that the foregoing petitions be and they hereby are dismissed for lack of prosecution.

### *Appliances Submitted for Approval.*

The chairman called attention to the following cases, where notices of intention to petition for approval were offered for filing; but where, despite notices from this office, papers have not been completed:

(357-22-SA)

Filed March 9, 1922—Approval of Quinn Acme Crude Oil Burner. Petitioner John C. Quinn. Dismissed for lack of prosecution.

(392-22-SA)

Filed March 16, 1922—Approval of Surface Combustion Low Pressure Type Combination Gas and Oil Burner. Petitioner The Surface Combustion Co. Dismissed for lack of prosecution.

(1104-22-SA)

Filed September 9, 1922—Approval of Dean Fuel Oil Pump. Petitioner Dean Brothers. Dismissed for lack of prosecution.

(960-23-SA)

Filed July 31, 1923—Approval of Crescent Combustion Fuel Oil Burner. Petitioner Crescent Fuel Co., Inc. Dismissed for lack of prosecution.

(1415-23-SA)

Filed December 3, 1923—Approval of Enco Mechanical Atomizer Fuel Oil Burner. Petitioner The Engineer Co. Dismissed for lack of prosecution.

(365-24-SA)

Filed March 10, 1924—Approval of Koaless Oil Burner. Petitioner Duplex Manufacturing Co. Dismissed for lack of prosecution.

(536-24-SA)

Filed April 15, 1924—Approval of Climax Oil Burner. Petitioner The Heating and Combustion Service Co. Dismissed for lack of prosecution.

(702-24-SA)

Filed May 19, 1924—Approval of Simplex Mechanical Oil Burner. Petitioner Simplex Fuel Oil Engineering Co., Inc. Dismissed for lack of prosecution.

(826-24-SA)

Filed June 19, 1924—Approval of the Heymsfield Low Pressure Burner. Petitioner Herbert R. Heymsfield. Dismissed for lack of prosecution.

(1337-24-SA)

Filed November 12, 1924—Approval of Sure Heat Gravity Oil Burner. Petitioner Sure Heat Gravity Oil Burner Co. Dismissed for lack of prosecution.

(1372-24-SA)

Filed November 20, 1924—Approval of Adga High Pressure Burner. Petitioner Adga Engineering Corp. Dismissed for lack of prosecution.

(729-25-SA)

Filed July 10, 1925—Approval of Hauck Venturi Low Pressure Oil Burner. Petitioner Hauck Manufacturing Co. Dismissed for lack of prosecution.

(1345-25-SA)

Filed December 29, 1925—Approval of Safe Fire Oil Burner. Petitioner Safe Fire Heating Co. Dismissed for lack of prosecution.

(249-26-SA)

Filed March 23, 1926—Approval of Peerless Rotary Oil Burner. Petitioner Keystone Oil Burner Co. Dismissed for lack of prosecution.

## THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and Deputy  
Chief Martin ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

WHEREAS, the foregoing petitioners have filed with the board of standards and appeals petitions for approval of the appliances in question; and

WHEREAS, the petitioners have failed to complete their papers, though duly notified to do so.

*Resolved*, that the foregoing petitions be and they hereby are dismissed for lack of prosecution.

Adjourned 5.20 p. m.

WILLIAM J. O'GORMAN, Secretary.

# RULES

## FIRE RETARDING RULES

Adopted by the Board of Standards and Appeals August 30, 1917; Amended November 1, 1917, and Feb. 3, 1922.

**Rule 1. Fire Retarding Materials for Garages, Motor Vehicle Repair Shops and Oil Selling Stations.** In garages, motor vehicle repair shops and oil selling stations any material or form of construction shall be deemed fire-retarding within the meaning of §73, subdivision 3, of the building code, that resists the action of flame and heat when subjected to a continuous fire for one hour at an average temperature of seventeen hundred (1700) degrees Fahrenheit without the passage of flame, and with a maximum temperature rise to four hundred (400) degrees Fahrenheit on the side away from the fire. The point at which the temperature of transmitted heat is measured shall be protected from external air and weather conditions.

When the test specimen is in the form of partition construction, the area under test shall be not less than one hundred (100) square feet and least dimension shall be not less than nine (9) feet. When in the form of floor construction, the area under test shall be not less than two hundred (200) square feet and the least dimension shall be not less than fourteen (14) feet.

During the fire, the floor construction shall support the live load for which it is designed, and after the fire shall safely sustain twice the designed live load with a maximum deflection of not more than one two-hundredth (1/200) part of the span.

**Rule 2. Wood Joisted Floor Construction.** Wood joisted floor construction shall be accepted as fire-retarding construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations when the beams are protected on the upper and under sides with the fire-retarding materials specified in rules for floor and ceiling coverings.

**Rule 3. Floor Covering.** Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the upper sides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) Seven-eighths ( $\frac{7}{8}$ ) inch wood underflooring protected with a membrane of two-ply waterproofing covered with not less than two and one-half ( $2\frac{1}{2}$ ) inches of 1:2½:5 concrete or better, reinforced with not less than one-fourth ( $\frac{1}{4}$ ) of one (1) per cent of steel mesh.

(b) Two and one-half ( $2\frac{1}{2}$ ) inches of 1:2:4 concrete applied directly to the top of the joists, with or without temporary support, reinforced with not less than one-fourth of one per cent steel rods, mesh or steel lath, and having the tops of the joists coated with approved waterproof paint or protected by tar paper on the top and on the sides for a distance of three inches from the top. (Amendment, Nov. 1, 1917.)

**Rule 4. Ceiling Covering.** Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the undersides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) One-half ( $\frac{1}{2}$ ) inch plaster boards, or three-eighths ( $\frac{3}{8}$ ) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers;

(b) Two thicknesses of one-quarter ( $\frac{1}{4}$ ) inch asbestos board laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring

strips when the floor beams are more than sixteen (16) inches on centers.

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $\frac{3}{4}$ ) inch thick.

**Rule 5. Attachment to Ceiling.** Fire-retarding ceilings in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations shall be attached to wood floor beams and girders in such manner as to maintain an air space between the wood beams, and all wood beams shall be seasoned before applying the protective coat.

**Rule 6. Openings in Fire-Retarding Floors.** Pipes or conduits which pass through floors shall be fitted with metal thimbles and made watertight for a height of three (3) inches above the floor.

**Rule 7. Columns.** All structural posts and columns in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials accepted in fireproof construction; except that an air space shall not be required around steel or cast iron columns.

Where necessary for protection against mechanical injury, the fire-retarding protection on columns shall be jacketed to a height of five (5) feet from the ground with No. 4 U. S. gauge metal.

**Rule 8. Girders.** All girders in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials acceptable in fireproof construction; except that an air space need not be provided around steel girders.

**Rule 9. Shaft Enclosures.** Existing stairways and vertical shafts in non-fireproof business buildings hereafter converted to be used as garages, motor vehicle repair shops or oil selling stations shall be enclosed in fire-retarding partitions continued through the non-fireproof floor construction, and when unfilled wood stud partitions are used, the space between the floor beams shall be fire-stopped with incombustible materials. All openings in such partitions shall be protected with accepted metal-covered fire doors or windows. Wherever necessary for protection against mechanical injury, the partition shall be jacketed to a height of five (5) feet on the garage side with No. 4 U. S. gauge metal. Any one of the following forms of partitions shall be accepted for the enclosure:

(a) Two by four inch wood studs, spaced not more than sixteen (16) inches on centers, covered both sides with metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $\frac{3}{4}$ ) of an inch thick;

(b) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $\frac{7}{8}$ ) inch wood sheathing, one-half ( $\frac{1}{2}$ ) inch plaster boards with pointed joints and No. 26 U. S. gauge sheet metal with one-inch lapped seams;

(c) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $\frac{7}{8}$ ) inch wood sheathing, two thicknesses of one-quarter ( $\frac{1}{4}$ ) inch asbestos boards laid with tight staggered joints and jacketed with No. 16 U. S. gauge metal on the garage side to a height of five (5) feet.

(d) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, filled in solidly between the studs with four inches of approved fireproof materials and covered on both sides with No. 26 U. S. gauge metal;

(e) Existing wood stud, lath and plaster partitions covered on the garage side with No. 26 U. S. gauge sheet metal with one-inch lapped seams.

---

## RULES

---

### COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS.

*Amended Resolution Adopted by the Board of Appeals, March 16, 1920, Under Cal. No. 549-17-BZ.*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed

under the building zone resolution in the absence of any definition therein to the contrary.

*Resolved*, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

---

## CONCRETE RULES

---

### USE OF HYDRATED LIME IN CONCRETE.

Adopted by the Board of Standards and Appeals, April 19, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated for each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

---

## FORMS FOR NOTICES TO PROPERTY OWNERS

---

If applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such forms are not to be supplied by this office.

The applicant is entitled only to one copy of Form 13A, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the

hearing can be entertained in view of this publication and of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth*, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.
